LEARNING

Inspiring a *Life of Learning*

Asia Pacific

A Life of Learning

Learning is how we explore our boundless potential and connect to the world around us. At Steelcase Learning, we inspire a life of learning by creating places that engage and ultimately empower people, within and beyond the classroom.

Throughout our history we've focused on how the design of spaces can impact every stage in a learner's path — from early to higher education, and eventually, to their work experience and beyond. At the same time, we know that learning is different for everyone. We serve the unique needs for each level and type of learning, while also understanding the common threads that improve learning outcomes.

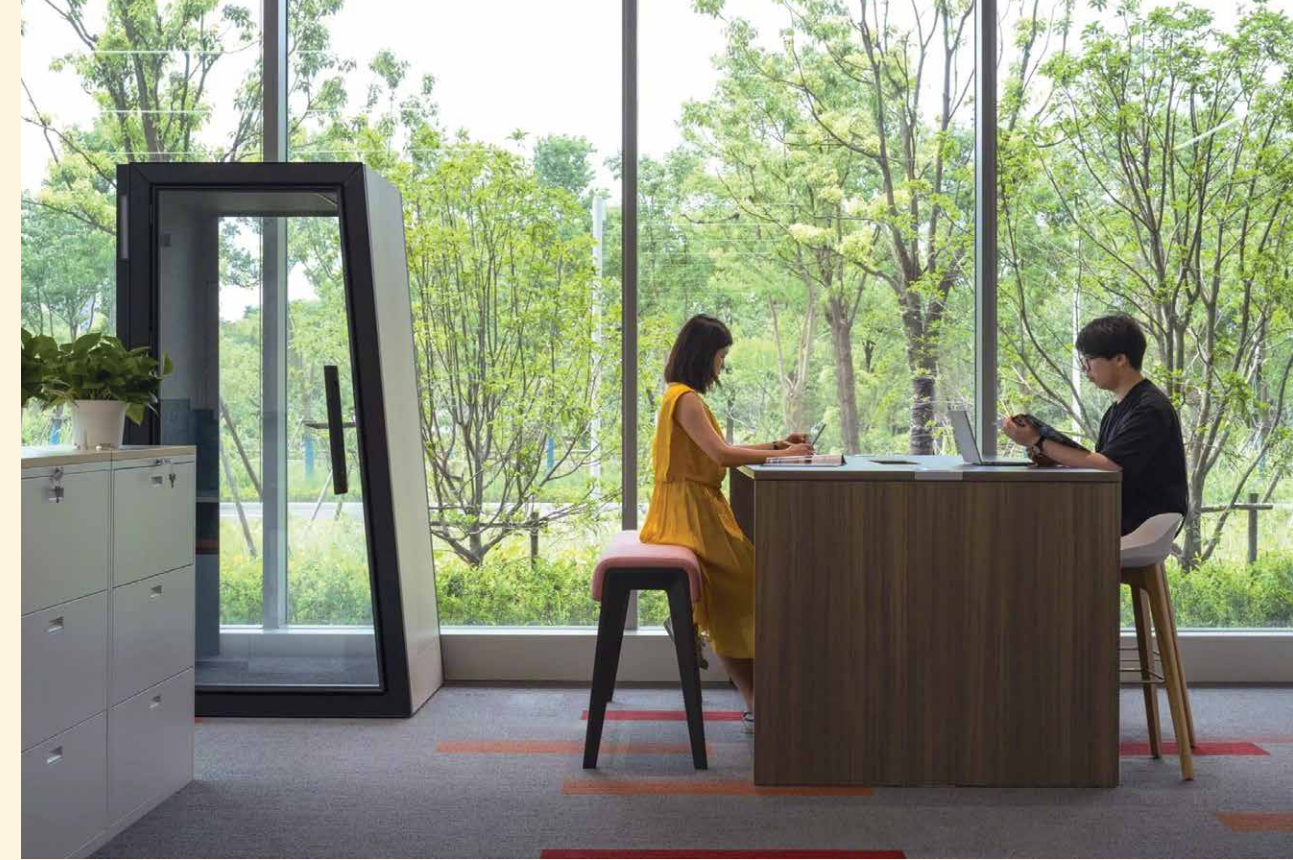

And, we're always learning, too — from schools, colleges, universities and educational organizations that we partner with throughout the world. Our human-centered, primary research approach gives us the insights to design solutions for the specific conditions that students, educators and institutions face, in both current and emerging learning environments.

