

# Elective Elements Parametric Specification Guide

## Availability

**Electronic price list updated** with release 200.M (U.S.) and 156.M (Canada), dated June 17, 2024.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

## Surface Materials

**The surface materials team** has announced the launch of the Finish Library, found at [www.steelcase.com/finishlibrary/](http://www.steelcase.com/finishlibrary/).

► For a list of all trademarks, refer to the last page of this specification guide. © 2024 Steelcase Inc.

### For Canadian Pricing

Canadian factor can be found at [www.steelcase.com/CADpricing/](http://www.steelcase.com/CADpricing/).

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

# Ten Tips: How to Get the Most Out of This Book

## Tip 1

**Watch** the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

## Tip 2

**Use the Statement of Line pages** for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

## Tip 3

**Find cross references** by looking for page numbers flagged with an arrow.

## Tip 4

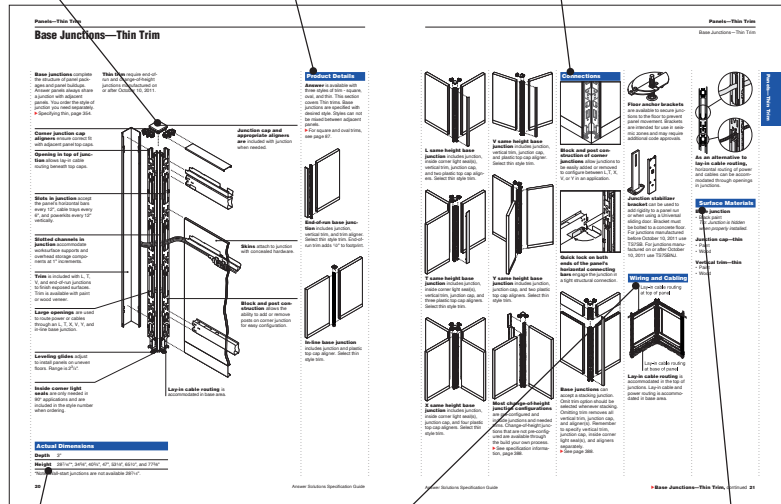

**Study the product detail pages** in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

**Product Drawing** shows you what the product looks like and points out important features.

**Product Details** gives specific information on the product and how it is used.

**Connections** describes how the product is assembled or how it attaches to another product.

**Actual Dimensions** table lists the dimensions of the product.

**Wiring and Cabling** details the power and cable-management and cable routing capabilities of the product.

**Surface Materials** lists what material is used for each part of the product.

**Tip 5**

**Refer to the specifying pages** for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
- Dimensions
- Style Number
- Price

**Standard Includes** (under the red or dark grey band) provides a list of what comes standard with the product.

**Required to Specify** (under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

**Specification Information** (under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

**Product Drawing** shows you what the product looks like.

**Options** (under the black band) lists all the options that apply to the product, their price, and what is required to specify.

**Related Products** provide specification information for products that are directly related.

**Tip 6**

**Required to Specify**

Specify with *Customiz Stain*

**Italic typeface** on specifying pages usually identifies wording that you should use in your order.

**Tip 7**

**To determine** how many skins are needed to complete a panel, consult the table at the right.  
*Tip: Remember to order skins for both sides of the panel buildup.*

**Watch for tips** throughout the text that give you explanations and helpful instructions.

**Tip 8**

**Learn what you cannot do** by looking for drawings crossed out with an "X."

**Tip 9**

**Use the surface materials listings** in the Surface Materials section of this book to find surface material color numbers.

**Tip 10**

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

**Refer to the style number index** when you need a style number and you need to find the page that has more details about the product.

# Additional Resources

## Elective Elements

**Parametric products** are supported with informational materials, tools, and software to help you plan, specify, and order an installation efficiently.

### FSC CoC Certification

Steelcase Wood harvesting practices are just one of the steps in achieving Forest Stewardship Council Chain of Custody (FSC CoC) certification. FSC certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

### Product brochures and planning tools

can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at [village.steelcase.com](http://village.steelcase.com).

**Planning Ideas** is your resource to help inspire, envision, and plan Steelcase wood solutions.

► See [www.steelcase.com](http://www.steelcase.com), resources, design center, planning ideas.

### Wood Solutions

**Interactive Tool** has everything you need to talk about wood solutions combined in one interactive tool. [www.steelcase.com/woodinteractive](http://www.steelcase.com/woodinteractive)

**Wood touch up kits** are available in specific finishes for field repair.

► Page 221

## Printed Materials

### Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Surface material selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

### Hard Surfaces Card

The card provides an overview of:

- Finish levels
- An explanation of Flat Cut, Rift Cut and Quarter Cut
- Veneer lay-up techniques on exterior surfaces
- Wood finishes
- Certifications

Form number 09-0000483

### Specification Guides

The following Specification Guides contain panels, supports, complementing tables, and complementing desk and seating that work with Elective Elements Parametric:

### Montage Solutions Specification Guide

### Answer Solutions Specification Guide

### Architectural Solutions Specification Guide

### Seating Specification Guide

### Steelcase Worktools Specification Guide

### V.I.A. Specification Guide

## Computer Tools

### Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools — Steelcase's design and specification software (for more information on SmartTools, please email [SmartTools@steelcase.com](mailto:SmartTools@steelcase.com)), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 CAP Studio.

### Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

### Digital Publications

You can access these digital publications at [www.steelcase.com](http://www.steelcase.com) or [village.steelcase.com](http://village.steelcase.com).

## Support

### Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

### For ordering or product assistance,

please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to [lineone@steelcase.com](mailto:lineone@steelcase.com).

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: [www.steelcase.com](http://www.steelcase.com).

## Sustainability

**At Steelcase**, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies. To learn more at a corporate level, visit: <https://www.steelcase.com/discover/steelcase/esg-overview/environmental/ProductEnvironmentalProfiles>, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at *Origin.build*.

### Back Panel For Use with Any Depth Floating Shelf

Parametric Width	18"–120"
Parametric Height	8"–48"
Thickness	¾"

Tip: Available parametrically in 1/16" increments.

**Elective Elements Parametric** includes worksurfaces, modesty panels, end panels, and wall-mounted tackboards. These products have the ability to flex dimensionally by 1/16" increments for depths and widths, and an unlimited increment for heights. Each product has its own parametric range that the dimensions can flex to. This enhanced flexibility within the products allow them to work endlessly to fit any dimensional need.

## Specification and Design Planning

### Specification

Elective Elements Parametric can be specified through SmartTools and Hedberg. Specification through SmartTools is highly recommended to ensure correct fit and function of the products. SmartTools has also been designed to ease specification while planning with the products.

Using Hedberg to specify Elective Elements Parametric is not recommended, as there is a risk of incorrect specification and misalignment of the products. Hedberg should only be used to specify when a small change is needed and a SmartTools spec has already been created.

### Blending Elective Elements Parametric with Elective Elements

Planning with both Elective Elements and Elective Elements Parametric products is available and recommended. The general rule around using Elective Elements Parametric with Elective Elements is:

– **Elective Elements Parametric worksurfaces cannot connect to Elective Elements end panels and modesty panels. They can only connect to Elective Elements Parametric end panels and modesty panels.**

– Elective Elements Parametric worksurfaces can connect to Elective Elements plinth base and leg base storage 36"W or less.

– Elective Elements Parametric worksurfaces, end panels, and modesty panels can be used with all of the legs and supports found in Elective Elements: gate leg, rectangular column leg, rectangular column leg with base, column, disk column, freestanding table base, adjustable-height legs, and parallel slip-fit support.

*Tip: See Elective Elements Specification Guide to specify the supports.*

– Elective Elements Parametric glass modesty panels can be used with modular worksurfaces, plinth and leg base end panels, and storage.

There are some limitations when using Elective Elements Parametric with Elective Elements:

– Elective Elements Parametric worksurfaces, end panels, and modesty panels cannot connect to the Elective Elements worksurfaces, plinth or leg base end panels, and modesty panels.

– Elective Elements Parametric worksurfaces cannot connect to leg base storage units greater than 36"W.

### Planning with SmartTools

Elective Elements is split into eight different product groupings: worksurfaces, worksurface supports, below worksurface storage, freestanding storage, above worksurface storage, above worksurface supports, accessories, and power. To make the planning process smooth, use the following order of product groupings for SmartTools placement.

<b>Worksurfaces</b>	include multiple shapes used for desks, run-offs, bridges, personal table tops, and storage tops. <i>Tip: Worksurfaces can be placed at different heights. The placement of the worksurface should start at the highest desired height going down to the lowest desired height.</i>
<b>Worksurface supports</b>	include end panels, modesty panels, legs, and table bases that can be used to build up a desk or worksurface application.
<b>Below worksurface storage*</b>	includes pedestals and laterals that can be used to support a worksurface or as stand-alone storage piece.
<b>Freestanding storage*</b>	includes bookcases, towers, vertical cabinets, cabinets, and file surrounds that provide space to store belongings.
<b>Above worksurface storage*</b>	includes single-high and double-high overheads, organizer shelves, and the floating shelf.
<b>Above worksurface supports</b>	are used to support above worksurface storage and include high pedestals, hutch kits, and side support frames.
<b>Accessories*</b>	such as wall-mounted tackboards, magnetic back-painted glass, task lights, and light valances can add touches of personalization to each setting.
<b>Power*</b>	allows users to stay connected in any worksurface application and include grommets infeeds and harnesses.

\*See Elective Elements Specification Guide for additional products.

# Elective Elements Parametric Dimension Guide

When planning with Elective Elements Parametric and Elective Elements it is important to ensure the correct dimensions are being specified.

Depths and widths of the Elective Elements products are actual and align to the actual depths and widths of Elective Elements Parametric.  
*Example: 60"W Elective Elements worksurface will align with a 60"W Elective Elements Parametric worksurface.*

The height dimensions of the Elective Elements products in the specification guide are nominal (these are not actual, but rather are rounded in imperial from metric), while the height dimensions of Elective Elements Parametric products are actual. When specifying an Elective Elements Parametric product to align with an Elective Elements products, use the height matrix, or SmartTools, to determine the correct height dimension.

*Example: To order an Elective Elements Parametric end panel to match the height of the Elective Elements 27½"H end panel, specify the height dimension as 27.5591"H.*

## End Panels and Storage

	Nominal Elective Elements Dimension		Matching Elective Elements Parametric Dimension
L-shape above worksurface end panel	10 <sup>3</sup> / <sub>8</sub> "	equals	10.8213"
T-shape above worksurface end panel	10 <sup>3</sup> / <sub>8</sub> "	equals	10.8213"
T-shape above worksurface end panel	4½"	equals	4.5221"
Perpendicular tether support panel	4 <sup>5</sup> / <sub>8</sub> "	equals	4.5221"
One-high storage	15½"	equals	15.3189"
1.5-high storage	21½"	equals	21.6181"
Two-high storage	27½"	equals	27.5591"
Tall pedestal	35 <sup>7</sup> / <sub>8</sub> "	equals	35.8268"
Three-high storage	39 <sup>3</sup> / <sub>8</sub> "	equals	39.4606"

## Modesty Panels

	Nominal Elective Elements Dimension		Matching Elective Elements Parametric Dimension
Desk modesty panel	12"	equals	12.0000"
Glass hanging modesty panel	12 <sup>1</sup> / <sub>16</sub> "	equals	12.0470"
Desk modesty panel	18"	equals	18.6875"
Modesty panel for use with run-off tops	18"	equals	18.6875"
Bridge modesty panel for leg base	18 <sup>1</sup> / <sub>16</sub> "	equals	18.6886"
Glass desk modesty panel	18 <sup>13</sup> / <sub>16</sub> "	equals	18.8600"
Full-height modesty panel for 1.5-high storage	21½"	equals	21.6181"
Full-height modesty panel for Two-high storage	27½"	equals	27.5591"
Bridge modesty panel	27½"	equals	27.5591"

## Wall-Mounted Tackboards for Use with Overheads

	Nominal Elective Elements Dimension		Matching Elective Elements Parametric Dimension
For use with double-high overhead	18½"	equals	18.5222"
For use with single-high overhead	21½"	equals	21.6206"
For use with double-high overhead and blade accessory shelf	15 <sup>5</sup> / <sub>8</sub> "	equals	15.3451"
For use with single-high overhead and blade accessory shelf	18½"	equals	18.5222"

**Wall-Mounted Tackboards for Use with Service Modules**

	<b>Nominal Service Module Width Dimension</b>	<b>Matching Tackboard Parametric Width Dimension</b>	<b>Matching Tackboard Parametric Height Dimension</b>
For use with 32¼"H single-high service modules	60"	58.375"	17.1875"
	66"	64.375"	17.1875"
	72"	70.375"	17.1875"
	78"	76.375"	17.1875"
	84"	82.375"	17.1875"
	90"	88.375"	17.1875"
	96"	94.375"	17.1875"
For use with 36⅝"H and 43½"H single-high service modules	60"	58.375"	21.5625"
	66"	64.375"	21.5625"
	72"	70.375"	21.5625"
	78"	76.375"	21.5625"
	84"	82.375"	21.5625"
	90"	88.375"	21.5625"
	96"	94.375"	21.5625"
For use with 36⅝"H and 43½"H single-high service modules and blade accessory shelf	60"	58.375"	18.4375"
	66"	64.375"	18.4375"
	72"	70.375"	18.4375"
	78"	76.375"	18.4375"
	84"	82.375"	18.4375"
	90"	88.375"	18.4375"
	96"	94.375"	18.4375"
For use with double-high service modules	60"	58.375"	18.4375"
	66"	64.375"	18.4375"
	72"	70.375"	18.4375"
	78"	76.375"	18.4375"
	84"	82.375"	18.4375"
	90"	88.375"	18.4375"
	96"	94.375"	18.4375"

# Understanding Elective Elements Parametric Worksurfaces

## Application Topics

Worksurface Lettering System	26
Edge Profile Application Guidelines	28
Worksurface Edge Matrix	30
Worksurface Grain Directions	33
Worksurface Wiring and Cabling	34
Grommet and Scallop	36
Personal Table Top and Support Guidelines	38

## Worksurface

Straight, Desk, Return, Desk Return, and Bridge Worksurfaces	40
Single Tapered, Single Tapered Run-Off, Double Tapered Run-Off, Bullet, and P-Top Worksurfaces	42
Corner and Extended Corner Worksurfaces	44
Transaction Worksurfaces	46
Personal Table Tops	48
Common Top for Height-Adjustable Desk Application	50

# Worksurface Lettering System

## Specifying Dimensions

**When specifying worksurfaces in SmartTools or Hedberg,** a lettering system is used to call out the worksurface sides that are specifiable.

**When worksurfaces that have multiple depths and/or widths that must be specified,** use the letters to identify each side. The lettering starts at the top of the worksurface with 'A' and moves counter-clockwise around the surface for 'B', 'C', and 'D'.

**If the worksurface side is not specifiable dimensionally,** the lettering will skip over the side and continue the pattern. P-top and double tapered worksurfaces are examples of this.

