

Healthy Interiors v2.3 / BIFMA LEVEL® 7.4.4 - Compliant Product List

must select approved fabrics and finishes to ensure compliance -
see bottom of list for additional notes on specification

Healthy Interiors criteria furniture and furnishings must not contain:

- formaldehyde (VOC)
- per and poly-fluorinated compounds (PFAS)
- polyvinyl chloride (PVC)
- antimicrobials
- flame retardants
- ✗ indicates non-compliance

Highlighted Products are available as Carbon Neutral

notes on product compliance and specification

- specify upholstery: non-vinyl, without soil-retardant treatment, without moisture barrier.
- flame retardants are only added when specified (fire code option).
- steelcase offers PVC-free edge band (1mm and 3mm profiles) in several color options. if specifying a PVC edge band profile, it is common for it to fall below the 1% small component exemption. that percentage varies by product and option, and should be evaluated before claiming compliance to the Healthier Hospitals Safer Chemicals Challenge.
- products that meet VOC/Formaldehyde criteria comply with LEED for Healthcare credit for Furniture and Medical Furnishings - Option 2. Testing and Modeling of Chemical Content.
- electronics and the electronic components of furniture and furnishings are exempt from the criteria.
- conformance assessments are made on typical/representative product configurations.
