e³ environmental CeramicSteel

The e³ environmental CeramicSteel Difference

Steelcase Premium White Boards incorporate the e³ environmental CeramicSteel surface, which is the first and only ecologically intelligent whiteboard surface to receive a MBDC Cradle to Cradle Bronze certification. Cradle to Cradle certification evaluates products for environmentally safe and healthy materials; energy and water use during production, the ability to recycle and reuse materials, and social responsibility. Steelcase has created its fourth generation of CeramicSteel writing surfaces, e³, which delivers the properties of its best selling writing surface, P³ CeramicSteel, and complies with the Cradle to Cradle certification criteria. Steelcase will continue to follow standards set forth by MBDC Cradle to Cradle certification to reaffirm our commitment to sustainability. For over five decades, millions of boards have been produced around the world using P³ CeramicSteel. Steelcase used this cross section of consumers to gather the information that helped determine what the next generation of writing surfaces should provide. Our internationally renowned R&D team worked with experts in the field of ceramics and technology to create e³ environmental CeramicSteel surface – the new industry standard for superior quality.

The e³ environmental CeramicSteel Advantage

The ceramic finish consists of a specially formulated glass substance applied by machine. The e³ environmental CeramicSteel surface is fused to steel at a temperature of approximately 1500 degrees Fahrenheit for whiteboards. It registers at a minimum of five (5) on the revised Mohs hardness scale.

Benefits of e³

- Ultra-smooth writing surface
- Improved erasability
- Greater color contrast
- Significantly less surface/light distortion
- Optimum eye comfort
- Enhanced visibility
- Reduced chalk pressure, greater adherence
- Increased chalk/surface contrast
- Accepts magnets

Environmental Features

- Enamel fused to cold-rolled enameling-grade steel
- In all coatings, the total amount of heavy metals cadmium, mercury, hexavalent chromium, and lead is less than 0.1%
- All coatings are free of arsenic and antimony
- No Volatile Organic Compounds (VOCs)
- Steel core is made from minimum 30% post-consumer and post-industrial waste
- e³ environmental CeramicSteel surface is 99% recyclable

Maintenance

Before the first use of your CeramicSteel:

- Remove the protective film.
- Wipe board with a clean cloth moistened with a high-quality whiteboard cleaner.
- Wipe surface dry with a clean cloth.

Daily cleaning instructions for your CeramicSteel:

- Wipe surface with a clean cloth moistened with warm water.
- Wipe surface dry with a clean cloth.

More thorough cleaning may be required if writing is left on the board for more than two days.

Textura Fabric Cleaning and Care

Wipe with a damp cloth using soap and water or use proprietary upholstery shampoo.

- For deeper cleaning use alcohol spray or wipes. Bleach can be used by following the guidelines below.
- Anti-bacterial sprays and wipes can be used to wipe down the fabric to disinfect.

General commercial disinfection:

- Use a household bleach (containing approximately 4.5 oz per 100 oz of sodium hypochlorite), which should then be used in a 1:10 dilution.
- Follow the instructions of the brand.
- Measure out the required dose in relation to the quantity of water, soak a white or lightly colored cloth in the solution, squeeze out any excess liquid and gently wipe the fabric before leaving dry.

Acoustic Cleaning and Care

Remove spills immediately using damp, clean cloth. Dab with a clean, soft white cloth dampened with a mild solution of liquid detergent and warm water. Repeat using only clean water, then pat dry with a lint free cloth. Always test in an inconspicuous area first. Avoid using wax polishes, solvents or concentrated abrasives. For more difficult stains, dampen a soft white cloth with a solution of household bleach (10% bleach / 90% water). Dab gently. Repeat using only a clean, water dampened cloth to remove bleach concentration then pat dry with a lint free cloth.

Note: Fabrics have been developed to withstand regular cleaning maintenance and disinfection. Please follow the manufacturer instructions on cleaning and disinfection agents. We recommend spot testing on an inconspicuous part of the material first. Fabric samples are available for testing by contacting samples@polyvision.com.

Markers

Use any high-quality dry erase marker.

