

Benching Specification Guide

Availability

Electronic price list updated with release 200.M (U.S.) and 156.M (Canada), dated June 17, 2024.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at www.steelcase.com/finishlibrary/.

► For a list of all trademarks, refer to the last page of this specification guide. © 2024 Steelcase Inc.

Working with This Specification Guide

Ten Tips: How to Get the Most Out of This Book	2
Additional Resources	4

Bivi	5

Lock and Keying	498
Style Number Index	500

For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing/. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing

shows you what the product looks like and points out important features.

Product Details

gives specific information on the product and how it is used.

Connections

describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
- Dimensions
- Style Number
- Price

Standard Includes (under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify (under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information (under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

Base Horizontal Frame Packages—Thin Trim

For Condition Pricing
Refer to the Condition Pricing section on page 104.

Options (under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with Customiz Stain

Italic typeface on specifying pages usually identifies wording that you should use in your order.

i

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.

Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you need to find the page that has more details about the product.

Additional Resources

Benching products are supported with informational materials, tools, and software to help you plan, specify, and order an installation efficiently.

Printed Materials

Other Specification Guides

Steelcase offers a comprehensive portfolio of furniture and solutions. For the full offering of products, refer to the individual product specification guides. These can be accessed at the www.steelcase.com web site or at village.steelcase.com.

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance,

please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies. To learn more at a corporate level, visit: [https://www.steelcase.com/discover/steelcase/esg-overview/environmental/Product Environmental Profiles](https://www.steelcase.com/discover/steelcase/esg-overview/environmental/Product%20Environmental%20Profiles), which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at *Origin.build*.

Height-Adjustable Desk and Spine Stability Guidelines

Stability Guidelines for Bivi Slim Spine: No Fixed Tops with Slim Legs Only

- Minimum requirement: (1) 60"W + (1) 72"W Trough with Slim Legs or (3) 48"W Troughs + (4) Slim Legs.
- Maximum requirement: unlimited.
- Not approved: any combination under 11"W or 132"W.

Stability Guidelines for Bivi Spine: No Fixed Tops with Standard Legs Only or Combination of Slim and Standard Legs

Approved Mixed Applications: (1) Trough + (1) Slim Leg + (1) Standard Leg OR (1) Trough + (2) Standard Legs:

- All Trough widths: 48"W, 60"W, 72"W with Tall Arch or Short Arch.

- All Trough widths: 48"W, 60"W, 72"W with Tall Arch.

Approved Mixed Applications: (2) Troughs + (1) or (2) Slim Legs + (1) or (2) Standard Legs:

- All Trough widths: 48"W, 60"W, 72"W with Tall Arch, (2) Standard Legs + (1) Slim Leg and Media Support System.

- All Trough widths: 48"W, 60"W, 72"W with Tall Arch or Short Arch.

Approved Applications:

- All Trough widths: 48"W, 60"W, 72"W with Short Arch and Side Storage.
- Trough widths: (1) 48"W combined with (1) 60"W or (1) 72"W with Tall Arch, (2) Standard Legs + (1) Slim Leg and Media Support System.
- Trough widths: (2) 60"W with Tall Arch, (2) Standard Legs + (1) Slim Leg and Media Support System.
- Trough widths: (1) 60"W and (1) 72"W with Tall Arch, (2) Standard Legs + (1) Slim Leg and Media Support System.
- Trough widths: (2) 72"W with Tall Arch, (2) Standard Legs + (1) Slim Leg and Media Support System.

Media Support System:

Media Support System is allowed on Bivi spine applications without fixed tops that are 108"W or wider.

Media Support System is not allowed on Bivi spine applications without fixed tops that are 107"W or smaller.

Non-Approved Mixed Spine Applications:

- All Trough widths: 48"W, 60"W, 72"W with Trunk.

- All Trough widths: 48"W, 60"W, 72"W with Half Round.

Tip: Non-approved mixed spine applications shown apply to applications without tops.

- 48"W Troughs with (2) Slim Legs, (1) Standard Leg, (1) Tall Arch + Media Support System.

Stability Guidelines for Bivi Desking System + Spine Applications

Any application combination that removes one or more Bivi static tops for a height-adjustable desk or Half Round Tops are not allowed:

- Half Round Tops are not allowed on settings that have one or more fixed tops removed.

- Trunk storage is only allowed on Bivi applications that have a minimum of two fixed tops on opposite sides.

Overview

Designed for movement with dynamic seating, adjustable worktools and Height-Adjustable Desks are important for today's office workers.

To determine the best height-adjustable solution, consider these four criteria:

1. **Adjustability Needed:**
What is the height range requirement? (seated or sit-to-stand)
2. **Worksurface Size Needed:**
What does the physical space look like? (worksurface configuration)
3. **Equipment/Tools Used:**
What type of computer equipment and other worktools are being used on the worksurface? (load capacity)
4. **Use:**
What is the Height-Adjustable Desk being used for (individual or shared, touchdown space or full workstation, sit-to-stand or seated)?

⚠️ WARNING

Risk of Serious Injury. If not used as intended, moving worksurfaces can pinch or injure people, or damage property. Always follow these Instructions:

1. Keep height-adjustment range free from obstructions above and below the worksurface.
2. Plan for a minimum 1" gap against a panel or wall.
3. Plan for a minimum 1" gap to adjacent furniture.

Tips

Obstructions

Moving worksurfaces can collide with other objects. Do not install overhead storage, stationary pedestals or components in the path of Height-Adjustable Desks.

Weight

The maximum allowable load (varies by height-adjustable desk) should be evenly distributed and must not be exceeded.

Width

Specify a minimum 1" gap to adjacent furniture. This eliminates any pinch points between a Height-Adjustable Desk and a fixed object.

Depth

When placing a Height-Adjustable Desk against a panel or wall specify the worksurface depth shorter to provide a minimum 1" gap. This eliminates pinch points and adds clearances for cable access.

Managing Technology

Design workstations with computer equipment in mind so that the height-adjustment range of the Height-Adjustable Desk is not impeded because of cables. Consider the addition of a cable riser or cable basket to help harness these wires and cables.

Power

Plan easy and unobstructed access to electrical outlets for computer equipment and Height-Adjustable Desks (when applicable).

⚠️ WARNING

Risk of serious injury.

Bases-only warranty limitations and potential for injury: The use of worksurfaces that do not comply with the Steelcase defined criteria and limitations could cause personal injury or property damage due to pinch points, instability, or other problems, and voids all Steelcase Warranties, expressed or implied.

The use of worksurfaces that do not comply with Steelcase criteria voids any Steelcase claims of compliance with ANSI/ BIFMA, UL, LEED, or other applicable requirements. The use of non-Steelcase worksurfaces on Steelcase adjustable-height bases may not be accepted as compliant to municipal electrical codes or OSHA federal workplace standards, because this use does not create an NRTL (UL, ETL, etc.) listed product. Steelcase is not responsible for the ultimate determinations of compliance for height-adjustable bases with non-Steelcase worksurface, and assumes no liability for their compliance with standards when height adjustable bases are used without a Steelcase worksurface as intended.

Worksurface Criteria and Limitations

The use of non-Steelcase worksurfaces is not recommended. Any use of a non-Steelcase worksurface requires additional investigation by the customer regarding the appropriateness for use. It is the sole responsibility of the customer to determine the suitability and safety of the selected worksurface construction and attachment means. The following information is provided as a guideline, but does not address all potential issues. Customers should seek professional guidance as to the appropriateness of their chosen worksurface.

Tips

Height-adjustable bases include fasteners intended for use with Steelcase worksurfaces. These fasteners may be suitable for worksurfaces meeting the following criteria:

- Medium-density or higher particleboard or fiberboard cores, with High- or Low-Pressure Laminates and backers.
- Thickness of 1" or greater (Ology and Migration SE)
- Thickness of 1 $\frac{3}{8}$ " or greater (Series 5 bases)
- Fasteners located a minimum distance of 1" from any edge

Bivi Tables: Basic Overview

Basic Bivi table components consist of a Trough, Leg(s), and Full Top(s).

The 26½" clearance underneath Bivi tables accounts for the 2" reinforcing channel located at the front edge underneath the Bivi Top.

The Bivi Full Top is designed to work on all Bivi tables, Table for One, Table plus One, Table for Two, Table plus Two, and at seated or standing heights.

Cable scallop is 2¾"D x 18"W.

The Trough acts as the center spine to Bivi tables; it attaches to the Legs and Full Tops and provides access to power and data.

The Bivi Leg has two T-slots on either side that are the connection point for everything from Full Tops, Rumble Seat, Arch accessories, etc. with different brackets.

The Bivi Leg is designed to support all of the Bivi tables.

Bivi Table for One is assembled with the Trough at one end of the legs and one Full Top installed.

Bivi Table for Two is assembled with the Trough centered between two Legs and two Full Tops placed on either side.

How to create larger settings:

A Bivi Table plus One can be added to a Bivi Table for One by sharing the inside Leg.

A Bivi Table plus Two can be added to a Bivi Table for Two by sharing the inside Leg.

How to create standing height settings:

Standard Table for One (**TS8SDWF**) or Table for Two components (**TS8TTWF**)

High Sit Bracket with Modesty Panel (**TS8HSMREV**) and two (2) Arches, Tall or Short (**TS8ARCH**)

High Sit/Standing Height application

How to reconfigure settings:

Bivi can be ordered as individual components (Full Top, Trough, and Legs) to create new configurations.

Table for One (**TS8SDWF**)

Full Top (**TS8RPFWS**)

Table for Two

Bivi Table for One and a Full Top create a Table for Two.

Table for Two (TS8TTWF)

Trough (TS8RPCT)
and Leg (TS8RPBSL)

Bivi Table for Two, a Trough, and a Leg create a Table for One with a Table plus One.

Bivi Table for Two (TS8TTWF)

Bivi Half-Round Top (TS8RW)

Bivi Table for Two and two Half-Round Tops create a conference table for six.

Application Guidelines

Bivi Table for One and a Table plus One can be attached with users sitting next to or across from each other.

When an architectural obstruction such as a column occurs, one Full Top can be left off.

The maximum number of Tables for Two and Tables plus Two, or Tables for One and Tables plus One, that can be connected is unlimited.

Note: Power is not unlimited. Additional power infeeds may be needed depending on the number of tables connected together.

Thought Starters

Nomad 1

Workspaces where mobile workers can set up quickly, connect devices, and work alone or with others: One of the spaces allows the worker to quickly set the worksurface height with an Ology height-adjustable desk at it's most convenient, comfortable, and appropriate height for the task at hand.

Quantity	Style Number	Description	Options

1	MGELTRQ	Height-Adjustable Desk, Extended Height, 54 ¹ / ₂ "	

Nomad 2

Workspaces where mobile workers can set up quickly, connect devices, and work alone or with others: Front and side-to-side privacy elements are tackable and help to eliminate work distractions for short term focus.

Quantity	Style Number	Description	Options
1	TS8TTWF	Bivi Table for Two	48"W
2	TS8TTAF	Bivi Table plus Two	48"W
4	TS8ARCH	Bivi Arch	Short
4	TS8ARCHFILL	Bivi Arch Infill	Lower
3	TS8HSMREV	Bivi High Sit Bracket w/ Modesty Panel	48"W
1	TS8P4IFH	Bivi Power Infeed, Hardwire-To-Modular	
3	TS8PBS	Bivi Modular Power Block, standard capacity, 4-circuit, non-PVC	
12	TS8PRD	Bivi Duplex Receptacle	
2	TS8P4H	Bivi Modular Harness, 4-circuit	
6	TS8PRCVR	Bivi Bezel Receptacle Cover	
6	TS8PAREC	Bivi Accessory Power, USB strips, rectangular	Clamp-on mount & USB ports
2	TS2CTEC	Bivi Trough End Cover	

Resident 4

Dedicated workspaces focused on individual work: The Campfire Slim Table creates a secondary worksurface and an extra power plug per person. The primary power solution in this setting is contained within the Bivi Trough, with desk height access, and provides three power plugs and two USB ports per person. Storage at the ends of the bench provides a place for personal items and extends the size of the workspace.

Quantity	Style Number	Description	Options
1	TS8TTWF	Bivi Table for Two	60"W
1	TS8TTAF	Bivi Table plus Two	60"W
2	TS8ARCH	Bivi Arch	Short
2	TS8ARCHFILL	Bivi Arch Infill	Lower

1	TS8P4H	Bivi Modular Harness, 4-circuit	
4	TS4TPST	Campfire Slim Table	

Functional Team

Collaborative setting with individual workspaces and storage for workers from the same department:

End storage keeps shared materials nearby, and applications support standup collaboration. Footshelf is available for foot support when standing and user has convenient access to power and USB ports. The 2" gap between tops provide visual boundaries.

Quantity	Style Number	Description	Options
1	TS8TTWF	Bivi Table for Two	48"W
2	TS8TTAF	Bivi Table plus Two	48"W
4	TS8ARCH	Bivi Arch	Short

3	TS8SCREENTREV	Bivi Tackable Screen	19"H X 36"W

Meeting Space 1

Team meeting space for project teams or impromptu meetings: Tall Arches define space and eliminate distractions. There is easy access to power for shared monitors and personal powering needs. Standing height provides seamless sharing with continued eye-to-eye contact, whether a coworker is sitting in a stool or standing.

Quantity	Style Number	Description	Options
1	TS8TTWF	Bivi Table for Two	60"W
1	TS8TTAF	Bivi Table plus Two	60"W
2	TS8ARCH	Bivi Arch	Tall

1	TS2HOLDER	Bivi Holder	
1	TS4TWP	Campfire Personal Table	

Lounge Meeting Space 3

Small meeting space in a casual lounge environment: Rumble Seats with Hoodies provide a semi-private meeting area, or can be used for individual focus in a lounge setting. Campfire Personal Tables can be used for a writing surface or to hold laptops.

Quantity	Style Number	Description	Options
2	TS8RS	Bivi Rumble Seat	Freestanding Legs
2	TS3RSH	Bivi Hoodie	Table frame attachment bracket
2	TS4TWP	Campfire Personal Table	

The appearance of laminate may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90° angle with each other. Please refer to the following illustration for an understanding of grain direction on your installation.

Depot, 2 High, and 3 High

Mini Transaction Top

Sarto Screens

Sarto screens provide a light scale boundary element, centered along the bench or on the sides of the work surface. They are available in one modular height to provide seated visual privacy.

► Specifying, page 76

Centered screens are specified with trough-mounted brackets for seated-height applications.

Clips are plastic and used to attach side screens to centered screens. Clips are available in L-shape or T-shape.

Side screens are attached to the edge of the work surface with thumbscrew and supported by the centered screen.

Actual Dimensions

	Centered Screens	Side Screens
Overall height	23 ¹ / ₂ "	23 ¹ / ₂ "
Width	46", 58", 72"	27", 33"

Tip: Height is measured from the top of the mounting surface to the top of the screen.

Product Details

Sarto screens are tackable and available in one height at 23 1/2". Centered screens are available in three widths. Side screens are available in two widths.

Brackets are included with centered screens. Two brackets are used with centered screens at 48"W. Three brackets are used with centered screens at 60"W or 72"W.

Bracket is included with side screens. One bracket is used with side screens to mount to the worksurface and clip is used to attach side screen to centered screen.

Gap is 1" between Sarto screen and mounting surface.

Tables

Table for One, Table plus One, Table for Two, and Table plus Two Overview

Bivi Table for One

comes standard with a Cable Trough, two Legs, and a Full Top. Bivi Table plus One comes standard with a Cable Trough, one Leg, and a Full Top.

► Specifying, page 79

Full Top is 1/2" thick with edge to match laminate color.

Bivi Table for Two

comes standard with a Cable Trough, two Legs, and two Full Tops. Bivi Table plus Two comes standard with a Cable Trough, one Leg, and two Full Tops.

► Specifying, page 82

Height of Bivi Full Tops to floor is 28 1/2".

Table for Two and plus

Two Tops depths are 22 1/2" or 28 1/2" and are available in widths of either 48"W, 60"W, or 72"W.

Leveling glides have 1 1/2" adjustability range to install tables on uneven floors.

Actual Dimensions

	Table for One	Table plus One	Table for Two	Table plus Two	Full Top
Depth	42 1/4"	42 1/4"	48" or 60"	48" or 60"	19 1/2", 22 1/2", or 28 1/2"
Width	50" or 62"	48" or 60"	50", 62", or 74"	48", 60", or 72"	46", 58", or 70"
Height	28 1/2"	28 1/2"	28 1/2"	28 1/2"	2"
Worksurface Thickness	1/2"	1/2"	1/2"	1/2"	1/2"

Product Details

Cable Troughs are used to hold power, wires, and blocks. Each Cable Trough has four areas for power. Two areas are in the floor of the Trough and one on each side. The power locations on the side of the Cable Trough have knock-outs that can be removed if power in these locations is desired for four-circuit power components.

Bivi Full Tops are available in three widths – 48"W, 60"W, and 72"W. The Bivi Full Top can be ordered as a separate component.

Bivi Full Tops are available in three nominal depths – 21"D, 24"D, and 30"D.

Cable scallops allow cords and plugs to pass behind the Full Top.

21"D and 24"D nominal Full Tops are not offered on Table for One or plus one due to the misalignment with the leg; it creates an undesirable visual and corner.

Full Tops have a reinforcing channel that runs along the front of the top. The Full Top cantilevers install in the Bivi Leg and tie into the reinforcing channel creating a steel under structure for added strength.

Connections

Plus tables come with one leg and adjustable glides with a 1¹/₂" range. Tables can be connected to an existing table in order to create a benching application. Two tables share one leg.

Weight Capacities

Table for One: 200 pounds.

Table for Two: 400 pounds.

Surface Materials

Full Tops

- Low-Pressure Laminate, High-Pressure Laminate, and wood veneer

Legs, Cable Trough, and Full Top Attachment Brackets

Team Table

Bivi Team Tables provide a highly functional, fully featured conference table with the Media Support System, Foot Support System, and space for 4–10 people.
 ▶ Specifying, page 86

One Circuit Plug and Play Power can be optioned on as an easy to install, convenient power solution with 16 power, or 12 power and 4 USB. Additional power available through specification.

Foot Support System provides the user with multiple postures while promoting ergonomic wellbeing and active standing.

Transaction Top utilizes the space at the end of an application to create a collaboration space, providing a place for two additional people.

Media Support System makes it easy to share digital information quickly and transparently. It is compatible with monitors 32"–43" and can support up to 50 pounds.

Size Recommendations

Team Table Size	Recommended Number of People	Total Table Width
48" Team Table	6 People	114"
60" Team Table	8 People	138"
72" Team Table	10 People	162"

Tip: Total table width includes the 18"D Transaction Top.

Cable Trough

Data ports can be set in the bottom half or the top half of the Trough and are accessed through the various cable routing openings.
▶ Specifying, page 88

The top half of the Cable Trough holds Power Strips and manages personal cords, such as a phone charger, iPod, or laptop cord.

The openings on the end of each Trough are for routing cables in and out.

The bottom half of the Cable Trough manages the bigger cords, such as electrical cords and laptop power blocks.

The Cable Trough measuring 48"W, 60"W, or 72"W, has two openings for power in the center of the Trough. There are Trough Floor Covers (TS2CTFC, package of two) available if you do not choose to use both or either of these locations.

Trough-Mounted Data Access, TS8DATA, snaps into a 48"W, 60"W, or 72"W Trough and provides an opening to fit standard sized communication modules.

Cable Trough End Dimensions

Trough-Mounted Data Access

Product Details

A Trough End Cover (TS2CTEC, package of two) is available if closed end is preferred.

72"W Troughs have a trough stiffener in the center of the trough that is factory installed to add more rigidity. The trough stiffener is 2 1/2"D x 3 1/4"W.

Bivi Trough Covers come in a quantity of two for 48"W and 60"W Troughs, and in a quantity of three for 72"W Troughs, to straddle over the center Trough Stiffener.

Rectangular openings on each end allow for cables to route through into the Trough.

Surface Materials

- Paint

Arches, Arch Accessories, and Screens

Arches install onto Bivi Legs and become an extension of the Bivi frame.
 ▶ Specifying, page 91

Upper Arch Infills install in the top location of a Tall Arch. Lower Arch Infills install in the Short Arch or bottom location of a Tall Arch.
 ▶ Specifying, page 95

Upper Arch Infill available in tackable fabric or markerboard surfaces.

High Sit Bracket with Modesty Panel attaches to two Short Arches, or two Tall Arches, or a combination of one Short Arch and one Tall Arch.
 ▶ Specifying, page 94

Height of Full Top when using a High Sit Bracket with Modesty Panel is between 40¹/₂" to 42", depending on glide adjustment.

Leveling glides have 1¹/₂" adjustability range to install tables on uneven floors.

Actual Dimensions

19"H x 72"W	69"W	72"W Table	19"H	16"H

: **Side Storage** is available in
: two widths, 48"W for use with
: two 24"D tops and 60"W for
: use with two 30"D tops.

