- Multiply the base price and each option by 1.03.
- Round each to the nearest dollar.
- Add base and options for total list price.

# About Design Options

---

## Easy specification

Design Options is a collection of commonly requested Specials that are not ordered in sufficient quantity to warrant support as a standard product. Use Design Options when your customer's needs cannot be met with standard products.

**It is available only on the Specials web area on [in2.steelcase.com](http://in2.steelcase.com). Check it regularly. Products may be added or deleted and pricing could change.**

Design Options is for Steelcase and dealer use only, and is not intended for distribution to customers or the design community.

## Placing an order

1. Follow the Required to Specify information from Design Options
2. Include the general quote number and Product ID on your order
3. Select the style number from Design Options

## Additional offerings

If you did not find a solution in Design Options, visit the Specials web area on in2 and complete a request for quote (RFQ) using E-quote.

# 86"H Door Tie Plates

Tip: Door tie plate must be used over door frames in an 86"H application.

Tip: You must supply a floor plan and elevation along with your order to ensure that top cap will be the correct length.

You must specify what is attached on each side of door.

• Not required for floor-to-ceiling applications.

Tip: The following tie plates are used when a Montage swing door has standard Montage frames attached to both the left-hand and right-hand side of the door frame. Choose the tie plate that matches your frame configuration.

## Standard Includes

- Extended top cap: all paint
- Attachment hardware

## Required to Specify

- 1 General quote number: **CA009774**
  - 2 Style number and Product ID
  - 3 Specify "door tie plate"
  - 4 Designate adjacent frame sizes and/or junctions. Specify style of junction.
  - 5 Size of door frame
  - 6 Paint color of top cap
- See Surface Materials in Montage Solutions Specification Guide.

# 42"H Enhanced Monolithic Frames

42"H Enhanced  
Monolithic Frames

Tip: Frame is available in black, sterling or platinum only. You must select a finish.

Tip: Enhanced monolithic frames accommodate enhanced monolithic tiles or enhanced segmented tiles. A horizontal filler strip, ordered separately, must be used at each location where tile segmentation occurs.

Tip: Desk-height cavity can be covered with a 18"H tile. Tile cannot be slatwall, high-performance acoustical, or perforated non-tackable.

Tip: Montage frames do not accept overheads or shelves on any base frame below 65"H.

Tip: Actual height of frame is 42.016"

Tip: Frame accepts 20"H tile in lower segments and a 18"H spec tile in upper segment. If frame has DC, only a standard 10" slatwall will fit above desk cavity, all other tile types are a special 10 1/2"H tile. Actual height of tile is 10.519.

# On-Module Cantilever for use with Duo Storage

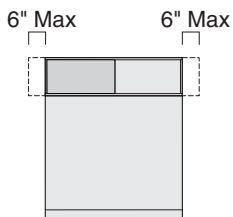

## What's Special

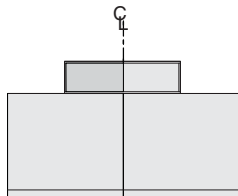

Cantilever for use with Duo Storage.

*Tip: Duo mounted on top of Montage frames using standard brackets.*

*Tip: For standard bracket applications, Duo cabinet must match width of panels and span at least 2 panel seams with a maximum overhang of 6" on both or either end. For standard brackets, specify ZTTBRK-TFP from the Montage Solutions Specification Guide.*

*Tip: For special bracket applications, panel seam must be located at the center point of the Duo cabinet.*

## Standard Includes

- Cantilever: paint
- Tie plate
- Attachment hardware

## Required to Specify

- 1 General quote number: **CA015291**
  - 2 Style number and Product ID
  - 3 Paint color number for cantilevers

# Power Beams

Tip: Line 1, Line 2, Line 3, and Line 4 are from left to right when facing beam.

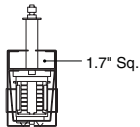

Tip: The internal harness that connects the two internal power blocks is included. The harness that connects the power beams to each other are specified separately.

Tip: Power beams run parallel to and underneath standard beams and should be ordered the same length as the standard beam.

Tip: Power beam is used with a standard beam, and is designed for at desk-height applications.

Tip: Junction guards are specified separately. Power hub, power strip, and horizontal fence tube are not required.

Tip: Voice/data blocks, covers, and cables are not supplied.

Tip: Use dimensions to help calculate cable capacity.

## What's Special

Straight worksurfaces are available in different widths.

*Tip: Standard worksurfaces are 1 1/8" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different worksurface types.*

# Rectangular Desk Shells

Tip: Grain direction of modesty panel runs horizontally. Grain direction of end panels runs vertically.

## What's Special

Rectangular desk shells available in additional widths.

Tip: For each clear-access end panel specified, two attachment brackets are shipped with the product.

Tip: Standard worksurfaces are 1 1/8" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different worksurface types.

Tip: 36"D desk shell has a 6" overhang on the visitor side.

# Modular Solid Wall Panels

## What's Special

Parametric panel widths are available in 1" increments. This option is also available through the SmartTools software.

Tip: Order ceiling track, feature strip, and continuous base trim separately.

Tip: Paint price group 2 is only available on panels 36"W or smaller.

Tip: Vinyl is not available on panels wider than 48"W.