In everything we do, we believe in a life of learning. We're helping to make the spaces that can prepare people to grow and thrive, in all the places where learning happens.

How We Support Lifelong Learning

People take part in a continuum of learning throughout their lives. We research and design solutions that engage and ultimately empower everyone to learn — understanding the unique needs of students and educators at each level, in all the places where learning happens.

Duke Kunshan University

Duke Kunshan University redefines higher learning environments with Steelcase Learning. Discover how forward-thinking design and innovative furniture solutions can shape lifelong learning spaces that are not only inspiring but also flexible, sustainable, and deeply inclusive.

We study and support key behaviors that can positively impact learning outcomes and foster a love of learning. With these principles, we help create learning experiences that:

Engage

Active and inclusive learning environments improve both student and teacher engagement, fostering the skill development and deeper relationships that help everyone succeed in their learning experiences.

Empower

Strong engagement allows for greater empowerment as people have more agency and independence, are able to focus on their wellbeing, and feel motivated to truly own their learning both in and out of the classroom.

Expand

Anyone can carry a learning mindset forward — marking an expansion into lifelong learning that will positively impact their personal and professional growth for years to come.

Leaders in education engage us in their biggest challenges related to learning environments and experiences. We work closely with decision makers and their institutions to study, interpret, solve problems and measure, and then share what we learn to improve the design of spaces and their outcomes.

Tsinghua University
Steelcase Learning insights into how to make learning more collaborative and effective helped Tsinghua University develop a new facility that students could use to prepare for job readiness and career success. These spaces bring advanced technologies and experiential learning approaches together with inviting, restorative aesthetics.

Xi'an Jiaotong University
Xi'an Jiaotong University in Xian, China offers an innovative space for creativity and hands-on learning. Our research into how learning happens everywhere helped to redefine what a university can look like, with interactive experiences to help prepare highly engaged students for success across diverse academic stages and career interests.

How We Support Lifelong Learning

We're Always Learning

People are at the heart of everything we do. Using human-centered, primary research, we observe and learn directly from educators and students around the world. Then we use our findings to help design innovative learning spaces, translating our insights into furnishings and solutions that support better learning experiences today and into the future.

Our dedicated team of researchers, strategists, designers and space experts studies many forces that impact learning outcomes. Steelcase Learning partners with a wide range of primary and secondary educational institutions to understand how teaching and learning are evolving — and how smarter, more active environments can help.

To date we've measured outcomes from over 110 educational institutions, including more than 75 K-12 schools and 35 colleges/universities, surveying over 16,500 students and 650 educators.

Explore the latest findings of our study.

How We Support Lifelong Learning

Learning Involves Everyone

We consider all the people who are impacted by the investment in learning spaces, including students, educators and leaders across many types of school districts, institutions and communities.

By understanding each group's distinct goals and challenges, we can design for a wide set of needs across diverse learning environments.

The Hong Kong Polytechnic University

The use of Node chairs in all the classrooms has revolutionized modes of teaching. Node supports a variety of student learning styles by allowing quick and seamless transitions from one teaching mode to the next, creating flexible and barrier-free classrooms, and encouraging spontaneous groupings and work.

Every Level of Learning

We serve the unique needs of each stage of learning, while also understanding the common threads that improve learning outcomes.

From early to higher education, and onward into work experiences and beyond, we bring in-depth expertise to many specialized learning spaces, both in and out of the classroom.

Yet we always connect the dots, promoting the core behaviors and wellbeing that help people thrive at any age, across the learning continuum.

National University Singapore Department of Architecture

To Steelcase Flex Collection was chosen for its stability to create totally configurable team 'neighbourhoods' from a selection of fixed height and height adjustable tables, huddle hubs, analogue markerboards, moveable acoustic barriers, mobile carts and the industry's first enterprise level mobile power.