**Straight Worksurface or Desk Straight Worksurface**

**Desk Bow Worksurface**

**Return Worksurface, Desk Return Worksurface, or Bridge Worksurface**

**Transaction Worksurface**

**Personal Table Tops**

**Common Top for Height-Adjustable Desks**

# Edge Profile Application Guidelines

## Edge Profile Types

**Wood worksurfaces** are available with two different wood edge profiles.

▶ See *Edge Matrix*, page 30

3 mm Wood Square Edge

2 1/8" Wood Blade Edge

*Tip: For wood and plastic blade edge profiles, the sloping underside of the edge is not finished.*

**Laminate worksurfaces** are available with three different edge profiles.

▶ See *Edge Matrix*, page 30

3 mm Plastic Square Edge

3 mm Wood Square Edge

2 1/8" Laminate Blade Edge

## Edge Profile Details

### 3 mm wood edges and 3 mm plastic edges

have a slightly ergonomically rounded profile for user comfort.

### Wood edge profile (square) on laminate work surface or (square or blade) on wood work surface

is achieved by adding a specially shaped solid wood edge to the work surface core. The 0.5 mm edge is wood banded. The 3 mm square and blade edges are made of wood solids. Wood solids run the length of straight edges. The 3 mm and 1.5 mm edge can wrap around curved edges.

**Plastic square edge profile on a laminate work surface** is achieved by adding plastic surfaces to the work surface core. This technique can be applied to work surfaces that are straight or curved.

**Grain direction of solid wood edge profile** is always parallel to the edge, regardless of grain direction of wood work surface.

## Edge Profile Connections

**Coped work surface edge** is standard with blade edge profile in a return, desk return, bridge, or run-off application to provide a smooth transition between the adjoining work surfaces. When a 3 mm square edge profile is specified, the edge which typically would be coped features a 3 mm wood (on wood work surfaces) or a 1 mm plastic (on laminate work surfaces) edge profile. Coped work surfaces can be used in freestanding and system applications.

**For bridge work surfaces with a blade edge**, subtract 2 1/8" from each side (4 1/4" total) for precise dimensions. The same applies to a bullet or P-top, and a U-shaped setting.

## Edge Profile Alignment

**Work surface edge** aligns with drawer face if square edge profile is selected. If the blade edge profile is selected, the bottom corner of the blade edge aligns with the pedestal drawer front.

**For work surfaces with a blade edge**, 2 1/8" will be added to the size of the work surface wherever the profile is added. For example, straight work surface would have 2 1/8" added to the depth measurement. However, a desk work surface would add 4 1/4" to the depth because the blade edge profile is located on the front and back of the work surface.

**The nominal width of a bridge coped with blade edge work surface** is approximately 4 1/4" less than a square edge.

**A worksurface with a blade edge** is not recommended next to a tower, the edge extends 2 1/8" beyond. A square edge profile offers a more consistent appearance.

**When mounting storage on worksurfaces with blade edge profile**, subtract 2 1/8" extension caused by the shape of the blade edge.

**Blade edge profile** cannot be used with either a height-adjustable leg or a gate leg. It is also recommended that the blade edge worksurface should not be used with a beam pull as it is difficult to access under the blade edge.

**Surface Materials**

**On wood worksurface**, specify the wood color. The wood worksurface and wood edge will be the same color. Worksurface and edge cannot have different stain colors.

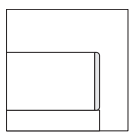

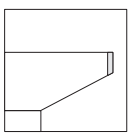

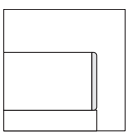

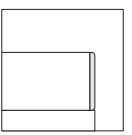

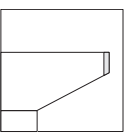

**On a laminate worksurface with plastic edge**, specify the 3 mm plastic edge color. The 1 mm plastic edge defaults to match the specified 3 mm finish.

**On a laminate worksurface with wood edge**, specify the wood edge color. The 1 mm plastic edge defaults to match the color of the laminate surface.

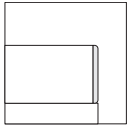

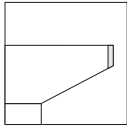

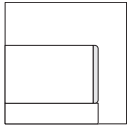

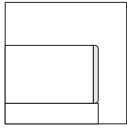

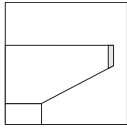

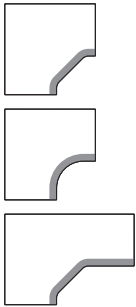

**Edge profile samples** can be ordered to meet your specifications. These 18"D x 20"W worksurfaces can be ordered with any Elective Elements edge profile and worksurface option.

# Worksurface Grain Directions

**Wood** is a natural, unique, and always changing material. No two pieces are the same. The appearance of each surface will vary based on a piece's individual grain pattern, underlying color, and characteristics (like gum pockets and pin knots). While the finishing process is identical for all pieces, each finished piece celebrates wood's individual beauty. Because wood contains standing fibers, similar to suede, the orientation of the grain pattern to a light source will cause it to reflect light differently and look a slightly different color. Two surfaces with grain directions that are at different angles to each other will look different. This natural phenomenon is called flash or polarization. This can happen within a piece as alternating veneer leaves are placed side by side or from piece to piece. Polarization is often noticed on worksurfaces installed at a 90° angle with each other.

**Grain direction on wood veneer and laminate** is optional in long or short grain and on worksurfaces except corner, transaction, or personal tops.

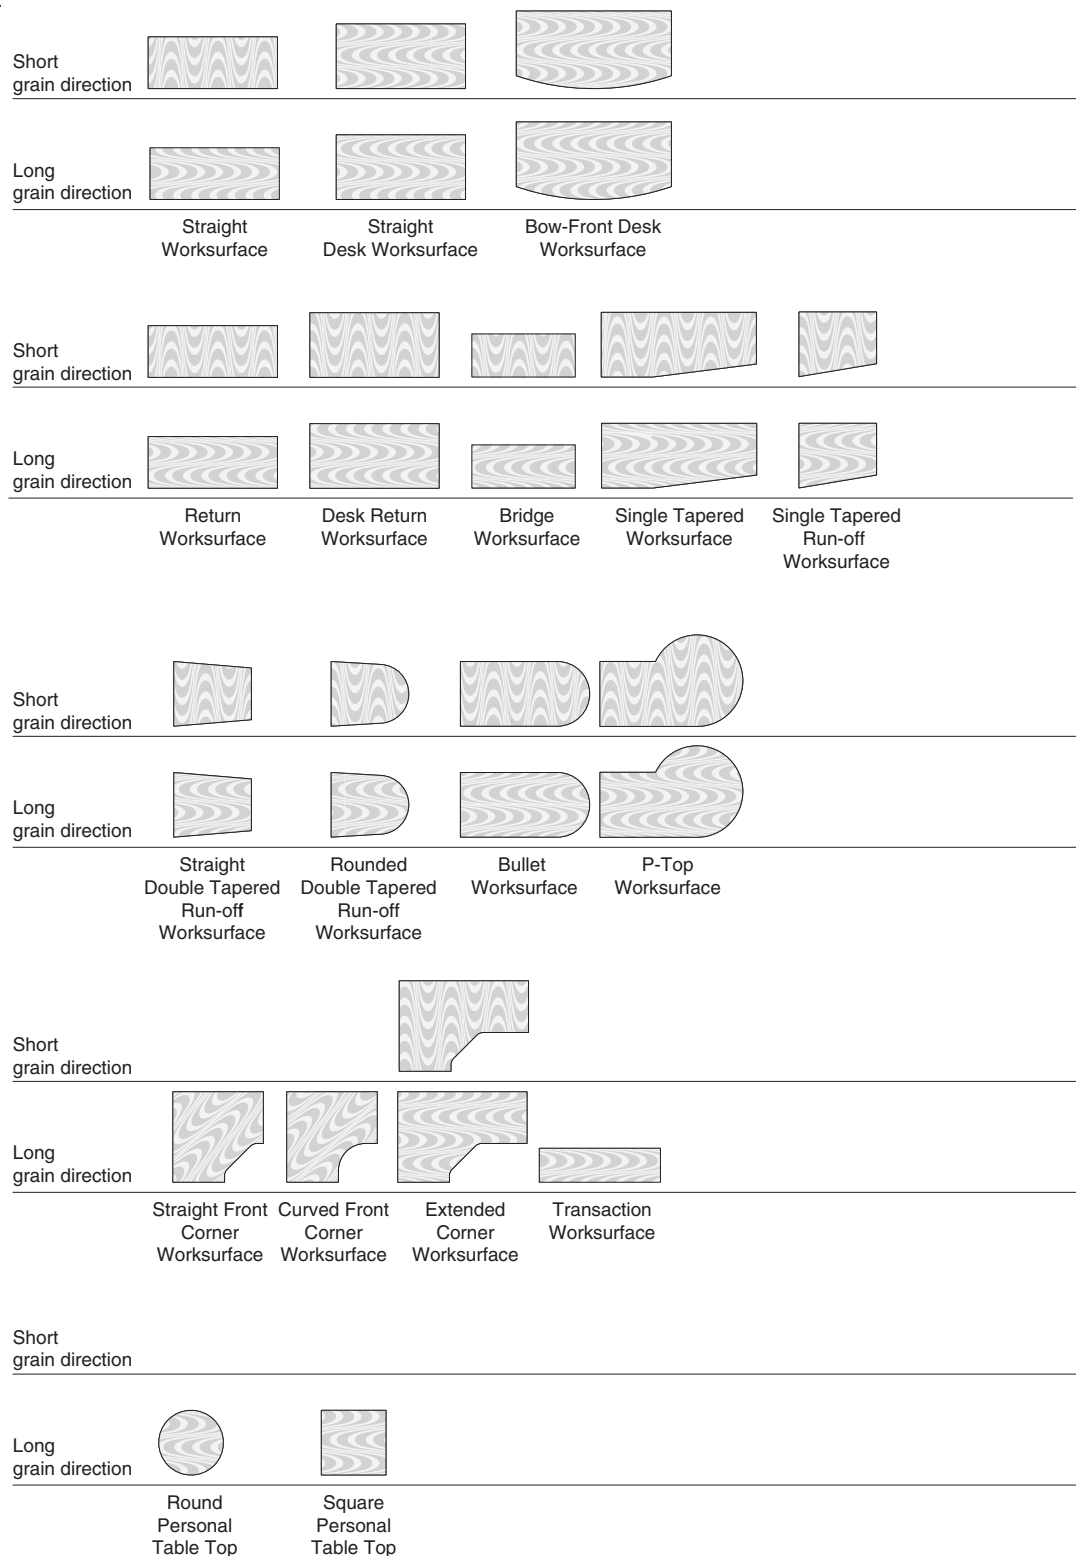

**Short grain direction on laminate** is only available on worksurfaces with widths 60" or less.

**Short grain direction on wood veneer worksurfaces** ensures that the wood grain in an installation all runs in the same direction.

**Make a sketch of the grain direction** for adjacent worksurfaces to ensure they are suitable for your installation.

**Please refer to the illustrations at right** for an understanding of grain direction on your installation.

**Directional laminates** are standard with the grain directions shown.

# Worksurface Wiring and Cabling

## Round Grommet

### Actual Dimensions

**Diameter** 2½"

*Tip: For installation purposes, the actual hole size for the round grommet is 2¼" in diameter.*

### Product Details

**Round grommets** provide a way for cords and cables to pass through the worksurface. It is specified within the worksurface style number.

**Accommodates** a three-prong plug through the opening.

**Cords and cables** can be routed behind pedestals and into the distribution channel on plinth base 1.5 high. There is a ¾" clearance behind 17¼"D, 23¼"D, and 29¼"D\* pedestals, and 17¼"D lateral files. There is a 6" clearance behind 23¼"D lateral files and a 12" clearance behind 29¼"D lateral files. For leg base storage, there is a cutout in the bottom panel to allow cord passage. *\*29¼"D pedestals are not available in a leg base application.*

### Connections

**Location of grommet** varies depending on the worksurface shape and type of support used.   
▶ See *Grommet and Scallop*, page 36

**Inset grommet location** is available for desk worksurfaces with an overhang. It is located approximately 8½" from the back edge of the worksurface. Grommets located on the back edge should not be used on worksurfaces with an overhang.

**Hutch kits and service modules** that extend to the middle of a worksurface may interfere with the center grommet.

**Scallops** may be used in conjunction with grommets.

**Round grommets** cannot be used adjacent to a gate leg due to bracket interference.

### Surface Materials

#### Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 9201 Polished Chrome
- 9211 Nickel

## Square Grommet

### Actual Dimensions

**Depth** 4½"

**Width** 6¾"

**Size of pass through hole** 3¾"

### Product Details

**Square grommets** are equipped with a door that swings up to provide a way for cords and cables to pass through the worksurface. It is specified as an option with a worksurface style number.

**Square grommets** cannot be used adjacent to a gate leg due to bracket interference.

**Power unit** with cord pass-through can be installed below the square grommet for effortless access. The power unit must be specified separately.   
▶ Refer to the *Elective Elements Specification Guide*.   
*Tip: Depending on layout, power unit may be visible on freestanding furniture if it is not equipped with a modesty panel.*

**Power units** cannot be used over 15"W or 18"W pedestals but can be used over 30"W or 36"W lateral files that are 30"D.

**Square grommets** cannot be placed over a lateral file or pedestal that are the same depth as the worksurface, due to interference.

**A square grommet with power unit** cannot be placed over any worksurface with credenza storage. It is allowed in a leg base kneewell.

**Unlike a round grommet** which can be easily cut in the field, square grommet requires very precise measurements as the lip protrudes only ⅛".

**Cords and cables** can be routed behind plinth base and leg base storage and into the distribution channel on plinth base 1.5 high. There is a ¾" clearance behind 17¼"D, 23¼"D, and 29¼"D\* pedestals, and 17¼"D lateral files. There is a 6" clearance behind 23¼"D lateral files and a 12" clearance behind 29¼"D lateral files. For leg base storage, there is a cutout in the bottom panel to allow cord passage. *\*29¼"D pedestals are not available in a leg base application.*

### Connections

**Location of grommet** varies depending on the worksurface shape and type of support used.   
▶ See *Grommet and Scallop*, page 36

**Inset grommet location** is available for desk worksurfaces with an overhang. It is located approximately 8½" from the back edge of the worksurface. Grommets located on the back edge should not be used on worksurfaces with an overhang.

**Hutch kits and service modules** that extend to the middle of a worksurface may interfere with the center grommet.

**Scallops** may be used in conjunction with grommets.

### Surface Materials

#### Square grommet door and frame

- 8043 Clear Anodized Aluminum
- 8044 Black Anodized Aluminum

## Scallop

### Actual Dimensions

<b>Depth</b>	1 $\frac{3}{8}$ "
<b>Width</b>	6 $\frac{1}{8}$ "
<b>Height</b>	1 $\frac{1}{2}$ "

### Product Details

**Scallops** provide an orderly way for cords and cables to pass over the back edge of the worksurface.

**Scallops** are also an option on modesty panels. If the worksurface has a scallop then it is recommended that the modesty panel has a scallop as well. It is not recommended for a modesty panel to have a scallop if the worksurface does not have a scallop as the opening is small.

