

Product pictured is not the exact style of the product studied in this document.

Sans™ Light

Product Environment Profile is an environmental declaration according to the objectives of ISO 14021. Precise, accurate, verifiable and relevant information on the sustainability attributes of Sans Light.

Featuring the core design of the original Sans, Sans Light is designed with streamlined edges and a thinner profile of 0.25” about half the depth as Sans. With the ability to configure both vertically or horizontally, the compact structure of Sans Light sits closer to the wall, creating an equally simple, yet more subtle installation.

The model chosen for analysis from the Sans Light range is reference #SANS.

Final Assembly Location

Final assembly of Sans Light is in Genk, Belgium and Walker, MI, USA for PolyVision and Steelcase for the Europe, Middle East, Africa (EMEA) Market.

Recycled Content ⁽¹⁾

Pre-Consumer: 37%
Post-Consumer: 6%

Recyclability ⁽²⁾: 64%

Product Certifications and Labels ⁽³⁾

- SCS Indoor Advantage™ Gold

Material Certifications ⁽⁴⁾

- E1

Plant Certifications

- ISO 14001 – Genk, Belgium
- OHSAS 18001 – Genk, Belgium

Sans Light may contribute to the following building standards and initiatives ⁽⁵⁾ in the following ways, depending on options.

Potential contribution area	LEED® Credit	The WELL Building Standard® Feature
Recycled content Pre-Consumer: 37% Post-Consumer: 6%	BPDO - Sourcing of raw materials, Furniture and medical furnishings	
SCS Indoor Advantage™ Gold	Low-emitting materials	Feature 04
Materials Transparency	Sans Light may meet the Furniture and Medical Furnishings credit of LEED.	

⁽¹⁾ Calculations of recycled materials exclude packaging and are based on data provided by professional organisations, suppliers and other available information. Recycled materials are determined by weight and defined in accordance with ISO 14021. This data may include industry averages, ranges or other broadly-based information. Steelcase makes conservative assumptions when compiling this information to provide the most accurate recycled content calculations possible but variability in market conditions or manufacturing processes may result in higher or lower content. This document will be reviewed and updated periodically and is subject to change without notice. Recycled content may include pre- and post-consumer materials:

Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

⁽²⁾ In locations where recycling is available. To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold. Steelcase offers services to assist customers with end-of-use options including resale, refurbishment, charitable donation, and recycling.

⁽³⁾ Product Certification and Labels

Cradle to Cradle Certified™ is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.

Indoor Advantage™ and Indoor Advantage™ Gold are trademarks of Scientific Certification Systems.

⁽⁴⁾ Available to specify

⁽⁵⁾ Building standards and initiatives

LEED® —an acronym for Leadership in Energy and Environmental Design™—is a registered trademark of U.S. Green Building Council®. These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product. Refer to www.usgbc.org for LEED Program details.

The WELL Building Standard® is the first standard to integrate human health and wellness into the design, construction, maintenance and operations of buildings. Learn more at WELL.certified.com.