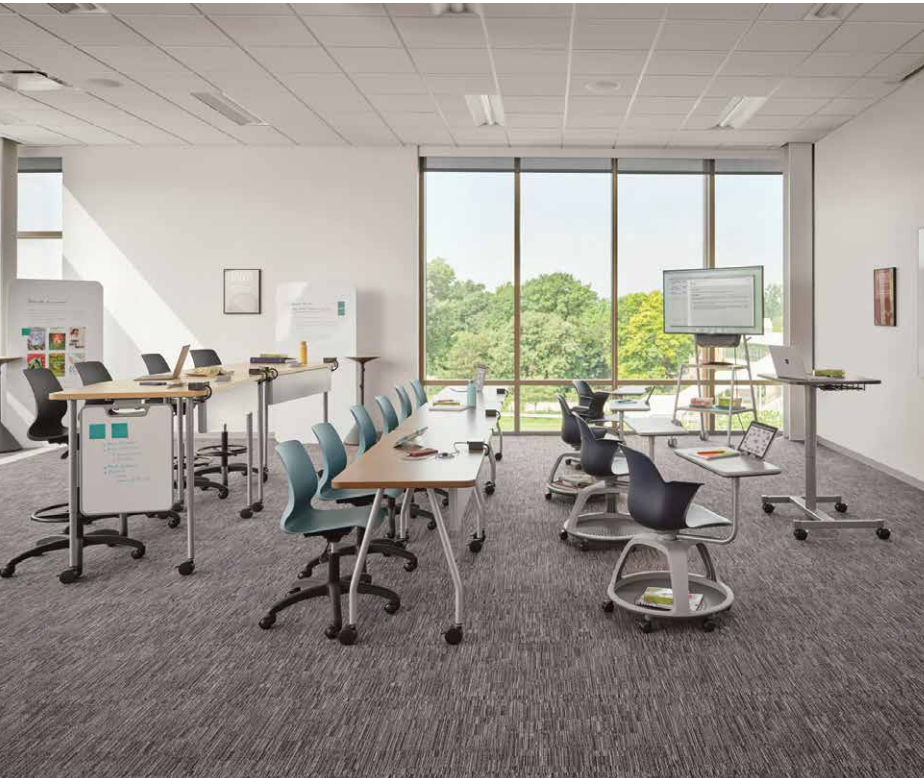

Spaces

Today's best learning spaces are designed to improve engagement, with active learning experiences that help students and educators collaborate and thrive — cognitively, physically and emotionally. From classrooms to libraries and beyond, having access to a variety of tailored and empowering learning environments across any grade level, subject matter or class size encourages people to grow into a life of learning.

Classrooms

Highly engaging classrooms can seamlessly support many modes of learning, with integrated technology and tools that facilitate class instruction, small group collaboration, independent reflection, discussion and more.

**Collaboration and creativity
lead to empowerment.**

As students come to own their own learning, they need spaces for more collaborative project work as well as places equipped for hands-on making and creativity, where they can develop points of view, craft new content and share it.

Above
Steelcase Node
Stools, Smith System
Planner Studio Tables

79% of high school and higher education students preferred their Steelcase active learning space over a traditional classroom. Subjects reported gains in many areas, including movement in the classroom, communication with peers and teachers, creative activities, critical thinking and collaborative learning.

Classrooms

Technology integration for better teaching and learning.

The human connection in learning is essential, whether a class is in-person, hybrid or remote. Modern, more effective and integrated uses of technology allow students to interact easily with teachers and peers, enhancing their engagement, building inclusion and improving learning outcomes.

“The digital transformation of learning is redefining how students and educators interact with the school environment. Knowledge transmission, such as lectures, is increasingly shifting outside the class session to computer-based delivery. Also, more active, hybrid learning models are leading to new value for the built environment. It’s exciting to see how space and technology can come together to deliver these new learning experiences.”

Andrew Kim
Director, WorkSpace Futures
North America

Beyond the Classroom

Any place can be a learning space throughout a campus. In libraries, learning commons, cafés and in-between spaces, design solutions outside the classroom can help learners collaborate, socialize and focus.

The heart of a campus in libraries and learning commons.

Building on their legacy role as the academic heart of a school, today's libraries are multi-purpose places of oasis and connection — where students, faculty, library staff and even members of the community can work and interact freely.

St Peters Lutheran College

Serving the Luther House Innovation Centre, an innovative facility was created to support academic expert in reimagining how they teach. This professional development program incorporates a variety of insight-led spaces to help lecturers practice new modes of instruction, including fresh ways to bring more active, project-based learning into their classrooms.

Social learning builds community.

Before and after class, social lounge spaces and commons areas invite students to meet and work with each other in comfort. Learning is amplified in these spaces by building the most important of campus commodities: a community.

Gaming becomes learning.

Esports and immersive learning give leaders in education new, compelling ways to engage students. The social benefits of camaraderie and belonging add to these multisensory experiences as more opportunities for gaming in the learning process are activated.

97%

of children in the U.S. play at least one hour of video games per day.

3 billion

gamers worldwide.

