

# Steelcase

Seating  
**Steelcase Karman®**

Sit back and let physics do its job. With a proprietary performance textile and an impossibly light frame, Karman goes beyond leading mesh office chairs to provide effortless comfort by naturally responding to a body's movement.

## Features + Adjustability

### LiveBack®

LiveBack® technology conforms to support the full spine in its natural, healthy S-shape and excels in providing continuous lower-back support.

### Organic Movement

A weight-activated mechanism responds intuitively to your body as you sit and change postures in every direction.

### Recline Adjustments

Comfort dial offers four settings: Upright back lock, mid-back stop, a boost setting (offers +20% additional back tension resistance for individuals who need it) and weight-activated full recline.

### 4D Arms

Fully adjustable arms move in height, width and depth, and pivot to better support your neck and shoulders. The cantilevered arm design encourages posture change.

### Lumbar Support

Optional added lumbar support lets you customize support for your lumbar region.

### Patented Hybrid Seat

The suspension seat with integrated cushioning provides maximum comfort for as long as you sit.

### Comfort Edge

The ultra-light frame flexes to eliminate hard edges and pressure points on your legs and body.

### Additional Options:

Chair or Stool

CarbonNeutral® product certification option

4D arms, height-adjustable arms, fixed arms or armless

Hubless and standard hard casters, soft casters, or glides

## Intermix + Lux Finishes

Intermix is a proprietary performance textile that uses an exclusive weaving process that, in unison with the Steelcase Karman flexible frame, achieves perfect tension to distribute your weight evenly over the seat and back—flexing to your movement and fitting the contours of your body perfectly.

## Back Options

### Standard Back

Featuring Steelcase Karman's proprietary performance textile: *Intermix*, coupled with soft comfort edges and LiveBack® technology – Karman's back design provides targeted lumbar energy that moves with the centerline curvature of your spine; ensuring you're supported no matter where your day takes you.

### High Back with Neck Support Pillow

Building upon the same LiveBack® technology of the standard back, the sculpted high back is designed to provide enhanced upper body support while helping create more dynamic spaces. Adjustable neck support pillow comes standard, with pillow-less version available as an option.
