AWAY FROM THE DESK

How do we learn from great social environments and bring the successful dynamics of these spaces into the new workplace?

It's a place that connects **people,** not furniture.

A growing number of organizations are pivoting toward more fluid workspaces that flexibly support a variety of work styles and modes.

Recent advancements in technology has changed how people work, and where.

With the advent of hybrid collaboration at scale, workplaces today need to balance the need for private focus spaces with collaborative ones.

Working in a **post-PC** world.

“...answers the needs of our rapidly changing workplace.”

Introducing Away from the Desk

Away from the Desk is a soft upholstery system which answers the needs of our rapidly changing workplace as we migrate away from the predominance of the personal desk, with its fixed and tethered technology. By optimizing its modular flexibility, limitless configurations can be created using its various topologies.

AftD Linear

Provides a diverse array of configuration options. Combine AftD units together for privacy and comfort for minimal floor footprint.

77+

Different variants – answer the need for more diverse configurations for both personal and team work.

Communities

Utilize the potential of AftD to be linked into larger multifunction and multidimensional combinations. Layouts are designed to facilitate collaboration and more casual interactions within larger community spaces.

Create landmarks in open spaces with a mixture of linear 120 and 90 units.

Intentionally designed

Large and small work surfaces to support focus, team or casual work.

New Way of Work - Design Theory

Great social and interactive spaces allow us to communicate, create and bond is at the heart of the way Orangebox approaches its design theory.

Away from The Desk is the leading soft seating system which brings ergonomics to the forefront.

Inspired by task chairs, the seat depth is shortened, and the back rest is integrated with prominent lumbar support allowing users to sit in an upright position. The seat is made from high density foam to support a longer, more comfortable sitting.

**Support
Wherever You Go.**

Worksurfaces
that **Make Sense.**

Mobile tables further encourage fluid and causal work.

Arm tablets provide simple workspace options and fixed tables are tapered to maximize space to support touch and go work.

A space to unwind and focus is just as important as collaborating with peers.

The single seater with chamfered screens give users partial privacy for focus work. Like many of the AftD models there are options to place power to intuitively indicate how long the seat can be occupied for.

**Focus &
Rejuvenate.**

Right Tools at the Right Place.

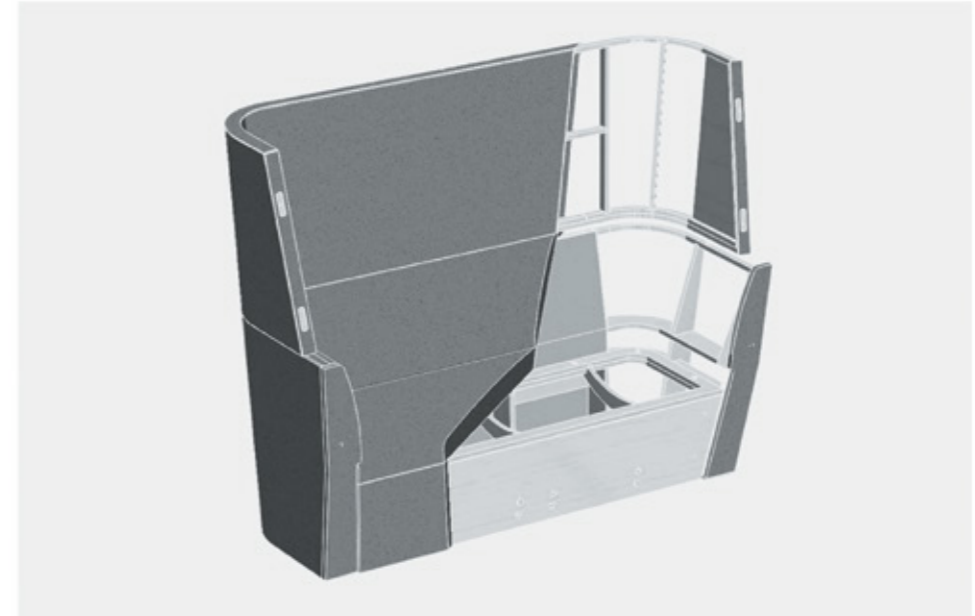

Having the right tools to collaborate is key.

Media Dens encourage ideation and casual discussion to be held in a semi-private space. The presence of tech sharing devices provide users with more choices for where they can gather, work and collaborate.

“From the outset, as perhaps the name suggests, the aim of this collection was to offer a substantial and credible alternative to desk working. Having achieved this, it is now taking on a life of its own, and it will continue to evolve in response to the ways that people use it.”

Gerard Taylor,
Creator of Away from the Desk

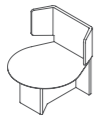

Statement of Line

Standard Modules

AD-81 DS

Low media unit with D - shaped top
table height - 730mm

H1455 [H57]
W1300 [W51]

Compliance and Sustainability

Orangebox's standard of compliance and commitment to sustainability is held high as a globally recognized solution. Products like the AFTD go through rigorous material testing and sourcing. This means engineering and design are focused on efficient energy usage, minimum emissions and ensuring longevity of the product.