### Connections

**Scallop availability** varies depending on the worksurface shape. When available, scallop is centered on the back edge of the worksurface.

▶ See *Grommet and Scallop*, page 36

**Hutch kits and service modules** that extend to the middle of a worksurface may interfere with cords or cables routed through the scallop.

**Wall-mounted tackboard** will cover the worksurface scallop. Cords or cables should be routed before the tackboard or wood panel with slatwall is installed.

**Modesty panel scallop** must be in the same location as the worksurface scallop to allow a cord plug to route through.

**Round and square grommets** may be used in conjunction with scallops.

### Surface Materials

#### Scallop on worksurface

- Wood banded, if wood worksurface is selected
- Plastic, if laminate worksurface is selected

#### Scallop on modesty panel

- Unfinished

# Grommet and Scallop

**Corner (left or right) grommets** are always  $3\frac{5}{16}$ " from the edge of the workspace. In a desk application, they can either be  $3\frac{5}{16}$ " in a rear application or  $8\frac{1}{2}$ " in an overhang application. If a blade edge profile is specified, grommets are located  $5\frac{7}{16}$ " or  $10\frac{5}{8}$ " from the visitor's side of a desk.

**Center grommets** are always  $3\frac{5}{16}$ " from the visitor's side. In a desk application, it can either be  $3\frac{5}{16}$ " in a rear application or  $8\frac{1}{2}$ " in an overhang application. If a blade edge profile is specified on a desk workspace, the grommet is located  $5\frac{7}{16}$ " or  $10\frac{5}{8}$ " from the visitors side.

**Grommets** on desks with inset modesty panels should only be ordered in right or left position because the modesty interferes with the center placement.

**Square grommet door** flips to the left on left and center grommet locations, and it flips to the right on the right grommet location. The square grommet can be rotated  $180^\circ$  in the field.

*Tip: When using a pedestal under one side of the workspace, select the opposite side for the grommet to ensure easy access.*

*Tip: Desk workspaces can have grommets positioned in the overhang or rear of the workspace.*

## Workspace Grommet Availability

	No Grommet	1 Grommet Center Location	1 Grommet Left, Right, or Center	1, 2, or 3 Grommets Left, Right, Center, Left/Center, Right/Center, or Left/Right
--	------------	---------------------------	----------------------------------	---

## Round and Square Grommets

15"W–23 $\frac{15}{16}$ "W	24"W–29 $\frac{15}{16}$ "W	30"W–41 $\frac{15}{16}$ "W	42"W–120"W
----------------------------	----------------------------	----------------------------	------------

**Technology zone cut-outs** specified in the right or left position, are always 3<sup>5</sup>/<sub>16</sub>" from the edge of the worksurface.

*Tip: If a blade edge profile is specified, the technology zone cut-out is located 5<sup>7</sup>/<sub>16</sub>" from the visitor's side of the desk.*

**Technology zone cut-outs** specified in the center position are always 3<sup>5</sup>/<sub>16</sub>" from the back edge of the worksurface.

*Tip: If a blade edge profile is specified, the technology zone cut-out is located 5<sup>7</sup>/<sub>16</sub>" from the visitor's side of the desk.*

**Technology zone doors** flip toward the user.

*Tip: Technology zones are available in 24" width.*

*Tip: Only one technology zone cut-out is allowed in a worksurface.*

*Tip: To determine location of a technology zone on a bullet worksurface, stand at curved end facing the flat end.*

*Tip: The corded version of the technology zone is equipped with a circuit breaker.*

*Tip: Unlike a round grommet which can be easily cut in the field, a technology zone or square grommet requires very precise measurements as the lip protrudes only 1/8".*

# Straight, Desk, Return, Desk Return, and Bridge Worksurfaces

**Straight and desk worksurfaces** are used to build freestanding casegoods or can be used in panel-supported and desk applications. These worksurfaces are parametric and can flex by 1/16" increments to allow flexibility in planning.

► Specifying, page 86

**Return, desk return, and bridge worksurfaces** provide a secondary worksurface in conjunction with the primary worksurface. They each can attach parallel to the straight or desk worksurface or perpendicular on the left or right end. These worksurfaces are parametric and can flex by 1/16" increments to allow flexibility in planning.

► Specifying, page 94

**Straight and Return Worksurfaces**

**Bow-Front Desk Worksurface**

*Tip: Also available in straight-front.*

**Bridge Worksurface**

**Desk Return Worksurface**

## Product Details

**Worksurfaces** are available with different edge profiles depending on the top surface material. Wood veneer worksurfaces are available in two different wood edge profiles—square and blade. Laminate worksurfaces are available with three edge profiles—plastic square, wood square, and laminate blade.

► See *Edge Profile Application Guidelines*, page 28

**Straight, return, desk return, and bridge worksurfaces** come with a specified edge profile on the user's side only. All other edges will be 1 mm plastic or .5 mm wood square depending on the surface material type.

► See *Edge Profile Application Guidelines*, page 28

**Desk worksurfaces** come with a specified edge profile on both the user's and visitor's side. All other edges will be 1 mm plastic or .5 mm wood square depending on the surface material type.

► See *Edge Profile Application Guidelines*, page 28

**Desk worksurfaces** should be specified with a freestanding application. It cannot be panel supported.

**Desk worksurfaces** are specifiable with a straight or bow front option.

**Handedness** is optional on desk return worksurfaces.

## Actual Dimensions

### Straight Worksurfaces

Parametric Depth Range	18"–36"
Parametric Width Range	15"–120"
Thickness	1½"

### Desk Worksurfaces

Parametric Depth Range:	
Straight Front	24"–36"
Bow Front	24/30"–36/42"
Parametric Width Range	30"–114"
Thickness	1½"

### Return Worksurfaces

Parametric Depth Range	18"–30"
Parametric Width Range	18"–120"
Thickness	1½"

### Desk Return Worksurfaces

Parametric Depth Range	30"–36"
Parametric Width Range	36"–72"
Thickness	1½"

### Bridge Worksurfaces

Parametric Depth Range	18"–30"
Parametric Width Range	30"–102"
Thickness	1½"

**Grain direction** is optional in short and long grain direction on wood veneer and laminate. Short grain direction on laminate is only available on widths of 60"W or less.  
▶ See *Worksurface Grain Directions*, page 33.

**Desk worksurfaces** that have a straight front can have a maximum 6" overhang. To specify, choose a desk worksurface depth that is a maximum of 6.802" deeper than the storage or support.  
*Tip: 23 1/4"D and 29 1/4"D pedestals must be used for overhang desks. End panels less than 23 1/4"D should not be used in overhang configurations.*

**Desk worksurfaces** that have a bow front can have a 6" or 12" overhang. To specify, choose a desk worksurface depth that is 6.802" or 12.802" deeper than the storage or support.  
*Tip: 23 1/4"D and 29 1/4"D pedestals should be used for overhang desks. End panels less than 23 1/4"D should not be used in overhang configurations.*

## Connections

**Supports for these worksurfaces** are ordered separately and include:

- End panel
- Free support end panel
- Rectangular column leg, column, disk column, gate leg, adjustable-height legs, freestanding table base, and parallel slip fit support
- Plinth or leg base storage
- Support for use with 6" module panels, please refer to the selected panel systems specification guide.

▶ Refer to the *Elective Elements Specification Guide for non end panel supports*.

**Elective Elements Parametric worksurfaces** can only be used with Elective Elements Parametric end panels and modesty panels. However, they can be used with Elective Elements non end panel supports, plinth base storage, and leg base storage 36"W or less.

**Panel-supported applications** can be achieved by attaching straight worksurfaces to Montage, Answer, and Privacy Wall.  
▶ Refer to appropriate panel specification guide.

**When a worksurface** has an unsupported span that is greater than 60"W in a plinth base setting, a center support panel or worksurface brace must be used.

**Return worksurfaces** attach to the front edge of the adjacent worksurface.

**Desk return worksurfaces** should only be used on desk worksurfaces. It will attach to the front edge of the worksurface.

**Bridge worksurfaces** are used in between two adjacent worksurfaces and attach on the front edge of each.

**Attachment hardware** is included with the worksurface.

## Wiring & Cabling

**Round and square grommets** are available on straight, desk, return, desk return, and bridge worksurfaces. These are factory installed to allow power cords and cables to pass through the worksurface. Grommet location options vary depending on the type of worksurface and the type of support used.  
▶ See *Grommet and Scallop*, page 36.

**Worksurface scallop** is available on straight, return, and desk return to route cords and cables.  
▶ See *Worksurface Wiring and Cabling*, page 34.

**Cable tray** is available to field install under a worksurface to keep cords and cables out of the way.

## Surface Materials

### Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge profile
- Laminate with wood edge profile
- Custom stain (option on wood)

### Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 9201 Polished Chrome
- 9211 Nickel

### Square grommet

- 8043 Clear Anodized Aluminum
- 8044 Black Anodized Aluminum

# Single Tapered, Single Tapered Run-Off, Double Tapered Run-Off, Bullet, and P-Top Worksurfaces

**Single tapered, single tapered run-off, double tapered run-off, bullet, and P-top worksurfaces** provide an extended range of workstation layouts and offer unique support for meetings. These worksurfaces are parametric and can flex by  $\frac{1}{16}$ " increments to allow flexibility in planning.

► Specifying, page 106

## Product Details

**Worksurfaces** are available with different edge profiles depending on the top surface material. Wood veneer worksurfaces are available in two different wood edge profiles—square and blade. Laminate worksurfaces are available with three edge profiles: plastic square, wood square, and laminate blade.

► See *Edge Profile Application Guidelines*, page 28.

**Single tapered and single tapered run-off worksurfaces** come with a specified edge profile on the front edge only. A single tapered worksurface will have 1 mm plastic or .5 mm wood on all other sides with no coping. A single tapered run-off worksurface will have 1 mm plastic or .5 mm wood square edge on one side and back edge with a coped edge on the adjoining side; if a blade edge profile is specified.

► See *Edge Profile Application Guidelines*, page 28.

**Double tapered run-off, bullet, and P-top worksurfaces** come with a specified edge profile on three sides. The side next to the adjoining worksurface will be coped if a blade edge profile is selected. All other edges will be 1 mm plastic or .5 mm wood square depending on the surface material type. If a bullet or P-top worksurface is used in a freestanding application, there will be no coping.

► See *Edge Profile Application Guidelines*, page 28.

**Handedness** is optional on single tapered, single tapered run-off, and P-top worksurfaces.

**Grain direction** is optional in short and long grain direction on wood veneer and laminate. Short grain direction on laminate is only available on widths of 60"W or less.

► See *Worksurface Grain Directions*, page 33.

## Actual Dimensions

### Single Tapered Worksurfaces

Parametric Depth B Range	30"–36"
Parametric Depth D Range	Calculated
Parametric Width A Range	60"–120"
Parametric Width C Range	24"–30"
Thickness	1½"

### Double Tapered Run-Off Worksurfaces

Parametric Depth B Range	30"–42"
Parametric Depth C Range	Calculated
Parametric Width A Range	36"–90"
Thickness	1½"

*Tip: Available in straight and round shapes.*

### P-Top Worksurfaces

Parametric Depth B Range	30"–48"
Parametric Depth C Range	24"–36"
Parametric Width A Range	
Freestanding Application	54"–96"
Run-off Application	54"–90"
Thickness	½"

### Single Tapered Run-Off Worksurfaces

Parametric Depth B Range	30"–36"
Parametric Depth C Range	Calculated
Parametric Width A Range	36"–90"
Thickness	1½"

### Bullet Worksurfaces

Parametric Depth Range	18"–36"
Parametric Width A Range	
Freestanding Application	30"–120"
Run-off Application	30"–90"
Thickness	1½"

**On bullet and P-top worksurfaces** specify the application type of free-standing or run-off.

**Double tapered run-off worksurfaces** can be a straight or round shape.

### Connections

**Worksurfaces** can attach anywhere along the front of the adjacent worksurface. When run-off worksurfaces are attached to an adjacent worksurface in a T-configuration, the adjacent worksurface must be supported by storage or end panels that are the same depth as the worksurface. Attachment hardware is included.

**If a 1 mm edge of a run-off worksurface** connects to a 3 mm edge of an adjacent worksurface or vice versa, a coped edge will not be used.

### Supports for the run-off end of these worksurfaces

must be ordered separately and vary with selected worksurface. To support the worksurface, you can use:

- End panel
- Free support end panel
- Extended T-shape end panel
- Rectangular column leg, column, disk column, gate leg, adjustable-height legs, freestanding table base, and parallel slip fit supports
- Plinth or leg base storage
- Support for use with 6" module panels, please refer to the selected panel systems specification guide.

*Tip: Recommended supports vary based on work-surface length and support conditions on the other end.*  
 ▶ Refer to the Elective Elements Specification Guide for non end panel supports.

*Tip: For panel environments, follow worksurface support rules for either line-specific or Universal worksurfaces. If universal cantilevers are used, the tabs need to be pushed down. This is not required for line-specific (i.e. Montage) cantilevers.*

**Elective Elements Parametric worksurfaces** can only be used with Elective Elements Parametric end panels and modesty panels. However, they can be used with Elective Elements non end panel supports, plinth base storage, and leg base storage 36"W or less.

### Wiring & Cabling

**Round and square grommets** are available and are factory installed to allow power cords and cables to pass through the worksurface. Grommet location options vary depending on the type of worksurface and the type of support used.  
 ▶ See *Grommet and Scallop*, page 36.

**Worksurface scallop** is available on the back edge of a single tapered and single tapered run-off worksurface to route cords and cables.  
 ▶ See *Worksurface Wiring and Cabling*, page 34.

**Cable tray** is available to field install under a worksurface to keep cords and cables out of the way.

### Surface Materials

#### Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

#### Attachment hardware

- 0835 Black

#### Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 9201 Polished Chrome
- 9211 Nickel

#### Square grommet

- 8043 Clear Anodized Aluminum
- 8044 Black Anodized Aluminum

# Corner and Extended Corner Worksurfaces

## Corner and extended corner worksurfaces

create an angled transition between two right-angle worksurfaces of the same depth. They fit into the 90° angle formed by panels or structural walls. They can also be used in a freestanding open plan or private office setting. These worksurfaces are parametric and can flex by 1/16" increments to allow flexibility in planning.

▶ Specifying, page 126

**Straight-Front Corner Worksurface**

**Curved-Front Corner Worksurface**

**Extended Corner Worksurface**

## Product Details

**Worksurfaces** are available with different edge profiles depending on the top surface material. Wood veneer worksurfaces are available in two different wood edge profiles—square and blade. Laminate worksurfaces are available with three edge profiles: plastic square, wood square, and laminate blade.

▶ See *Edge Profile Application Guidelines*, page 28.

**Corner and extended corner worksurfaces** come with a specified edge profile on the front edge only. All other edges will be 1 mm plastic or .5 mm wood square depending on the surface material type.

▶ See *Edge Profile Application Guidelines*, page 28.

Right-hand

*Tip: The difference between width B and depth D of the corner and extended corner worksurface must be greater than or equal to 12".*

**Grain direction** is optional in short and long grain direction on wood veneer and laminate for extended corner worksurfaces. Short grain direction on laminate is only available on widths of 60"W or less. Grain direction is not optional on corner worksurface and will be diagonal.