CAUTION

For optimal performance, Steelcase recommends the use of high quality solvent-based dry-erase markers, as opposed to water-based dry-erase markers (also called "low odor markers"). Low odor markers do not perform as well as solvent-based because the water takes longer to dry and the ink clings more aggressively to the board's surface, leaving behind a film. Replace markers when almost dry to avoid poor erasability. Replace the eraser felt regularly. Dirty felt or erasers will result in poor erasability.

Removing Permanent Marker

Option 1:

- Write over the top of the permanent marker ink with a dry-erase marker
- Simply erase

Option 2:

- Moisten a clean, dry cloth with isopropyl alcohol
- Wipe the board in a circular motion to loosen marker residue
- Rinse with clear water
- Dry the board with a clean cloth
- Repeat these steps as necessary

Installer's Instructions for Initial Cleaning at Time of Installation

NOTE: These initial cleaning instructions are shipped with every board.

- For initial cleaning, wipe your board with a clean cloth moistened by a mild, alcohol-based cleaner.
- Rinse with clear water. This step is simple, but very important.
- Wipe dry with a clean cloth.

Material Description

e³ environmental CeramicSteel is produced by a controlled, continuous coil-coating process. The surface consists of a steel core of .013" and .019" thickness covered on both sides with thin enamel coatings. The ceramic finish is fused to the steel at a temperature of approximately 1500°F for whiteboard and 1250°F for chalkboard.

Characteristic	e ³ environmental CeramicSteel
Writeability	Whiteboards can be written on with any dry-erase, semi-permanent, water-soluble, permanent marker, pen, or crayon without damaging the surface. Chalkboards have a superior, low-gloss, matte finish that readily accepts chalk providing a sharp, unbroken line with less pressure and maximum surface adherence.
Visibility	Contrast/waviness for whiteboards (light and dark effects) shall be no greater than 15 when tested with BYK - Gardner Wave Scan 5+ measurement device showing visual acuity (contrast sensitivity) to the human eye at distances greater than 3 meters (10'-0"). Contrast/waviness for chalkboards (light and dark effects) shall be no less than 20 when tested with the contrast measurement test with 773-gram load on chalk. Resolution (visual acuity) shall be based on 3 lines per degree and be visibly maintained beyond the current standard of 3 meters.
Erasability	For whiteboards, dry-erase marker ink can be wiped off easily with a dry cloth or standard eraser. Crayon, semi-permanent, and permanent marker pen inks can be removed with a solvent based cleaner. Chalkboards erase easily with a dry cloth or standard chalk eraser, retains minimal residual chalk dust, and will not leave "ghost writing." Color change (dark/light) after chalk erasing is reduced 60% from traditional surfaces.
Cleanability (Washability)	WET Ghost measurements on chalkboard surfaces before and after wet cleaning shall not exceed a factor of 0.49. For further care and cleaning instructions, refer to the www.steelcase.com/en/products/category/markerboards/static-boards .
Wearability	Vitrified glass-hard ceramic surface fused to light-gauge enameling grade steel at approximately +1250°F for chalkboards and +1500°F for whiteboards. High resistance to impact damage, abrasion, scratching, and color fading. The e ³ environmental CeramicSteel surface registers at a minimum of 5 for chalkboards and 6.5 for whiteboards on the revised Mohs hardness scale.
Magnet Capability	The e ³ environmental CeramicSteel surfaces are ideal for all magnets and magnetic impregnated materials and will not be scratched or damaged from the contact.
Flame Resistance	The e ³ surface is 100% non-combustible.

Low-Gloss Whiteboards

The ultra-smooth finish enables dry markers and chalk to glide easily across the e³ environmental CeramicSteel surface with minimal friction. The surface smoothness allows more dry-erase ink and chalk to be removed, improving erasability and eliminating "ghost writing".

*All whiteboard erasability tests were conducted using High-Gloss e³ environmental CeramicSteel surfaces.

Writeability

Low-Gloss provides the same writing characteristics as High-Gloss.

Erasability

Low-Gloss surfaces will not erase as thoroughly as High-Gloss surfaces. When this occurs, a water-dampened cloth will be required to erase the surface.

