

Steelcase

High-Capacity Cable Riser

Worktools

Product Positioning

With the evolution of the workspace comes a new-found need to manage cluttered cords. More often, people are choosing height-adjustable desks for flexibility in their work environment. That means cords and cables need a home, whether the desk is at seated or standing height. The High-Capacity Cable Riser keeps multiple cords hidden away and worksurfaces clutter-free.

Design Details

The Steelcase High-Capacity Cable Riser provides vertical cable management for multiple, heavy-gauge cords. It is recommended for height-adjustable worksurfaces and connects to a magnetic metal surface, like Answer Fence. Each link lays flat against the other to form a concealed front, and links move together uniformly, keeping cables aligned and well managed from a seated to a standing position.

Performance Features

Strong enough to withstand heavy-tech usage

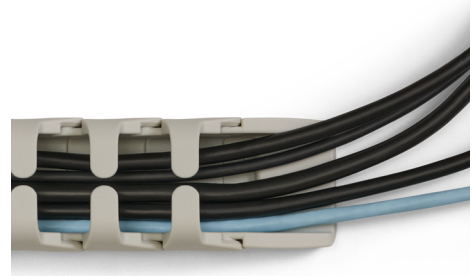

Wide format to manage multiple cords

Easy to install and disassemble

Universal fit for most applications

Features

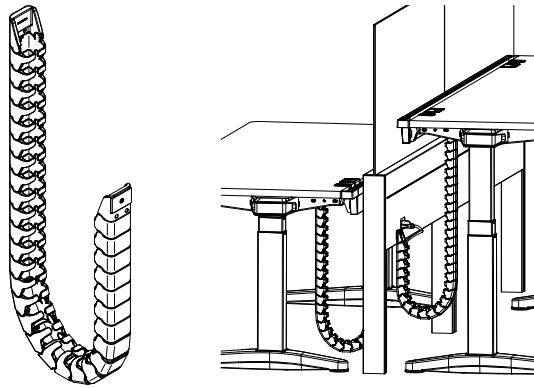

Organization, Optimized

The High-Capacity Cable Riser is easy to use and keeps workspaces looking neat and tidy. The magnetic attachment includes a soft rubber material, so when used with a magnetic connection like Answer Fence, it won't scratch or damage the surface.

Tech Savvy

The Steelcase High-Capacity Cable Riser is built to accommodate heavy-tech usage. It can manage multiple cords and hold them neatly while the desk can easily transition from seated to standing height.