▶ See *Edge Profile Application Guidelines*, page 28.

**A straight or curved front** is optional on corner and extended worksurfaces.

## Actual Dimensions

### Corner Worksurfaces

Parametric Depth C Range	18"–36"
Parametric Depth D Range	18"–36"
Parametric Width A Range	36"–48"
Parametric Width B Range	Calculated
Thickness	1½"

*Tip: Available in straight and rounded shapes.*

### Extended Corner Worksurfaces

Parametric Depth C Range	18"–36"
Parametric Depth D Range	18"–36"
Parametric Width A Range	36"–120"
Parametric Width B Range	36"–48"
Thickness	1½"

*Tip: Available in straight and rounded shapes.*

## Connections

**Supports for corner and extended corner worksurfaces** must be ordered separately and vary with selected worksurface.

To support the worksurface, you can use:

- Gate leg
- Corner support kit
- Rear L-shape corner support
- L-shape end panel
- Plinth or leg base storage for the long end of an extended corner worksurface
- Support for use with 6" module panels, please refer to the selected panel systems specification guide.

▶ *Refer to the Elective Elements Specification Guide for non end panel supports.*

*Tip: For panel environments, follow worksurface support rules for either line-specific or Universal Worksurfaces. If universal cantilevers are used, the tabs need to be pushed down. This is not required for line-specific (i.e. Montage) cantilevers.*

### Elective Elements Parametric worksurfaces

can only be used with Elective Elements Parametric end panels and modesty panels. However, they can be used with Elective Elements non end panel supports, plinth base storage, and leg base storage 36"W or less.

**Modesty panel** is ordered separately and is full height. It is stationary and is not required for support. It attaches to the end panel supports and rear corner support.

## Wiring & Cabling

**Round and square grommets** are available and are factory installed to allow power cords and cables to pass through the worksurface. Grommet location options vary depending on the type of worksurface and the type of support used.  
▶ See *Grommet and Scallop*, page 36.

**Worksurface scallop** is available centered on both back edges of corner and extended corner worksurfaces to route cords and cables.

*Tip: Worksurface scallops and modesty panel pass throughways do not line up when used on corner and extended corner worksurfaces.*

▶ See *Worksurface Wiring and Cabling*, page 34.

**Cable tray** is available to field install under a worksurface to keep cords and cables out of the way.

## Surface Materials

### Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

### Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 9201 Polished Chrome
- 9211 Nickle

### Square grommet

- 8043 Clear Anodized Aluminum
- 8044 Black Anodized Aluminum

# Transaction Worksurfaces

**Transaction work-surfaces** are used with Answer or Montage panels and provide a surface that can be used by standing visitors or serve as a shelf. These worksurfaces are parametric and can flex by 1/16" increments to allow flexibility in planning.

► Specifying, page 134

## Product Details

**Worksurfaces** are available with different edge profiles depending on the top surface material. Wood veneer worksurfaces are available in three edge profiles: plastic square, wood square, and laminate blade. Laminate worksurfaces are available with three edge profiles: plastic square, wood square, and laminate blade.

► See *Edge Profile Application Guidelines*, page 28.

**Transaction worksurfaces** come with a specified edge profile on the front and back edges. All other edges will be 1 mm plastic or .5 mm wood square depending on the surface material type.

► See *Edge Profile Application Guidelines*, page 28.

**Grain direction** is long grain direction on wood veneer and laminate.

► See *Worksurface Grain Directions*, page 33.

## Actual Dimensions

### Transaction Worksurfaces

Parametric Depth Range	
For Use with Answer	12"–16"
For Use with Montage	13"–16"

Parametric Width Range	18"–120"
------------------------	----------

Thickness	1 1/2"
-----------	--------

*Tip: Maximum width for transaction tops with Montage is 60"W.*

## Connections

### For Montage

**Transaction worksurfaces** attach to cantilevers that are inserted in the slotted channels of Montage panels and replace the panel's top cap. Attachment hardware is included.

**The width of the transaction worksurface** should equal the width of the panel.

**Transaction worksurface** can be centered over the Montage panel.

**Recommended height** (approximately 40"H) is achieved by attaching the transaction worksurface to 38"H (ordered through Specials) Montage panels. All panel heights can accept transaction worksurfaces.

**Taller panels** cannot be used adjacent to transaction worksurfaces. Adjacent panels must be the same height.

**Multiple Montage panels** can be spanned with transaction worksurfaces.  
▶ See *Montage Specification Guide* for more details.

### For Answer

**Transaction worksurfaces support brackets** connect to the top of a horizontal connecting bar. Horizontal bar must be connected to junctions in the top position. Attachment hardware is included.

**Transaction worksurfaces** cannot be used when a transparent window, pass-through window, or consolidation point cabinet is assembled at the top of a panel.

**Spanning two panels** is possible. If the transaction worksurface is 78"W or larger, the panels cannot be equal in width.

**The panel application of either change of height or panel run** must be specified.

**The width of the transaction worksurface in a panel run application** equals the width of the panel.

**The width of the transaction worksurface in a change-of-height application with slim trim top caps** should be specified as the plan width of the corresponding panel.

**The width of the transaction worksurface in a change-of-height application with cable routing** should be specified as the plan width of the corresponding panel.

**If adjacent panels** are shorter than the panel with the transaction worksurface, the transaction worksurface width must equal the width of the panel.  
▶ See to the *Answer Solutions Specification Guide* for more details.

**A top cap** must be specified and is available in square or oval.

**Transaction worksurface** must be centered on the panel.  
▶ See *Answer Solutions Specification Guide* for more details.

## Wiring & Cabling

**Cables** can still be routed in the space at the top of a Montage panel when a transaction worksurface is attached in place of a panel top cap.

▶ See *Worksurface Wiring and Cabling*, page 34.

## Surface Materials

### Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

### Attachment hardware

- 0835 Black

# Personal Table Tops

## Personal table tops

are available in square and round shapes. They provide an auxiliary workspace and offer a meeting area for both the private office and open plan. These worksurfaces are parametric and can flex by  $\frac{1}{16}$ " increments to allow flexibility in planning.

► Specifying, page 138

## Product Details

**Worksurfaces** are available with different edge profiles depending on the top surface material. Wood veneer tops are available in two different wood edge profiles: square and blade. Laminate tops are available with three edge profiles: plastic square, wood square, and laminate blade.  
 ► See *Edge Profile Application Guidelines*, page 28.

**Round and square personal tops** come with a specified edge profile all sides.

► See *Edge Profile Application Guidelines*, page 28.

**A blade edge on a personal top** will not add  $2\frac{1}{8}$ " to the overall dimensions of the worksurface. The added dimension of the blade edge is included in the overall depth for a personal top.

**Grain direction** is not specifiable on personal tops.  
 ► See *Worksurface Grain Directions*, page 33.

## Connections

**Supports for personal tops** must be ordered separately and vary with selected worksurface. To support the worksurface, you can use:

- Adjustable-height legs, see *Elective Elements Specification Guide*
- Freestanding table base, see *Elective Elements Specification Guide*
- Convene disk base, and other select Convene bases, see *Conference and Collaborative Tables Specification Guide*
- Groupwork table base, see *Conference and Collaborative Tables Specification Guide*

► Refer to application guidelines in the specification guide from which you are selecting.

## Actual Dimensions

### Round Personal Top

Parametric Diameter Range	24"–60"
Thickness	1 $\frac{1}{2}$ "

### Square Personal Top

Parametric Width Range	24"–60"
Thickness	1 $\frac{1}{2}$ "

### Wiring & Cabling

**Round grommets** are available and are factory installed to allow power cords and cables to pass through the worksurface. The grommet is located in the center of the personal top.

▶ See *Grommet and Scallop*, page 36.

### Surface Materials

#### Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

# Common Top for Height Adjustable Desk Application

## Common top for height adjustable desk application

attaches to the Elective Elements one-high open plinth base pedestal to seamlessly integrate the Ology desk into storage. It is parametric and can flex by 1/16" increments to allow flexibility in planning.

► Specifying, page 142

## Product Details

**Common top for height adjustable desk application** are available with different edge profiles depending on the surface material of the top. Wood veneer tops can have a wood square edge. Laminate tops can have a plastic or wood square edge. It can be used in longer sizes with additional Elective Elements one-high storage to create credenzas.

**Cut-out for Ology leg** is available on the left side or the right side of the common top. Ology desk cannot be placed in the middle of the common top.

**Grain direction** is optional in short and long grain direction on wood veneer and laminate. Short grain direction on laminate is only available on widths of 60"W or less.

► See *Worksurface Grain Directions*, page 33.

## Surface Materials

### Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

## Actual Dimensions

### Common Top for Height-Adjustable Desk Application

Parametric Depth Range 18"–24"

Parametric Width Range 24"–120"

Thickness 1 1/2"

---

# Understanding Elective Elements Parametric Worksurface Supports

## Application Topics

Worksurface Support Guidelines	52
Plinth Base Modesty Panel and Back Panel Options	54
Leg Base Modesty Panel and Back Panel Options	56

## End Panels

Plinth Base End Panel, L-Shape End Panel, J-Shape End Panel, and On-Module End Panel	58
Free Support End Panel and Extended T-Shape End Panels	60
Corner Support Kit and Rear L-Shape Corner Support	62
T-Shape End Panel, L-Shape Above Storage End Panel, and Perpendicular Tether Support Panel	64
Plinth Base Center Support Panel and Filler Panel	66

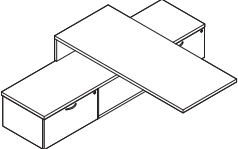

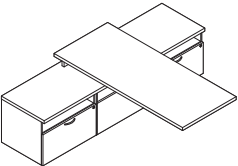

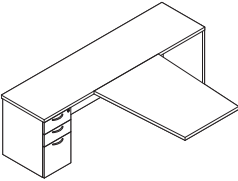

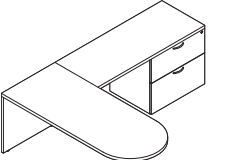

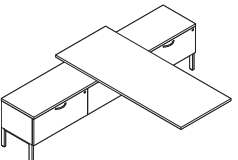

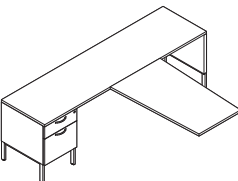

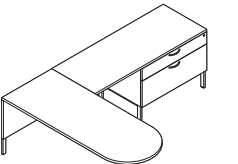

## Modesty Panels

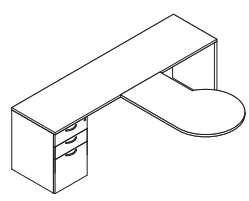

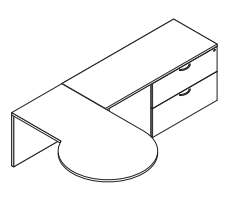

Full-Height Modesty Panel, Bridge Modesty Panel, Desk Modesty Panel, Freeform Hanging Modesty Panel, and Hanging Modesty Panels for Use with Run-Off Worksurfaces	68
Glass Desk Modesty Panels, Glass Modesty Panel for Use with Run-Off Applications, Glass Hanging Modesty Panels for Use with Run-Off Worksurfaces, and Freeform Glass Modesty Panel	72

# Worksurface Support Guidelines

For Use with Plinth Base and Leg Base

Elective Elements Parametric worksurfaces can only connect to Elective Elements Parametric end panels, modesty panels, and Elective Elements non end panel supports, plinth base storage, and leg base storage 36"W or less.

	<b>Gate, Column, or Rectangular Column Leg</b>	<b>Disk Column or Rectangular Column Leg with Base</b>	<b>Freestanding Table Base</b>	<b>Adjustable-Height Legs</b>
	When one end is supported by a T-shape or L-shape end panel greater than 4.5221"H on plinth base One-high pedestals	up to and including 72"W	all sizes approved	all sizes approved
	When one end is supported by a 4.5221"H perpendicular tether or T-shape end panel on plinth base 1.5-high storage	up to and including 84"W	greater than 84"W	all sizes approved
	When run-off worksurface is attached using flush mount brackets	up to and including 72"W	all sizes approved	all sizes approved
	When used to support a worksurface supported by a free support or L-shape end panel attached to a bridge or return worksurface	up to and including 90"W	all sizes approved	all sizes approved
	When one end is supported by a 4.5221"H perpendicular tether or T-shape end panel on leg base 21 1/2"H storage	up to and including 84"W	greater than 84"W	all sizes approved
	When run-off worksurface is attached using flush mount brackets	up to and including 72"W	all sizes approved	all sizes approved
	When used to support a worksurface supported by a leg base free support end panel or L-shape end panel attached to a bridge or return worksurface	up to and including 72"W	all sizes approved	all sizes approved

	<b>Gate, Column, or Rectangular Column Leg</b>	<b>Disk Column or Rectangular Column Leg with Base</b>	<b>Freestanding Table Base</b>	<b>Adjustable-Height Legs</b>
	When P-top worksurface is attached using flush mount brackets	up to and including 72"W	all sizes approved	all sizes approved
	When used to support a worksurface supported by a full-height free support or L-shape end panel attached to a bridge or return worksurface	up to and including 72"W	all sizes approved	all sizes approved

# Plinth Base Modesty Panel and Back Panel Options

Elective Elements Parametric modesty panels can only connect to Elective Elements Parametric worksurfaces, end panels, and Elective Elements non end panel supports, plinth base storage, and leg base storage 36"W or less.

**Full-Height Modesty Panel**  
▶ Page 68

**Bridge Modesty Panel**

# Leg Base Modesty Panel and Back Panel Options

Elective Elements Parametric modesty panels can only connect to Elective Elements Parametric worksurfaces, end panels, and Elective Elements non end panel supports, plinth base storage, and leg base storage 36"W or less.

## Full-Height Modesty Panel

▶ Page 68

## Bridge Modesty Panel

▶ Page 68

## Filler Panel

▶ Page 66

## Glass Desk Modesty Panel and Glass Modesty Panel for Use with Run-Off Applications

▶ Page 72

*Tip: Elective Elements Parametric laminate and veneer modesty panels cannot connect to Elective Elements leg base end panels. As an alternative, use leg base storage.*

# End Panels

Plinth Base End Panel, L-Shape End Panel, J-Shape End Panel, and On-Module End Panel

**End panels** are used to support a worksurface and are available in four types – plinth end, on module plinth end, L-shape, and J-shape end panels. A variety of desk-ing applications can be created using end panels. They are available parametrically by  $\frac{1}{16}$ " increments in depth and an unlimited increment within a range for height.

► Specifying, page 146

## Product Details

**Plinth end panel** is a straight shape and must be used with a plinth base modesty panel to support a worksurface in desk-ing applications.

**Depth of the plinth end panel** should be specified to equal the depth of the worksurface. The plinth end panel will be  $\frac{3}{4}$ " recessed to accommodate the modesty panel.

*Tip: A desk worksurface can have a plinth end panel that is recessed 6". Specify a plinth end panel depth that is 6.802" less than the depth of the worksurface.*

**L-Shape end panel** is used on worksurfaces in freestanding applications with no modesty panel or used to support worksurfaces used in conjunction with plinth base pedestals.

