Air25W – Back View

Launched in 2014, Orangebox's award-winning Air³ acoustic pod range can act as a freestanding meeting room, private space, phone booth or touchdown room.

Its internationally patented opening roof system features an advanced fire safety system developed specifically for sprinklered office environments.

Like all Orangebox pods, Air³ is demountable so it can be moved, re-positioned or re-used to suit changing needs.

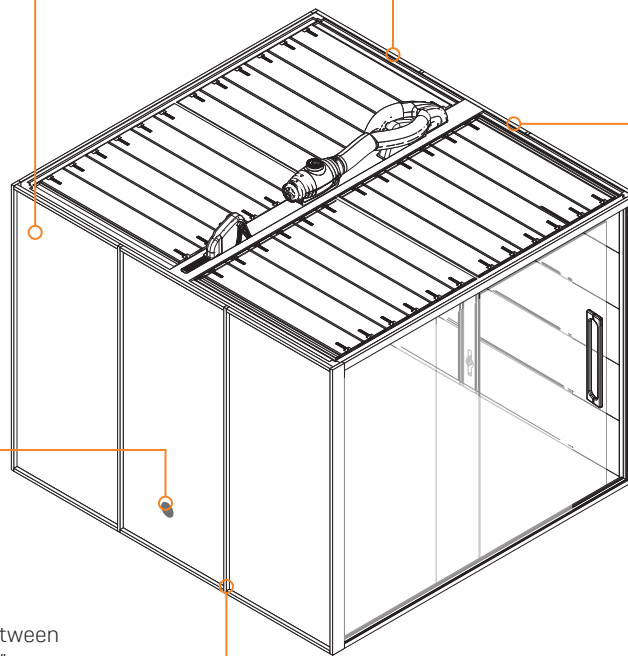

Wood grain direction on the panels is always vertical. Wood is only available in clearcoat oak veneer finish.

Air25W is a veneer wood paneled variation of the Air25 pod.

Wood panels add a total of 650 lbs.

Grommet is 3.1" in diameter.

Trim pieces between panels are 3/4".
