

Series 7
enhanced sit-to-stand height-adjustable tables

details®

The ultimate in comfort, control, wellbeing and productivity.

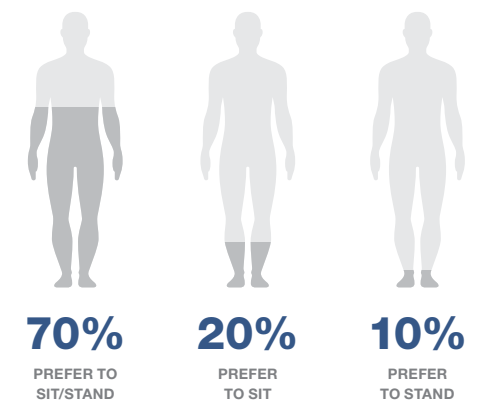

Attracting and retaining employees (and keeping them healthy and productive) is essential to the success of any organization. And an employee's work environment is considered one of the more important factors.

The electric Series 7 tables allow employees to sit or stand at their whim without disturbing others, maximizing comfort and productivity, while reducing costly turnover and demonstrating an organization's commitment to its employees' health and wellbeing.

COMFORT + CONTROL

With the touch of a button, employees can work at optimal sitting and standing heights, and keep frequently-accessed tools and personal items close at hand.

A case study of musculoskeletal discomfort experienced by bank tellers conducted by A. Roelofs and L. Straker.

Enhanced sit-to-stand height-adjustability. Controller options (3-preset, 3-preset with digital display or flush-mounted up/down button) allow individuals to electronically adjust their worksurfaces to a new or preprogrammed height, ranging from 24¼" to 52".

Optimal sit-to-stand height-adjustability. With an exceptional load capacity, an energy-saving stand-by mode, a broad sit-to-stand height range and a choice of three controllers, Series 7 is ideal for individuals expecting the most from themselves and their work environment.

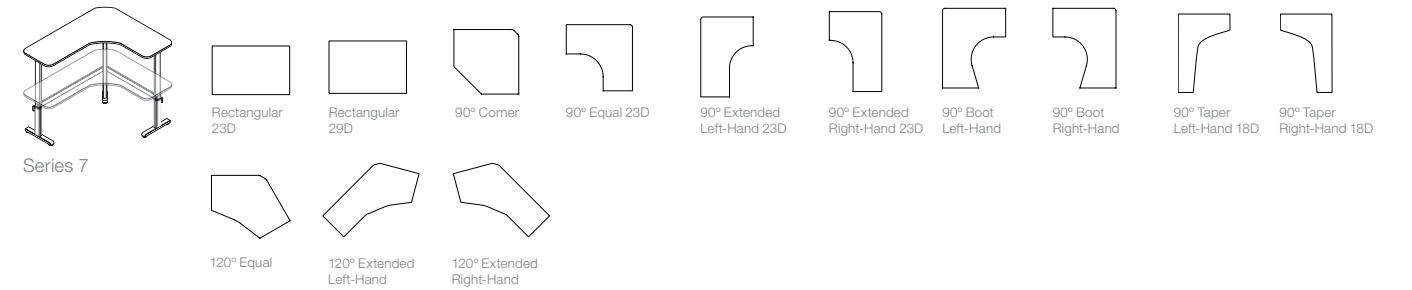

SEAMLESS INTEGRATION

With a simple, understated design, Series 7 (shown with Answer) integrates well with other product lines and applications, and—with up to 540 lbs. of distributed load bearing capacity—it can accommodate even the most demanding technology applications.

STATEMENT OF LINE

HEIGHT-ADJUSTABLE TABLES

SPECIFICATIONS

Height range: 24¼" – 52"
 Recommended load capacity*: 295 lbs. (2-leg) / 458 lbs. (3-leg)
**Includes weight of worksurface*
 Adjustment speed: 1.7" per second
 Standby Power: 0.1W