**An L-shape end panel** cannot be used on a desk worksurface.

**The depth of the L-shape end panel** should be specified as the same depth of the worksurface.

## Actual Dimensions

### Plinth End Panel

Parametric Depth Range	15"–36"
Parametric Height Range	21.0000"–39.5071"

### J-Shape End Panel

Parametric Depth Range	24"–36"
Parametric Width Range	15" or 18"
Parametric Height Range	27.5000"–39.5071"

### L-Shape End Panel

Parametric Depth Range	15"–36"
Parametric Width Range	15"–18"
Parametric Height Range	21.0000"–39.5071"

### On Module End Panel

Parametric Depth Range	15"–36"
Parametric Height Range	21.0000"–39.5071"

**L-shape end panel** can be specified as a full or 3/4" recessed application. When the L-shape end panel is specified to the depth of the worksurface and a 3/4" recessed application is specified, the panel will be 3/4" in from the back of the worksurface. When the L-shape end panel is specified to the depth of the worksurface and a full application is specified, the end panel depth will equal the worksurface depth.

**Plinth end panel or an L-shape end panel** that is placed anywhere that is not flush to the front of the worksurface, must be attached to a tower or an adjacent parallel worksurface with an end panel.

**J-shape end panel** can only be used with desk worksurfaces. It can be used to create a single plinth base pedestal desk and sit flush or inset from visitor side of the worksurface.

*Tip: A J-shape end panel that is less than 30"D with an inset modesty panel does not meet BIFMA knee space requirements.*

*Tip: When the J-shape end panel is used without a modesty panel, there will be exposed holes.*

**A desk worksurface with a straight front and a J-shape end panel** can be ordered flush with the worksurface or with a maximum 6" overhang. To specify a J-shape end panel that sits flush with the worksurface, specify a depth that is equal the depth of the desk worksurface. To specify a J-shape end panel for a 6" overhang, specify a depth that is 6.802" less than the depth of the desk worksurface.

**A bow front desk worksurface** can have a 6" or 12" overhang and must be in a J shape end panel and plinth base pedestal combination. To specify a J-shape end panel for a 6" overhang, specify a depth that is 6.802" less than the depth of the desk worksurface. To specify a J-shape end panel for a 12" overhang, specify a depth that is 12.802" less than the depth of the desk worksurface.

**On module end panel** is available for panel supported applications and can be used with Answer or Montage panels and Privacy Wall.

*Tip: On-module end panel with Montage brackets is only available at 27.5591"H.*

**On module end panels** are used to attach a worksurface to the panel on module. Worksurfaces supported by these end panels are not meant to be freestanding.

**The depth of the on module end panel** can be specified to equal the depth of the worksurface to create a flush front application. If knee space is desired use the following guidelines:

- 15"D or deeper on module end panel can be specified on worksurfaces with depths 30" or less.
- 18"D or deeper on module end panel can be specified on worksurfaces with depths greater than 30".

**Handedness** is optional on plinth end panel, L-shape end panel, J-shape end panel, and on module end panel.

**Optional holes** are available for use with a filler panel on plinth end panel, L-shape end panel, J-shape end panel, and on module end panel. Option off the filler holes if a filler panel will not be used.

**Glides** come standard on each end panel and can adjust for installations on uneven floors. Adjustability range is 1 1/4".

**Grain direction** is optional in vertical and horizontal grain direction on wood veneer and laminate.

► See *Worksurface Grain Directions*, page 33.

**All exposed edge and sides of the end panel** are finished.

**Technology cuts outs** are not allowed in end panels, only in storage units.

**Connections**

**Quick-lock assembly hardware** is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the end panel.

**Elective Elements Parametric end panels** can only be used with Elective Elements Parametric worksurfaces and modesty panels.

**Surface Materials**

**End panel**

- Wood veneer
- Laminate
- Customiz stain (option on wood)

**Attachment hardware**

- Black paint only

# Free Support End Panel and Extended T-Shape End Panels

## Free support end panels

are available to support work-surfaces up to 60"W. They are available parametrically by 1/16" increments in depth and an unlimited increment within a range for height.

► Specifying, page 154

## Extended T-shape end panel

supports a bullet or P-top worksurface in a non run-off application in a plinth base setting. They are available parametrically by 1/16" increments in depth and an unlimited increment within a range for height.

► Specifying, page 156

**Free Support End Panel**

**Extended T-Shape End Panel**

## Product Details

### Free support end panel

should be specified to provide proper support to work-surfaces up to 60"W. It has a 77/16"W metal support triangle that extends from the end panel to provide support.

### The depth of the free support end panel

should be specified to equal the depth of the work-surface.

**For proper stability,** bullet and P-top work-surfaces supported by a free support end panel must be connected to a perpendicular work-surface forming an L- or U-shaped configuration.

### If the free support end panel

is used with above work-surface storage, then the free support end panel must be attached to either a tower or a building wall for stability.

### In a plinth base set-

ting, two free support end panels can support a stand-alone work-surface.

## Actual Dimensions

### Free Support End Panel

Parametric Depth Range	18"–36"
Parametric Height Range	27.0000"–39.5071"

### Extended T-Shape End Panel

Parametric Depth Range	
For Use with Bullet Work-surface	18"–36"
For Use with P-Top Work-surface (Depth C)	24"–36"
Parametric Width Range	Calculated*
Parametric Height Range	27.0000"–28.5039"

\*Width panel is a calculated value.

**Extended T-shape end panel** supports a bullet or P-top worksurface in a non run-off application in a plinth base setting only. Either a column or disk column supports the other end of the worksurface. The modesty panel is notched at the top to allow installation next to the column or disk column.

**The width of the modesty panel on the extended T-shape end panel** is calculated based on width, depth, and edge profile of the bullet or P-top worksurface.

**The depth of the extended T-shape end panel** should be specified to equal the depth of the worksurface.

**When supporting a P-top worksurface,** extended T-shape end panels are handed. The modesty panel is located 10" in from the visitor side.

**When supporting a bullet or P-top worksurface,** extended T-shape end panel cannot stand alone in a freestanding application.

**Grain direction** is optional in short and long grain direction on wood veneer and laminate.  
▶ See *Worksurface Grain Directions*, page 33.

**All exposed edges and sides of the free support end panel and extended T-shape end panel** are finished.

## Connections

**Quick-lock assembly hardware** is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the end panel.

**Elective Elements Parametric end panels** can only be used with Elective Elements Parametric worksurfaces and modesty panels.

## Surface Materials

### Free support end panel and extended T-shape end panel

- Wood veneer
- Laminate
- Customiz stain (option on wood)

### Attachment hardware

- Black paint only

# Corner Support Kit and Rear L-Shape Corner Support

**Corner support kit** is used to support the corner or extended corner worksurface. They are available parametrically by  $\frac{1}{16}$ " increments in depth and an unlimited increment within a range for height.

► Specifying, page 160

**Rear L-shape corner support** can be specified separately for an extended corner worksurface that is supported by a storage unit at one end and an L-shape end panel at the other end.

► Specifying, page 162

**Corner Support Kit**

**Rear L-Shape Corner Support**

## Product Details

**Corner support kit** includes two 15" x 15" L-shape end panels and one 12" x 12" rear L-shape corner support to hold the corner or extended corner worksurface.

**The L-shape end panels of the corner support kit** support the front corners of the worksurface. The L-shape end panels are handed with the 15" side installed on the back of the worksurface.

**The rear L-shape corner support** attaches to the back corner of the worksurface.

**If an extended corner worksurface** is supported by a pedestal or lateral file on one end, then specify a rear L-shape corner support and an L-shape end panel separately to support the back and other end.

**Grain direction** is optional in vertical or horizontal grain.

**All exposed edges and sides of the panel** are finished.

## Actual Dimensions

### Corner Support Kit

Center Support	12"
Left Support	15"
Right Support	15"
Parametric Height Range	27.0000"—28.5039"

### Rear L-Shape Corner Support

Depth	12"
Parametric Height Range	27.0000"—28.5039"

## Connections

**Quick-lock assembly hardware** is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the end panel.

**Full-height modesty panels can only be used if the corner support kit** is the  $\frac{3}{4}$ " recessed application. It attaches to the plinth base rear L-shape corner support, the L-shape end panel, and the worksurface. Select a modesty panel that is 12" shorter than the worksurface.

**Elective Elements Parametric end panels** can only be used with Elective Elements Parametric worksurfaces and modesty panels.

## Surface Materials

### Corner support kit and rear L-shape corner support

- Wood veneer
- Laminate
- Customiz stain (option on wood)

### Attachment hardware

- Black paint only

# T-Shape End Panel, L-Shape Above Storage End Panel, and Perpendicular Tether Support Panel

**T-shape end panels, L-shape above storage end panels, and perpendicular tether support panels** are used above storage to support a work surface and can create a layered look. They are available parametrically by 1/4" increments in depth and an unlimited increment within a range for height.

► Specifying, page 164

**T-Shape End Panel**

**L-Shape Above Storage End Panel**

**Perpendicular Tether Support Panel**

## Actual Dimensions

### T-Shape End Panel

Parametric Depth Range	18"–42"
Width	12"
Parametric Height Range	4.5221"–10.8213"

### Perpendicular Tether Support Panel

Parametric Depth Range	*Calculated
Parametric Height Range	4.5221"–10.8213"

### L-Shape Above Storage End Panel

Parametric Depth Range	18"–36"
Parametric Width Range	15"–18"
Parametric Height	4.5221"–10.8213"

\*The perpendicular tether support panel depth is determined by the depth of the upper and lower work surface.

## Product Details

**T-shape end panel** is used on top of storage to support another worksurface in a perpendicular application. It has an 11"W leg that extends from the end panel to provide proper worksurface support. It is not designed for use with a coped worksurface edge.

**Use a T-shape end panel** to support a worksurface over plinth base storage when a service module is above. This will avoid interference with a technology trough in storage.

**The depth of a T-shape end panel** should be specified to equal the depth of the worksurface.

**L-shape above storage end panel** is used to support a worksurface on plinth base storage.

Right-hand shown

**Handedness** must be specified on the L-shape above storage end panel as left hand or right hand.

**L-shape above storage end panel** sits flush to the top worksurface end and  $\frac{3}{4}$ " in from the back of the worksurface.

**The depth of the L-shape above storage end panel** should be specified to equal the depth of the worksurface that is being supported.

**Perpendicular tether support panels** are used to support desk work-surfaces when used with storage units. It allows for a desk worksurface to be positioned anywhere along a run of storage. Tether support panels are non-handed.

**Perpendicular tether supports** are positioned 2" in from the side and back edge of the desk worksurface and storage units.

**Depth of the perpendicular tether support** is determined by the depth of the desk worksurface supported and storage used.

**If perpendicular tether supports or L-shape above storage end panels** are used with other worksurface types (ie. bullet and P-top worksurfaces) holes must be field drilled.

**Grain direction** is optional in vertical and horizontal grain direction on wood veneer and laminate.

► See *Worksurface Grain Directions*, page 33.

**All exposed edge and sides of the end panel** are finished.

## Connections

**Quick-lock assembly hardware** is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the end panel.

**Attachment hardware** is included with the tether support panel to secure it to the worksurface in the field.

**Attachment** is required to both the worksurface above and the worksurface or top of storage on which the support rests.

**Elective Elements Parametric end panels** can only be used with Elective Elements Parametric worksurfaces and modesty panels.

## Surface Materials

**T-shape end panel, L-shape above storage end panel, and perpendicular tether support panels**

- Wood veneer
- Laminate
- Customiz stain (option on wood)

**Attachment hardware**

- Black paint only

# Plinth Base Center Support Panel and Filler Panel

**Center support panel** is used when a worksurface has an unsupported span that is greater than 60" wide. They are available parametrically by 1/16" increments in depth and an unlimited increment within a range for height.

► Specifying, page 170

**Filler panel** is used to close the space that may result from various applications. They are available parametrically with unlimited increments within a range for height.

► Specifying, page 172

**Center Support Panel**

**Filler Panel**

## Product Details

**Center support panel** can support worksurfaces with unsupported spans from seated to standing height.

**For unsupported spans from 60"W to 90"W**, use one worksurface brace or a center support. For spans greater than 90"W, a center support panel must be used.

**When calculating unsupported spans**, the portion of an L-shape end panel that runs along the back edge of the worksurface should not be considered. Measure from the portion of the end panel that runs the depth of the worksurface.

**Minimum depth requirements for the center support panel** are based on the worksurface depth. Use the following guidelines to specify the correct depth of the center support panel:

- 18"D worksurfaces can only use a center support panel of 8" deep or deeper.
- 18<sup>1</sup>/<sub>16</sub>"D to 30"D worksurfaces can only use a center support panel of 11" deep or deeper.
- 30<sup>1</sup>/<sub>16</sub>"D to 36"D worksurfaces can only use a center support panel of 18" deep.

*Tip: On a 18"D–19"D worksurface with a modesty panel and center support panel, the maximum depth of the center support panel should be 1" less than the depth of the worksurface.*

## Actual Dimensions

### Center Support Panel

Parametric Depth Range	8"–18"
Parametric Height Range	21.0000"–39.5071"

### Filler Panel

Parametric Height Range	27.0000"–39.5071"
Width	5 <sup>3</sup> / <sub>8</sub> "

**Filler panel** is used with a desk and desk return in an L- or U-shape configuration. It is required for a return, bridge, or run-off worksurface with an overhang and a modesty panel. It fills the space between the modesty panel and adjacent worksurface end panel.

**Grain direction** is optional in vertical and horizontal grain direction on wood veneer and laminate. ▶ See *Worksurface Grain Directions*, page 33.

**Center support and filler panels** have vertical grain direction that matches the adjacent storage and panels.

**All exposed surfaces of the filler panel** are finished.

**All exposed edge and sides of the end panel** are finished.

## Connections

**Quick-lock assembly hardware** is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the end panel.

**Attachment hardware** is included with the center support panel and filler panel to secure it to the worksurface in the field.

**Parametric filler and center support panels** can only be used with parametric worksurfaces, end panels, and modesty panels.

