

Wood is a natural material, and variations will occur in color, grain pattern, and character marks. Because of these natural irregularities, each veneer will have its own variation in color, grain structure, and texture.

Each tree species has unique qualities, and the way in which the wood is sliced will produce different grain characteristics. Every grain pattern is a one-of-a-kind, unique and natural design. Defects, such as knots or other natural blemishes, enhance the beauty and add character to furniture.

To create this finish, veneer flitches with knots, contrasting streaks, and other natural markings are taken from scrap piles and used in furniture production. This one-of-a-kind aesthetic celebrates the (im)perfections found in nature.

Color variation and characteristics between planks should be expected.

Knots and other natural markings are a celebrated feature of this finish.

Planking between flitches is visible and will highlight variation in color.

Color and grain variation are natural characteristics of wood surfaces. Since no two trees are exactly alike, these variations will be evident. This finish celebrates the unique grains, knots, markings and color variation that will occur.

3P61 PLANKED OAK SIGN-OFF

Color variation and characteristics between planks should be expected.

Knots and other natural markings are a celebrated feature of this finish.

Wood will age and lighten or darken as it goes through a natural maturation process. Color changes occur because wood is an organic material. The rate and degree of color change depends on the species of the tree, its growing conditions, and the conditions of the environment it is exposed to after being made into furniture. Direct and constant sunlight (natural or synthetic) will age any wood product.

To create this finish, veneer flitches with knots, contrasting streaks, and other natural markings are taken from scrap piles and used in furniture production. This one-of-a-kind aesthetic celebrates the (im)perfections found in nature.

By signing below, you are acknowledging that the variations that occur with this finish are part of the design intent and are not product defects. If signing on the behalf of the customer and/or designer, you are acknowledging the design intent and have educated the customer on the variations that will occur in color, character marks and grain pattern.

If this accurately captures your understanding, please sign below and return a copy of this letter to Steelcase.