: **48"W Side Storage** can
: be used with two 30"D tops,
: but it is not recommended to
: use 60"W Side storage with
: two 24"D tops; it creates an
: undesirable condition sticking
: out beyond the table tops.

Side Storage

Holder measures 3"D x
26⁵/₈"W x 3"H, and can be
attached to the Tall Arch,
Short Arch, Leg, a wall, or
stand alone.

► Specifying, page 93

**Table-Mounted Arm
Brace** is installed into the
cantilevers and back chan-
nel of either the Trough or
High Sit Bracket under the
Bivi Full Tops.

Product Details

Arches ship standard with screw covers, which are a modified version of the screw covers that ship with Bivi Legs. When installing Arches, the arch screw covers replace the leg screw covers.

Tip: Save leg screw covers for future configurations. Both leg screw covers and arch leg screw covers are supported as service parts.

Side Storage installs onto a Short Arch and is shared between adjacent users. Each end of the Side Storage has open cubbies that can be left open. Side storage can be mounted on a table for two without additional support.

Side Storage should not be installed next to a Rumble Seat because it overhangs into the user sitting area.

Holder can be attached opposite of other Bivi accessories.

Side Storage attaches over a Short Arch and creates storage space and a boundary between workers.

Connections

High Sit Bracket with Modesty Panel attaches to Arches and supports Full Tops at standing height applications. At seated height applications, the High Sit Bracket with Modesty Panel provides privacy.

Mini Hook assembles onto High Sit Bracket with Modesty Panels that are manufactured after 11/6/2017. There can be two Mini Hooks per side if other components are not in use.

Modesty Panel is tackable and has two sides for cable management. Each side has an access pocket for cords to route into.

Arch Infills are tackable with painted brackets to attach to the upper section of the Tall Arch and the lower section of the Tall Arch and/or Short Arch.

Upper Arch Infill is also available with non-tackable markerboard surface.

Tackable Screens are available as freestanding or Bivi Trough-mounted. Screens are not a tackboard, but they are tackable.

Freestanding, Tackable Screen stanchions and base come standard in three plastic color choices with a paint option upcharge.

Trough-mounted, Tackable Screen stanchions come standard in three plastic color choices with a paint option upcharge. The base is always painted and replaces the Bivi Trough End Attachment Cover.

Tall and Short Arches can be mounted on either ends of a Bivi Table or in between two tables. They provide slots for mounting other Bivi accessories.

Upper Footshelf is painted steel, available in 48", 60", and 72" widths. Upper Footshelf can be paired with the Lower Footshelf at standing height to create a footself from standing and sitting posture.

Leg Covers come in a quantity of one. They are used for aesthetic purposes to cover up strength ribs in Bivi Legs and are not structural. Leg Covers come in half size, when used on a leg that has a Bivi Footshelf, and full size, when no Footshelf is present.

Lower Footshelf is painted steel, available in 48", 60", and 72" widths. Footshelf is used for foot support when in a standing posture.

Lower Footshelf is not recommended to be used with 21"D standing height tops due to possible leg interference.

Footshelf bracket covers the lower half of the Bivi Leg. The footshelf bracket can be shared between two Footshelves. The first Footshelf should be specified with the two bracket option and the adjacent footshelves should be specified with the one bracket option.

To install Footshelf brackets onto legs manufactured on or before July 17, 2016, order adaptor package, **TS8FRETR0SR.**

Side Storage cannot be installed where a High Sit Bracket with Modesty Panel is present, as they interfere with each other.

Weight Capacities

Short Arch: 100 pounds per side maximum.

Tall Arch: 100 pounds per side maximum.

Side Storage: 50 pounds bottom shelf/100 pounds top.

Holder: 25 pounds maximum.

Surface Materials

Arches, Arch Infills, High Sit Bracket with Modesty Panel, Tackable Screens, Upper and Lower Footshelf

- Paint

Tackable Screen stations, freestanding Screen bases, and Trough mounting brackets

- Plastic

- High-Pressure Laminate

Storage

Trunk storage attaches to the end of a Bivi Table for Two. It has storage on each end as well as additional storage in the middle. Trunks are also available with freestanding legs for a freestanding application.

► Specifying, pages 96-77

Depot storage is freestanding and comes in two high or three high. Depot is not approved to be stacked on top of each other and cannot be wall mounted.

The same Freestanding Legs are used on the 48"W and 60"W Trunk.

Product Details

Trunk storage attaches to the end of a Bivi Table for Two. It has storage on each end as well as additional storage in the middle.

Trunk cannot be used on a Bivi Table for One.

Trunk is not recommended to be used on a standing height Bivi Table for Two. The trunk table frame attachment brackets only work on the Bivi Leg, not on the Short or Tall Arch. Therefore, Trunk does not line up with the standing height Full Tops.

3-High Depot has the ability to turn the top section around so it faces the Full Top when placed against the end of the Bivi table.

Depot storage comes with feet on each end and a foot in the middle, all with adjustable glides.

Weight Capacities

Trunk: 200 pounds on top, 50 pounds per cubby, and 25 pounds per shelf.

Depots: 200 pounds on top (all sizes) and 50 pounds per cubby (all sizes).

Surface Materials

Trunk top and Depot storage

Rumble Seat and Hoodie

Rumble Seat comes with an option for either table frame attachment brackets or freestanding legs. Available in multiple standard and COM fabric options.
 ▶ Specifying, page 100

Rumble Seats are available in three widths – 36"W, 48"W, or 60"W.

Rumble Seat fabric relaxes with use creating comfort wrinkles. If the least amount of comfort wrinkles is desired, Cogent:Connect fabric is recommended.

Hoodie is standard with attachment hardware to connect to a Rumble Seat. Available in a single fabric option for the top and sides and a default mesh on the back panel.
 ▶ Specifying, page 102

Contrasting seat is available as an option on all sizes of the Rumble Seat. Inner back, outer back, and arms will match each other.

Rumble Seat

Hoodie

Actual Dimensions

	Rumble Seat with Freestanding Legs or Table Frame Attachment Brackets	Freestanding Legs	Hoodie	Rumble Seat with Hoodie
Height	28 ¹ / ₂ "	12"	38 ¹ / ₈ "	67 ⁵ / ₈ "
Seat Height	16 ³ / ₈ "	N.A.	N.A.	N.A.
Depth	28"	28"	28"	28"
Seat Depth	23 ¹ / ₂ "	N.A.	N.A.	N.A.
Width	33 ³ / ₄ ", 45 ³ / ₄ ", and 57 ³ / ₄ "	34", 46", and 58"	57 ³ / ₄ "	58"

Product Details

Freestanding Legs connect to the bottom of the 36"W, 48"W, and 60"W Rumble Seat.

Rumble Seats TS3RS and TS3RSBKT, manufactured on 5/21/2017 or before, work with Freestanding Legs TS3RSL2 and Table Frame Attachment Brackets TS3RSTA, manufactured on 5/21/2017 or before. These TS3RS style numbers are no longer available.

Rumble Seats TS8RS, manufactured on 5/22/2017 or after, work with Freestanding Legs TS8RSL2 and Table Frame Attachment Brackets TS8RSTA, manufactured on 5/22/17 or after.

48"W and 60"W Rumble Seats can be installed on one or both sides of a Bivi Table for Two. 36"W Rumble Seats are only available on Freestanding Legs. To create this setting, order a Bivi Table for One and move the Cable Trough to the center. Install the Full Top on one side and the Rumble Seat on the other side.

Rumble Seats can connect to a Bivi Table for Two on both sides. To create this setting, order a Rumble Seat with Table Frame Attachment Brackets, two Bivi Legs, and one Bivi Cable Trough.

Rumble Seats cannot be installed in place of a worksurface on a Bivi Table for One.
Tip: Rumble Seat cannot be installed on 48"W Bivi Table for One, but can be installed on a 48"W Bivi Table for Two manufactured on or after 5/22/2017.

Hoodie is only intended to be used attached to a Rumble Seat.

Hoodie comes with two fabric options for the sides and top.

Back panel on Hoodie is defaulted in mesh. Mesh material used on the Hoodie back panel offers semi-transparency.

Connections

Table Frame Attachment Brackets connect the Rumble Seat to the table frame in place of a Full Top on a Bivi Table for Two.

Rumble Seats have connectors that come standard to attach the Hoodie. These connectors need to be located and cut to expose them in order to attach the Hoodie. If you know ahead of time that a Hoodie will be installed, there is an accessory bracket option that supports the Rumble Seat with the connectors exposed from the factory.

Weight Capacity

48"W and 60"W Rumble Seat: Two people, up to 300 pounds each.

36"W Rumble Seat: One person, up to 300 pounds.

Electrical Components

Plug and Play Corded Power, One Circuit Hardwire-to-Modular Power, Two Circuit

Bivi electrical components are simple and easy to install. Power Strips and hardwired Powerways can be installed in the Cable Trough, which provides easy access.

► Specifying, pages 104-119

Bivi Power Strips and Modular and Chicago Hardwired Powerways have spill-proof technology to prevent electrical shorts.

Hardwired-to-Modular

Modular Powerways, TS8P260 and TS8P2CHI, have two sections with four receptacles each for a total of eight receptacles.

Steelcase products are designed and tested for code and standard compliance when installed and used as an integrated product solution in accordance with Steelcase application guidelines and installation instructions. However, the building owner or designated agent is responsible for verifying that the installation is in compliance with local codes and regulations.

Plug and Play

Plug and Play Power Strip package of two, TS8PS2PKREV, has two sections with four receptacles each for a total of eight receptacles.

Plug and Play Power Strip package of four, TS8PS4PKREV, has four sections with four receptacles each for a total of 16 receptacles.

Trough-Mounted Data Access, TS8DATA, snaps into a 48"W, 60"W, or 72"W Trough and provides an opening to fit standard sized communication modules.

Trough-Mounted Data Access

Plug and Play Power Strips have a 15-amp 10' cord that plugs into a building receptacle.

Product Details

Two-Pack and Four-Pack Power Strips do not connect together as this would cause a potential power failure and hazard. Power Strips must plug into an individual power source.

Power Strips have the first and last receptacle rotated out to accommodate larger power units.

Power Strips have four simplex plugs. The fourth position can have two USB ports optioned in place of the simplex plug.

For the standard Bivi Modular Hardwire Base Power, when using a 60"W table there is 22" of conduit with 6" of wire length once the power hits the floor for the electrician to work with and connect to the building power source. When using a 48"W table, there are 12" of additional conduit.

Bivi San Francisco Hardwired Modular Power can be used outside of San Francisco. If more conduit length is desired, it has 72" length of conduit from the point of coming straight out of the table.

The San Francisco Hardwired Base Power can be used in other areas of the country where local codes allow liquid tight conduit if additional conduit length is desired. Check with local electrical inspectors.

Modular Harnesses are used when connecting power between two Bivi tables or when two hardwired Powerways are used in one Bivi table.

One circuit plug and play power strips, two circuit modular powerway, and Chicago two circuit hardwired powerway are compatible to install in the top half of the cable trough.

Plug and play power strips, two circuit modular powerway, and Chicago two circuit hardwired powerway do not work on the bottom half of Bivi cable troughs with style numbers beginning with TS8, manufactured on or after August 31, 2016.

Power Specifications

- Single circuit power
- 12-amp system rating
- 15-amp power cord with 15-amp over-current protection
- UL recognized Powered Table System component per UL962

Surface Materials

- Power Strips**
- Paint

Electrical Components Plug and Play Corded Power, One Circuit Hardwire-to-Modular Power, Two Circuit, continued

Bivi Plug and Play Corded, One Circuit

Plug and Play Power have 6' of conduit between receptacle strips, that gives room to share power between multiple tables in some applications. Plug and Play Power Strips are color coded and connect into each other.

2-Pack Plug and Play Power Strips have maximum of one connection point. **4-Pack Plug and Play Power Strips** have maximum of three connection points.

Bivi tables do not have maximum table limit. An unlimited amount of tables can be connected together. Plug and Play Power will need to be plugged into a building outlet in the middle of runs when multiple tables are connected and power is used.

Openings can be skipped to stretch out the power to more users. There is 6' of cord length between Power Strips which allows this.

Tip: Skipping openings will reduce cost.

Six Person Example

Provides two (2) plugs per person at the Table for Two at each end and four (4) plugs per person at the Table for Two in the middle of the setting. Requires quantity of one (1) package of four (TS8PS4PKREV) and one (1) building outlet to power up table.

Eight Person Example

Provides two (2) plugs per person. Requires quantity of one (1) package of four (TS8PS4PKREV) and one (1) building outlet to power up table.

Bivi Modular-Hardwire Power, Two Circuit

Modular Powerways, TS8P260, have two Power Strips for a total of eight simplex receptacles (power outlets).

Bivi tables can fit one powerway per Trough, located at the top of the Trough.

When additional Bivi plus One or plus Two tables are added a Two Circuit Modular Harness will be required, TS8P2H.

Bivi Modular-Hardware Power, Two Circuit, continued

Modular Hardware Power can support a maximum of six (6) Powerways, TS8P260, per Power Infeed, Two Circuit, TS8PBT2. After six (6) Powerways, a new power infeed will be required.

Tip: For modular and hardwire powerways, see page 108.

Tip: For modular harnesses, see page 109.

How to Select Monitor Arms for Bivi Tables

Bivi Table-Mounted Monitor Arm Brace:

The new Bivi Table-Mounted Monitor Arm Brace, **TS8TMBRAC**, supports Steelcase worktools monitor arms on Bivi tables. This brace is compatible with 48", 60", and 72" Bivi seated and standing applications (some limitations apply depending on the application). Below are step by step instructions on how to order your Bivi Table-Mounted Monitor Arm Brace for your Bivi tables.

1

Know what Bivi application you have and which monitor arms are applicable

Listed on page 71 are all of the monitor arm style numbers that are and are not compatible with particular Bivi applications.

▶ See page 71

2

Decide which monitor arm you want on your Bivi Table.

After you know your table size and Bivi application, you will need to select your monitor arm. Worktools has a wide range of monitor arms and the Bivi Table-Mounted Monitor Arm Brace is compatible with CF single monitor arms.

Example

CF Plus single monitor arm: **CFPLUS** (Monitor arm style numbers can be found in the *Worktools Specification Guide*)

3

Order your Bivi Table-Mounted Monitor Arm Brace.

Once you know your Bivi application and the Monitor Arm you would like that is compatible you can order your Bivi Table-Mounted Monitor Arm Brace. This brace is not compatible with worksurfaces and support brackets manufactured prior to August 31, 2016.

Style number: **TS8TMBRAC**

Required selections:

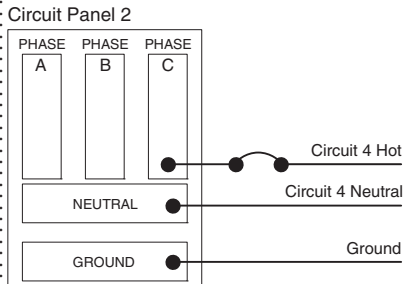

- Width
 - 48"
 - 60"
 - 72"
- Mounting plate
 - CF

Bivi Four-Circuit Modular-Hardwire Power offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

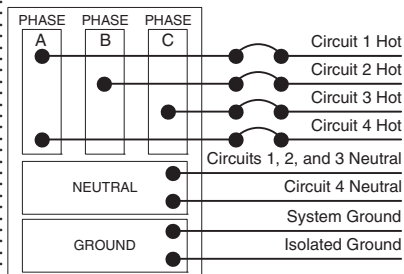

- Black = Four-circuit, 3+1
- Brown = Four-circuit, 2+2
- Rust = Three-circuit, separate neutral (3SN)
- Shared neutral = 10 gauge
- Non-shared neutral = 12 gauge
- Hot wires = 12 gauge

Four-Circuit, 3+1

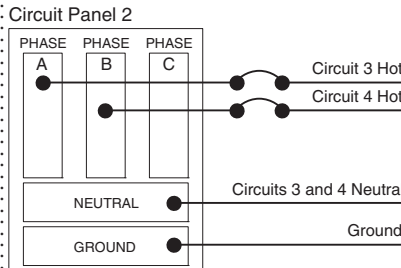

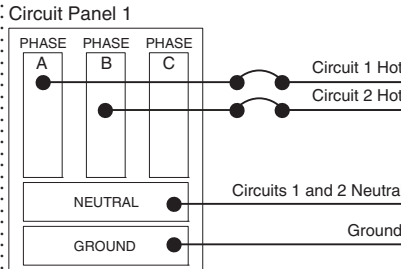

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase Circuit Panel

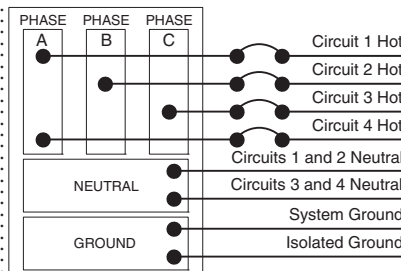

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

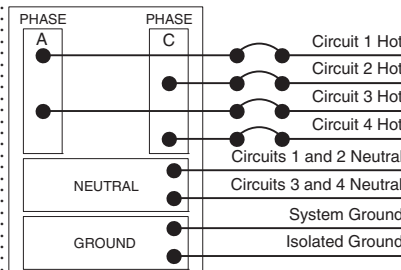

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and are supported with their own shared neutral and ground.

Single 3-Phase Circuit Panel

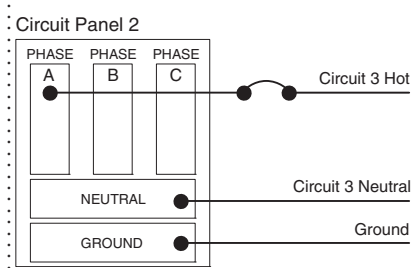

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase Circuit Panel

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate neutral

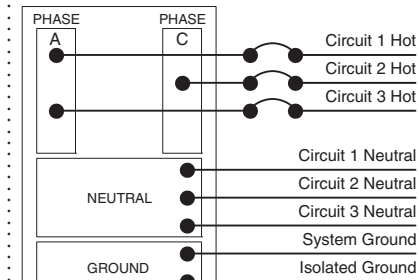

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported with its own neutral and ground.

Single 3-Phase Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance: The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

► See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit
Laptop (Low)	30	0.25	120	64
Laptop (High)	100	0.83	120	19
CPU/Desktop Computer (Low)	65	0.54	120	30
CPU/Desktop Computer (High)	150	1.25	120	13
Monitor (Low)	15	0.13	120	128
Monitor (High)	80	0.67	120	24
Phone	5	0.04	120	384
High Power Tablet	10	0.08	120	192
Lower Power Tablet	45	0.38	120	43
Desktop Printer	40	0.33	120	48
42" LCD Screen	120	1.00	120	16
Projector (Small)	50	0.42	120	38
Projector (Medium)	250	2.08	120	8
Projector (Large)	800	6.67	120	2
Desktop Lamp	20	0.17	120	96
Large Printer/Copier	1600	13.33	120	1
Small Printer/Copier	800	6.67	120	2
Paper Shredder (Small)	250	2.08	120	8
Paper Shredder (Large)	800	6.67	120	2
Desktop Fan	25	0.21	120	77
Standing Fan	125	1.04	120	15
Coffee Maker (Low)	500	4.17	120	4
Coffee Maker (High)	1500	12.50	120	1
Microwave (Low)	600	5.00	120	3
Microwave (High)	1000	8.33	120	2
Refrigerator (Low)	200	1.67	120	10
Refrigerator (High)	1500	12.50	120	1
Vacuum (Low)	200	1.67	120	10
Vacuum (High)	1500	12.50	120	1
Space Heater (Low)	400	3.33	120	5
Space Heater (High)	1500	12.50	120	1
Height-Adjustable Desk (Low Power Consumption)*	200	1.67	120	10
Height-Adjustable Desk (High Power Consumption)*	550	4.58	120	3

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

** Refer to the Height-Adjustable Desks Specification Guide for specific product information.*

Cable Capacities

Four Circuit

	Outside Diameter of Cable = .223 (5E)			Outside Diameter of Cable = .310 (6A)		
	Max Capacity (5E) without Power	Max Capacity (5E) with 1- or 2-Circuit Power	Max Capacity (5E) with 4-Circuit Power	Max Capacity (6A) without Power	Max Capacity (6A) with 1- or 2-Circuit Power	Max Capacity (6A) with 4-Circuit Power
A Power Infeed Cover	149	144	141	98	94	92
B Trough	104	75	55	75	63	45
C Utility Pole	151	146	143	102	98	96

Note: The TIA recommends a maximum fill rate of 40%.

Note: When routing cables through any combination mentioned above, the capacity is equal to the smallest number.

Distribution and Access

Four Circuit

Power Blocks are placed in the bottom half of the Bivi Trough, are dual-sided, and are accessible on both sides of the Trough. Modular Harnesses are used to distribute power through the bench.

Standard-Capacity Power includes one Power Block, provides back-to-back power, and accepts two receptacles per side. The Standard-Capacity Power Block allows access to power in the sides of the Bivi Trough.

Accessory Power Strips can be placed at seated or standing height tables for easy user access. Power and data, power and USB, or power only are available.