## Surface Materials

### Center support panel and filler panel

- Wood veneer
- Laminate
- Customiz stain (option on wood)

### Attachment hardware

- Black paint only

# Modesty Panels

Full-Height Modesty Panel, Bridge Modesty Panel, Desk Modesty Panel, Freeform Hanging Modesty Panel, and Hanging Modesty Panels for Use with Run-Off Worksurfaces

**Full-height modesty panel** is used to create a finished back on a desk with either end panels or pedestals. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 174

**Bridge modesty panel** is full-height and is only used with bridge worksurfaces. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 176

**Desk modesty panel** is used with an overhang desk. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 178

**Freeform hanging modesty panel** is used on any worksurface where the primary worksurface is supported by storage. It comes with hanging brackets to suspend the modesty panel. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 180

**Hanging modesty panel for use with run-off worksurfaces** is used with bullet, P-top, and double tapered run-off worksurfaces. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 182

*Tip: The following bases are designed to pair with the  $\frac{2}{3}$ -height modesty panel for run-off or adjacent worksurfaces, **AWQP4** and **AWQD422**.*

**Hanging Modesty Panel for Use with Run-Off Worksurfaces**

**Full-Height Modesty Panel**

**Desk Modesty Panel**

**Bridge Modesty Panel**

**Freeform Hanging Modesty Panel**

**Actual Dimensions**

**Full-Height Modesty Panel**

Parametric Width Range	15"-120"
Parametric Height Range	21.0000"-39.5071"

**Desk Modesty Panel**

Parametric Width Range	42"-120"
Parametric Height Range	10.0000"-19.0000"

**Bridge Modesty Panel**

Parametric Width Range	Calculated
Parametric Height Range	27.0000"-39.5071"

**Freeform Hanging Modesty Panel**

Parametric Width Range	15"-90"
Parametric Height Range	10.0000"-19.0000"

**Hanging Modesty Panel for Use with Run-Off Worksurfaces**

Parametric Width Range for Use with Bullet Run-Off Worksurface	30"-93"
Parametric Height Range for Use with Bullet Run-Off Worksurface	10.0000"-19.0000"
Parametric Width Range for Use with P-Top Run-Off Worksurface	54"-93"
Parametric Height Range for Use with P-Top Run-Off Worksurface	10.0000"-19.0000"
Parametric Width Range for Use with Double Taper Run-Off Worksurface	30"-93"
Parametric Height Range for Use with Double Taper Run-Off Worksurface	10.0000"-19.0000"

**Product Details**

**To specify a flush full-height modesty panel,** the width of the full-height modesty panel should equal the width of the worksurface for a desk, return, or credenza application. If storage units are used in the desking application, choose the unfinished back option.

**Full-height modesty panel** can be used with a flush or an overhang desk, return, desk return, single tapered, corner, and extended corner worksurfaces with end panels or storage. It can also be used to cover multiple plinth base storage units in a credenza application.

**To specify the width an inset full-height modesty panel,** deduct the width of the pedestals from the desk worksurface width. An inset full-height modesty panel is only available on desk worksurfaces supported by storage units. *Example: 66"W (worksurface) - 30"W (two pedestals) = 36"W (modesty panel).*  
*Tip: An inset full-height modesty panel on a 24"D or narrower desk application will cause limited knee space.*

**Inset full-height modesty panels** are used with J-shape end panels to make single pedestal desks.

**Single-tapered run-off worksurfaces** may use a full-height modesty panel. The modesty panel width is equal to the worksurface width. A 15" deep or deeper end panel must be used to support the end of the modesty panel that attaches to the adjacent worksurface. An end panel, pedestal, or leg must support the other end of the modesty panel.

**A full-height modesty panel** can be used on plinth base corner and extended corner worksurfaces and needs to be 12" shorter than the worksurface width because it connects to the corner support. To select the correct modesty panel width, subtract 12" from the worksurface width. *Example: 42"W (worksurface) - 12" (rear corner support) = 30"W (modesty panel).*

**Full-height modesty panels** cannot be used with disk column or column support.

**Bridge modesty panel** is full-height and is 6" longer than the worksurface width. It is inset 1 1/2" because it attaches to the inside of the end panels on the adjacent worksurfaces. *Tip: For a bridge modesty panel to be used to align to leg base storage, specify a height of 18.6886".*

**The width of the bridge modesty panel** is calculated based on the width of the bridge worksurface specified. When specifying in Hedberg, enter the width of the bridge worksurface to calculate the width of the bridge modesty panel.

Modesty Panels, Full-Height Modesty Panel, Bridge Modesty Panel, Desk Modesty Panel, Freeform Hanging Modesty Panel, and Hanging Modesty Panels for Use with Run-Off Worksurfaces, continued

**Desk modesty panel** is used with a desk worksurface and sits proud of the under worksurface storage back panels. It must attach to pedestals, end panels, or leg supports. The storage units must be ordered separately with a finished back panel.

**Width of desk modesty panel** must be specified to equal the width of the worksurface.

**Optional inset distance of none, partial, or full widths** allows for different applications. An inset width distance of none will be a modesty panel width that equals the worksurface width. An inset width distance of partial will be 6" less than the worksurface width. An inset distance of full will 12" less than the worksurface width.

**Freeform hanging modesty panel** is available on any worksurface besides bullet, P-top, and double tapered run-off worksurfaces. It sits proud of the under worksurface storage back panels and comes with hanging brackets to suspend the modesty panel. It can also be used in applications where the primary worksurface is supported by storage on one end and another worksurface support on the other end.

*Tip: The storage units must be ordered separately with the finished back option selected.*

**It is recommended that the freeform hanging modesty panel only** be specified through SmartTools to ensure the correct fit on the worksurface and avoid interference with wiring and worksurface supports.

**Hanging modesty panel for use with run-off worksurfaces** attaches to the underside of the bullet, P-top, or double tapered run-off worksurface and extends to the underside of the adjacent worksurface. It will attach in the middle of the run-off worksurface for double taper and bullet worksurfaces.

**The width of the hanging modesty panel for use with run-off worksurfaces** is calculated based on the depth, width, and edge profile of the run-off worksurface and the depth of the adjacent worksurface.

**Grain direction** is optional in vertical and horizontal grain direction on wood veneer and laminate. Vertical grain direction on laminate is only available on widths of 60"W or less. ▶ See *Worksurface Grain Directions*, page 33.

**All edges and both sides of the modesty panel** are finished.

*Tip: When woodgrain laminates are specified, the grain direction runs vertically for modesty panels up to 60"W.*

### Connections

**Quick-lock assembly hardware** is used to assemble the components in the field. The hardware features pins in the back of the supports and underside of the worksurface that are captured by rotating connector locks in the modesty panel.

**If adjustable height legs** are used, the modesty panel connects to the legs so that the modesty panel remains stationary when the worksurface is adjusted.

**Attachment hardware** is included with the modesty panel to secure it to the worksurface in the field.

**Elective Elements Parametric modesty panels** can only be used with Elective Elements Parametric worksurfaces and end panels. However, they can also be used with Elective Elements plinth base and leg base storage.

### Wiring & Cabling

**A scallop option** is available on full-height modesty panels and bridge modesty panels. The scallop aligns with the worksurface scallop to allow a three-prong plug to pass through. The scallop is unfinished and centered on the top edge of the full-height modesty panel.

*Exception: Scallop on free-standing corner worksurface will not align with modesty panel pass through.*

### Surface Materials

#### Modesty panels

- Wood veneer
- Laminate
- Customiz stain (option on wood)

#### Attachment hardware

- Black paint only

# Glass Modesty Panels

Glass Desk Modesty Panel, Glass Modesty Panel for Use with Run-Off Applications, Glass Hanging Modesty Panels for Use with Run-Off Worksurfaces, and Freeform Glass Modesty Panel

**Glass desk modesty panel** can be used with any overhang worksurface where the worksurface is deeper than the storage and supports. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 188

**Glass modesty panel for use with run-off applications** can be used on straight or bridge run-off worksurfaces. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 189

**Glass hanging modesty panel for use with run-off worksurfaces** is used with bullet, P-top, and double tapered worksurfaces. It is available parametrically by  $\frac{1}{16}$ " increments in width and an unlimited increment within a range for height.

► Specifying, page 190

**Freeform glass modesty panel** can be used with any worksurface and is placed anywhere along the front edge of the worksurface.

► Specifying, page 193

**Glass Modesty Panel for Use with Run-Off Worksurfaces**

**Freeform Glass Modesty Panel**

**Glass Desk Modesty Panel**

## Product Details

**Glass desk modesty panel** is used with any overhang worksurface. It must attach to pedestals or leg supports in the following configurations - storage with gate leg, storage with free support end panel, storage with J-shape end, or storage with storage.

**The width of the glass desk modesty panel** is calculated based on the width of the worksurface, the worksurface support used, and the width of left and or right storage if used.

**All glass modesty panels** comes with attachment hardware to suspend the modesty panel.

**Glass modesty panel for use with run-off applications** is used with straight or return worksurfaces. The modesty panel will hang at the front of the worksurface. It must attach to pedestals or leg supports. ► See *Run-Off Application Matrix* on page 73.

**If storage** is one of the supports used for the glass modesty panel for use with run-off applications, the depth of the storage must equal the depth of the run-off worksurface.

**A U-shape configuration** cannot use a glass modesty panel for use with run-off applications. As an alternative, specify the freeform glass modesty panel.

**The width of the glass modesty panel for use with run-off applications** is calculated based on the width of the worksurface, the worksurface support used, and the width of left and or right storage if specified.

## Actual Dimensions

### Glass Desk Modesty Panel

Parametric Width Range	Calculated
------------------------	------------

Parametric Height Range	10.0000"—19.0000"
-------------------------	-------------------

### Glass Modesty Panel for Use with Run-Off Applications

Parametric Width Range	Calculated
------------------------	------------

Parametric Height Range	10.0000"—19.0000"
-------------------------	-------------------

### Glass Hanging Modesty Panel for Use with Run-Off Worksurfaces

Parametric Width Range	Calculated
------------------------	------------

Parametric Height Range	10.0000"—19.0000"
-------------------------	-------------------

### Freeform Glass Modesty Panel

Parametric Width Range	24"—72"
------------------------	---------

Parametric Height Range	10.0000"—19.0000"
-------------------------	-------------------

The following table outlines the available configurations of supports for the glass modesty panel for use with run-off applications.

Supports for the hanging modesty panel for use with run-off worksurfaces are ordered separately.

**Run-Off Application Matrix**

		Right Hand				
		Adjacent Storage	Adjacent End Panel	Storage	Free Support End Panel	Gate Leg
Left Hand	Adjacent Storage	Allowed	Allowed	Allowed	Allowed	Allowed
	Adjacent End Panel	Allowed	Allowed	Allowed	Allowed	Allowed
	Storage	Allowed	Allowed	Not Allowed	Not Allowed	Not Allowed
	Free Support End Panel	Allowed	Allowed	Not Allowed	Not Allowed	Not Allowed
	Gate Leg	Allowed	Allowed	Not Allowed	Not Allowed	Not Allowed

**Glass hanging modesty panel for use with run-off worksurfaces** attaches to the underside of the bullet, P-top, or double tapered run-off worksurface and extends to the underside of the adjacent worksurface. It will attach in the middle of the run-off worksurface.

The width of the glass hanging modesty panel for use with run-off worksurfaces is calculated based on the depth and width of the run-off worksurface and the depth of the adjacent worksurface.

**Freeform glass modesty panel** is available on any worksurface besides bullet, P-top, and double tapered run-off worksurfaces. It sits proud of the under worksurface storage back panels and comes with hanging brackets to suspend the modesty panel. It can also be used in applications where the primary worksurface is supported by storage on one end and another worksurface support on the other end.

*Tip: The storage units must be ordered separately with the finished back option selected.*

**If an application is not available through the glass modesty panel for use with run-off applications**, the freeform glass modesty panel can be used.

**It is recommended** that the freeform glass modesty panel only be specified through SmartTools to ensure the correct fit on the worksurface and avoid interference with wiring and worksurface supports.

**Elective Elements Parametric glass modesty panels** can be used with both Elective Elements and Elective Elements Parametric products.

**Surface Materials**

**Glass desk modesty panel, glass modesty panel for use with run-off applications, glass modesty panel for use with run-off worksurfaces, freeform glass modesty panel**

- Glass

**Glass desk modesty panel, glass modesty panel for use with run-off applications, glass modesty panel for use with run-off worksurfaces, freeform glass modesty panel steel back**

# Understanding Elective Elements Parametric Tackboards

---

## Wall-Mounted Tackboard Details

Wall-Mounted Tackboards

76

# Wall-Mounted Tackboards

For Use with Service Modules, Blade Accessory Shelves, and Wall-Mounted Overheads

**Wall-mounted tackboards** finish the space between a service module or overhead storage unit and a worksurface. It is a fabric-covered tackable surface that is available parametrically by  $\frac{1}{16}$ " increments in depth and an unlimited increment within a range for height.

▶ See *Specifying*, page 196

## Product Details

**Wall-mounted tackboards** provide a fabric-covered tackable surface above the worksurface.

**The ends of the wall-mounted tackboards** are finished.

**The top and bottom of wall-mounted tackboards** include a routing for attachment hardware. This is visible when overhead storage is not paired with tackboards.

*Tip: The ends of the tackboard are finished.*

## Actual Dimensions

### Tackboard

Parametric Width Range	24"–114"
Parametric Height Range	12"–47½"
Thickness	1"

*Tip: Tackboard thickness do not include thickness with attachment brackets.*

*Tip: Elective Elements Parametric wall-mounted tackboards have a design allowance to account for variations within fabric choices and alignment with adjacent solutions; such as, overhead storage. The width design allowance is .1090" less than the nominal width specified. The height design allowance is .1040" less than the nominal height specified.*

*Tip: When aligning tackboards and/or glass, please take note of panel thickness and utilize the appropriate sets of spacers.*

*Tip: When aligning ½" thick glass with 1" thick tackboards, two sets of spacers are required to be installed with the glass to ensure a flush mount.*

## Connections

**When used with a service module,** the wall-mounted tackboard attaches with hook and loop. The attachment hardware is standard with the tackboard for field installation.

▶ See *Elective Elements Specification Guide* for more information on service modules.

▶ See *tackboards specifying*, page 196.

**When used with a structural wall,** wall-mounted tackboards attach with fasteners, spacers, and velcro strips.

**When used with an overhead and blade accessory shelves,** specify the following tackboard heights:

- Single-high overhead = 18.5222"
- Double-high overhead = 15.3451"

**When used with a service module,** specify the following heights:

- 32 $\frac{1}{4}$ "H single-high service modules = 17.1875"
- 36 $\frac{5}{8}$ "H and 43 $\frac{1}{2}$ "H single-high service modules = 21.5625"
- 36 $\frac{5}{8}$ "H and 43 $\frac{1}{2}$ "H single-high service modules and blade accessory shelf = 18.4375"
- Double-high service modules = 18.4375"

## Wiring & Cabling

### Scallop option on wall-mounted tackboards

is either centered on the left or right of the top edge. This allows a light cord to be routed to the cavity behind. Daisy chain option is not recommended on T2 fluorescent light. Daisy chaining may be used on LED lights.

**One scallop** is centered on wall-mounted tackboards 54"W and smaller.

**Two scallops** are located on the left and right on wall-mounted tackboards 54 $\frac{1}{16}$ "W and wider.

### Worksurface scallop

will be covered by the tackboard on 36 $\frac{5}{8}$ "H, 43 $\frac{1}{2}$ "H, and 48 $\frac{9}{16}$ "H service modules. Cords or cables should be routed before the tackboard is installed. No additional cables will be able to be routed once the tackboard is in place.

## Surface Materials

### Wall-mounted tackboards

- Vertical surface fabric
- Tip: Because wall-mounted tackboard is a one-piece design, fabric will be railroaded for consistent application.*

### Attachment hardware

- Black paint only

---

# Understanding Elective Elements Parametric Storage

<b>File Surround</b>	<b>80</b>
<b>Floating Shelf with Shelf Back Panel, Floating Back Panel, and Upside Down Floating Shelf with Shelf Back Panel</b>	<b>82</b>

# File Surround

For Use with Universal Storage

**File surrounds** are used to encase storage units to provide a seamless, finished look in laminate or veneer. A top, back panel, and end panels come together to wrap the storage units. They are available in a variety of configurations and parametric sizes that surround Universal Storage.