175

universities in America offer esports scholarships.

Workspaces

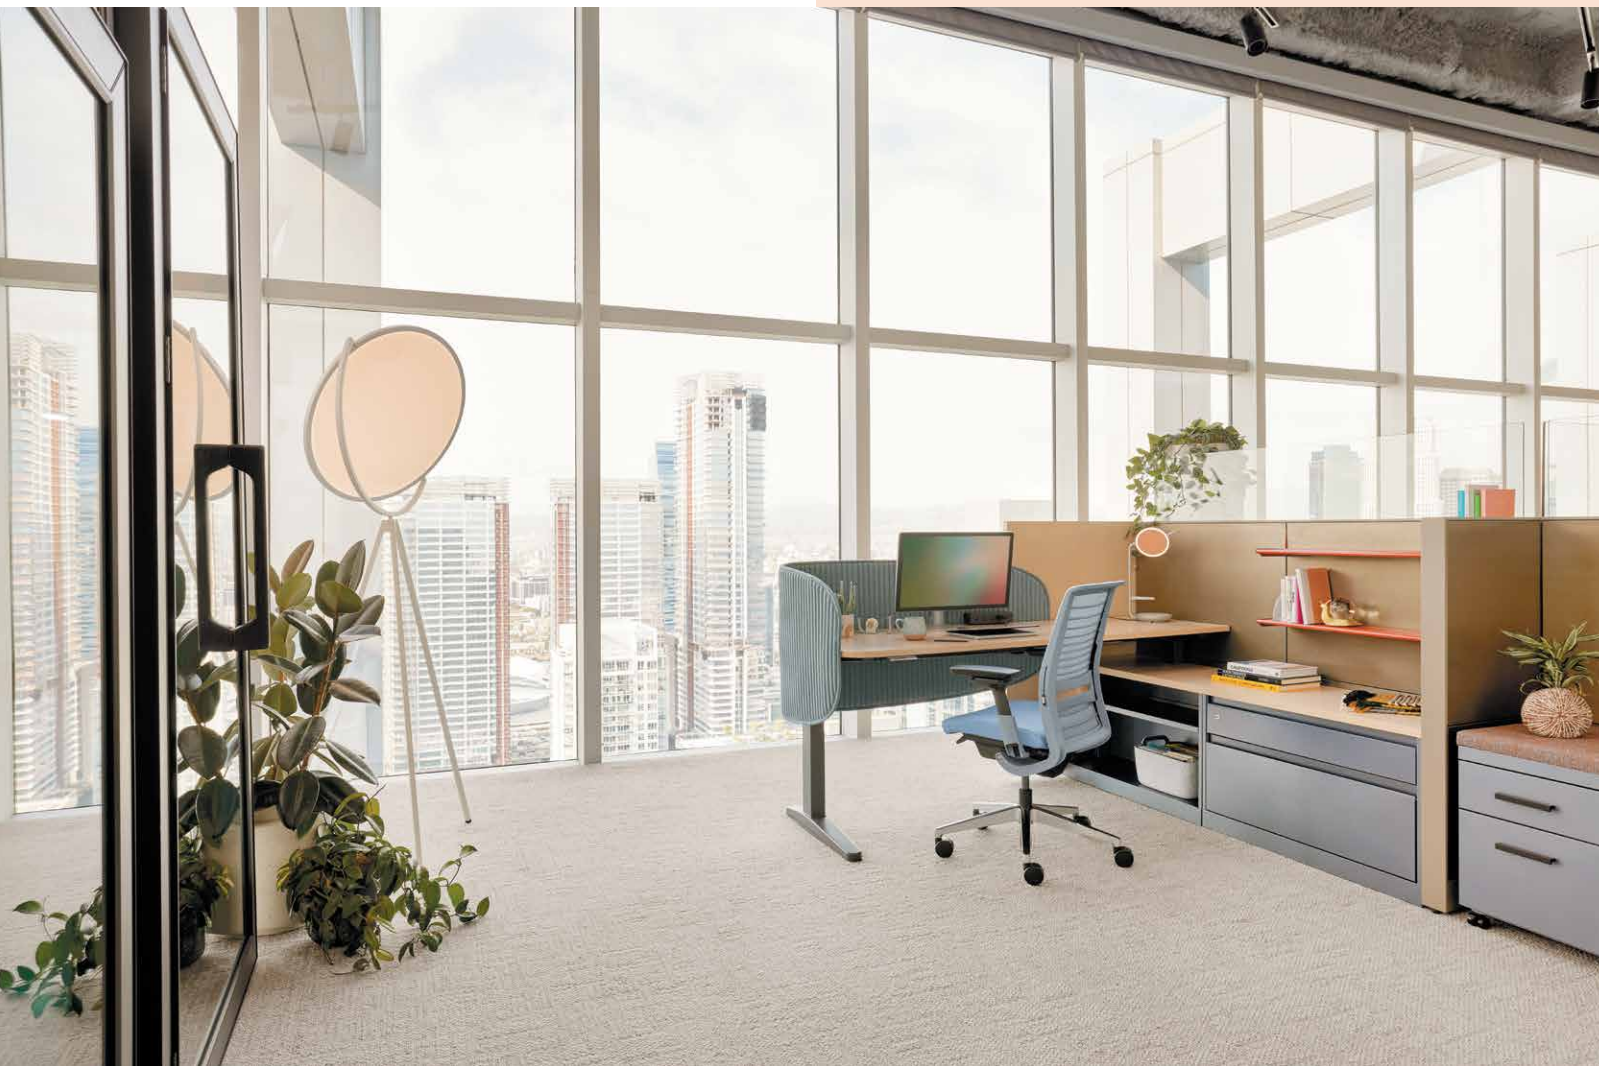

Learning institutions are workplaces, too. Faculty, educators and administrators need valued spaces where they can do their work independently as well as collaboratively. A combination of settings for individual focus, meetings with colleagues and student interactions allows them to thrive professionally.

Smith System

Learning is not a “one-size-fits-all” thing. The same goes for the furniture that supports it. Our broad product selection helps pre-K-12 educators re-imagine learning environments, making them more functional, flexible and inspiring.

Our Community of Brands

m.a.d

The m.a.d. collection features dining chairs and tables, barstools, lounge chairs, accent tables and lighting geared towards the home, work and hospitality environments.

The assortment includes over 40 originally designed products that are simple and elegant in form, and physically and stylistically built to last.

Viccarbe

An international reference in the manufacture of collaborative furniture, Viccarbe provides a collection from a blend of different cultures — the result of years collaborating with the most prestigious designers. Our aim is to inspire Mediterranean experiences through the design of timeless chairs, stools, armchairs, sofas, tables and accessories.

Orangebox

At Orangebox, we believe truly great workspaces should remove barriers and bring people together. Our Smartworking™ furniture solutions respond to our ever-evolving workplace needs with UK designed and US manufactured furniture made to promote engagement, productivity, flexibility and flow so you can work wherever you want and however you choose.

AMQ

AMQ specializes in supporting open plan design ideas with height adjustable desks, benching and seating for collaborative learning and working environments.

How We Can Help

Research + Insights

Steelcase invests in human-centered research about the ways and places people work and learn. We study directly and in collaboration with leading research organizations, to uncover insights that lead us to innovation and breakthrough design.