Modular Harness is used to connect power blocks and distribute power through the bench.

Four-Circuit Powerway connects to a Four-Circuit Modular Power Block or Connector Power Block and is available in three wiring schematics with multiple line options. As with the Plug and Play Powerways and Modular-Hardwire Two-Circuit Powerways, the Four-Circuit Powerway mounts into the floor of the Trough.

Wiring and Cabling

Modular Power Block Standard-Capacity Power includes one power block, provides back-to-back power, and accepts two receptacles per side.

Power Block Connector, Four-Circuit (TS8PHBC) may be used with a Four-Circuit Modular Powerway (TS8P4QUAD) in place of the Standard-Capacity Power Block to keep the sides of the Bivi Trough covered for a clean aesthetic.

Four-Circuit Modular Powerway (TS8P4QUAD) is available in three wiring schematics with multiple line options.

Chicago Hardwire Box is available. It accommodates two receptacles per side.

Duplex Receptacles are available in 15-amp, isolated, or system ground and are available in three wiring schematics with multiple line options. Receptacles have two outlets and are ordered separately.

Duplex Receptacles

are available in nine plastic colors:

6000	Black
6009	Arctic White
6249	Platinum Solid
6527	Merle
6651	Tungsten
6652	Titanium
6654	Sand
6697	Fog
6B03	Red

Modular Flexible Receptacles are available in 15-amp, isolated or system ground, with multiple line options. Flexible Receptacles offer easy access to three outlets.

Controlled Receptacle must be indicated when tying into the building management system. Duplex Receptacles have an option for a factory permanent, pad stamp power icon symbol. Symbol aids in Title 24 compliance. ▶ See *Surface Materials*, page 484, for symbol ink colors.

USB Receptacles are 2.1 amperage quick charge which is a 50% faster charge than the 1.0 amperage version. USB Receptacles are available in three wiring schematics with multiple line options. USB Receptacles offer easy access to two charging ports. Each port provides 1 amperage of output. USB Receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Bezel Receptacle Cover installs in the sides of Bivi Trough, providing access to the Four-Circuit Duplex Receptacles.

Modular Harnesses are used to connect power blocks.

▶ See *Power Routing Harness Chart*, page 62, to determine lengths needed.

Power Infeed Cover can be used to conceal conduit and cables along the floor.

Two Power Strips are available: rectangular and pyramid. Each have options of power, data, and USB ports. The Rectangular Power Strip has an option for clamp-on mount that works well in the Bivi table scallop at both seated and standing heights.

Rectangular Power Strip with clamp-on mount works on worksurfaces that range from 1/2" to 2 1/2" thick.

Trough-Mounted Data Access, TS8DATA, snaps into a 48"W, 60"W, or 72"W Trough and provides an opening to fit standard sized communication modules.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Power Routing Harness Chart

Building Interface

Four Circuit

Building power and data can interface with Bivi tables from the floor, wall, column, or ceiling. Both modular and hard-wire infeeds are available.

Utility Poles attach to the T-slot on the Bivi Leg. The Utility Pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.
► Specifying, page 116

An Infeed Cover is available to conceal the power and data.
► Specifying, page 118

Infeeds can enter Bivi tables at either end or anywhere along the Trough.

Infeed Cover

Wiring and Cabling

Hardwire-to-Modular Power Infeed is available in 6, 12, and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the Trough and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Straight/
Flush

90°

Modular Junction Box Faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight flush and 90° faceplates are available. A 90° Junction Box Faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

New York Power Infeeds are available. The junction box is mounted to the underside of the Trough. A 50" harness is included to reach the first power block in the Trough. If a shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-Modular Infeeds can also be used.

Hardwired/Chicago Power Infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

Base Power Infeeds are not available.

Power and data can enter the Trough through the end or in the middle of a run. ▶ See *Cable Capacities*, page 59.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

Utility Pole connects to the T-slot in the Bivi Leg.

Non-PVC modular electrical components are the standard offering with the option to order PVC on some components. For those trying to gain the LEED Innovation and Design credit, non-PVC should be selected.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Components and Accessories

Half-Round Top, Transaction Top, End Hanging Top, Gallery Panel, Bottom Shelf, Hook, and Media Support System

Half-Round Top attaches to the end of a Bivi Table for Two.
▶ Specifying, page 121

CF monitor arms are available with Bivi Bracket to assemble into the trough.

Bottom Shelf attaches to the leg of a Bivi table. The Bottom Shelf can hold a CPU, backpack, computer bag, and other small items.
▶ Specifying, page 130

Hooks attach to the leg of a Bivi table either under the desk or on the outside. Hooks also attach to a Bivi Arch. Hooks come in two-packs or four-packs.
▶ Specifying, page 130

Leg Infill and Leg Modesty are available to use on the Bivi Leg to close off the end-of-runs. They can be used separately or together.

Adding a Half-Round Top at the ends of a Bivi Table for Two creates a conference table.

Bivi Leg is available to order separately for reconfiguration purposes. In an existing benching application, you can take apart the table and add a leg to create two freestanding tables.
▶ Specifying, page 90

Bivi Slim Leg works alone to create a Slim Spine or in combination with the Bivi Leg.
▶ See pages 14 for *Bivi Spine Stability Guidelines*.

Leg

Product Details

CF Plus can be mounted to Bivi with the Bivi Table-Mounted Monitor Arm Brace. Specify Adaptor Block (CF) when ordering Brace. Specify Bivi Bracket when ordering **CFPLUS**.

Half-Round Top will not work with a stand alone 48"W or 60"W Bivi Table for Two, due to stability test guidelines. Half-Round Top is approved to work with 72"W Bivi Table for Two.

Half-Round Top is not recommended to be used on a standing height Bivi Table for Two. The overall width is 4" wider than the span of two Full Top depths and the depth of a Bivi Trough. At standing height, the Half-Round Top will overhang the footprint of two Full Tops by 2" on either side.

Half-Round Top will work with 48"W, 60"W, or 72"W Bivi with additional product added to the other end. For example, add a Bivi table or Trunk to a 48" Bivi Table for Two.

Transaction Top attaches at the end of a 60"W Bivi Table for Two at standing height to create a team table or easy collaboration spot.

Mini Transaction Top attaches at the end of two 21"D Tops at standing height.

Transaction Top is not recommended to be used on a Bivi Table for One. It overhangs the Table for One footprint and creates unwelcome edges.

Transaction Top is not recommended to be used at a seated height Bivi Table for Two. The overall width is 56" to match the two Full Tops in a Bivi Table for Two at standing height. This is 4" narrower than a Half-Round Top due to no Trough in the center of a Bivi Table for Two at standing height.

End Hanging Top is a 60"W x 18"D top that attaches to the end of a seated height Bivi table run. It is designed to provide extra workstations in a smaller foot print, and to keep the square aesthetic of Bivi.

End Hanging Top is not recommended to be installed on a Bivi Standing Height Table for Two. Brackets are designed to attach into the leg and not the Short or Tall Arch.

End Hanging Top will not work with stand alone 48"W or 60"W Bivi Table for Two due to stabilizing guidelines. End Hanging Top is approved to work with 72"W Bivi Table for Two.

Mid Transaction Top attaches at the end of a 48"W Bivi Table for Two at standing height.

End Hanging Top cannot be installed on a Bivi Table For One. End Hanging Top overhangs past the Table for One and creates unwelcome edges.

Back and side edges of End Hanging Top have an edge band that is defaulted to match the laminate surface.

Grain direction of End Hanging Top is always side to side.

End Hanging Top works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

Gallery Panel is a panel that attaches to the Bivi Leg at the end of a run to conceal the understructure of the Bivi frame when a closed visual is desired.

Gallery Panel works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

Gallery Panel is not recommended to be installed on a Bivi Standing Height Table for Two. Gallery Panel is only 28½"H which would lead to a gap from the panel to the top at standing height.

Gallery Panel cannot be installed on a Bivi Table For One. The Gallery Panel overhangs past the Table for One and creates unwelcome edges.

Back and side edges of Gallery Panel have an edge band that is defaulted to match the laminate surface.

Grain direction is always specified up and down (waterfall) to work with the grain direction of the Bivi Full Tops.

Bivi Monitor Arm Brace Matrix

48" Seated and Standing

60" and 72" Seated and Standing

Monitor Arm

CF

CFPLUS (single arm, no pole)	Yes	Yes
CFPLUS (single arm, on pole)	Yes	Yes
CFPLUS (dual arm, on pole)	Yes	Yes
CFPLUS (dual arm, on pole with laptop support)	Yes	Yes
CFSTATIC (single, triple, triple wide static configurations)	No	Yes

Monitor arms and laptop supports with C-clamp brackets are not approved on Bivi tables.

Use the table-mounted monitor arm brace to attach monitor mounts. This brace is compatible with seated- and standing-height applications of Bivi tables.

*Tip: Specify Adapter Block (CF) when ordering Bivi Monitor Arm Brace and specify Bivi Bracket when ordering **CFPLUS**.*

Components and Accessories, Half-Round Top, Transaction Top, End Hanging Top, Gallery Panel, Bottom Shelf, Hook, and Media Support System, continued

Product Details

Half-Round Top will not work with a stand alone 48"W or 60"W Bivi Table for Two, due to stability test guidelines. Half-Round Top is approved to work with 72"W Bivi Table for Two.

Half-Round Top is not recommended to be used on a standing height Bivi Table for Two. The overall width is 4" wider than the span of two Full Top depths and the depth of a Bivi Trough. At standing height, the Half-Round Top will overhang the footprint of two Full Tops by 2" on either side.

Half-Round Top will work with 48"W, 60"W, or 72"W Bivi with additional product added to the other end. For example, add a Bivi table or Trunk to a 48" Bivi Table for Two.

Transaction Top attaches at the end of a 60"W Bivi Table for Two at standing height to create a team table or easy collaboration spot.

Mini Transaction Top attaches at the end of either two Upper Dual Tops or two 21"D Tops at standing height.

Transaction Top is not recommended to be used on a Bivi Table for One. It overhangs the Table for One footprint and creates unwelcome edges.

Transaction Top is not recommended to be used at a seated height Bivi Table for Two. The overall width is 56" to match the two Full Tops in a Bivi Table for Two at standing height. This is 4" narrower than a Half-Round Top due to no Trough in the center of a Bivi Table for Two at standing height.

End Hanging Top is a 60"W x 18"D top that attaches to the end of a seated height Bivi table run. It is designed to provide extra workstations in a smaller foot print, and to keep the square aesthetic of Bivi.

End Hanging Top is not recommended to be installed on a Bivi Standing Height Table for Two. Brackets are designed to attach into the leg and not the Short or Tall Arch.

End Hanging Top will not work with stand alone 48"W or 60"W Bivi Table for Two due to stabilizing guidelines. End Hanging Top is approved to work with 72"W Bivi Table for Two.

Mid Transaction Top attaches at the end of a 48"W Bivi Table for Two at standing height.

End Hanging Top cannot be installed on a Bivi Table For One. End Hanging Top overhangs past the Table for One and creates unwelcome edges.

Back and side edges of End Hanging Top have an edge band that is defaulted to match the laminate surface.

Grain direction of End Hanging Top is always side to side.

End Hanging Top works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

Gallery Panel is a panel that attaches to the Bivi Leg at the end of a run to conceal the understructure of the Bivi frame when a closed visual is desired.

Gallery Panel works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

Gallery Panel is not recommended to be installed on a Bivi Standing Height Table for Two. Gallery Panel is only 28½"H which would lead to a gap from the panel to the top at standing height.

Gallery Panel cannot be installed on a Bivi Table For One. The Gallery Panel overhangs past the Table for One and creates unwelcome edges.

Back and side edges of Gallery Panel have an edge band that is defaulted to match the laminate surface.

Grain direction is always specified up and down (waterfall) to work with the grain direction of the Bivi Full Tops.

Monitor arms and laptop supports with C-clamp brackets are not recommended on Bivi tables. Use the table-mounted monitor arm brace to attach monitor mounts such as CF to Bivi. This brace is compatible with seated- and standing-height applications of Bivi tables.

Table-Mounted Monitor Arm Brace is installed in the scallop of the top and does not interfere with the trough. This allows the brace to be used at seated height and standing height.

Table-Mounted Monitor Arm Brace can be used with a screen or a modesty panel installed.

CF	Style Number
Single arm, no pole	CFPLUS

On a Bivi Table for One, the monitors cannot be rotated to where they are hanging over the other side due to possible tipping.

Triple wide monitor arms are available on Bivi Full Tops. The CF triple wide monitor arms can be specified on Bivi standing and seated height 60" and 72" applications.

Style numbers FPAEC1BIVI, FPAEC2BIVI, and FPAELC2BIVI can only be used at seated height without a modesty panel installed.

Media Support System consists of three parts — Monitor Mount, Shroud, and Shelf — that can have matching or contrasting paint colors. Each item can be ordered separately or as a full kit (package).

Attachment: Media Support System can only be attached to a Bivi Tall Arch. It cannot attach to a Bivi Short Arch or to the lower T-slot in a Bivi Tall Arch.

Monitor Dimensions and VESA Patterns:

Media Support System can accommodate monitors ranging from 32" to 43", and less than 50 pounds. System accommodates monitors with the following VESA Patterns:

- 75 mm x 75 mm
- 100 mm x 75 mm
- 100 mm x 100 mm
- 200 mm x 100 mm
- 200 mm x 200 mm
- 300 mm x 200 mm
- 300 mm x 300 mm
- 400 mm x 200 mm
- 400 mm x 400 mm

A grommet opening comes standard in the Media Support Shelf, and an additional grommet can be installed in the Bivi Full Top to manage cables and gain easier access to power.

Media Support Shelf can be used as a way to manage cords and hold small devices such as remotes, display devices, and electronics.

Bivi Trough Accessory Install Guide

48" Bivi Tables

48" Bivi Table Trough has eight (8) predrilled hole patterns in the Trough floor to accept accessories.

Tip: End locations are not recommended dual monitors in the 48" or 60" Bivi Tables.

Tip: End locations are not recommended single monitor arms if power is installed.

60" and 72" Bivi Tables

60" and 72" Bivi Tables Trough has twelve (12) predrilled hole patterns in the Trough floor to accept accessories.

Tip: End locations are not recommended for dual monitors in the 48" or 60" Bivi Tables.

Tip: End locations are not recommended for single monitor arms if power is installed.

Application Topics

Conference setting can be created by a Bivi 4-pack with an End Hanging Top on both ends to make it into a 6-pack.

Collaboration setting can be created by a Bivi 2-pack with End Hanging Top on one end and with a Media Support Mount and Media Support Shroud on the other side to provide a meeting space.

Gallery Panels are used on each side of a setting when a closed finished visual is desired.

Tech seated setting can include a Bivi 6-pack at seated height with dual monitors on each top and with modesty panels attached.

Tech standing setting can include a Bivi 6-pack at standing height with dual monitors on each top and with modesty panels attached.

Media Support System can support two full systems with monitors on a single Bivi Tall Arch. If mounted on a standing height table for two, Media Support System requires a transaction top as a counterweight, for stability.

Media Support System cannot be installed on a seated height Bivi For Table Two.

Sarto Screens

Sarto Centered Screens

For Use with Bivi

Tip: Fabric is applied horizontally on the screen.

Rumble Seat, Supports, and Hoodie

Rumble Seat

Tip: Rumble Seat only fits within a 48"W or 60"W Bivi Table for Two or Table plus Two.

Tip: Rumble Seat fabric relaxes with use creating comfort wrinkles. If the least amount of comfort wrinkles is desired, Congent: Connect fabric is recommended.

Tip: Contrasting seat is available as an option on all sizes of the Rumble Seat. Inner back, outer back, and arms will match each other.

Tip: Table Frame Attachment Bracket is used to attach the 48"W or 60"W Rumble Seat to a Bivi table frame in place of a Full Top in a Table for Two or Table plus Two. 36"W Rumble Seats do not have Table Frame Attachment Bracket option since this size cannot be attached to a table frame.

Tip: 36"W, 48"W, and 60"W Rumble Seats have a Freestanding Legs option.

Tip: Rumble Seats TS8RS, manufactured on 5/22/2017 or after only work with Freestanding Legs TS8RSL2 and Table Frame Attachment Brackets TS8RSTA, manufactured on 5/22/2017 or after.

Electrical Components

One Circuit

Plug and Play Power Strips, One Circuit

Tip: The Plug and Play Power Strips USB option provides three simplex receptacles and one USB port with two USB plugs per strip. The USB option is always located in the fourth port location.

Tip: Plug and Play Power Strips are a UL recognized powered table system component per UL962.

Tip: Plug and play power strips do not work on the bottom half of Bivi cable troughs with style numbers beginning with TS8, manufactured on or after August 31, 2016.

Standard Includes	Required to Specify
<ul style="list-style-type: none"> ▶ Need help? Tackable Screens

Freestanding

Trough mount

Tip: 36"W screens do not work on 60"W Bivi tables.

Tip: Plastic is not available for Trough mount base.

Tip: Trough mounted screens can be converted to free-standing by ordering the freestanding base. See Service Parts for more information.

Tip: 36"W screen is intended for 48"W Bivi tables. 48"W screen is intended for 60"W Bivi tables. 60"W screen is intended for 72"W Bivi tables. This leaves 6" on each side for a future side storage to be added without having to add a new screen insert. If no gaps are desired, a 48"W screen may be used on a 48"W table, a 60"W screen may be used on a 60"W table, and a 72"W screen may be used on a 72"W table.

Overview of FrameOne with Rail

Dual-sided base units

include an integrated rail and legs. Overall depths are 48"D or 60"D. Widths range from 48"W to 96"W. Dual-sided base units can be used independently or combined with dual-sided extensions to lengthen the bench.

Dual-sided extension units

include an integrated rail and an intermediate leg, and connect to dual-sided base units. Dual-sided extensions can be added to each other to lengthen the bench. Dual-sided extensions are offered in the same dimensions as the dual-sided base units.

End counters can be placed at either end of a dual-sided base or extension unit, and allow a place for printers, additional touch-down space for users, etc. End counters are available 18"D or 24"D and 48"W or 60"W.

Single-sided base units

include an integrated rail and legs, and are available in two depths – 25½"D or 31½"D. Widths range from 48"W to 96"W. Single-sided base units can be used independently or combined with single-sided extensions to lengthen the bench. Single-sided base units can also be used between dual-sided units to get around a column.

Single-sided extension units

include an integrated rail and an intermediate leg, and connect to a single-sided base unit. Single-sided extensions can be added to each other to lengthen the bench. Dimensions are the same as single-sided base units.

Universal screens

are mounted with bayonets to the rail on both dual- and single-sided base and extension units. 13½"H and 19½"H screens have widths of 24"W-96"W.

Centered screens

are mounted to the rail on both dual- and single-sided base and extension units. 12"H and 19½"H screens have widths of 48"W to 84"W. 24"H screens have widths of 48"W to 72"W.

Overview of FrameOne without Rail

Dual-sided base units

include two end legs. Overall depths are 48"D or 60"D. Widths range from 48"W to 96"W. Dual-sided base units can be used independently or combined with dual-sided extensions to lengthen the bench.

Dual-sided extension units include an intermediate leg and connect to dual-sided base units. Dual-sided extensions can be added to each other to lengthen the bench. Dual-sided extensions are offered in the same dimensions as the dual-sided base units.

End counters can be placed at either end of a dual-sided base or extension unit, and allow a place for printers, additional touch-down space for users, etc. End counters are available 18"D or 24"D and 48"W or 60"W.

Universal screens are mounted with bayonets to the dual-sided base and extension units. 13½"H and 19½"H screens have widths of 24"W–96"W.

Stability Guidelines

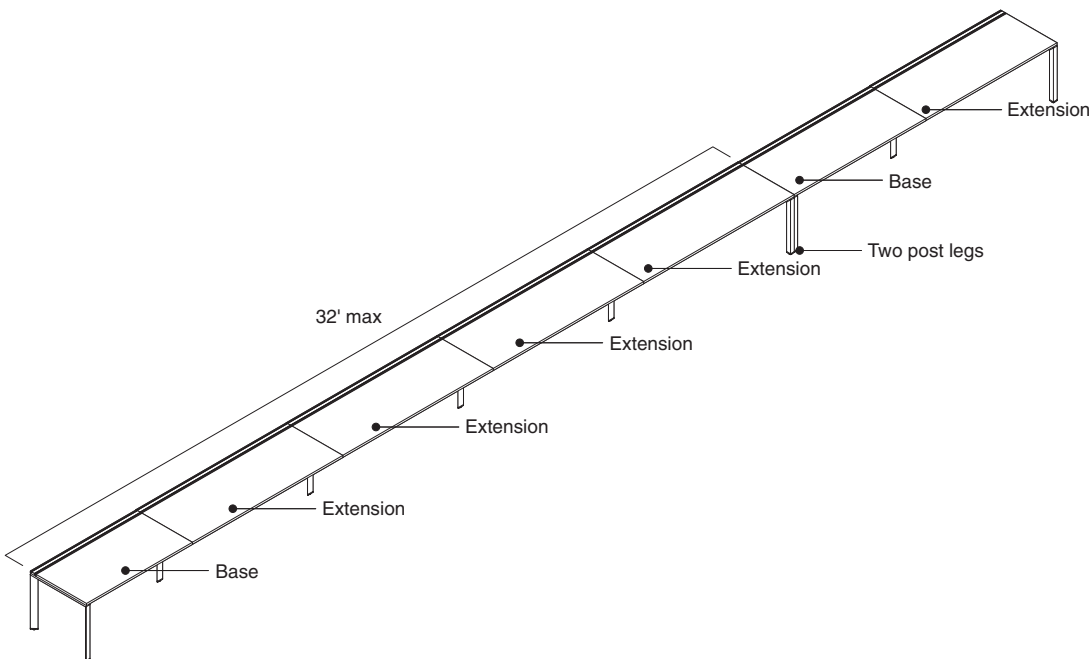

Maximum run of dual-sided base and extensions is 32'.