- ▶ Specifying, page 200
- ▶ Please see SmartTools for complete specification and pricing.

**Available** in laminate or veneer.

**Open spaces** are allowed in a variety of configurations.

**Storage units** must be ordered separately.  
▶ See *Storage Specification Guide*.

## Product Details

**SmartTools** must be used to order the file surround to ensure correct configuration, fit, and alignment.

**Multiple configurations** are available with the file surround. This includes surrounding a single row or back-to-back storage units with or without open spaces. Open spaces are allowed between storage units or on the ends of storage units.

**Storage units** must be placed under the file surround and are ordered separately. Universal storage units pair with the file surround.

- ▶ See *Storage Specification Guide*.

**File surrounds** allow for each edge profile on the top to be specified- profile A, profile B, profile C, and profile D. Wood veneer worksurfaces can have a 3 mm wood square edge or .5 mm veneer edge. Laminate worksurfaces can have a 3 mm, 1 mm plastic square edge or a 3 mm wood square edge.

**If a 3 mm wood square edge** is specified on a laminate file surround top, all remaining sides will be a 1 mm plastic square edge.

- ▶ See edge matrix page 30

## Actual Dimensions

### File Surround

	Outside Dimensions	Inside Dimensions
Depth	15.3125"–59.9375"	15"–58 1/4"
Width	16.5490"–361.4105"	15"–358 5/16"
Height	17.4310"–67.2900"	16"–65 55/64"
Thickness	1 1/2"	1 1/2"

.5 mm or 1 mm square edge

3 mm square edge

**File surround top edges** that are a 1 mm plastic or .5 mm wood veneer square edge will align with the face of the storage unit. A 3 mm plastic or wood veneer square edge band will overhang the face of the storage unit by 3 mm. To ensure a tight fit and connection with the wall or adjacent storage, a 1 mm plastic or .5 mm wood square edge is recommended for all sides or sides B, C, and D.

**Sectioned tops** are optional based on the width of the top. One section top is allowed between 15"W–120"W, two sections are allowed between 96 1/16"W–240"W, three sections are allowed between 192 1/16"W–360"W, and four sections are allowed between 288 1/16"W–360"W. *Tip: A singular top is considered one section.*

*Tip: When two, three, or four sections are specified, the top will be split into sections equal in width.*

**End panels** are specifiable on the left side, right side, or both.

**One end panel** is only allowed when storage is placed on the end of the file surround that does not have the end panel.

Inset at 0"

Proud

-4" Inset

**Back panel inset distance** is based off the depth of the file surround. The max distance a back panel can be inset is equal to the depth of the file surround less four inches. The inset distance starts at the back of the file surround. An inset distance of 0" will create a file surround where the seams of the top, back panel and end panels are visible from the back of the unit.

**Unsupported open spaces** are allowed in the middle or ends of the file surround. Open spaces in the middle or end of the file surround can be up to 60"W without a worksurface brace, and up to 90"W with a worksurface brace. Open spaces on the ends of the file surround must be supported with a back panel and end panel.

**Grain direction on the top** is available in long or short grain on wood veneer tops and only available in long grain direction on laminate tops. If the width is greater than 120", long grain direction is not available on wood veneer tops.

**Grain direction on end panels** is available in horizontal or vertical grain. *Tip: Laminate grain direction must be vertical if the height greater than 60".*

**Grain direction on back panels** will always have horizontal grain direction.

**Woodgrain laminate sectioned tops** will not be grain matched over 120"W. Please refer to specials if grain matching is desired on woodgrain laminate sectioned tops greater than 120"W.

**The recommended grain direction on the file surround** includes long grain direction on the top and vertical grain direction on the end panels. This creates the waterfall look.

## Connections

**Worksurface braces** are required for unsupported open spaces greater than 60"W and up to 90"W.

**Attachment hardware** is included with the file surround. To attach to storage, the attachment hardware is included with the storage units.

## Surface Materials

### File Surround

- Wood veneer with wood edge
- Laminate with plastic edge
- Laminate with wood edge

# Floating Shelf with Shelf Back Panel, Floating Back Panel, and Upside Down Floating Shelf with Shelf Back Panel

New EEFSSH, EEFSHUD, and EELBPSH style numbers are available April 15, 2024. E6FSH and E6LBPSH will be culled October 2024.

**Floating shelf** is offered in laminate or veneer and has a back panel.  
 ▶ Specifying, page 204

**Floating back panel**, ordered separately, is offered in veneer and laminate, with a standard horizontal grain direction. Optional vertical grain laminate is limited to 60"W. There is no size restriction on vertical grain veneers.  
 ▶ Specifying, page 212

**Shelves** mounted side-by-side will require **EEFSHSHK** shelf kit for flush alignment.

**Shelf** cannot be mounted lower than 38" from the floor.  
*Tip: Floating shelf is intended for light load settings. Shelf weight capacity is 18 pounds per linear foot.*

## ⚠ WARNING

**The shelf** is not designed to function as a seat or for heavy bulk storage.

**Shelf back panel** is offered in laminate or veneer, with a standard horizontal grain direction. Optional vertical grain laminate is limited to 60"W. There is no size restriction on vertical grain veneers (option).

**Floating shelf** comes standard with a horizontal grain direction. Vertical grain direction is not available.

**The floating shelf** can be mounted in a structural wall-mount application. Not intended for a panel-mounted application.

**With light option** includes an integrated light bar on the under-side of the floating shelf. Light is automatically specified parametrically to match specified width of shelf.

*Tip: Light bar is 3<sup>5</sup>/<sub>8</sub>" from the back edge of the shelf when installed.*

*Tip: One light kit (**EELPK**) is needed for each specified light option and contains all power and switch components.*

*Tip: Each **EELPK** light kit can support a maximum of six individual shelves with light option, or a total combined shelf width of 260", whichever is the first limiting factor.*

*Tip: One **EELPK** light kit includes one power switch. For shelf lights to be powered individually, they will require their own light kit.*

## Surface Materials

### Floating shelf

- Wood veneer
- Laminate
- Open Line laminate (option)

### Shelf back panel

- Wood veneer
- Laminate
- Open Line laminate (option)

### Floating back panel

- Wood veneer
- Laminate
- Open Line laminate (option)

### Edge on shelf, back panel, and floating back panel

- Plastic
- Wood veneer

*Tip: Floating shelf with shelf back panel and floating back panel are also available in a laminate/veneer mix.*

## Actual Dimensions

### Floating Shelf with Shelf Back Panel

Floating shelf depth	6" and 12"
Floating shelf and back panel width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", and 90"
Shelf back panel height	15", 22", and 30"
Shelf back panel thickness	3/4"

*Tip: Refer to SmartTools for parametric sizes, available in 1/16" increments within the following ranges: 6"–15" depth, 18"–120" width, and 7"–48" height.*

### Upside-Down Floating Shelf with Shelf Back Panel

Floating shelf depth	6" and 12"
Floating shelf and back panel width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", and 90"
Shelf back panel height	15" and 22"
Shelf back panel thickness	3/4"

*Tip: Refer to SmartTools for parametric sizes, available in 1/16" increments within the following ranges: 6"–15" depth, 18"–120" width, and 7"–24" height.*

### Floating Back Panel

Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", and 90"
Height	8", 15", 22", 36", and 48"
Thickness	3/4"

*Tip: Refer to SmartTools for parametric sizes, available in 1/16" increments within the following ranges: 18"–120" width, and 8"–48" height.*

## Product Details

When aligning floating back panels, floating shelves, tackboards and/or glass, please take note of panel thickness and utilize the appropriate sets of spacers.

Example Style	Style Description	Thickness		
		1"	3/4"	1/2"
<b>EEAWST</b>	Tackboard	X	N.A.	N.A.
<b>E6GBP</b>	Glass	N.A.	N.A.	X
<b>EELBPSH</b>	Floating Back Panel	N.A.	X	N.A.
<b>EEFSH</b>	Floating Shelf	N.A.	X	N.A.

*Tip: When aligning 1/2" thick glass with 3/4" thick floating shelves and floating back panels, or 1" thick tackboards, two sets of spacers are required to be installed with the glass to ensure a flush mount.*

# Bridge Worksurfaces

Tip: Depth and width are specifiable in 1/16" increments.

Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.

Tip: For bridge worksurfaces with a blade edge, subtract 2 1/8" from each side (4 1/4" total) for precise dimensions.

Tip: The nominal width of a bridge work surface with a blade edge is approximately 4 1/4" less than a square edge.

Tip: Refer to page 36 for grommet understanding.

Tip: Short grain direction on laminate is only available on width of 60" or less.

**For Canadian Pricing**  
Multiply U.S. Price by the Canadian price factor.

# P-Top Worksurfaces

Right-hand Unit

► Need help?  
Product details,  
page 42

## Standard Includes

- Worksurface: wood group 1 or laminate price group 1
- Wood worksurface with wood edge:
  - 3 mm wood square edge on three sides
  - 0.5 mm veneer edge on other side (unless coped)
- Laminate worksurface with plastic edge:
  - 3 mm plastic square edge on three sides
  - 1 mm plastic edge on other side, plastic default to match user's side
- Run-offs are coped on the end to fit into adjoining worksurface when specified with blade edge
- Run-offs include attachment hardware: black paint only

## Required to Specify

- 1 Style number
  - 2 Depth B (see below under Required Selections)
  - 3 Depth C (see below under Required Selections)
  - 4 Width A (see below under Required Selections)
  - 5 Edge profile (see below under Required Selections)
  - 6 Application (see below under Required Selections)
  - 7 Handedness (see below under Required Selections)
  - 8 Composite veneer, wood, or laminate color number for worksurface
  - 9 Wood or plastic edge color number for wood or laminate worksurface
  - 10 Options, if selected (see below)
- See *Surface Materials*, page 218.

Tip: Depth and width are specifiable in 1/16" increments.

Tip: The difference between depth B and depth C must be at least 6" and at most 12".

Tip: Run-Off is not available when width is greater than 90"W.

Tip: Surface material upcharges vary by size. See *SmartTools* or *Hedberg* for full pricing.

Tip: For proper stability, T-shape end panel must be connected to a perpendicular worksurface forming an L- or U-shape configuration.

# Transaction Worksurfaces

Tip: Depth and width are specifiable in 1/16" increments.

Tip: Depth for use with Montage panels is limited to 13"-16"D.

Tip: Maximum width for transaction tops with Montage is 60"W.

Tip: The width of the Answer transaction worksurface in a panel run application should be specified to equal the width of the corresponding panel.

Tip: The width of the Answer transaction worksurface in a change-of-height application with slim trim top caps should be specified as the plan width of the corresponding panel.

Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.

Tip: The width of the Answer transaction worksurface in a change-of-height application with cable routing should be specified as the plan width of the corresponding panel.

Tip: The sizes represented show a small subset of common sizes. For parametric sizes and pricing, please refer to SmartTools.

Tip: See SmartTools or the Elective Elements Parametric Dimension Guide on page 14 when planning to align to Elective Elements sizes.

#### For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

▶ See page 1 for details.

# Corner Support Kit

*Tip: Corner support kits are not available in leg base applications. Plinth base corner support kits are still a feasible option to be used within a leg base application if needed.*

*Tip: Height is specifiable parametrically to four decimal places.*

*Tip: Left and right support will always be 15"x15". The rear corner support will always be 12"x12".*

*Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.*

Standard Includes		Required to Specify

# Hanging Modesty Panel for Use with Bullet Run-Off Worksurfaces

Standard Includes	Required to Specify
<ul style="list-style-type: none"> <li>▶ Need help? Product details, page 68</li> <li>• Hanging modesty panel for use with bullet run-off work-surfaces: wood group 1 or laminate price group 1</li> <li>• Attachment hardware: black paint only</li> </ul>	<ol style="list-style-type: none"> <li>1 Style number</li> <li>2 Depth adjacent (see below under Required Selections)</li> <li>3 Depth bullet run-off (see below under Required Selections)</li> <li>4 Width bullet run-off (see below under Required Selections)</li> <li>5 Height (see below under Required Selections)</li> <li>6 Edge profile of bullet run-off (see below under Required Selections)</li> <li>7 Composite veneer, wood, or laminate color number for modesty panel</li> <li>8 Options, if selected (see below)</li> </ol> <ul style="list-style-type: none"> <li>▶ See Surface Materials, page 218.</li> </ul>

*Tip: Depth and width is specifiable parametrically in 1/16" increments. Height is specifiable parametrically to four decimal places.*

*Tip: The depth, width, and edge profile of the run-off worksurface and the depth of the adjacent worksurface are used to calculate the width of the hanging modesty panel.*

*Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.*

*Tip: The following bases are designed to pair with the 2/3-height modesty panel for run-off or adjacent worksurfaces, **AWQP4** and **AWQD422**.*

Dimensions	Required Selections	U.S. Price	Required to Specify
	• Depth of adjacent worksurface 18"–36"	Prices at right	Specify depth of adjacent worksurface.
	• Depth of bullet run-off worksurface 18"–36"	Prices at right	Specify depth of bullet run-off worksurface.
	• Width of bullet run-off worksurface 30"–93"	Prices at right	Specify width of bullet run-off worksurface.
	• Height 10.0000"–19.0000"	Prices at right	Specify height.
	• Width of panel, calculated	Prices at right	Width of panel will be calculated.

Edge Profile of Bullet Run-Off Worksurface	Required Selections	U.S. Price	Required to Specify
	• 3 mm plastic square edge	No cost	Specify with 3 mm plastic square edge.
	• 3 mm wood square edge	No cost	Specify with 3 mm wood square edge.
	• Blade edge	No cost	Specify with blade edge.

Surface Materials	Options	Panel	U.S. Price	Required to Specify
		• Composite veneer group 1	Prices at right	Specify composite veneer color number.
		• Composite veneer group 2	Prices at right	Specify composite veneer color number.
		• Wood group 1	Prices at right	Specify wood color number.
		• Wood group 2	Prices at right	Specify wood color number.
		• Wood group 3	Prices at right	Specify wood color number.
		• Customiz stain	No cost	Specify with Customiz stain.
		• Laminate price group 2	Prices at right	Specify laminate color number.
		• Laminate price group 3	Prices at right	Specify laminate color number.
		• Open Line laminate (OLL)	+\$102 plus cost of laminate	▶ See Surface Materials Reference Manual.
				• No grain direction (solid laminate only)
• Vertical grain direction	No cost			Specify with vertical grain direction.
• Horizontal grain direction	No cost			Specify with horizontal grain direction.