People + Planet

As designers and makers of products in the 21st century, we believe that doing our best work for the places we all share starts with designing better futures for the wellbeing of people and the planet. We're doing better for people by developing initiatives that help communities thrive and foster inclusion, in our own Steelcase family and around the globe, and by always acting with integrity. We're doing better for the planet by committing to a net-zero future – making, sourcing and delivering products to reduce our carbon footprint, designing for circularity, and choosing and using materials responsibly. Working toward a more inclusive, sustainable and resilient future has always been part of who we are. Because when we do better, we help the world work better.

Design Inspiration

Our expert design team draws on research and insights to develop design principles for different learning space types. Translating these principles, we can share a variety of application ideas and digital files for easy planning and specifying. Our services include a unique focus on materials, to help our customers source these design elements from our partners.

Industry Leading Warranty

No one in the industry offers a warranty as broad, deep and extensive as Steelcase. The quality and durability of our products are demonstrated in lower warranty expenses per sales dollar despite the strength of the warranty coverage.

The Steelcase Dealer Community

Creating the places where people can do their best work is a complex effort. Every Steelcase dealer is an engaged partner who can help you navigate every aspect of your workplace journey, from creation to installation and beyond — providing the capabilities and tailored solutions you need. We're with you every step of the way. Together, we deliver local expertise with the global power of Steelcase behind every experience.

Purchasing Contracts

Steelcase Learning group purchasing options can be attained through multiple buying organizations. We work closely with clients to understand their eligibility and intent of how they want to use a group purchasing contract.