If dual-sided run is longer than 32', a base is required mid run. One connection kit (base leg to base leg) must be ordered to connect the two post (or loop) legs together.

Maximum run of single-sided base and extensions is 32'.

If single-sided run is longer than 32', a base is required mid run. One connection kit (base leg to base leg) must be ordered to connect the two post (or loop) legs together.

Stability Guidelines, continued

If specifying a 24"D single-sided unit with 19"H glass screens, you must specify a run with all base units. No extension units are permitted with 24"D single-sided units with 19"H glass screens. Extension units may be used with 12"H glass screens.

A single-sided base allows efficient planning, providing the ability to work around architectural obstructions. Two connection kits (base leg to base leg) must be ordered to connect the dual-sided post (or loop) legs to the single-sided post (or loop) legs.

Horizontal Sight Lines

Sight lines are the imaginary lines that run through the vertical space, creating the horizontal continuity that relates the different components to one another and the system as a whole. There are three significant sight lines in the horizontal visual field of aesthetic. The height of the bench at 28 1/2", the height with the 12" screen at 40 1/2", and the height with the 19 1/2" screen at 48".

Dual-Sided Bases, Dual-Sided Extensions, and End Counters with Rail

Dual-sided bases and extensions connect together to create benching applications. Overall depths are 48"D or 60"D. Surfaces are 3/4"-thick with a wood core and are supported by a frame and legs. Widths range from 48"W to 96"W.
 ▶ Specifying, page 194

Post or loop legs are available with dual-sided base units. Post legs come standard and loop legs are available as an option. Legs are fixed-height with top of surface at 28 1/2"H.

Cutout is optional on dual-sided base and extension units.

Integrated rail is located in center of dual-sided base and extension units and allows for the mounting of centered screens, monitor arms, lights, power strips, and other worktools.

Intermediate leg is included with dual-sided extension units. Leg is fixed-height with the top of surface at 28 1/2"H. Leg supports adjacent surface.

Power and data access door is optional on dual-sided base and extension units.

1/2" gap between rail and surface accommodates worktools and cords.

End counters are available in 18"D or 24"D, and widths of 48"W and 60"W. They can be added to the end of a dual-sided bench to provide additional surface space for printers, additional touchdown space for users, etc.

Leg glides have 1 3/8" of adjustment for uneven floors.

Actual Dimensions

A	24" or 30" (to centerline of integrated rail)
B	48", 60", 66", 72", 78", 84", or 96"
C	48" or 60"
Thickness	3/4"

Tip: Actual worksurface depths are 22" and 28".

Product Details

Two leg types are available on dual-sided base units. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg is included and used on dual-sided extension units. Leg covers are available to provide a different visual and to conceal power/data infeeds at this location. Lower trays or simple trays are recommended when leg covers are used.

24\"/>

Dual-sided base units include two legs. The second leg is used at the end of the bench or when 32' has been reached.

► See *Stability Guidelines*, page 150, for more information.

Power and data access door is optional on all dual-sided base and dual-sided extension surfaces. One door is centered on the surface and allows user access to power and data outlets as well as cord management. When optioned on 96\"/>

Cutouts are optional on all dual-sided base and dual-sided extension surfaces. One cutout is centered on the surface and allows user access to power and data outlets, as well as cord management. When optioned on 96\"/>

Trays are available on dual-sided base and extension units. There are three tray options.

Upper tray is standard and provides under the surface cord management, data termination, and conceals the power blocks and conduit.

The lower tray is optional and always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables creating a clean visual.

Dual-sided extension units include an extension tray when lower tray is optioned.

Simple tray is optional in place of upper or upper and lower trays. Simple tray accommodates standard capacity power only.

Power covers can be added to simple trays to provide a decorative trim around receptacles. Power covers are available for dual- and single-sided applications.

If power covers are not selected, any connection points on modular power blocks not being used by a harness, infeed, or connector must be filled with dust covers. Order style number FMVBK.

End caps can be added to simple trays and are sold in pairs. End caps are painted metal.

Extension trays conceal conduit or wires between two extensions, or a base and an extension, using simple trays. They also allow for wires or conduit to be brought up through the bottom. Extension trays can be added to 96\"/>

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Data kit is recommended for use with simple trays only.

Omit trays is an option if trays are not needed. However, if power and data access door or cutout is selected, a tray is required. *Tip: It is not recommended to mix tray types within one run of benches.*

Dual-sided base

Dual-sided extension

96"W dual-sided base and extension units

include two 48"W frames and two 96"W surfaces. If power and data access door is selected, each 96"W surface will have two doors.

Storage must be at least 6" from centerline when trays are used.

Storage can nest under the bench. The clearance is 25 1/2". Except when within 3" of an intermediate leg, the clearance is 25".

Storage can nest under end counters. There is 25" of clearance under cantilever.

Connections

Floor anchor brackets (FMFA) are available to secure a dual-sided base to the floor to prevent movement for power infeed applications as dictated by local codes. Brackets are typically only used when the dual-sided unit is not connected to an extension.

Base leg to base leg connection kit

is required when two dual-sided base legs are adjacent to each other or when transitioning from a dual-sided base unit to a single-sided base unit. Connection occurs at the top of the legs, under the surface, and at the glide location.

Wiring and Cabling

Modular power, in a dual-sided base or extension unit without trays, must be secured with a strain relief bracket. Order style number FMVBK for each unit.

Power components are ordered separately.

Dual-Sided Bases and Extensions with Continuous Top

Dual-sided bases and extensions with continuous top are ideal for collaborative applications, like project teams and meeting rooms.

Dual-sided bases and extensions with continuous top connect together to create benching applications. Overall depths are 48"D or 60"D. Surfaces are 3/4"-thick with a wood core and are supported by a frame and legs. Widths range from 48"W to 96"W.
 ▶ Specifying, page 202

Dual-sided bases and extensions with continuous top do not have a center rail.

Post or loop legs are available with dual-sided base units. Post legs come standard and loop legs are available as an option. Legs are fixed-height with top of surface at 28 1/2"H.

Intermediate leg is included with dual-sided extension units. Leg is fixed-height with the top of surface at 28 1/2"H. Leg supports adjacent surface.

Power and data access doors are standard on dual-sided base and extension units with continuous top.

End counters are available in 18"D or 24"D, and widths of 48"W and 60"W. They can be added to the end of a continuous top bench to inset the leg and accommodate a larger group.

Leg glides have 1 3/8" of adjustment for uneven floors.

Actual Dimensions

A	24" or 30" (to centerline)
B	48", 60", 66", 72", 78", 84", or 96"
C	48" or 60"

Product Details

Two leg types are available on dual-sided base units. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg is included and used on dual-sided extension units. Leg covers are available to provide a different visual and to conceal power/data infeeds at this location.

24\"/>

Dual-sided base units include two legs. The second leg is used at the end of the bench or when 32' has been reached.
 ▶ See *Stability Guidelines*, page 150, for more information.

Power and data access door is standard on all dual-sided base and dual-sided extension surfaces with continuous top. Two doors are centered on the surface and allow user access to power and data outlets as well as cord management. When optioned on 96\"/>

Simple tray is standard on benches with continuous top and includes power covers. Bases include one pair of end caps. Extensions include extension tray.

Simple tray accommodates standard capacity power only.

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Data kit is recommended for use with simple trays only.

Storage must be at least 6\"/>

Storage can nest under the bench. The clearance is 25 1/2\"/>

Storage can nest under end counters. There is 25\"/>

Connections

Floor anchor brackets (FMFA) are available to secure a dual-sided base to the floor to prevent movement for power infeed applications as dictated by local codes. Brackets are typically only used when the dual-sided unit is not connected to an extension.

Base leg to base leg connection kit is required when two dual-sided base legs are adjacent to each other or when transitioning from a dual-sided base unit to a single-sided base unit. Connection occurs at the top of the legs, under the surface, and at the glide location.

Value Package Benches with and without Rail

Value package benches offer FrameOne bench features at a lower price than when selected individually.

Value package benches are available in four or six packs with and without the rail. Benches are dual sided in overall depths of 48" or 60". Benches include a base with legs, and the appropriate number of extensions and intermediate legs.
▶ Specifying, page 206

Simple tray is standard on value package benches and does not include power covers, end caps, or extension trays. These can be specified separately.

Modular power is specified separately.

Cutouts are standard on value package bench surfaces. One cutout is centered on each side of the surface and allows user access to power and data outlets, as well as cord management.

Actual Dimensions

A	24" or 30" (to centerline of integrated rail)
B	96", 120", 144", 180", or 216"
C	48" or 60"
Thickness	3/4"

Tip: Actual worksurface depths are 22" and 28" with rail, and 23" and 29" without rail.

Product Details

Two leg types are available on benches. Post is the standard, and loop leg is optional. A pair of legs is included with each unit.

Intermediate leg(s) is included and used on benches. A leg cover is available, ordered separately, to provide a different visual and to conceal power/data infeeds at this location.

24\"/>

Cutouts are standard on value package bench surfaces. One cutout is centered on each surface and allows user access to power and data outlets, as well as cord management.

Simple tray is standard and does not include power covers, end caps, or extension trays. These can be specified separately. Simple tray accommodates standard capacity power only.

Power covers can be added to simple trays to provide a decorative trim around receptacles.
▶ Specifying, page 216

If power covers are not selected, any connection points on modular power blocks not being used by a harness, infeed, or connector must be filled with dust covers. Order style number FMVBK.

End caps can be added to simple trays and are sold in pairs. End caps are painted metal.

▶ Specifying, page 217

Extension trays conceal conduit or wires between two extensions, or a base and an extension, using simple trays. They also allow for wires or conduit to be brought up through the bottom. Extension trays can be used with or without intermediate leg covers.

▶ Specifying, page 216

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

▶ Specifying, page 449

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMA/Decora style data plates.

Storage must be at least 6" from centerline when trays are used.

Storage can nest under the bench. The clearance is 25 1/2". Except when within 3" of an intermediate leg, the clearance is 25".

Storage can nest under end counters. There is 25" of clearance under the cantilever.

Single-Sided Bases and Single-Sided Extensions

Single-sided bases and extensions connect together to create benching applications. Two depths are available—25½"D or 31½"D. Surfaces are ¾"-thick with a wood core and are supported by a frame and legs. Widths range from 48"W to 96"W.

► Specifying, page 210

Post or loop legs are available with single-sided base units. Post legs come standard and loop legs are available as an option. Legs are fixed-height with top of surface at 28½"H.

Intermediate leg is included with single-sided extension units. Leg is fixed-height with the top of surface at 28½"H.

Power and data access door is optional on single-sided base and extension units.

Cutout is optional on single-sided base and extension units.

Integrated rail is located at the back of single-sided base and extension units and allows for the mounting of centered screens, monitor arms, lights, power strips, and other worktools.

½" gap between rail and surface accommodates worktools and cords.

Leg glides have 1⅜" adjustment for uneven floors.

Actual Dimensions

A 25½" or 31½" (to back edge of integrated rail)

B 48", 60", 66", 72", 78", 84", or 96"

Thickness ¾"

Tip: Actual worksurface depths are 22" and 28".

Product Details

Centered Screens

Centered screens provide a boundary element along the bench. They are available in three heights to accommodate varying levels of privacy.

► Specifying, page 222

Product Details

Centered screens with fabric infill are tackable and available in 12"H, 19"H, and 24"H. 12"H and 19"H screens have widths from 36"W to 84"W. 24"H screens have widths ranging from 36"W to 72"W. Frosted glass is also available in heights of 12"H and 19"H and widths from 36"W to 84"W.

Brackets are included with screens. Two brackets are used on 48"W screens. All other widths require three brackets.

Centered screen custom insert kit

allows for use of other infill materials. Screens 36"W to 48"W require the two bracket kit. Screens 60"W to 84"W require the three bracket kit. Infill should not exceed 18½" in height.

Gap is 1" between centered screen and mounting surface.

A 24"D single-sided FrameOne base unit with 19"H glass screens cannot connect to a FrameOne single-sided extension unit.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Surface Materials

Overall Height 13½" or 19½"

Width 48", 60", 66", 72", 78", 84", or 96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Tip: 13½"H screen aligns with a 42"W datum from the floor.

19½"H screen aligns with a 48"W datum from the floor.

Sarto Screens for Use with FrameOne with Rail

Sarto Screens for Use with
FrameOne with Rail

Sarto screens provide a light scale boundary element along the bench. They are available in two modular heights to accommodate varying levels of privacy.

- ▶ Specifying, page 227

Actual Dimensions

Screen Height 12½" or 18½"

Overall Height 13½" or 19½"

Width 24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Tip: Modular 13½"H screen aligns with a 42"W datum from the floor. Modular 19½"H screen aligns with a 48"W datum from the floor.

Tip: Parametric specifications are available for Sarto screens.

Tip: Parametric height specifications define overall height from top of mounting surface to the top of the screen. It is recommended to use CET SmartTools to verify all dimensions.

Product Details

Sarto screens are tackable and available in 13½"H and 19½"H modular sizes. These screens are available in modular widths from 24"W-96"W. Screens can also be specified parametrically.

Brackets and hard stops are included with screens. Two brackets are used on screens 54"W and smaller. Three brackets are used on screens 60"W and larger. Screen brackets are each two pieces, which slide into the channels on the top of the rail. A plastic cap slides over the two pieces to hold the bracket together. The hard stops are then added before sliding the screen onto the brackets.

Gap is 1" between Sarto screen and mounting surface.

Single-Sided Screen Width for 31¹/₂" D Single-Sided Base with Return	67 ¹ / ₂ ", 79 ¹ / ₂ ", or 91 ¹ / ₂ "
Clearance (from bottom of leg)	0" or 15"
Thickness	3/4"

Tip: Boundary screen heights are available parametric from 13¹/₂"H–48"H in 1/16" increments.

Tip: Boundary screen widths are available parametric in 1/16" increments. See Statement of Line pages for available ranges.

Tip: Boundary screen clearance from floor is available parametric from 0"H–15"H in 1/16" increments.

Tip: A 3/8" allowance is deducted from the height shown above to allow for floor variation.

Product Details

Boundary screens attach to single- or dual-sided bases and are available in three different versions; spanning, split, and single-sided.

Spanning boundary screen is a single segment screen that attaches to the frame leg of a 48"D or 60"D dual-sided base. Spanning boundary screens can match the width of the bench or overhang past user edge by 18" on each side. For spanning, the overhang must be equal on both sides.

Split boundary screen is a two segment screen that attaches to the frame leg of a 48"D or 60"D dual-sided base. Split screens may extend past user edge by 18" on each side. Split screens can be different widths on each side.

Split boundary screens can also be used when returns are present on one or both sides of the dual-sided base. Split screen segments are not required to be equal width on both sides of the split. Each segment must be 96"W or less.

If overhang is desired when application includes a return surface, use the parametric option.
Tip: Overhang cannot extend more than 18" from final connection point.

Single-sided boundary screens use one screen segment matching the width of a 25½"D or 31½"D single-sided base. Overhang option is available and can be specified with a modular overhang of 18" or parametric overhang up to 18" in ¼" increments.

Modular

1/16" to 18"
Parametric

Single-sided boundary screens can be used on single-sided base units with attached returns. Screen must be specified as left or right. If overhang is desired, use parametric option.

Greater than 18"

Overhang cannot extend more than 18" from the final connection point on the base.

Connections

Boundary screens come standard with attachment bracket and hardware used for mounting in predrilled locations on the screen. Leg mounting brackets require drilling of pilot holes in FrameOne leg.

Bracket attachment locations are predrilled based on the specified installed height, the clearance from the bottom of the screen to the bottom of the leg, width, and return, if selected. Bracket location assumes worksurface is at 28½" above floor.

Surface Materials

Boundary Screens

- Laminate
- Wood veneer

Edge

- Plastic

Open Line Laminate

can be applied with vertical grain direction only. Open Line laminates are not allowed on screens that are 60"W or wider. Open Line Laminate is only available when specifying modular screens.

Directional and wood grain laminate

can be applied horizontally on spanning and single-sided boundary screens up to 96"W and vertically up to 60"W. Directional and wood grain laminate can only be applied vertically on split boundary screens.

Wood veneer grain direction

can be specified horizontal or vertical for all spanning and single-sided boundary screens. Wood veneer can only be applied vertically on split boundary screens.

Application Topics

Modular boundary screen installed heights align with FrameOne sight lines of 28 1/2"H, 40 1/2"H, or 48"H. Parametric boundary screen installed heights are available 28 1/2"H–48"H in 1/16" increments.

Clearance at the bottom of screen is 0"H or 15"H above the bottom of the leg for the modular option. Clearance at the bottom of the screen for parametric option is 0"H–15"H in 1/16" increments.

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any 3/4"- to 1 1/2"-thick worksurface.
 ▶ Specifying, page 257

Magnetic body accommodates magnets for visual display.

21 1/2" of the screen sits on the worksurface. The depth allows the side screen to work on any 24"D or deeper worksurface.

Finger trigger makes it simple for the end user to move the screen to allow for expansion, compression, increased privacy, or collaboration.

Overhang provides greater peripheral privacy.

Clamp can accommodate 3/4"- to 1 1/2"-thick worksurfaces.

Product Details

Divisio side screen can be made more permanent by adding two screws through the clamp. For work-surfaces 1" thick or less; FrameOne, Ology, Migration, a #10 x 3/4" countersunk screw is recommended. For work-surfaces over 1", a #10 x 7/8" countersunk wood screw is recommended.

Actual Dimensions

Depth	29 1/2" (total), 21 1/2" (sits on worksurface)
Width	1 1/4"
Height	14 1/4" (total), 11 5/8" (above worksurface)

Single-Sided Bases

48"W to 84"W

96"W

Tip: Two cable hangers are included with 48"W to 66"W units, three cable hangers are included with 72"W units, and four cable hangers are included with 78"W to 96"W units.

Tip: 96"W single-sided bases and extensions include an intermediate leg. The 96"W single-sided base or extension is recommended to be used as a two person workstation. It should not be used as a single person work, as the intermediate leg may cause interference with the user. This is only applicable on the single-sided application.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Wood veneer group 2 and 3 upcharges are in addition to wood veneer group 1 upcharge. Composite veneer group 2 upcharge is in addition to composite veneer group 1 upcharge.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Centered Screen Custom Insert Kits

Tip: FMSK2 is for use with screens up to 48"W.

Tip: FMSK3 is for use with screens wider than 48"W.

Tip: These kits are available to accommodate additional materials for centered screens. Infills can be 18½"H or less. For actual dimensions of centered screens, see page 178.

Tip: Custom insert kit can accommodate inserts that are ¼", ⅜", or ½" thick.

Tip: To order a fusion screen, contact your Designtex representative.

Spanning Boundary Screens

For Use with Dual-Sided Bases

	Standard Includes	Required to Specify
▶ Need help? Product details, page 184	<ul style="list-style-type: none"> Screen: High-Pressure Laminate price group 1 or wood group 1 veneer Edge on laminate screen, if selected: plastic Height: 13½"H–48"H Height installed: 28½"H–48"H Width: 48"W–96"W Brackets: paint group 1 	<ol style="list-style-type: none"> Style number Screen size type (see below under Required Selections) Height installed (see below under Required Selections) Screen clearance (see below under Required Selections) High-Pressure Laminate or wood veneer color number for screen Plastic color number for edge on laminate screen, if selected Bench depth Grain direction Paint color number for brackets Options, if selected (see below) <p>▶ See <i>Surface Materials</i>, page 478.</p>

Tip: Screen height is determined by height installed less screen clearance.

Tip: Screen clearance is measured from the bottom of the boundary screen to the bottom of the leg which the screen is attached.

Tip: Open Line laminate is only available when specifying modular screens, and can be applied with vertical grain direction only.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Split Boundary Screens

For Use with Dual-Sided Bases

	Standard Includes	Required to Specify
▶ Need help? Product details, page 184	<ul style="list-style-type: none"> Screen: High-Pressure Laminate price group 1 or wood group 1 veneer Edge on laminate screen, if selected: plastic Height: 13½"H–48"H Height installed: 28½"H–48"H Width: 48"W–96"W Brackets: paint group 1 	<ol style="list-style-type: none"> Style number Screen size type (see below under Required Selections) Height installed (see below under Required Selections) Screen clearance (see below under Required Selections) High-Pressure Laminate or wood veneer color number for screen Plastic color number for edge on laminate screen, if selected Bench depth Grain direction Paint color number for brackets Options, if selected (see below) <p>▶ See <i>Surface Materials</i>, page 478</p>

Tip: Screen height is determined by height installed less screen clearance.