**For Canadian Pricing**  
Multiply U.S. Price by the Canadian price factor.

# Hanging Modesty Panel for Use with P-Top Run-Off Worksurfaces

▶ Need help?  
Product details,  
page 68

## Standard Includes

- Hanging modesty panel for use with P-top run-off work-surfaces: wood group 1 or laminate price group 1
- Attachment hardware: black paint only

## Required to Specify

- 1 Style number
  - 2 Depth adjacent (see below under Required Selections)
  - 3 Depth B P-top run-off (see below under Required Selections)
  - 4 Depth C P-top run-off (see below under Required Selections)
  - 5 Width P-top run-off (see below under Required Selections)
  - 6 Height (see below under Required Selections)
  - 7 Edge profile of P-top run-off (see below under Required Selections)
  - 8 Composite veneer, wood, or laminate color number for modesty panel
  - 9 Options, if selected (see below)
- ▶ See Surface Materials, page 218.

*Tip: Depth and width is specifiable parametrically in 1/16" increments. Height is specifiable parametrically to four decimal places.*

*Tip: The depth, width, and edge profile of the run-off worksurface and the depth of the adjacent worksurface are used to calculate the width of the hanging modesty panel.*

*Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.*

# Hanging Modesty Panel for Use with Double Taper Run-Off Worksurfaces

▶ Need help?  
Product details,  
page 68

## Standard Includes

- Hanging modesty panel for use with double taper run-off worksurfaces: wood group 1 or laminate price group 1
- Attachment hardware: black paint only

## Required to Specify

- 1 Style number
  - 2 Depth adjacent (see below under Required Selections)
  - 3 Depth B of double taper run-off (see below under Required Selections)
  - 4 Width double taper run-off (see below under Required Selections)
  - 5 Height (see below under Required Selections)
  - 6 Edge profile of double taper run-off (see below under Required Selections)
  - 7 Composite veneer, wood, or laminate color number for modesty panel
  - 8 Options, if selected (see below)
- ▶ See Surface Materials, page 218.

*Tip: Depth and width is specifiable parametrically in 1/16" increments. Height is specifiable parametrically to four decimal places.*

*Tip: The depth, width, and edge profile of the run-off worksurface and the depth of the adjacent worksurface are used to calculate the width of the hanging modesty panel.*

*Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.*

# Glass Desk Modesty Panel

Tip: Glass modesty panels offer no structural support.

Tip: Width is specifiable parametrically in 1/16" increments. Height is specifiable parametrically to four decimal places.

Tip: The width of the panel is calculated based on the width of the worksurface and the support used on the left and right.

Tip: See Run-Off Application Matrix on page 73 to determine support option availability.

Tip: Glass modesty panel cannot mount in front of a power unit with a scallop due to bracket interference.

Tip: Glass modesty panel cannot attach flush to the same end of a worksurface that has a pedestal as a support.

Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.

Tip: The sizes represented show a small subset of common sizes. For parametric sizes and pricing, please refer to SmartTools.

Tip: The pricing shown at right includes a free support end panel left support and a right hand 25"W storage unit.

Tip: See SmartTools or the Elective Elements Parametric Dimension Guide on page 14 when planning to align to Elective Elements sizes.

# Glass Modesty Panel for Use with Run-Off Applications

Glass Modesty Panel  
for Use with Run-Off  
Applications

Tip: Glass modesty panels offer no structural support.

Tip: Used with straight and return worksurfaces in run-off applications.

Tip: Width is specifiable parametrically in 1/16" increments. Height is specifiable parametrically to four decimal places.

Tip: The width of the panel is calculated based on the width of the worksurface and the support used on the left and right.

Tip: See Run-Off Application Matrix on page 73 to determine support option availability.

Tip: Glass modesty panel cannot mount in front of a power unit with a scallop due to bracket interference.

Tip: Glass modesty panel cannot attach flush to the same end of a worksurface that has a pedestal as a support.

Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.

Tip: The sizes represented show a small subset of common sizes. For parametric sizes and pricing, please refer to SmartTools.

Tip: The pricing shown at right includes a free support end panel left support and an adjacent storage unit at right.

Tip: See SmartTools or the Elective Elements Parametric Dimension Guide on page 14 when planning to align to Elective Elements sizes.

# Specifying Elective Elements Parametric Tackboards

---

## Specification Information Tackboards

Wall-Mounted Tackboards

196

# Wall-Mounted Tackboards

For Use with Service Modules, Blade Accessory Shelves, and Wall-Mounted Overheads

Tip: Width and height are specifiable parametrically in 1/16" increments.

Tip: If scallop is specified, one scallop located in the center when the tackboard is 24"W–54"W. Two scallops will be located on the left and right when the tackboard is 60"W and wider.

Tip: Surface material upcharges vary by size. See SmartTools or Hedberg for full pricing.

Tip: The cords and cables can be routed behind the tackboards. Daisy chain option is not recommended.

Tip: Check with local building code official for proper application.

Tip: The sizes represented show a small subset of common sizes. For parametric sizes and pricing, please refer to SmartTools.

Tip: See SmartTools or the Elective Elements Parametric Dimension Guide on page 14 when planning to align to Elective Elements sizes.

# Specifying Elective Elements Parametric Storage

<b>File Surround</b>	<b>200</b>
<b>Floating Shelf with Shelf Back Panel and Upside Down</b>	
<b>Floating Shelf with Shelf Back Panel</b>	<b>204</b>
<b>Floating Back Panel</b>	<b>212</b>

# File Surround

For Use with Universal Storage

Without back panel

With back panel

*Tip: Dimensions of the file surround represent the internal cavity dimensions based on the storage being surrounded. Depth, width, and height are available parametrically.*

*Tip: Refer to SmartTools for full parametric pricing upcharges and sizes.*

*Tip: Depth and width are available parametrically by 1/16" increments. Height is specifiable to the fourth decimal place.*

*Tip: A single top is one section.*

*Tip: SmartTools will automatically generate the section top option, when available, based on the size specified.*

*Tip: Back panel is only specifiable when end panel left and right is selected.*

	• Wood group 3	Prices at right	Specify wood color number for top.
	• Customiz stain	Prices at right	Specify with Customiz stain for top.
	• Full-fill finish on wood group 1 (not available on laminate worksurfaces with wood edge)	Prices at right	Specify full-fill finish number for top.
<b>End panel</b>			
• Wood group 3	Prices at right	Specify wood color number for end panel.	
• Customiz stain	No cost	Specify with Customiz stain for end panel.	
<b>Back panel</b>			
• Wood group 3	Prices at right	Specify wood color number for back panel.	
• Customiz stain	No cost	Specify with Customiz stain for back panel.	

**For Canadian Pricing**

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

► **Options, continued on next page**

► Options, continued from previous page

**For laminate price group 2 and 3 pricing,** please refer to SmartTools.

*Tip: The Open Line laminate (OLL) upcharge applies once per file surround unit.*

*Tip: Short grain direction on laminate is not allowed on the top.*

*Tip: Long grain direction on veneer is not allowed on tops larger than 120"W.*

*Tip: Woodgrain laminated sectioned tops with long grain direction over 120"W will not be grain matched. Please refer to specials if grain matching is desired on woodgrain laminate sectioned tops greater than 120"W.*

*Tip: End panel grain direction on laminate must be vertical when the height is greater than 60".*

*Tip: Back panel grain direction is always horizontal.*

*Tip: The file surround is currently only able to surround Universal storage.*

Style Number	Quantity	U.S. Price
--------------	----------	------------

**Floating Shelf Alignment Kit, Field Installed**

<b>EFSHSK</b>	See tip below	\$165
---------------	---------------	-------

*Tip: One Floating Shelf Alignment Kit (**EFSHSK**) contains 20 dowels for alignment. One kit can support multiple shelf alignments, dependent upon shelf dimensions - it is not needed to select one kit per shelf.*

**Light Kit with Driver**

<b>EELPK</b>	1	\$450
--------------	---	-------

*Tip: One light kit (**EELPK**) is needed for each specified light option and contains all power and switch components.*

*Tip: Each **EELPK** light kit can support a maximum of six individual shelves with light option, or a total combined shelf width of 260", whichever is the first limiting factor.*

*Tip: One **EELPK** light kit includes one power switch. For shelf lights to be powered individually, they will require their own light kit.*

**For Canadian Pricing**

Multiply U.S. Price by the Canadian price factor.

# Surface Materials

This listing includes all the surface material choices that are available for the Elective Elements Parametric products in this specification guide.

## Resources

For more information about surface materials, refer to the following resources:

**Additional surface materials specification tools** are available to assist you in the specification process—the Surface Materials Binders.

**The global surface materials palette** is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see [steelcase.com/surface-materials](http://steelcase.com/surface-materials).

**Surface Materials Binders** include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

## Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

## Veneer

### Wood Group 1

#### Flat-Cut Open-Pore

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry Ⓔ
- 3422 FC/OP Medium Cherry
- 3522 FC/OP Clear Maple
- 3592 FC/OP Blonde on Maple Ⓔ
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3752 FC/OP Medium Walnut Ⓔ
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

#### Flat-Cut Open-Pore, Natural Veneer

- 3342 FC/OP Black Walnut
- 35A2 FC/OP Blanch Maple
- 37A2 FC/OP Thunder Walnut

#### Quarter-Cut Open-Pore

- 3042 QC/OP Ash Ⓔ
- 3222 QC/OP Clear Maple
- 3292 QC/OP Blonde on Maple Ⓔ
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3352 QC/OP Medium Walnut Ⓔ
- 3362 QC/OP Dark Walnut
- 3372 QC/OP Medium Mahogany on Walnut
- 3382 QC/OP Graphite Walnut

#### Quarter-Cut Open-Pore, Natural Veneer

- 32A2 QC/OP Blanch Maple
- 33A2 QC/OP Thunder Walnut
- 3392 QC/OP Black Walnut

#### Rift-Cut Open-Pore

- 3602 RC/OP Desert Oak

#### Rift-Cut Full-Fill, Natural Veneer

- 36A2 RC/OP Volcanic Oak

### Wood Group 3

#### Flat-Cut Open-Pore, Natural Veneer

- 3082 FC/OP Washed Walnut

### Wood Group 1

#### Open-Pore Planked Veneer

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

*Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.*

## Full-Fill

**Full-fill finish** is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

### Wood Group 2

#### Flat-Cut Full-Fill

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry Ⓔ
- 3424 FC/FF Medium Cherry
- 3524 FC/FF Clear Maple
- 3544 FC/FF Blonde on Maple Ⓔ
- 3704 FC/FF Clear Walnut
- 3714 FC/FF Natural Walnut
- 3754 FC/FF Medium Walnut Ⓔ
- 3764 FC/FF Dark Walnut
- 3774 FC/FF Medium Mahogany on Walnut

#### Flat-Cut Full-Fill, Natural Veneer

- 3734 FC/FF Black Walnut

#### Quarter-Cut Full-Fill

- 3224 QC/FF Clear Maple
- 3294 QC/FF Blonde on Maple Ⓔ
- 3304 QC/FF Clear Walnut
- 3314 QC/FF Natural Walnut
- 3354 QC/FF Medium Walnut Ⓔ
- 3364 QC/FF Dark Walnut
- 3374 QC/FF Medium Mahogany on Walnut
- 3384 QC/FF Graphite Walnut

#### Quarter-Cut Full-Fill, Natural Veneer

- 3394 QC/FF Black Walnut

#### Rift-Cut Full-Fill

- 3604 RC/FF Desert Oak

### Wood Group 3

#### Flat-Cut Full-Fill, Natural Veneer

- 3084 FC/FF Washed Walnut

## Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on [village.steelcase.com](http://village.steelcase.com) for sample information and product line availability. All premium veneers are in clear-coat.

### Wood Group 3

#### Quarter-Cut Open-Pore

- 3832 QC/OP Figured Anegre

**Select Surfaces****Composite Veneer**

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are part of our Select Surfaces program as Wood Group 1 pricing.

**Composite Veneer Group 1****Composite Flat-Cut Open-Pore**

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite
- 3LAX FC/OP Graphite on Oak Composite
- 3LCX FC/OP Medium Cherry on Cherry Composite

**Composite Quarter-Cut Open-Pore**

- 3F8X QC/OP European Walnut Composite
- 3GGX QC/OP Zebrano Composite
- 3HGX QC/OP Oak Composite
- 3HVX QC/OP Walnut Composite
- 3LBX QC/OP Clear Walnut on Walnut Composite
- 3LDX QC/OP Natural Walnut on Walnut Composite
- 3ZNX QC/OP Night Cerused Oak Composite

**Composite Veneer Group 2****Composite Flat-Cut Open-Pore**

- 3LHX FC/OP Espresso on Walnut Composite

**Composite Quarter-Cut Open-Pore**

- 3LEX QC/OP Desert Oak on Oak Composite
- 3LGX QC/OP Chai on Walnut Composite
- 3LJX QC/OP Ebony on Walnut Composite

Ⓔ = Established

**Custom Surfaces**

**Customiz stain** is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable. Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Low sheen wood finish topcoat, approximately 15 gloss level instead of standard 35 gloss level, is available through Customiz stain at no additional cost.

**Laminate****Steelcase Surfaces****High-Pressure Laminate****Price Group 1****Fiber Laminate**

- 24H2 Satin Black
- 24H3 Satin Stone
- 24H4 Satin Mocha

**Custom Surfaces**

**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

**Laminate Approval and Material Requirements**

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit [www.steelcase.com](http://www.steelcase.com)

**How to Order**

Once you have confirmed that the laminate you've selected has been tested and approved, you are ready to place your order.

**To order an Open Line laminate:**

- Mark the purchase order with the laminate manufacturer, laminate number, and laminate description.
- Use the appropriate Open Line laminate number, 2900.
- Use the appropriate "2K" number to indicate the edge color requirements.

*Tip: Refer to the OLL coordination matrix on page 223 to determine the correct finish.*

**For additional information,** refer to the *Steelcase Surface Materials Reference Manual*.

**Paint**

*Tip: Not every paint color is available on every painted component.*

## Veneer Cut Guidelines

### Flat Cut

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

### Quarter Cut

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

### Rift Cut

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

## Wood Touch-Up Kits

### How to Order Wood Touch-Up Kits

Order wood finish touch-up kits from J.Kaltz Co. Specific Steelcase finish codes (such as 3422) can be found under Finishes > Dealer Kits. Each kit contains one brush tip marker and one fill stick.

Place orders as follows:

- Phone: 616.942.6070
- Web: <http://www.jkaltzco.com>

# Specification Guidelines for Vertical Fabric Applications

**Warp horizontal** means the height dimension of the tackboard is perpendicular to the warp of the fabric.

## Application Topics

*Tip: Fabric warp direction cannot be altered from standard on tackboards.*

### Customer's Own Material Yardage Requirements

Pre-approved fabrics are available. To determine if the fabric you want is on the pre-approved list, call a COM Consultant at 616.246.9822.

### Surface Materials Representatives

are also available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822.

**For further information regarding COM fabrics,** refer to the *Steelcase Surface Materials Reference Manual*.

**Additional fabric** is required to accommodate flaws, wrinkles, and other imperfections.

**E** = Established

**1 mm plastic edge trim color** is defaulted and is determined by the laminate color you select for the worksurface. The edge trim color cannot be specified.

**3 mm plastic edge trim color** is specifiable. Refer to *Plastic* on page 220.

**All laminates**, except woodgrain laminates, will have solid color plastic edging.

**Woodgrain laminates** will have woodgrain plastic edges and the grain of the edges will be horizontal.
