

# You're Part of the Solution.

**Your space is part of our workplace study.**

What you should know:

- A sensor has been placed under your worksurface.
- This is not a camera or a microphone! It's a motion detector.
- It can't identify you, it can only sense presence.
- This presence data is automatically grouped with other individuals' data.
- In other words, we're not tracking your location.

Those are the essentials.

For more detailed information regarding the sensor and our study, please visit [steelcase.com/steelcase-workplace-advisor-study-customer-toolkit](https://steelcase.com/steelcase-workplace-advisor-study-customer-toolkit).

Thanks for your help!