Tip: Screen clearance is measured from the bottom of the boundary screen to the bottom of the leg which the screen is attached.

Tip: Open Line laminate is only available when specifying modular screens.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or *SmartTools*.

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Workstation Design Guidelines and Requirements

Overview

Designed for movement with dynamic seating, adjustable worktools and height-adjustable benches are important for today's office workers.

To determine the best height-adjustable solution, consider these four criteria:

1. **Adjustability Needed**
What is the height range requirement? (seated or sit-to-stand)
2. **Worksurface Size Needed**
What does the physical space look like?
3. **Equipment/Tools Used**
What type of computer equipment and other worktools are being used on the worksurface? (weight capacity)
4. **Use**
What is the height-adjustable desk being used for (individual or shared, touchdown space or full workstation, sit-to-stand or seated)?

⚠ WARNING

Risk of Serious Injury. If not used as intended, moving work-surfaces can pinch or injure people, or damage property. Always follow these Instructions:

1. Keep height-adjustment range free from obstructions above and below the worksurface.
2. Plan for a minimum 1" gap against a panel or wall.
3. Plan for a minimum 1" gap to adjacent furniture.

Tips

Obstructions

Moving worksurfaces can collide with other objects. Do not install overhead storage, stationary pedestals or components in the path of height-adjustable desks.

Weight

The maximum allowable load (varies by height-adjustable bench) should be evenly distributed and must not be exceeded.

Width

Specify a minimum 1" gap to adjacent furniture. This eliminates any pinch points between a height-adjustable desk and a fixed object.

Managing Technology

Design workstations with computer equipment in mind so that the height-adjustment range of the height-adjustable desk is not impeded because of cables.

Power

Plan easy and unobstructed access to power for users at worksurface height through the use of the power access door or power strip.

⚠ WARNING

Risk of serious injury.

Bases-only warranty limitations and potential for injury: The use of worksurfaces that do not comply with the Steelcase defined criteria and limitations could cause personal injury or property damage due to pinch points, instability, or other problems, and voids all Steelcase Warranties, expressed or implied.

The use of worksurfaces that do not comply with Steelcase criteria voids any Steelcase claims of compliance with ANSI/BIFMA, UL, LEED, or other applicable requirements. The use of non-Steelcase worksurfaces on Steelcase adjustable-height bases may not be accepted as compliant to municipal electrical codes or OSHA federal workplace standards, because this use does not create an NRTL (UL, ETL, etc.) listed product. Steelcase is not responsible for the ultimate determinations of compliance for height-adjustable bases with non-Steelcase worksurface, and assumes no liability for their compliance with standards when height adjustable bases are used without a Steelcase worksurface as intended.

Worksurface Criteria and Limitations

The use of non-Steelcase worksurfaces is not recommended. Any use of a non-Steelcase worksurface requires additional investigation by the customer regarding the appropriateness for use. It is the sole responsibility of the customer to determine the suitability and safety of the selected worksurface construction and attachment means. The following information is provided as a guideline, but does not address all potential issues. Customers should seek professional guidance as to the appropriateness of their chosen worksurface.

Tips

Height-adjustable bases include fasteners intended for use with Steelcase worksurfaces. These fasteners may be suitable for worksurfaces meeting the following criteria:

- Medium-density or higher particleboard or fiberboard cores, with High- or Low-Pressure Laminates and backers.
- Thickness of 1" or greater (Ology and Migration)
- Fasteners located a minimum distance of 1" from any edge

A well-designed, ergonomically advanced chair that allows a full range of healthy postures throughout the day and can contribute to worker wellness and productivity.

Neck is straight or slightly forward.

Shoulders are relaxed so arms hang naturally.

Back has full contact with the backrest (sit all the way back in your chair).

Elbows and forearms can rest comfortably on the arms of your chair, or on worksurfaces.

Lower back fits into curved lumbar support.

Tension is adjusted so backrest reclines easily, yet provides smooth, even support, and encourages postural change.

Top of monitor should be at eye level.

Screen is 20 to 30 inches from the eyes. Screen is at eye level slightly lower and directly in front of worker so head is not turned.

Wrists should be straight when keying or mousing, not bent up or down.

Thighs are parallel to the floor.

When keying or mousing, forearms are parallel to the floor.

Feet are flat on the floor or on a footrest.

If worksurfaces and keyboard support are not height-adjustable, raise your chair's seat height to achieve the appropriate relationship to your tasks. If this leaves your feet dangling above the floor, use a footrest.

Height-Adjustable
Benching

Basics of Standing and Monitor Arm Positioning

Height-adjustable benches, when combined with monitor arms, allow a full range of healthy postures throughout the day and can contribute to worker wellbeing and productivity.

Top of monitor should be 0° to 20° below horizontal line of sight.

Avoid locking knees to help maintain good posture.

Feet should be flat on the floor or use foot rest or foot pad.

Height

Top of the monitor should be positioned at or slightly below eye level.

Distance

Monitor should be 20" to 30" from the eyes or approximately an arm's length away.

Alignment

Proper alignment is the key to preventing strain. Computer monitor, keyboard, and mouse should be centered to allow user to see the display without looking downward or to either side. Mouse should be accessible without twisting or reaching. Reference documents should never be flat on desk and should be at the same height as or aligned with the monitor or above keyboard and below the monitor.

**Dual Monitor
Alignment**

If using two monitors,
position the monitor used
more often closer. If equally
used, center monitors
directly in front and angle
them in a slight inward "V"
shape.

Height-Adjustable
Benching

Height-Adjustable Benching Comparison Chart

The chart will help you determine which product line best meets your needs.

Ology

Basic Height

Extended Height

Performance sit-to-stand height-adjustability

Intuitive controllers (Simple Touch and Active Touch) deliver electric adjustability at 1½" per second. Base supports a maximum distributed weight capacity of 314 pounds per side. When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options.

▶ See *Worksurface Weights*, page 286.

Bench Comparison Chart

FrameOne End Panels with Utility Pole For Use with Ology Benches

Ology Height-Adjustable Benches and Bases

Ology brings together physiology and biology to support wellbeing at work. It allows users to quickly, quietly, and intuitively change posture without disrupting their coworkers. The integrated rail offers today's workers a range of ergonomic tools. Ology provides Bactiblock antimicrobial protection on frequently touched areas of the bench. Single-sided applications can be used to work around building columns or to create runs along an aisleway.

► Specifying, pages 300–308 and 324–328.

Dual-Sided Bench

Bench has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Simple touch controller allows for intuitive adjustments by lifting or pressing down on the controller. Available in an antimicrobial option to support a more health conscious environment.

Lifting column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Cable manager is standard on all dual-sided benches and is used to route cords or cables from the cable tray to the worksurface.

Height-adjustable bases come in fixed height, basic height, and extended height. The fixed height bases are 28½"H, basic height base adjusts from 27¾"H to 46⅔"H, and the extended height base adjusts from 22⅔"H to 48⅞"H in any increment.

Leveling glides adjust 2" to install bench on uneven floors.

Connection kit is required to connect dual-sided units to each other. Kit includes data tray extensions.

Single-Sided Bench

Access door and tray with power, available as option, provides user access to 120V and USB power and data as well as cord management. Available as an option.

End-of-run trim kit, specified as a separate style number, is used to finish the end of run.

Stabilizer post, specified as a separate style number, is required to support units that have monitor arms or custom insert brackets.
▶ See *Application Topics for Ology Bench Stabilizer Post*, page 284

Leveling glides adjust 1/2" to install bench on uneven floors. 1" glides are available as an option.

Integrated rail, available as an option, supports screens, lighting, desktop powerstrip, and worktools to give users choice and control for their physical wellbeing.

Edge is available in 3 mm edge profile.

Soft edge, available as option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Soft edge is 36"W and is centered on bench.

Base supports a maximum distributed weight capacity of 314 pounds (2-leg).
Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.
▶ See page 286 for *worksurface weights*.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Active touch controller is standard.

Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Product Details

High-Pressure Laminate Benches

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See *Surface Materials* in this book for specific PVC-free availability, page 478.

Edge profile finishes are specified separately from laminate color.

Square corners, available as an option, have 90° corners on all four sides with a front user's edge.

Radius corners, available as an option, have 1/4" radius on all four sides with a continuous user's edge. Radius corners eliminate sharp edges and are appropriate for freestanding furniture.

When radius corners are specified in applications with integrated rail, the front corners of the bench will be radius and the back corners will be square.

Wood Veneer Benches

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for bench. Corner style for wood veneer benches are square corners.

Ology combo benches and bases are also available, where height position on one side of the bench will be different than the other side. A height position must be selected for each side, allowing positions to be mixed and matched in any adjustment variation. Example, in combo benches and bases one leg will have basic height and the other leg will have extended height.

Simple touch controller

is available as an option and easily adjusts height of bench, at a rate of 1 1/2" per second, by lifting or pressing down on the controller. *Tip: Available with an antimicrobial option.*

Active touch controller is Bluetooth-enabled and is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Tip: When specifying the active touch controller on a dual-sided bench, a centered screen is required. The screen prevents an inadvertent safety concern when user A adjusts the desk and user B does not have both feet flat on the floor.

An obstruction sensor is standard with all Ology benches. The worksurface will backtrack when it makes contact with an object.

Bench sizes are listed in actual dimensions to allow for 2" gap to adjacent worksurface eliminating any pinch points.

Integrated rail, available as an option, allows for the mounting of personal screens, lights, power strips, and other worktools.

The overall dimension of the worksurface, without the integrated rail is 23"D, 28"D, and 34"D.

Integrated rail is optional on dual-sided and single-sided bench units and must be optioned on initial order. It cannot be added after install. Worksurface depth is shortened by 1 3/4" to accommodate the integrated rail so the overall footprint remains 23"D, 28"D, or 34"D. 40"W through 45 15/16"W worksurfaces with integrated rail cannot have power access door and tray.

Cord drop is standard when rail is specified and power door or grommets are not optioned to allow for cords to drop below the surface.

Soft edge, available as an option, is polyurthane and is offered with Bactiblock antimicrobial protection. Soft edge is available on benches that are 58" or wider.

Stabilizer post is required when mounting monitor arms on a single sided bench. When benches are connected in a run, one stabilizer post is required at the each end.
▶ See *Application Topics for Ology Bench Stabilizer Post*, page 284

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1½" per second. Motor is 110V and includes a 10½' power cord. Motor has 0.1W standby power.

Chicago requires that benches shipping into Illinois ship with a 9' power cord.

Ology benches are listed by ETL.
Tip: Ology base only is ETL recognized because alternative worksurfaces do not create an ETL listed product.
▶ See page 260

Simple/active touch controller must be located next to the control box. The control box can be placed on either the right or left side of the bench and is field-installed.

Power and data access door and tray with USB is available as an option. The door is 16½"W and centered on the surface, providing user access to power, data, and USB, as well as cord management.

40"W through 45¹⁵/₁₆"W worksurfaces are available with optional power access door or optional integrated rail, but not available with both options.

Power strip, located in tray, includes three outlets and easy access to two USB charging ports. Each port provides two amperage of output. USB receptacles conveniently charge a wide range of electronic devices, though not all devices are USB compatible. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Benches shipping to Chicago and California with the power access door option have a power strip with overcurrent protection.

Grommets come in pairs and are available as an option. They can help manage cable/cords going from the top of bench to the underside. Grommet inside dimensions are 3¼"W X 3¼"D.
Tip: When a grommet is specified, power and data access door cannot be applied.

Cable manager supports cable management vertically between the cable tray and the underside of the bench. It is available in 6527 Merle. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified.
▶ Specifying, page 342

Cable manager parallel option is available to mount the cable manager parallel to the cable tray.

Cable manager inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface.
▶ Specifying, page 342.

Cable baskets inside dimensions are 6"D x 17¾"W x 4¼"H and the overall dimensions are 8"D x 19½"W x 4½"H.

Cable basket requires 8"D of clearance to install. The cable basket bracket is universal which allows for front or back facing orientation. Front access only when used with integrated rail.

Inside dimensions of cable brackets are 6"D x 2"H.

Connection kit is required to connect two benches together. The connection kit conceals conduit or wires between benches. Kit includes data tray extension.

Dual-to-dual application

Dual-to-single application

Single-to-single application

Connection kits are available in dual-to-dual, dual-to-single and single-to-single applications.

Dual-sided

End-of-run tray covers for benches, can be added to cover the ends of the cable tray and data tray. The tray covers are painted metal and are sold in pairs.

Single-sided

Cable tray covers have an opening to allow cords and cables to enter the cable tray.

End-of-run trim kit, ordered separately, is used to cover the cross tubes. Trim kit includes a left-hand and right-hand trim piece. Trim kit is painted metal.

Dual-sided

Single-sided

Centered screens are attached and centered on the cable tray. Universal and Sarto screens can be ordered separately. Screens are always full width. Aligner clips are available as a separate style number for Universal screens.

▶ See page 345

Tip: For Ology benches and bases surface materials and applications topics.

▶ See page 283

Cable tray is standard and provides cord management and data termination.

Data tray, available as an option, attaches to the underside of the cable tray to manage the routing of voice and data cables. The data kit, **OLBVDK**, which terminates data must be ordered separately.

▶ See page 449

Intermediate

End of Run

Shared Intermediate

Infills, available for dual-sided benches, are painted steel and can be positioned at the end of a run, in line using an intermediate infill, or shared intermediate infill.

Ology Height-Adjustable 120° Corner Benches and Bases

Ology brings together physiology and biology to support wellbeing at work. It allows users to quickly, quietly, and intuitively change posture without disrupting their coworkers.

► Specifying, pages 312–320 and 330–334.

Integrated rail, available as an option, supports screens, lighting, desktop powerstrip, and worktools to give users choice and control for their physical wellbeing.

Bench has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Lifting column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Cable manager is standard on all dual-sided benches and is used to route cords or cables from the cable tray to the worksurface.

Height-adjustable bases come in fixed height, basic height, and extended height. The fixed height bases are 28½"H, basic height base adjusts from 27¾"H to 46¾"H, and the extended height base adjusts from 22¾"H to 48¾"H in any increment.

Base supports a maximum distributed weight capacity of 471 pounds (3-leg).
Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 286 for worksurface weights.

Leveling glides adjust 2" to install bench on uneven floors.

Access door and tray with power, available as option, provides user access to 120V and USB power and data as well as cord management. Available as an option.

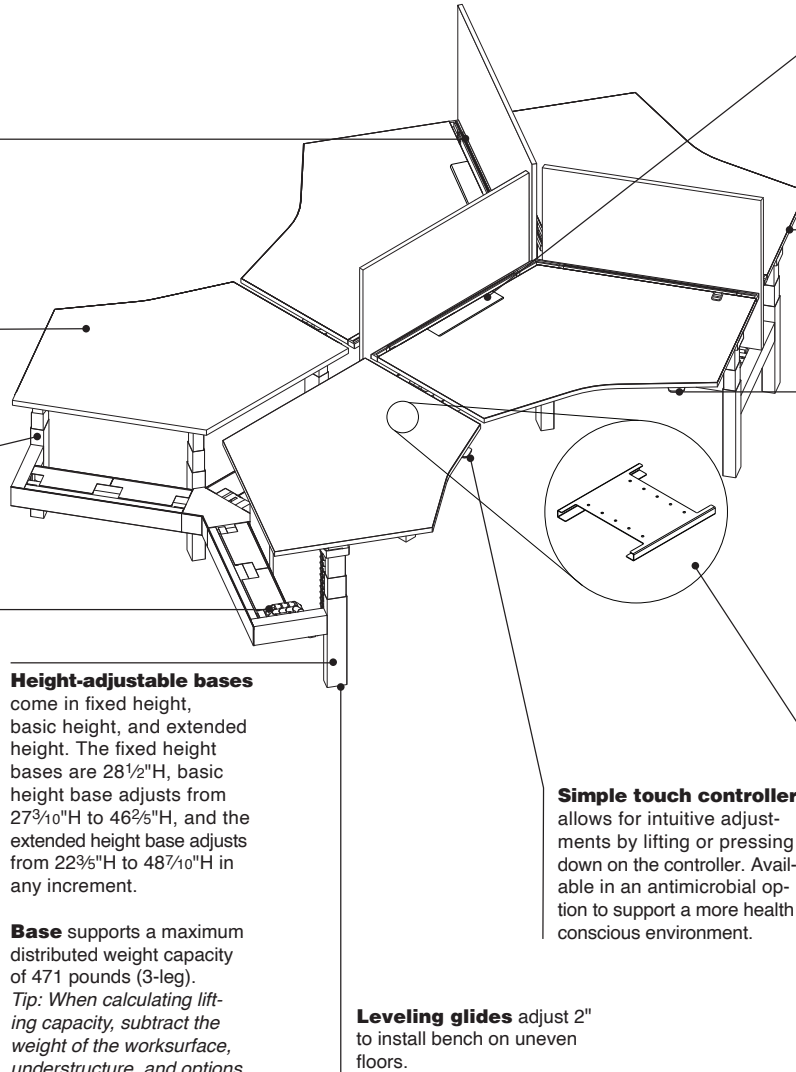

Edge is available in 3 mm edge profile.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Active touch controller is standard.

Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Simple touch controller allows for intuitive adjustments by lifting or pressing down on the controller. Available in an antimicrobial option to support a more health conscious environment.

Connection kit is required to connect 120° units to each another. Kit includes data tray extensions.

Product Details

High-Pressure Laminate Benches

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

▶ See *Surface Materials* in this book for specific PVC-free availability, page 492.

Edge profile finishes are specified separately from laminate color.

Square corners, available as an option, have 90° corners on all four sides with a front user's edge.

Radius corners, available as an option, have 1¼" radius on all four sides with a continuous user's edge. Radius corners eliminate sharp edges and are appropriate for freestanding furniture.

When radius corners are specified in applications with integrated rail, the front corners of the bench will be radius and the back corners will be square.

Wood Veneer Benches

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for bench. Corner style for wood veneer benches are square corners.

Simple touch controller is available as an option and easily adjusts height of bench, at a rate of 1½" per second, by lifting or pressing down on the controller.
Tip: Available with an antimicrobial option.

Active touch controller is Bluetooth-enabled and is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Tip: When specifying the active touch controller on a dual-sided bench, a centered screen is required. The screen prevents an inadvertent safety concern when user A adjusts the desk and user B does not have both feet flat on the floor.

An obstruction sensor is standard with all Ology benches. The worksurface will backtrack when it makes contact with an object.

Bench sizes are listed in actual dimensions to allow for 2" gap to adjacent worksurface eliminating any pinch points.

Integrated rail, available as an option, allows for the mounting of personal screens, lights, power strips, and other worktools.

The overall dimension of the 120° worksurface is 23"D and 28"D.

Integrated rail is optional on 120° corner benches and must be optioned on initial order. It cannot be added after install. Worksurface depth is shortened by 1¾" to accommodate the integrated rail so the overall footprint remains 23"D or 28"D.

Cord drop is standard when rail is specified and power door or grommets are not optioned to allow for cords to drop below the surface.

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1½" per second. Motor is 110V and includes a 10½" power cord. Motor has 0.1W standby power.

Chicago requires that benches shipping into Illinois ship with a 9' power cord.

Ology benches are listed by ETL.
Tip: Ology base only is ETL recognized because alternative worksurfaces do not create an ETL listed product.
▶ See page 260

Simple/active touch controller must be located next to the control box. The control box can be placed on either the right or left side of the bench and is field-installed.

High-capacity power block is not available on 34"W 120° benches.

Power and data access door and tray with USB is available as an option. The door is 16½"W and centered on the surface, providing user access to power, data, and USB, as well as cord management. 120° corner benches can support the access door on either side of the worksurface, or on both sides and will have a cord drop on opposite side when an integrated rail is specified.

Power strip, located in tray, includes three outlets and easy access to two USB charging ports. Each port provides two amperage of output. USB receptacles conveniently charge a wide range of electronic devices, though not all devices are USB compatible. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Benches shipping to Chicago and California with the power access door option have a power strip with overcurrent protection.

Grommets come in pairs. 120° corner offer pairs of grommets on the left side, right side, or both sides. They can help manage cable/cords going from the top of bench to the under side. Grommet inside dimensions are 3¼"W x 3¾"D.

Tip: When grommet is optional, power and data access door cannot be applied on the same side of the worksurface.

Cable manager supports cable management vertically between the cable tray and the underside of the bench. It is available in 6527 Merle. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified. ▶ Specifying, page 342

Cable manager parallel option is available to mount the cable manager parallel to the cable tray.

Cable manager inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface. ▶ Specifying, page 342.

