

Ology™ Height-Adjustable Desk

Designed for Wellbeing

The health of any organization is dependent on the wellbeing of its employees. A healthy workplace safeguards the company's most significant investment—its people—ensuring maximum efficiency and innovation.

The Ology™ height-adjustable desk is designed to support the wellbeing of workers and encourage a more health-conscious environment.

CLEAN ENVIRONMENTS

Ology offers BactiBlock®, an antimicrobial additive that can be molded into the most frequently touched components. The additive suppresses the growth of algae, mold, mildew, fungi and bacteria which cause unpleasant odors, discoloration, stains and deterioration.

IMPROVING WORKPLACE PHYSIOLOGY

Every aspect of Ology has been designed to promote user movement and wellbeing, including two controller options—Simple Touch and Active Touch.

Ology's Simple Touch controller allows users to effortlessly move the desk up or down without taking their eyes off their work, while Active Touch reminds workers to change posture with Active Motion, subtle desk movements that remind users to maintain posture. Users create a profile with preset desk heights and preferred intervals of sitting and standing, and the Bluetooth-enabled controller seamlessly pairs with the Rise mobile app so users can take their presets with them and track their level of activity over time.

Simple Touch controller

Optional antimicrobial additive available

Active Touch controller

Compatible with both iOS and Android devices, the free Rise mobile app allows you to connect to workstations via Bluetooth in order to track sitting and standing activity.

Available with the Active Touch controller

Integrated storage optimizes shrinking workspaces while still providing full access to storage.

1H available for use with Extended Height, 1.5H available for use with Basic Height

The integrated rail supports ergonomic tools such as lighting, monitor arms, screens and worktools.

The power access door offers effortless access to three power outlets and two USB ports the provide two amps of power per port.

The soft edge embedded into the worksurface provides support for wrists and forearms to reduce stress on the neck and shoulders.

Optional antimicrobial additive available

New gyrosopic obstruction-sensing technology to protect people and property.

CarbonNeutral® Product Certification option.