Surface distortion (Orange Peel) has been reduced significantly in direct comparison with the competition's surface.

Cleanability

After normal erasing of Low-Gloss surfaces, solvents may be used to remove harder-to-erase dry marker inks and residue from other pens. Always clear water rinse after using any cleaning agent on the surface.

The e³ environmental CeramicSteel surface maximizes the performance of reflected light and reduces surface glare, resulting in improved visibility under a wide range of lighting conditions.

Understanding Parametrics

What is Parametric?

Parametrics is the ability for a customer to change dimensions of a product within pre-engineered limits.

Customers do not have to go through the specials process for dimensional size changes, thus reducing lead times.

Parametric Premium Whiteboards allow for the specification of non-modular sizes in three trim styles to suit a variety of design applications. The two style numbers are PWBWTBRD for whiteboards and PWBTKBRD for tackboards.

► Specifying, page 32

Trim styles:

- Edge Series
- 110 Series
- 555 Series

Parametric Polyvision whiteboards allow for specification of non-modular sizes with or without edge framing, varying by product selected. The two style numbers for Polyvision whiteboards are **PVFLOWPM** for Flow and **SANSPM** for Sans.

Two edge options are available:

- Sans—frameless only, optional accented edge colors
- Flow— anodized aluminum, framed or frameless

Parametric products requiring digital print graphics will need to be quoted by Specials. Refer to Sans, Sans Light, or Parametric Premium Whiteboards for standard graphic patterns and finish color options.

Overall Dimensions

Premium whiteboard and tackboard dimensions can be ordered to the $\frac{1}{16}$ of an inch within these ranges.

For whiteboards, the range of sizes is:

- Width: 24.25" to 192.25"
- Height: 18.25" to 48.25"

For tackboards, the range of sizes is:

- Width: 24.25" to 120.25"
- Height: 18.25" to 48.25"

Polyvision whiteboard dimensions vary by product selected and orientation. Dimensions can be ordered to the $\frac{1}{16}$ of an inch within these ranges. The marker tray option is not available for Sans or Flow parametric.

SANSPM the range of sizes is:

Horizontal:

- Width: 24" to 144" (610 mm to 3658 mm)
- Height: 24" to 46.625" (610 mm to 1184 mm)

Vertical:

- Width: 24" to 46.625" (610 mm to 1184 mm)
- Height: 46.6875" to 96" (1186 mm to 2438 mm)

PVFLOWPM the range of sizes is:

- Width: 46.6535 (1185 mm) The width for **PVFLOWPM** is a fixed dimension
- Height: 60" to 96" (1524 mm to 2438 mm)

Connections

Edge Series

2" over panel bracket/hook mounting system allows for Premium Whiteboards to be mounted on Kick and Avenir.

3" over panel bracket/hook mounting system allows for Premium Whiteboards to be mounted on Answer and Montage.

110/555 Series

Metal cleat-mounting system is standard on Edge Series.

Wall-anchored mounting system is standard on 110 and 555 Series.

On- and off-module bracket allows for Premium Whiteboards to be mounted on Privacy Wall, Answer, or Kick using a standard metal cleat-mounting system.

Spline joints allow larger format boards to be delivered in two equal pieces and require assembly on-site. There will be a visible seam where the boards and marker trays are joined that will not hinder the performance or writeability of the board in any way. They are available as options with upcharge on Edge, 110, and 555 trim types 120.25" and larger in width.

Additional options for 110 and 555 Series include maprail, map hook/clips, flag holder, and roller bracket.

1" maprail is of cork construction and allows for versatility with accessories. Maprail is not available on tackboards.

Map hook/clip, flag holder, and roller bracket must be specified with maprail; cannot be specified separately.

1" map hook/clip allows for ease in hanging maps and charts for presentation purposes.

1" flag holder allows for convenient hanging of flags.

Roller bracket can be ordered if 1" maprail option is selected. Roller bracket is not available on tackboard.

Package of four dry-erase markers (black, blue, red, and green) and one eraser is included with whiteboards.