Tip: Panels that are wider than 48" may not be suitable for application in certain areas where local building codes have specific provisions for seismic activity. For more information regarding seismic applications, visit the Architectural Solutions Web site at [in2.steelcase.com/SalesGuides](http://in2.steelcase.com/SalesGuides) and more.

# Thought Starters

## Panel to Beam Junctions on Answer and Montage

- An 8' run with no panel hung components does not require a return panel.
- Panels must be same height.
- 30"W return panels are required when panel mounting binder bins or c:scape mid storage on panel runs up to 8'.
- For additional stability or longer runs, apply a junction stabilizer bracket every 8' bolted to a concrete floor.

- Recommend ordering a special desk tie bracket to tie the end of the panel run into the understructure of the desk when desks parallel to the panel.

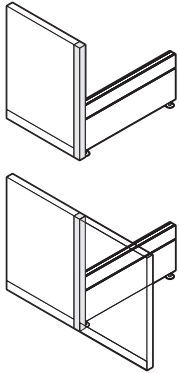

**For runs over 8' and up to 12', you must use at least a 30"W return panel.**

- Can use any type of panel skins or tiles.
- Available with steel and veneer trims.
- Power can be transitioned from c:scape beam into panel. Use a 30" harness to transition from the harness-to-harness connector in the beam into an Answer power kit. The harness-to-harness connector must be placed one foot from end of beam.
- Cannot panel mount components without return panel.

# Answer L and T Base Panel Junctions—Square Trim

# Universal Mobile Pedestals

With Proud Steel Fronts

Tip: 1/8"H steel top is non-structural.

## What's Special

Pedestals available with c:scape pull.

Tip: Optional tops will increase the overall pedestal height.

### Premium Wood

**Pricing:** To calculate the estimated price for Premium wood veneer top, multiply Customiz stain upcharge by five for Premium wood 2 or by ten for Premium wood 3, then add the price for wood veneer top. For exact pricing, see the electronic catalog.

# Airtouch Height-Adjustable Universal Systems Worksurfaces

High-Pressure Laminate, with Airtouch Technology

Worksurface Edge

## What's Special

Worksurfaces are available in larger widths that ship with a wider mounting plate. Discard smaller mounting plate.

*Tip: Airtouch adjustable-height mechanisms require assembly and attachment to the worksurface.*

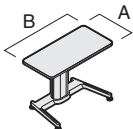

*Tip: Airtouch is designed for a wide range of applications, from lighter cargo loads (laptops or flat screen monitors) to heavier loads (large monitors or multiple monitors). An adjustment feature on the column allows the unit to function properly with any load up to 150 pounds including the worksurface.*

*Tip: All sizes are listed in actual dimensions which allows for a 1" gap to adjacent furniture, eliminating any pinch points.*

*Tip: C-clamping is not recommended on 22<sup>1</sup>/<sub>4</sub>"D worksurfaces due to interference with the mounting plate. The mounting plate is 26"W and extends 8" on either side of the column. C-clamping on the outside of the plate is allowed.*

*Tip: Cableways are not recommended for use with 22<sup>1</sup>/<sub>4</sub>"D straight worksurfaces.*

*Tip: These sizes are NOT for use with casters.*

## Standard Includes

- Universal Systems worksurface: High-Pressure Laminate
- Plastic 3 mm edge profile on front edge of worksurface: plastic
- Flat profile on side and back edges of worksurface: plastic default
- Adjustable-height column mechanism: 4799 Platinum default

# Lock and Keying

**All locking products** are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

*Exceptions: Individual locking drawers are only available with field-installed locks. Overfiles are only available with factory-installed locks.*

**Locks** consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

**Two types of locks** are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

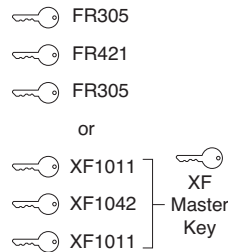

## Factory-Installed Keying

**Factory-installed locks** are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

*Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.*

▶ See below.

### Key Random

### Required to Specify

<b>Master key random</b>	+\$23	Specify with master key random.
--------------------------	-------	---------------------------------

## Field-Installed Keying

**Field-installed locks** are only available on products that include factory-installed lock mechanisms. *Exception: Overfiles are only available with factory-installed locks.*

**Specify "plug"** when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder. *Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.*

**Front-removable lock cylinders** must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field. *Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.*

**Lock cylinders** will be shipped separately so that you can install the locks when you are ready.

**Three keying choices** are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

**Key random** means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). *Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.*

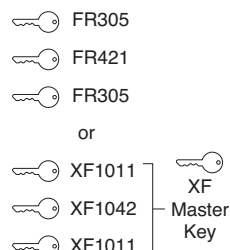

**Key specific** means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same. *Tip: Designate the quantity per key number in your specification.*

**Key consecutive** means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

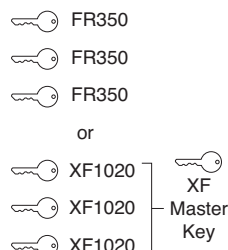

**Example** of a typical lock cylinder specification is shown below:

5	LOCK9201FR FR350
15	LOCK9201XF XF1100