Cable baskets inside dimensions are 6"D x 17¾"W x 4¼"H and the overall dimensions are 8"D x 19½"W x 4½"H.

Cable basket requires 8"D of clearance to install. The cable basket bracket is universal which allows for front or back facing orientation. Front access only when used with integrated rail.

Inside dimensions of cable brackets are 6"D x 2"H.

Connection kit is required to connect two benches together. The connection kit conceals conduit or wires between benches. Kit includes data tray extension.

Connection kits are available in dual-to-dual, dual-to-single and single-to-single applications.

Cable tray covers have an opening to allow cords and cables to enter the cable tray.

Cable tray is standard and provides cord management and data termination.

Data tray, available as an option, attaches to the underside of the cable tray to manage the routing of voice and data cables. The data kit, **OLBVDK**, which terminates data must be ordered separately. ▶ See page 449

End-of-run tray covers, for 120° benches, can be added to cover the ends of the cable tray and data tray. The tray covers are painted metal and are sold individually.

Infills, available for 120° corner triple-sided and dual-sided benches are painted steel and can be positioned at the end of a run, in line using an intermediate infill, or shared intermediate infill.

Intermediate

End
of Run

Shared
Intermediate

120° corner triple-sided center infill is painted. Center infill can be specified to conceal power/data infeed.

Universal screens are attached and centered on the cable tray. Screens are always full width. Aligner clips are available as a separate style number.
▶ See page 345

Parametric Connection Kit

The **parametric connection kit** can be used in place of the connection kit or a single-sided bench to work around building columns or other structures. Parametric widths are available in 1/16" increments from 2 1/16"–36"W.

Parametric connection kit is available from 2 1/16"–36"W.

Product Details

Parametric connection kits are used in place of modular connection kits to connect two benches together.

The **connection kit** conceals conduit or wires between benches. Kit includes data tray extension.

Parametric connection kits are available in dual-to-dual, dual-to-single, and single-to-single application. *Tip: 1" pinch point clearance per worksurface is built into dimension of the parametric connection kit.*

Example: 15"W parametric connection kit will create 13" of additive width.

Modular harness length is determined by adding connection kit width minus 2" to the required modular sized harness length. *Tip: Size up to next closest harness length if necessary.*

Modular harness calculation example for a 15" parametric connection kit for a 28"D x 58"W bench.

A = Power block

B to C: 51"L modular harness (using a modular connection kit)

A to B: 66" modular harness (using a 15" parametric connection kit: 51"W + 13"W = 64"L*)

*Sized up to the next closest harness length

► See page 450 for available modular harness lengths.

Ology Height-Adjustable Benches and Bases Surface Material and Application Topics

- 7360 Merle
- Anodized aluminum

Door bezel

- 6527 Merle

Application Topics

Moving benches can collide with other components. Do not install overhead storage, bench-height power, or bench accessories in the path of height-adjustable benches.

Fixed privacy screens mount on the integrated rail above for privacy only. Screens cannot be mounted in the modesty position.

On the extended height base, any storage higher than 18" will impede height range of bench worksurface. On the basic height base, any storage higher than 23" will impede height range of bench worksurface.
Tip: Do not place storage underneath controller.

When the centered power access door is optioned on extended height bases, any storage taller than 15 1/2" will impede the height range of the bench worksurface. On basic height bases, any storage higher than 20 1/2" will impede the height range of the bench worksurface.
Tip: Do not place storage underneath controller.

Worksurface mounted storage is not allowed on Ology height-adjustable benches.

When optioning the integrated rail, without the power access door, monitor arms may be attached to the worksurface with a C-clamp.
Tip: Monitor arms cannot be rail mounted.

When optioning both the integrated rail and power access door, monitor arms cannot be c-clamped 5 1/2" on either side of the power door.

When optioning the integrated rail and using a cable basket, there will not be enough room to C-clamp behind the basket.

40"W through 45 1/16"W worksurfaces are available with optional power access door or optional integrated rail, but not available with both options.

When attaching power strips or lighting to the integrated rail, there is a 5 1/4" mounting free zone on each end of the rail.

When using or installing a dash light on Ology bench, the light cannot be plugged into the base or integrated power tray without the 90° mini extension cord.
▶ See page 343

When installing SlatRail with a power door only, do not C-clamp the stanchions 5 1/2" on either side of the power door.

CPU holders are not allowed on Ology height-adjustable benches.

All assemblies meet or exceed ANSI/BIFMA standards.

WARNING

Read base only warranty limitations.

▶ See page 260 for *Workstation Design Guidelines and Requirements*.

Keyboard assemblies are not allowed on Ology on height-adjustable benches.

Installation

Benches ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

Application Topics for Ology Bench Stabilizer Post

23"D stand alone single-sided unit require stabilizer posts on both sides of the bench.

Stabilizer post is not required on 28"D or 35"D stand alone single-sided units.

Stand alone single-sided rectangle units with monitor arms and/or custom insert kits with glass insert require stabilizer posts on both sides of the bench.

Run of two or more single-sided rectangle units with monitor arms require stabilizer post at the ends of the run. Up to two monitors with focal adjustment can be mounted per workstation. Up to three monitors without focal adjustment can be mounted per workstation.
Tip: 23"D workstation can support one monitor with focal adjustment and up to two monitors without focal adjustment.

Run of two or more single-sided rectangle units with custom insert kit with glass insert require stabilizer post at the ends of the run.

When a single-sided bench with monitor arms and/or custom insert kits with glass insert is connected to a dual-sided bench or 120° bench, stabilizer posts are not required.

Stabilizer post is not required on a run of two or more 23"D single-sided units.

Stabilizer post is not required when boundary screens or FrameOne end panels are present.

Worksurface Weights

Base supports a maximum distributed weight capacity of 314 pounds (2-leg) and 471 pounds (3-leg) per worksurface.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options (i.e. integrated rail, power and data access door or soft edge).

Tip: A label applied to the underside of the worksurface will include the load-capacity for each bench.

Worksurface Weight								
Worksurface Shape	A	B	C	Worksurface Weight	Understructure Weight	Integrated Rail Weight	Options	
							Power and Data Access Door Weight	Soft Edge Weight
23"D								
Rectangular	23"	40"	50"	24 lb	18.6 lb	5.8 lb	6.9 lb	N.A.
	23"	46"	50"	27 lb	20.3 lb	6.6 lb	6.9 lb	N.A.
	23"	52"	50"	31 lb	22 lb	7.3 lb	6.9 lb	N.A.
	23"	58"	50"	35 lb	23.7 lb	8 lb	6.9 lb	2.6 lb
	23"	64"	50"	39 lb	25.4 lb	8.8 lb	6.9 lb	2.6 lb
	23"	70"	50"	42 lb	27.1 lb	9.5 lb	6.9 lb	2.6 lb
	23"	76"	50"	46 lb	28.9 lb	10.2 lb	6.9 lb	2.6 lb
28"D								
	28"	40"	60"	30 lb	19.6 lb	5.8 lb	6.9 lb	N.A.

Ology Height-Adjustable Benching

Infills

For Use with Ology Benches and Ology Bases

Infills are painted steel and can be positioned at the end of a run or in-line using an intermediate infill, or intermediate shared infill. Infills provide privacy and can be used to conceal power/data infeeds.

End-of-run infills provide aisle way privacy and can conceal power/data infeeds.

Intermediate infills are used to close the space between two legs at a connection and can conceal a power/data infeed. To conceal the space between each set of legs at a connection, two pairs of intermediate infills would be required.

Intermediate shared infills can be used to close the space between all four legs at a connection in order to conceal large amounts of power and data entering the bench.

Wiring and Cabling

When building infeed is positioned outside the footprint of the bench and at the end, an infill should not be used.

Surface Materials

Infill
• Paint

Infills are painted steel and can be positioned at the end of a run or in-line using an intermediate infill, or intermediate shared infill.

120° center infills are available for use with the triple-sided 120° benches.

120° corner center infill is used to conceal the space in the center of a triple-sided 120° bench.

Intermediate infills are used to close the space between two legs at a connection and can conceal a power/data infeed. To conceal the space between each set of legs at a connection, two pairs of intermediate infills would be required.

Intermediate shared infills can be used to close the space between all four legs at a connection in order to conceal large amounts of power and data entering the bench.

End-of-run infills provide aisle way privacy and can conceal power/data infeeds.

Wiring and Cabling

When building infeed is positioned outside the footprint of the bench and at the end, an infill should not be used.

Universal Centered Screens

For Use with Ology Benches

Universal centered screen provide a boundary element along the bench. They are available in two heights to accommodate varying levels of privacy.

Universal screen is pin tackable.

Product Details

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The width of the screen must match the width of the bench.

Universal screens are tackable and available in 26"H and 32"H. Screens range in size from 42"W-78"W.

Universal screens are mounted on the cable tray. The 26"H screen has an overall height of 42"H from the floor. The 32"H screen has an overall height of 48"H from the floor.

Universal screens will be mounted flush with no gap.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Surface Materials

Thickness 3/4"

Sarto Centered Screens

For Use with Ology Benches

Sarto Centered Screens

Sarto centered screens

provide a light scale boundary element along the bench. They are available in two modular heights to accommodate varying levels of privacy.

► Specifying, page 346

Sarto screen is pin tackable.

Actual Dimensions

Width 42", 48", 54", 60", 66", 72", and 78"

Height 26" and 32"

Thickness 9/16"

*Tip: Parametric specifications are available for Sarto screens.
Tip: Parametric height specifications define overall height from top of mounting surface to the top of the screen. It is recommended to use GET SmartTools to verify all dimensions.*

Product Details

The width of the screen must match the width of the bench.

Sarto screens are tackable and available in 26"H and 32"H modular heights. Screens are available in modular widths from size from 42"W-78"W. Screens can also be specified parametrically.

Sarto screens are mounted on the cable tray. The modular 26"H screen has an overall height of 42"H from the floor. The modular 32"H screen has an overall height of 48"H from the floor.

Brackets and hard stops are included with screens. Two brackets are used on screens narrower than 60"W. Three brackets are used on screens 60"W and larger.

Sarto screens will be mounted flush with no gap between screens side to side.

Custom Insert Kit

For Use with Ology Benches

Custom insert kits

support customer supplied inserts to provide a boundary element along the bench.

Product Details

Custom insert bracket can support panel thickness ranging from 1/4" - 1/2" thick.

Maximum insert height is 31.83"H. Insert must be 31.83"H to hit a 48"H datum and 25.65"H to hit a 42"H datum.

60" wide
planning module
58" wide
bench

Insert width must be between 1/4" and 4" narrower than the bench plan width. Example: insert width must be between 56"W and 59 3/4"W for a 60"W planning module.

Insert material flammability: Check with local building/fire code authorities.

Glass, if used, must be 3/8" thick tempered glass with chamfered, beveled, or radius edges and meet ANI Z97.1 Class A requirements.

Insert must be free of contact hazards (i.e. sharp edges).

Maximum panel weight formula:

maximum weight (pounds) allowed per bench = 1.24 x plan width (inches)
i.e. if the plan width is 78", the max weight = 1.24 x 78 = 96.7 pounds.

Maximum surface area formula:

maximum surface area (square inches) = 31.83 x plan width (inches)
i.e. if the plan width is 78", the max surface area is = 2482.7 square inches.

Tip: Failure to comply with these restrictions will void the Steelcase warranty on this bracket assembly and could also introduce safety and code compliance issues.

Application Topics

Stabilizer posts are required when custom insert kits are used on single-sided Ology benches.

▶ See *Application Topics for Ology Bench Stabilizer Post*, page 284.

Surface Materials

Brackets (plastic)

- 6000 Black
- 6009 Arctic White
- 6527 Merle
- 6899 Platinum Metallic

Personal screens are tackable and provide variable privacy when and where it is needed. The screens can be used on integrated rail.
 ▶ Specifying, page 348

Fixed personal screens are available in three heights, 12", 19½", and 24", and four widths to accommodate varying levels of privacy. Height is measured from the top of the mounting surface to the top of the screen.

Brackets are attached to the screens.

Actual Dimensions	
Width	30", 36", 42", or 48"
Height	11", 18½", or 23"
Overall height	12", 19½", or 24"
Thickness	¾"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Product Details

12"H screen

19½"H screen

24"H screen

Personal screens can be mounted on the integrated rail. The overall height from the floor will vary depending on the height of the adjustable worksurface.

Gap is 1" between personal screen and integrated rail.

Surface Materials

Infill
 • Fabric

Brackets
 • 4799 Platinum paint

Fabric without pattern is recommended when using a COM fabric to provide a consistent visual. Fabric with patterns could result in the above visual.

Application Topics

When mounting the dash LED light to integrated rail, specify the integrated SOTO rail bracket.

Fixed personal screens cannot be used in the modesty position on benches, when table is lowered due to lack of clearance.

Boundary Screens

For Use with Ology Benches

Boundary screens provide light scale space division and privacy for a variety of work settings.

Boundary screens attach to the end of a single- or dual-sided bench to provide aisle way boundary/privacy.

► Specifying, pages 350–352

Boundary screens are 1³/₁₆" thick. Screens are available in laminate or wood veneer.

Boundary screens come standard with adjustable glides, with a range of 1¹/₂". The glides are located 11¹/₂" from the outside of each edge.

Product Details

Boundary screens attach to single- or dual-sided benches and are available in three heights: 28¹/₂", 42", and 48"H.

18"

Modular

1/16"
to 18"

Parametric

Single-sided boundary screens use one screen segment that spans from the back of the cable tray to the front of the worksurface. Overhang option is available and can be specified with a modular overhang of 12", or parametric overhang up to 18" in 1/16" increments.

A maximum of 12" overhang is available on 34"W screens.

Connections

Boundary screens come standard with attachment bracket and hardware used for mounting in predrilled locations on the screen.

Surface Materials

Bracket

- 4799 Platinum Metallic
- 7207 Black
- 7241 Arctic White
- 7360 Merle

Boundary screens

- Laminate
- Wood veneer

Edge

- Plastic

Open Line laminate can be applied with vertical grain direction only. Open Line laminates are not allowed on screens that are 60"W or wider. Open Line laminate is only available when specifying modular screens.

Directional and wood grain laminate can be applied horizontally on spanning and single-sided boundary screens up to 96"W and vertically up to 60"W. Directional and wood grain laminate can only be applied vertically on split boundary screens.

Wood veneer grain direction can be specified horizontal or vertical for all spanning and single-sided boundary screens.

Application Topics

Boundary screen installed heights align with centered screen heights of 42"H or 48"H.

FrameOne End Panels

For Use with Ology Bench

FrameOne end panels or end panels with utility pole attach to dual-sided or single-sided benches to add a refined, consistent aesthetic to the space.

► Specifying, pages 354-356

1" gap between work-surface and end panel provides pinch point clearance.

Legs are fixed height at 27 1/4"

Loop leg

Infills are High-Pressure Laminate or veneer.

Post leg

Product Details

Post leg Loop leg
Two FrameOne end panel leg types are available. Ordered as a single leg with infill.

Post leg with utility pole Loop leg with utility pole

Post leg without utility pole Loop leg without utility pole

FrameOne end panels can be ordered with or without the utility pole.

Infills for use with FrameOne end panels are painted steel and are positioned on the inside of the lifting columns.

Connections

FrameOne end panel ships with mounting bracket that connects to the cross tube on Ology bench.

When specifying FrameOne end panel with utility pole, connection occurs at the infill and includes a cutout to route cables. FrameOne end panel ships with both connection bracket and utility pole.

Utility pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.

FrameOne end panel attachment allows for 1" gap to the adjacent bench eliminating any pinch points.

FrameOne end panel width aligns with overall worksurface depth of the dual-sided bench.

FrameOne end panel width aligns with the back of the cable tray on a single-sided bench. End panels are handed and must be specified for use on left or right.

Bench footprint increases by 3 1/4" for each FrameOne end panel without utility pole that is added.

Connection bench footprint increases by 9 3/8" for each FrameOne end panel with utility pole that is added.

Ology Height-Adjustable Dual-Sided Benches

High-Pressure Laminate or Wood Veneer

Tip: On extended height bases, any storage higher than 18", or 15½" if the power access door is optional, will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23", or 20½" if the power access door is optional, will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Base supports a maximum distributed weight capacity of 314 pounds (2-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

▶ See page 286 for worksurface weights.

Tip: Fixed height does not have a controller option or a power cord.

Tip: Antimicrobial can be specified only when specifying simple touch controller and/or soft edge.

For composite veneers, and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: 40"W through 45¹⁵/₁₆"W worksurfaces are available with optional integrated rail or optional power access door and tray, but not available with both.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

Tip: Fixed height does not have a controller option or a power cord.

Tip: If selecting the same leg type position for both sides of the bench, the non-combo style benches should be used.

Tip: Antimicrobial can be specified only when specifying simple touch controller and/or soft edge.

Tip: Soft edge is available on benches 58"W and larger.

Tip: Rectangular benches accommodate either power and data access door or grommet, but not both.

Tip: Prices below are shown only for one worksurface. You must add the price of leg type position one and two for the total price of the bench.

Tip: 40"W through 45¹⁵/₁₆"W worksurfaces are available with optional integrated rail or optional power access door and tray, but not available with both.

Ology Height-Adjustable Benching

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.
► See page 1 for details.

Ology Height-Adjustable Single-Sided Benches

High-Pressure Laminate or Wood Veneer

Tip: On extended height bases, any storage higher than 18", or 15½" if the power access door is optional, will impede lowest height range of bench work surface. On basic height bases, any storage higher than 23", or 20½" if the power access door is optional, will impede lowest height range of bench work surface. Do not place storage underneath controller.

Tip: Base supports a maximum distributed weight capacity of 314 pounds (2-leg). When calculating lifting capacity, subtract the weight of the work surface, understructure, and options selected.

▶ See page 286 for work surface weights.

Tip: Fixed height does not have a controller option or a power cord.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: 40"W through 45½"W work surfaces are available with optional integrated rail or optional power access door and tray, but not available with both.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

Ology Height-Adjustable 120° Corner Dual-Sided Benches

High-Pressure Laminate or Wood Veneer

Tip: On extended height bases, any storage higher than 18", or 15½" if the power access door is optioned, will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23", or 20½" if the power access door is optioned, will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Base supports a maximum distributed weight capacity of 471 pounds (3-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

▶ See page 286 for worksurface weights.

Tip: Fixed height does not have a controller option or a power cord.

Tip: Antimicrobial can be specified only when specifying simple touch controller.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

► Options, continued from previous page

Tip: Benches accommodate either power and data access door or grommet, but not both.

Tip: Power and data access door and grommet cannot be located on the same side of the workstation.

Tip: Power and data access door is available on benches 52"W or greater.

Tip: When selecting power and data access door or grommet on one side, a cord drop will be standard on opposite side if integrated rail is present.

Options	U.S. Price	Required to Specify	
Power and Data Access Door, Tray, and USB	• No power or data access door	No cost	Specify without power and data access door.
	• Power and data access door, left or right: paint group 1 or 2	+\$1124	Specify with power and data access door left or right and select paint color number.
	• Power and data access door on left or right: anodized aluminum	+\$1140	Specify with power and data access door left or right and select anodized aluminum.
	• Power and data access door on left and right: paint group 1 or 2	+\$2248	Specify with power and data access door left and right and select paint color number.
Grommet	• Power and data access door on left and right: anodized aluminum	+\$2280	Specify with power and data access door left and right and select anodized aluminum.
	• No grommet	No cost	Specify without grommet.
Glides	• Grommet on left- or right-hand side	+\$ 61	Specify with grommet and select left- or right-hand side.
	• Grommet on left- and right-hand side	+\$ 122	Specify with grommet and select left- and right-hand side.
Related Products	• 1/2" glides	No cost	Specify with 1/2" glides.
	• 1" glides	+\$ 23	Specify with 1" glides.

Ology Height-Adjustable Dual-Sided Bases

Tip: On extended height bases, any storage higher than 19" will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23⁷/₁₆" will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Fixed height does not have a controller option or a power cord.

Tip: Base supports a maximum distributed weight capacity of 314 pounds (2-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 286 for worksurface weights.

Tip: Antimicrobial can be specified only when specifying simple touch controller.

Tip: Attachment hardware is intended for worksurfaces 1" thick only.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

Ology Height-Adjustable 120° Corner Dual-Sided Bases

Tip: On extended height bases, any storage higher than 19" will impede lowest height range of bench worksurface. On basic height bases, any storage higher than 23⁷/₁₀" will impede lowest height range of bench worksurface. Do not place storage underneath controller.

Tip: Fixed height does not have a controller option or a power cord.

Tip: Base supports a maximum distributed weight capacity of 471 pounds (3-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 286 for worksurface weights.

Tip: Antimicrobial can be specified only when specifying simple touch controller.

Tip: Attachment hardware is intended for worksurfaces 1" thick only.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

Standard Includes		Required to Specify

FrameOne End Panels for Use with Migration SE Benches

FrameOne End Panels with Utility Pole For Use with Migration SE Benches

Migration SE Height-Adjustable Rectangle Benches and Bases

Migration SE supports wellbeing at work by allowing users to move between seated and standing postures throughout the workday.
 ▶ Specifying, page 378

Desk has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Leveling glides adjust 1" to install desk on uneven floors.

