## Take teamwork anywhere.

Steelcase® Roam™ Collection, for the Microsoft Surface Hub 2S family of devices, allows teams to come together—even when working apart. Co-developed with Microsoft, the Roam system of mobile stands and easy-to-install wall mounts supports large-scale collaboration—anywhere, anytime, any way.

### Bring Remote Teams Together

The Roam Collection enhances collaboration across distance and across devices. Bring remote teams together and enable large-scale teamwork where everyone can be seen, heard and actively participate in meetings—whether they're together or apart.

### Support Flexibility

The flow of ideas doesn't have to end when your scheduled meeting does—the intentionally approachable design of the Roam Collection of wall mounts and mobile stands provides the flexibility to support a variety of devices, to move and adapt in space and empower teamwork to happen wherever ideas do: anytime, anywhere, any way.

### Enable Active Collaboration

Collaboration fuels innovation. The Roam Collection allows teams more room for ideas and content sharing, and more opportunities to physically and emotionally engage in the creative process.

## A collection built to support collaboration—anytime, anywhere, any way.

### Wall Mounts

The Roam Collection of easy-to-install wall mounts makes any space more flexible, from small huddle spaces and conference rooms to private offices. It's building code-compliant, keeping the large-scale screens close to the wall—unobtrusive and inviting for a team to work together naturally.

20-0143110

### Floor Supported Wall Mount

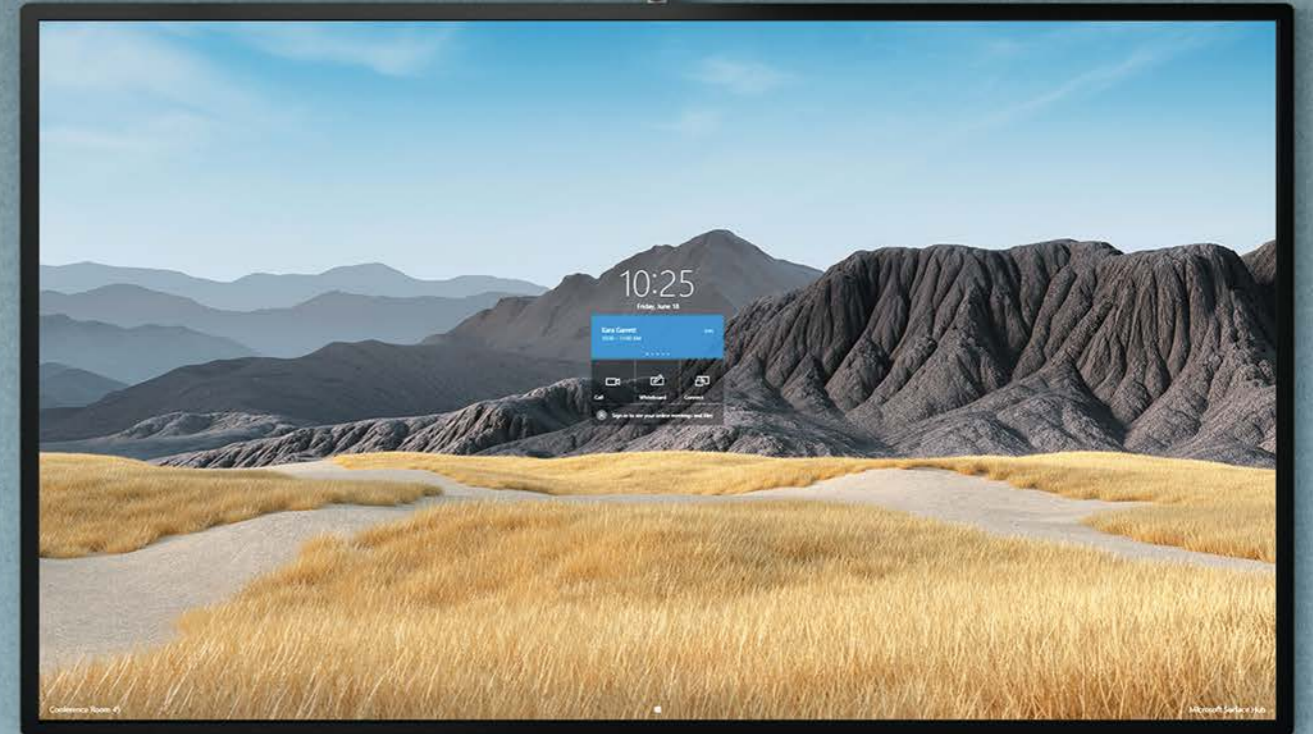

The freestanding wall mount provides the option to safely and easily integrate the Microsoft Surface Hub 2S 85" into any room—without the worries of wall reinforcement and access to power and data. Mounting brackets enable legs to rest away from the wall, allowing any space to become a collaborative space without remodeling or new construction.

### Mobile Stands

The Roam Collection of mobile stands moves easily on smooth-rolling casters for on-the-go transitions throughout any space. Locking casters provide added stability and safety. The mobile stand was thoughtfully designed to help teams work effectively. The legs are designed to be the ideal circumference for hands to easily grip. On the 50" mobile stand, the storage tray keeps cables hidden and the back panel is useful to house various assets or presentation needs.