Cable riser is available as an option on all benches and is used to route cords or cables from the cable tray to the worksurface.

Leveling glides adjust 1/2" to install desk on uneven floors.

Sarto or Universal screens are available for use with Migration SE bench and are ordered separately.
 ▶ See page 384 for Universal screens and page 386 for Sarto screens.

Push button controller adjusts height at a rate of 1 1/10" per second. Two options are available—up/down or 4 pre-set.

Base supports a maximum distributed weight capacity of 250 pounds.
Tip: When calculating lifting capacity, subtract the weight of the worksurface.
 ▶ See page 366 for worksurface weights.

Connection kit is required to connect dual-sided units to each other. Kit includes data tray extensions.

Edge is available in 3 mm edge profile.

The extended height adjustable base adjusts from 22 3/5"–48 7/10" in any increment.

Internal motors with electronic synchronization drive.

Corners are available in both square or radius options. The radius corner option offers both a 2" and 5" radius.

Product Details

High-Pressure Laminate Desks

Front (user's) edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and three woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

▶ See *Surface Materials* in this book for specific PVC-free availability, page 477.

Edge profile finishes are specified separately from laminate color.

Square corners are standard and have 90° corners on all four sides.

Radius corners are available as an option with 2" radius or 5" radius on all four corners and will include 3 mm edge profile on all sides.

Wood Veneer Desks

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for desk.

Migration SE extended height-adjustable bench adjusts from 22³/₅"–48⁷/₁₀" in any increment.

Up/down controller is available as an option and easily adjusts height of desk, at a rate of 1³/₁₀" per second, by simply pushing the up and down arrows.

4 pre-set programmable controller is available as an option. It allows users to set the seated and standing height positions or pre-set heights for multiple users. When activated, the digital display will show the height of desk.

Obstruction sensing technology is standard with all Migration SE benches. The worksurface will backtrack when it makes contact with an object.

Bench sizes are listed in actual dimensions to allow for 2" gap to adjacent worksurface eliminating any pinch points.

Connection kit is required to connect two benches together. The connection kit conceals conduit or wires between benches.

Centered screens are attached and centered on the power beam. Screens are always full width. Sarto or Universal screens are available for use with Migration SE bench. Aligner clips are available as a separate style number for use with Universal screens.

Wiring and Cabling

Electric motor with whisper quiet operation adjusts at 1³/₁₀" per second. Motor is 24V DC and includes a 9' power cord. Motor also has 0.3W standby power.

Migration SE benches are listed by ETL.

Tip: Migration SE base only is ETL recognized because alternative worksurfaces do not create an ETL listed product.
▶ See page 260

Controller can be mounted on either the left- or right-hand side of the top and is field-installed.

Power and data strips are field-installed on either a SOTO rail or worksurface. Specify appropriate attachment bracket depending on application.

▶ See page 383 for *Cable and Power Management*.

Cable riser supports cable management vertically between the power beam cable and the underside of the bench. It is available in 6527 Merle. Cable riser is available as an option. Fence connection option must be selected for use with Migration SE bench.

Cable riser fence connections inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable brackets, ordered separately, support horizontal cable management below the worksurface.

▶ Specifying, page 383

Inside dimensions of cable brackets are 3⁵/₈"D x 1³/₁₆"H.

Cable management includes two cable clips and two ties to help manage desk cables.

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square 3 mm edge profile

- Wood veneer to match desk

Height-adjustable base

- 4799 Platinum Metallic
- 7207 Black
- 7241 Arctic White
- 7360 Merle

Integrated storage cannot be used on Migration SE desk with 5" radius corners.

Application Topics

Moving benches can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

21"H pedestal

On extended height benches, any storage higher than 18³/₁₀" will impede height range of desk.

CPUs installed in a CPU holder should not exceed 16" high or it will impede the height range of the bench.
Tip: CPUs should be installed in front of the crossbar.

All assemblies meet or exceed ANSI/BIFMA standards.

Keyboard assemblies are not recommended for use on height-adjustable benches.

WARNING

Read base only warranty limitations.
▶ See page 260 for *Workstation Design Guidelines and Requirements*.

Installation

Benches ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

Desk Weight

	W	D	Overall Depth (Dual-sided)	Worksurface Weight
Single-Sided Bench				
Rectangle— 23"D	46"	23"	50"	30 lb
	52"	23"	50"	34 lb
	58"	23"	50"	38 lb
	64"	23"	50"	42 lb
	70"	23"	50"	46 lb
Dual-Sided Benches				
Rectangle—28"D	46"	28"	60"	38 lb
	52"	28"	60"	43 lb
	58"	28"	60"	48 lb
	64"	28"	60"	53 lb
	70"	28"	60"	58 lb

Base supports a maximum distributed weight capacity of 250 pounds, per worksurface.

Tip: When calculating lifting capacity, subtract the weight of the worksurface.

Universal Centered Screens

For Use with Migration SE Benches

Universal centered screen provide a boundary element along the bench. They are available in two heights to accommodate varying levels of privacy. ▶ Specifying page 384

Universal screen is pin tackable.

Actual Dimensions

Width	48", 54", 60", 66", and 72"
Height	22" and 28"
Thickness	3/4"

Product Details

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The width of the screen must match the width of the bench.

Universal screens are tackable and available in 22"H and 28"H. Screens range in size from 48"W–72"W.

Universal screens are mounted on the cross tube. The 22"H screen has an overall height of 42"H from the floor. The 28"H screen has an overall height of 48"H from the floor.

Universal screens will be mounted flush with no gap.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Sarto Centered Screens

For Use with Migration SE Benches

Sarto centered screens

provide a light scale boundary element along the bench. They are available in two heights to accommodate varying levels of privacy.

► Specifying, page 346

Sarto screen is pin tackable.

Product Details

The width of the screen must match the width of the bench.

Sarto screens are tackable and available in 22"H and 28"H. Screens range in size from 48"W–72"W.

Sarto screens are mounted on the cross tube. The 22"H screen has an overall height of 42"H from the floor. The 28"H screen has an overall height of 48"H from the floor.

Brackets and hard stops are included with screens. Two brackets are used on screens 54"W and smaller. Three brackets are used on screens 60"W and larger.

Sarto screens will be mounted flush with no gap.

Surface Materials

Height 22" and 28"

Thickness 9/16"

Boundary Screens

For Use with Migration SE Benches

Boundary screens provide light scale space division and privacy for a variety of work settings.

Boundary screens attach to the end of a single- or dual-sided bench to provide aisle way boundary/privacy.

► Specifying, pages 388–390

Boundary screens are 1 $\frac{3}{16}$ " thick. Screens are available in laminate or wood veneer.

Boundary screens come standard with adjustable glides, with a range of 1 $\frac{1}{2}$ ". The glides are located 1 $\frac{1}{2}$ " from the outside of each edge.

Product Details

Boundary screens attach to single- or dual-sided benches and are available in three heights: 28 $\frac{1}{2}$ ", 42", and 48"H.

Modular

Parametric

Dual-sided boundary screen width matches the bench depth. Overhang option is available and can be specified with a modular overhang of 12" or 18" or parametric overhang up to 18" in $\frac{1}{16}$ " increments.

Actual Dimensions

Height	28 $\frac{1}{2}$ ", 42", or 48"
Spanning Screen Width for Dual-Sided Bench without 18" Overhang	50 $\frac{3}{32}$ " or 60 $\frac{3}{32}$ "
Spanning Screen Width for Dual-Sided Bench with 18" Overhang	86 $\frac{3}{32}$ " or 96 $\frac{3}{32}$ "
Single-Sided Screen Width for Single-Sided Bench without 18" Overhang	26 $\frac{7}{8}$ " or 31 $\frac{7}{8}$ "
Single-Sided Screen Width for Single-Sided Bench with 18" Overhang	44 $\frac{7}{8}$ " or 49 $\frac{7}{8}$ "
Thickness	1 $\frac{3}{16}$ "

Tip: Boundary screen overhang widths are available parametric in $\frac{1}{16}$ " increments. See Statement of Line pages for available ranges.

0"

18"

Modular

1/16"
to 18"

Parametric

Single-sided boundary screens use one screen segment that spans from the back of the power beam to the front of the worksurface. Overhang option is available and can be specified with a modular overhang of 18", or parametric overhang up to 18" in 1/16" increments.

Connections

Boundary screens come standard with attachment bracket and hardware used for mounting in predrilled locations on the screen.

Surface Materials

Bracket

- 4799 Platinum Metallic
- 7207 Black
- 7241 Arctic White
- 7360 Merle

Boundary screens

- Laminate
- Wood veneer

Edge

- Plastic

Open Line laminate can be applied with vertical grain direction only. Open Line laminates are not allowed on screens that are 60"W or wider. Open Line laminate is only available when specifying modular screens.

Directional and wood grain laminate can be applied horizontally on spanning and single-sided boundary screens up to 96"W and vertically up to 60"W. Directional and wood grain laminate can only be applied vertically on split boundary screens.

Wood veneer grain direction can be specified horizontal or vertical for all spanning and single-sided boundary screens.

Application Topics

Boundary screen installed heights align with centered screen heights of 42"H or 48"H.

FrameOne End Panels

For Use with Migration SE Bench

FrameOne end panels or end panels with utility pole attach to dual-sided or single-sided benches to add a refined, consistent aesthetic to the space.

► Specifying, pages 392–394

Product Details

Post leg

Loop leg

Two FrameOne end panel leg types are available. Ordered as a single leg with infill.

Post leg with utility pole

Loop leg with utility pole

Post leg without utility pole

Loop leg without utility pole

FrameOne end panels can be ordered with or without the utility pole.

Connections

FrameOne end panel ships with mounting bracket that connects to the cross tube on Migration SE bench.

When specifying FrameOne end panel with utility pole, connection occurs at the infill and includes a cutout to route cables. FrameOne end panel ships with both connection bracket and utility pole.

Utility pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.

FrameOne end panel attachment allows for 1" gap to the adjacent bench eliminating any pinch points.

FrameOne end panel width aligns with overall worksurface depth of the dual-sided bench.

FrameOne end panel width aligns with the back of the cable tray on a single-sided bench. End panels are handed and must be specified for use on left or right.

Bench footprint increases by 3 1/4" for each FrameOne end panel without utility pole that is added.

Connection bench footprint increases by 9 3/8" for each FrameOne end panel with utility pole that is added.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Open Line laminate is only available when specifying modular screens, and can be applied with vertical grain direction only.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

Height-adjustable benching offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

Black = Four-circuit, 3+1

Brown = Four-circuit, 2+2

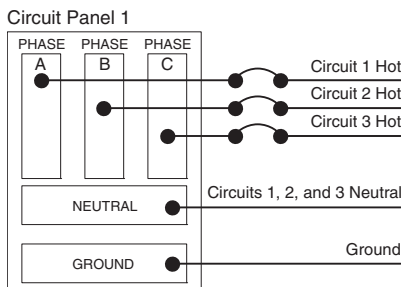

Rust = Three-circuit, separate neutral (3SN)

Shared neutral = 10 gauge

Non-shared neutral = 12 gauge

Hot wires = 12 gauge

Four-Circuit, 3+1

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase Circuit Panel

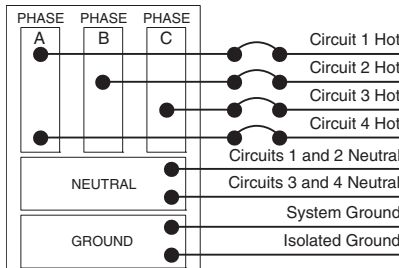

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

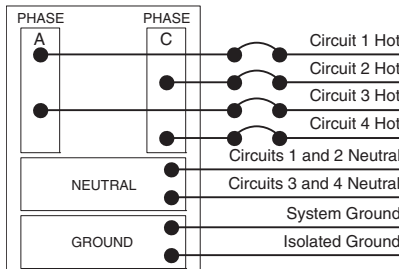

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and are supported by their own shared neutral and ground.

Single 3-Phase Circuit Panel

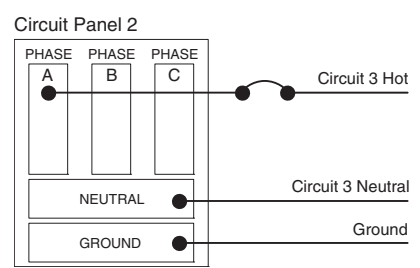

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase Circuit Panel

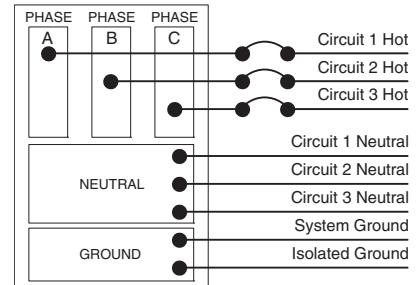

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate neutral

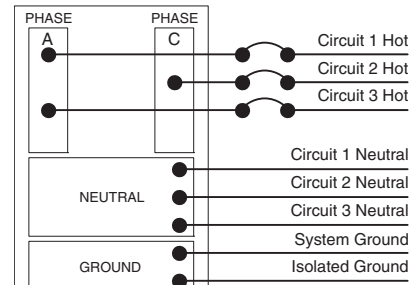

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

Single 3-Phase Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit
Laptop (Low)	30	0.25	120	64
Laptop (High)	100	0.83	120	19

Upper Tray	Available	Available	Not Available	Available	Available
Upper and Lower Tray	Available	Available	Available	Available	Available

Simple Tray Feature Comparison

To provide the best possible appearance and value, the simple tray is configured differently depending on application.

Application	Power Covers	Extension Tray	End Caps
Dual-Sided Bases and Extensions with Rails	Separate Style Number	Separate Style Number	Separate Style Number
Dual-Sided Bases and Extensions without Rails	Separate Style Number	Separate Style Number	Separate Style Number
Single-Sided Bases and Extensions	Separate Style Number	Standard	Separate Style Number
Bases and Extensions with Continuous Top	Standard	Standard	Standard
Value Package Benches	Separate Style Number	Separate Style Number	Separate Style Number

Distribution and Access

FrameOne

Power blocks can be placed on the underside of the integrated rail. Modular harnesses are used to distribute power through the bench.

Power strips can be placed above the work surface by connecting to the integrated rail. Power and data or power only are available.

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power block includes two power blocks and a block-to-block connector, provides back-to-back power, and accepts four receptacles per side.

Voice/data access occurs in the upper tray and can be positioned left or right of the power blocks. Both modular furniture and NEMA faceplates can be used. On 48"W and 96"W desks, data opening is positioned to the right.

Modular harness is used to connect power blocks and distribute power through the bench.

Wiring and Cabling

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power includes two power blocks and a block-to-block connector. It provides back-to-back power, and accepts four receptacles per side.

High-capacity power cannot be used in simple trays.

Chicago hardwire box is available. It accommodates two receptacles per side.

Duplex receptacles are available in 15- and 20-amps, isolated or system ground, with multiple line options. Receptacles have two outlets and are ordered separately.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled, per compliance with the Energy Code.

Modular flexible receptacles are available in 15-amp, isolated or system ground, with multiple line options. Flexible receptacles offer easy access to three outlets. Receptacles are ordered separately.

Controlled receptacle must be indicated when tying into the building management system. Modular flexible receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled, per compliance with the Energy Code.

Modular harnesses are used to connect power blocks.
 ▶ See *Power Routing Harness Chart*, page 404, to determine lengths needed.

Power and data access door is optioned on base and extension units. It is centered on the surface and provides user access to power and data as well as cord management. When optioned on 96"W units, two doors are provided in each surface.

If door or cutout is not optioned, power and data is maintenance accessible by sliding the surface open. Devices are then plugged in and the surface is closed and locked. High-capacity power cannot be used in simple trays. Application is intended for those devices that will remain plugged in.

Cable hangers attach to the underside of the integrated rail to manage the routing of voice/data cables. They are included with all dual- and single-sided base and extension units.

Trays are available on dual-sided base and extension units. There are three tray options. The standard includes an upper tray which provides under the surface cord management, data termination, and conceals the power blocks and conduit.

Data can be terminated and accessed in the upper tray—either left or right of the power. Exception: On 48"W and 96"W desks, data opening is positioned to the right. Both modular furniture and NEMA faceplates can be used.

The lower tray is optional and is always used in conjunction with an upper tray. It is intended for use when voice/data cables are being routed. It conceals data cables, creating a clean visual.

Simple tray is optional in place of upper or upper and lower trays. Simple tray accommodates standard capacity power only.

Data kit provides cable management and data termination. A data termination box and two pieces of wire manager are included.

Data box and wire managers attach to inside of tray with VHB adhesive. The data box is compatible with NEMADecora style data plates.

Data kit is recommended for use with simple trays only.

Omit trays is an option if trays are not needed. However, if power and data access door or cutout is selected, a tray is required.

Block-to-block connector is included with high-capacity power. It can also be ordered separately, along with another power block, to convert standard-capacity power to high-capacity.

Modular power in a dual-sided base or extension unit, without trays, must be secured with a strain relief bracket. Order style number FMVBK for each unit.

Power infeed in a dual-sided base or extension unit without rail, must be secured with a strain relief bracket. To order one use the style number FMVBK for each unit.

48"W and 96"W single-sided bases and extensions accommodate standard-capacity power only.

Filler packages are available to fill unused power or data options. Order separately in packages of 20.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Powerstrip Intro

► Specifying, page 460

Product Details

Powerstrip intro offers desktop C-clamped powerstrips with combinations of power outlets, USB-A and USB A+C 20W, and optional under worksurface utility power 4 or 7 power outlets.

Desktop power configuration options and specifications include:

- Two power
- One power and dual USB-A
- One power and USB A+C 20W
- Two power and one USB-A+C 20W
- Power outlet is 15A, 120V, 60Hz
- Tamper resistant power outlets

Meets spill test criteria.

Two power with 20 watt intelligent USB A+C:

- If only USB-C in use: delivers what the device needs up to 20 watts
- If only USB-A in use, up to 10 watts
- If both USB A+C in use, USB-A delivers up to 10 watts and 10 watts to USB-C. If USB-A device needs less than 10W, the remainder up to 20 watts goes to the USB-C device
- USB-A watt/amp output (2 port) is 10W/2A per port with dedicated charging ports

C-clamp is designed to accommodate worksurfaces up to 1½" thick.

20W USB A+C

Powerstrip intro USB ports are recommended for charging: cell phones, tablets, headphones, wearable fitness trackers, or other small electronic devices. Not recommended for devices needing higher output, more than 20-watts, like compact laptops. See Powerstrip Plus for higher output USB options.

Cable management clips, 2-pack, comes standard with each powerstrip. Mounts under the worksurface to manage cords.

Tip: Cord clip screw length for minimum worksurface thickness of ¾".

Powerstrip intro without optional under worksurface utility power includes a 9-foot standard smooth cord with a diameter of ⅜".

Powerstrip intro includes a standard straight 3-prong plug. An overcurrent protection (OCP) 90-degree plug is also an option. Check with your local authorities having jurisdiction to see if overcurrent protection is required.

Optional Under Worksurface Utility Power

The bottom of each utility powerstrip block has slots. The slots allow the block to slide onto raised bars in the universal cable management trays, sold separately. These help keep the powerstrip in place when the tray is opened or closed.

Optional under worksurface utility power blocks do not ship with independent mounting hardware. They are designed to mount into the universal cable management kit without additional hardware. Kit sold separately.

Universal cable management tray - small tray, **DSTRAYSM**, holds four outlets and large tray, **DSTRAYLG**, holds seven outlets under worksurface utility power.

Overcurrent protection, OCP, via a circuit breaker prevents one powerstrip intro assembly from drawing more than 15 amps of power.

Overcurrent protection is included as standard with powerstrip intro configurations with more than three outlets and is an option on configurations with less than four outlets. Check with your local authorities having jurisdiction to see if overcurrent protection is required for assemblies with less than four outlets.

Overcurrent protection (OCP) includes a circuit breaker rated for 15 amps.

Powerstrip intro with optional under worksurface utility power comes standard with OCP inline box and optional 6-foot or 8-foot standard smooth power cord with a diameter of ⅜". Choice of standard straight or 90 degree NEMA 5-15 3-prong plug.

Product Details

Desktop power offers multiple power, USB, and data options; and can be specified with a C-clamp, rail mount, or front edge mount. Meets spill test criteria.

C-clamp is designed to accommodate worksurfaces between 1/2" and 1 3/8" thick. Also available with rail mount or front edge mount.

Under worksurface optional utility power blocks do not ship with independent mounting hardware. They are designed to mount into the Universal cable management kit without additional hardware. Kit sold separately.

Cable management kit comes standard with each powerstrip. Mounts under the worksurface to manage cords.

Tip: Cord clip screw length for minimum worksurface thickness of 3/4".

The bottom of each utility powerstrip block has slots. The slots allow the block to slide onto raised bars in the universal cable management kit. These help keep the powerstrip in place when the tray is opened or closed. Universal cable management kit sold separately.

Dual USB-C 45W
20W USB A+C

45W or 100W USB C

Powerstrip Plus's USB A+C 20W recommended for charging: cell phones, tablets, headphones, wearable fitness trackers, or other small electronic devices.

USB-C 100W recommended for all of the above and compact laptops.

Overcurrent protection via a circuit breaker prevents one powerstrip plus assembly from drawing more than 15 amps of power.

Overcurrent protection is included as standard with powerstrip plus configurations with more than three outlets and is an option on configurations with less than four outlets. Check with your local authorities having jurisdiction to see if overcurrent protection is required for assemblies with less than four outlets.

Optional Under Worksurface Utility Power Dimensions

Under Worksurface Utility Power

► Specifying, page 464

Product Details

Under worksurface utility power provides multiple power outlets for plugging in a height adjustable desk, computer, and desktop necessities with a one cord out solution.

Cable management kit comes standard and mounts under the worksurface to manage cords.

Tip: Cord clip screw length for minimum worksurface thickness of 3/4".

Under worksurface utility power does not ship with independent mounting hardware. The blocks are designed to mount into the universal cable management kit without additional hardware. Kit sold separately.

The bottom of each utility powerstrip block has slots. The slots allow the block to slide onto raised bars in the universal cable management kit trays. This design helps keep the powerstrip in place when the tray is opened or closed. Universal cable management kit's smart straps, if selected, are used to hold the power cord in place. ► See page 465 for universal cable management kit understanding content.

Overcurrent protection is required by UL on these products.

UL Listed: Utility power block outlets are hardwired together in a complete, UL listed assembly.

Tip: Underwriters laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code.

Universal Cable Management Kit

► Specifying, page 465

Product Details

Universal cable management kit provides easy management and access to cords, cables, and power blocks under a workstation.

Optional smart straps allow for easy management of cables and cords in the cable management tray. Straps are 5³/₄" long.

Cable management tray is designed to fit behind the stretcher bar and under-structure of most Steelcase height-adjustable tables.

Cable management tray provides tool-free and hardware-free mounting of under worksurface utility power.

Cable management tray allows for a ¹/₈" gap around all four sides between the tray and the worksurface when mounted to allow for cable egress.

The small 15¹/₂" cable management tray is designed to hold one, 4 outlet, utility powerstrip. The tray does not have the capacity to hold more than one utility powerstrip.

The large 30" cable management tray holds two utility powerstrips in the raised bars section. There is capacity to add three utility powerstrips, two in the raised bar area and one more in the tray, strapped down.

Consider ordering one small and one large tray when specifying nine under worksurface outlets, for additional storage.

Surface Materials

Cable tray

Width 15¹/₂", 30"

Height 2⁵/₈"
(3¹/₂" when installed)

Building Interface

FrameOne

Building power and data can interface with the bench from the floor, wall, column, or ceiling. Both modular and hard-wire infeeds are available.

Utility poles are available on both dual- and single-sided benches. Pole attaches to the integrated rail on the bench. Pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.

When infeed enters at an intermediate leg, a leg cover is available to conceal conduit and cables.

Infeeds can enter the bench at either end or at an intermediate leg. If lower trays are not being used, the infeed can enter anywhere along the bench.

A vertebral riser is available to conceal the power and data.

Hardwire-to-modular power infeed is available in 6, 12, and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the bench and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Modular-to-modular power infeed is available in 6, 12, and 24 foot lengths. A straight/flush modular junction box faceplate cover is standard and is wired to a 4 1/16" square junction box located in the building. The harness is then routed into the bench and connected to a power block. A 90° junction box faceplate can be optioned and is recommended for use at a wall or column. The straight/flush is generally used in the floor. Non-PVC is standard. PVC version can be optioned.

Modular junction box faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° junction box faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

New York power infeeds are available. The junction box is mounted to the underside of the desk. A 50" harness is included to reach the first power block in the bench. If a shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-modular infeeds can also be used.

Hardwired/Chicago power infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

Base power infeeds are not available.

Vertebral riser can attach to the lower tray or simple tray. Its position is approximately 18" from either end of the desk unit. Length is 30".

Extension vertebral riser can be used to conceal conduit and cables along the floor. Length is 15". Risers can be linked to each other for longer length requirements.

Power and data can enter the bench through the end of the lower tray or simple tray. The opening is approximately 14" from the end of the desk.

▶ See *Cable Capacities*, page 410.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

Non-PVC modular electrical components are the standard offering with the option to order PVC on some components. For those trying to gain the LEED Innovation and Design credit, non-PVC should be selected.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Utility pole connects to simple tray or lower tray.

Utility poles, for dual-sided benches, include a connector piece to conceal cables between the utility pole and tray.

Utility poles, for single-sided benches, do not include the connector piece.

Utility pole cannot be used with continuous top bases or extensions.

Cable Capacities

Ology Bench

Cable manager supports cable management vertically between the cable tray and the underside of the bench. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified.

► Specifying, page 342.

Tray Dimensions

	Outside Diameter of Cable = .223 (5E)		Outside Diameter of Cable = .310 (6A)	
	Maximum Capacity	Maximum Capacity with Power	Maximum Capacity	Maximum Capacity with Power
A Data tray	96	88	48	44
B Infeed at end-of-run or intermediate leg, dual-sided unit	96	88	48	44
C Connection kit	96	88	48	44
D Cable manager	15	10	7	3

Tip: When routing cables through any combination mentioned above, the capacity is equal to the smallest number.

Tray Dimensions

	Outside Diameter of Cable = .223 (5E)		Outside Diameter of Cable = .310 (6A)	
	Maximum Capacity	Maximum Capacity with Power	Maximum Capacity	Maximum Capacity with Power

B Infeed at end-of-run or intermediate leg, dual-sided unit	96	88	48	44
C Connection kit	96	88	48	44
D Cable manager	15	10	7	3

Tip: When routing cables through any combination mentioned above, the capacity is equal to the smallest number.

Distribution and Access

Ology Bench

Power blocks can be placed on the inside of the cable tray.

Modular harness is used to connect power blocks and distribute power through the bench.

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power block includes two power blocks and a block-to-block connector, provides back-to-back power, and accepts four receptacles per side.

Voice/data access can be positioned on the left or right end of the cable tray. Both modular furniture and NEMA faceplates can be used. To do so, option the data tray for Ology and order the data kit separately.

Wiring and Cabling

Standard-capacity power includes one power block, provides back-to-back power, and accepts two receptacles per side.

High-capacity power includes two power blocks and a block-to-block connector. It provides back-to-back power, and accepts four receptacles per side.

High-capacity power block is not available on 34"W 120° benches.

Chicago hardware box is available. It accommodates two receptacles per side.

Duplex receptacles are available in 15- and 20-amps, isolated or system ground, with multiple line options. Receptacles have two outlets and are ordered separately.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled, per compliance with the Energy Code.

USB receptacles are available in three wiring schematics with multiple line options. USB receptacles offer easy access to two charging ports. Each port provides 1 ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Modular harnesses are used to connect power blocks.

► See *Power Routing Harness Chart*, page 404, to determine lengths needed.

Hardwire-to-modular power infeed is available in 12 and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the bench and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Modular-to-modular power infeed is available in 12 and 24 foot lengths. A straight/flush modular junction box faceplate cover is standard and is wired to a 4¹/₁₆" square junction box located in the building. The harness is then routed into the bench and connected to a power block. A 90° junction box faceplate can be optioned and is recommended for use at a wall or column. The straight/flush is generally used in the floor. Non-PVC is standard. PVC version can be optioned.

Straight/
Flush

90°

Modular junction box faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° junction box faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

Hardwired/Chicago power infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

New York power infeeds are available. The junction box is mounted to the cross tube at the end of the cable tray.

A 50" harness is included to reach the first power block in the bench. If shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-modular infeeds can also be used.

End-of-run infills, intermediate infills, boundary screens, or FrameOne end panels cannot be used when New York infeed is present. Shared intermediate infills can be used when New York infeed is located in the middle of a run.

Base power infeeds are not available.

Power and data access door and tray with USB is available as an option. The door is 16¹/₂"W and centered on the surface, providing user access to power, data, and USB, as well as cord management. Corner desks can support the access door on either side of the desk or on both sides and will have a cord drop on the opposite side when an integrated rail is specified.

Power strip, located in tray, includes three outlets and easy access to two USB charging ports. Each port provides two amperage of output. USB receptacles conveniently charge a wide range of electronic devices, though not all devices are USB compatible. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Benches shipping to Chicago and California with the power access door option have a power strip with overcurrent protection.

Grommets come in pairs and are available as an option. They can help manage cable/cords going from the top of bench to the underside. 120° corners offer pairs of grommets on the left side, right side, or both sides. Grommet inside dimensions are 3¹/₄"W X 3³/₄"D. *Tip: When a grommet is specified, power and data access door cannot be applied.*

Cable manager inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Cable manager supports cable management vertically between the cable tray and the underside of the bench. Bench comes standard with one cable manager for perpendicular application per workstation. An additional cable manager can be specified. ► Specifying, page 342

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface.

Cable baskets are available on benches 40"W or larger.

Cable baskets inside dimensions are 6"D x 17 3/4"W x 4 1/4"H and the overall dimensions are 8"D x 19 1/2"W x 4 1/2"H.

Inside dimensions of cable brackets are 6"D x 2"H.

Data tray, available as an option, attaches to the underside of the cable tray to manage the routing of voice and data cables.

Data can be terminated and accessed in the data kit which mounts to the cable tray. The data kit can be positioned on either the left or right side of the cable tray.

Data kit, ordered separately, provides voice/data termination. A data termination box and two pieces of wire manager are included. Both modular furniture and NEMA faceplates can be used, which are provided by the data installer. For a dual-sided bench, two data kits should be ordered, one for each.

Block-to-block connector is included with high-capacity power. It can also be ordered separately, along with another power block, to convert standard-capacity power to high-capacity.

Filler packages are available to fill unused power or data options. Order separately in packages of 20.

Power and data can enter the bench through the end of the tray. The opening is approximately 8 1/4" from the end of the desk.

▶ See *Base Power and Cable Capacities*, page 432.

Infills, available for dual-sided benches are painted steel and can be positioned at the end of a run, in line using an intermediate infill, or shared intermediate infill.

Center infill for triple-sided 120° corner bench can be used to close the space between all three corner legs to conceal large amounts of power and data entering the bench.

Building Interface

Ology Bench

Building power and data can interface with the bench from the floor, wall, column, or ceiling. Both modular and hard-wire infeeds are available.

Utility poles are available on both dual- and single-sided benches. Pole attaches to the cross tube on the bench. Pole reaches a maximum ceiling height of 10'. Pole is 3"D x 6"W.

Intermediate or shared intermediate infills can be added to conceal infeed.

End-of-run infills can be added to conceal infeed.

Infeeds can enter the bench at either end or at the connection kit between two benches.

Hardwire-to-modular power infeed is available in 6, 12, and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the bench and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Modular-to-modular power infeed is available in 6, 12, and 24 foot lengths. A straight/flush modular junction box faceplate cover is standard and is wired to a 4¹/₁₆" square junction box located in the building. The harness is then routed into the bench and connected to a power block. A 90° junction box faceplate can be optioned and is recommended for use at a wall or column. The straight/flush is generally used in the floor. Non-PVC is standard. PVC version can be optioned.

Straight/
Flush

90°

Modular junction box faceplate can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° junction box faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

Hardwired/Chicago power infeeds are supplied by the electrician.

San Francisco can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

Base power infeeds are not available.

New York power infeeds are available. The junction box is mounted to the cross tube at the end of the cable tray.

A 50" harness is included to reach the first power block in the bench. If shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-modular infeeds can also be used.

End-of-run or intermediate infills cannot be applied at the same location as the New York infeed. New York infeed can be used with shared intermediate infills.

Power and data can enter the bench through the end of the cable tray. The opening is approximately 8¹/₄" from the end of the bench.

▶ See *Cable Capacities*, page 432.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

Non-PVC modular electrical components are the standard offering with the option to order PVC on some components. For those trying to gain the LEED Innovation and Design credit, non-PVC should be selected.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Utility pole connects to the cross tube on a dual-sided or single-sided bench.

Cable Capacities

Migration SE Bench

Infeeds can enter the bench at either end or at the connection kit between two benches.

Tray Dimensions

	Outside Diameter of Cable = .223 (5E)		Outside Diameter of Cable = .310 (6A)	
	Maximum Capacity	Maximum Capacity with Power	Maximum Capacity	Maximum Capacity with Power

Tip: Underworksurface power blocks do not ship with independent mounting hardware. They are designed to mount into the Universal cable management kit without additional hardware. Kit sold separately.

Tip: Overcurrent protection includes a 15 amp circuit breaker.

Without overcurrent protection

With overcurrent protection

with optional underworksurface utility power with 4 outlets

with optional underworksurface utility power with 7 outlets

with optional underworksurface utility power with 9 outlets

Specification Information

Style Number	U.S. Base Price
DSPOWER	\$388

Tip: Configurations with outlets under the work-surface are standard with overcurrent protection.

Tip: Check with your local fire inspector and other authorities with jurisdiction, to understand if overcurrent protection is required for your municipality on units without under worksurface outlets.

Tip: Height adjustable desks can be plugged into powerstrip plus for a 'one cord down' solution.

Tip: When using powerstrip plus with nine outlets under worksurface utility power, specify one large and one small universal cable management kit.

Tip: Do not use a vertical cable manager with a curly cord or braided cord.

Tip: Curly power cord cannot be used with power plug type thread.

Under Worksurface Utility Power

Tip: Underworksurface power blocks do not ship with independent mounting hardware. They are designed to mount into the universal cable management kit without additional hardware.

Tip: Overcurrent protection includes a 15 amp circuit breaker.

Tip: Do not use a vertical cable manager with a curly cord or braided cord.

Tip: Cord length between blocks is 24", if applicable.

Tip: Never plug a powerstrip into another powerstrip.

Tip: 4 outlet utility block fits in the small tray universal cable management kit, 7 outlet utility block fits in large tray universal cable management kit, and 9 outlets with three utility blocks, specify one large and one small universal cable management kit.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate. When processing orders for Open Line laminate on FrameOne, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate. Laminate Approval and Material Requirements to confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement. For additional information, refer to the *Surface Materials Reference Manual*. *Tip: OLL is not available on FrameOne dual-sided end panels or infills.*

Wood

Applies to:

- FrameOne dual- and single-sided base and extensions
- FrameOne end counters
- FrameOne infills (exception — no full-fill finish)
- FrameOne single-high overhead cabinets
- FrameOne organizer shelves
- FrameOne boundary screens
- Ology bench worksurfaces, boundary screens, and FrameOne end panel infills
- Migration SE bench worksurfaces

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

E = Established

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer

Wood Group 1

Flat-Cut Open-Pore

- 3062 FC/OP Graphite Walnut

Open-Pore Planked Veneer

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

E = Established

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

- 3832 QC/OP Figured Anegre

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are part of our Select Surfaces program as Wood Group 1 pricing.

Composite Veneer Group 1

Composite Flat-Cut Open-Pore

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite
- 3LAX FC/OP Graphite on Oak Composite

Composite Quarter-Cut Open-Pore

- 3LEX QC/OP Desert Oak on Oak Composite
- 3LGX QC/OP Chai on Walnut Composite
- 3LJX QC/OP Ebony on Walnut Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer. A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed. In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable. Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate. Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see www.steelcase.com/surface-materials

Surface Materials Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Bivi, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate. Laminate Approval and Material Requirements to confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements: For additional information, refer to the *Surface Materials Reference Manual*.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer.

We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers.
- Store products in areas that simulate office temperatures (60°F to 90°F).
- Store products in areas that maintain constant, office-like humidity levels.
- Keep product away from light. Cover products to make sure they are not exposed to light.

Veneer

Veneers are matched for proper balance and consistency. Veneers are available quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Flat-cut open-pore finish choices

Wood Group 1

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry
- 3422 FC/OP Medium Cherry
- 3522 FC/OP Clear Maple*
- 3592 FC/OP Blonde on Maple **E**
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3752 FC/OP Medium Walnut **E**
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

Quarter-cut open-pore finish choices**Wood Group 1**

- 3042 QC/OP Ash **E**
- 3222 QC/OP Clear Maple
- 3292 QC/OP Blonde on Maple **E**
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3352 QC/OP Medium Walnut **E**
- 3362 QC/OP Dark Walnut
- 3372 QC/OP Medium Mahogany on Walnut
- 3382 QC/OP Graphite Walnut

Rift-cut open-pore finish choices**Wood Group 1**

- 3602 RC/OP Desert Oak

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on worksurfaces only.

Flat-cut full-fill finish choices**Wood Group 1**

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry
- 3424 FC/FF Medium Cherry
- 3524 FC/FF Clear Maple*
- 3544 FC/FF Blonde on Maple **E**
- 3704 FC/FF Clear Walnut
- 3714 FC/FF Natural Walnut
- 3754 FC/FF Medium Walnut **E**
- 3764 FC/FF Dark Walnut
- 3774 FC/FF Medium Mahogany on Walnut

Quarter-cut full-fill finish choices**Wood Group 1**

- 3224 QC/FF Clear Maple*
- 3294 QC/FF Blonde on Maple **E**
- 3304 QC/FF Clear Walnut
- 3314 QC/FF Natural Walnut
- 3354 QC/FF Medium Walnut **E**
- 3364 QC/FF Dark Walnut
- 3374 QC/FF Medium Mahogany on Walnut
- 3384 QC/FF Graphite Walnut

Rift-cut full-fill finish choices**Wood Group 1**

- 3604 RC/FF Desert Oak

* To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clearcoat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000756 for 3042, form number 05-0001370 for 3222 and 3224.

Premium Veneer

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Quarter-cut open-pore finish choices**Wood Group 3**

- 3832 QC/OP Figured Anegre

Tip: Full-fill finish is not available on Premium veneers as a standard. To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish.

The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000758 for 3832.

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from DesignTex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as part of our Select Surfaces program as Wood Group 1 pricing.

Flat-cut open-pore finish choices**Wood Group 1**

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite

Quarter-cut open-pore finish choices**Wood Group 1**

- 3F8X QC/OP European Walnut Composite
- 3GGX QC/OP Zebrano Composite
- 3HJX QC/OP Oak Composite
- 3HVX QC/OP Walnut Composite
- 3ZNX QC/OP Night Cerused Oak Composite

Tip: To understand more about composite ordering, lead-times, and pricing, please consult the composite sign-off sheet available through Steelcase advertising stock, form number 14-0000141. A sign-off sheet is required prior to orders being accepted for composite projects.

Natural Veneer

Natural veneer is available in the Select Surfaces offering. Natural veneer may have extended lead-times. Place your order as you normally would for any other finish, calling out the appropriate finish code.

The following finishes are available through the natural veneer offering:

Flat-cut open-pore finish choices**Wood Group 1**

- 3342 FC/OP Black Walnut
- 35A2 FC/OP Blanch Maple
- 37A2 FC/OP Thunder Walnut

Wood Group 3

- 3082 FC/OP Washed Walnut

Flat-cut full-fill finish choices**Wood Group 2**

- 3734 FC/FF Black Walnut

Wood Group 3

- 3084 FC/FF Washed Walnut

Quarter-cut open-pore finish choices**Wood Group 1**

- 32A2 QC/OP Blanch Maple
- 33A2 QC/OP Thunder Walnut
- 3392 QC/OP Black Walnut

Quarter-cut full-fill finish choices**Wood Group 2**

- 3394 QC/FF Black Walnut

Rift-cut open-pore finish choices**Wood Group 2**

- 36A2 RC/OP Volcanic Oak

Planked Veneer

Planked veneer is available in the Select Surfaces offering. Planked veneer may have extended leadtimes. Place your order as you normally would for any other finish, calling out the appropriate finish code.

The following finishes are available through the planked veneer offering:

Wood Group 1

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Custom Surface

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid.

If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges on products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

FrameOne Wood Veneer Grain and Directional Laminate Application

Wood veneer and directional laminates are standard with the grain directions shown.

Wood is a natural, unique, and always changing material. No two pieces are the same. The appearance of each surface will vary based on a piece's individual grain pattern, underlying color, and characteristics (like gum pockets and pin knots). While the finishing process is identical for all pieces, each finished piece celebrates wood's individual beauty.

Some wood veneer finishes and woodgrain laminates share the same name. Because of the difference in materials, veneers and laminates of the same name are not an exact match but do coordinate with each other.

When specifying directional grain laminates and veneers on boundary screens, there are some things you need to know.

Lock and Keying	498
Style Number Index	500

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.
Exceptions: Individual locking drawers are available only with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
 ▶ See below.

- Key Random**
- FR305
 - FR421
 - FR305
 - or
 - XF1011
 - XF1042
 - XF1011
- } XF Master Key

Required to Specify

Master key random	+\$36	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.
Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation — random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
 ▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
<hr/>	
30	Total
<hr/>	
1	877102003SR standard lock tool
1	877102002SR master lock tool
