

Montage Solutions Specification Guide

Availability

Electronic price list updated with release 200.K (U.S.) and 156.K (Canada), dated February 26, 2024.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at www.steelcase.com/finishlibrary/.

► For a list of all trademarks, refer to the last page of this specification guide. © 2024 Steelcase Inc.

For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing/. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

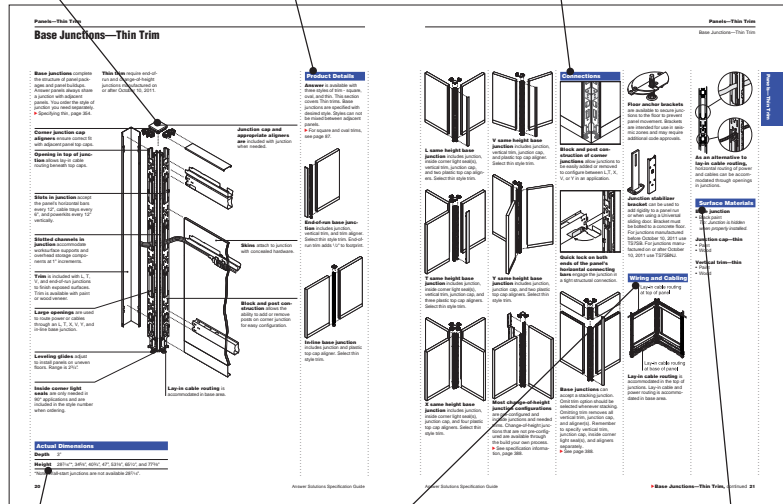

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
- Dimensions
- Style Number
- Price

Standard Includes (under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify (under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information (under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

The screenshot shows a specification page for window frame packages. It features several key sections:

- Standard Includes:** Lists items provided at no cost.
- Required to Specify:** Lists items that must be specified, such as window type and surface material.
- Options:** Lists additional features and their associated costs.
- Base Trim:** Lists different trim styles and their costs.
- Specification Information:** A table listing various window styles (e.g., 24", 30", 36") and their prices, along with surface material options.

Options (under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with Custom Stain

Italic typeface on specifying pages usually identifies wording that you should use in your order.

i

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.

Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you need a style number and you need to find the page that has more details about the product.

Additional Resources

Montage is supported with informational materials, tools, and software to help you plan, specify, and order an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

This specification guide contains multiple Steelcase product lines which are designed into one specification guide for your convenience.

Additional storage products can be found in the *Storage Specification Guide*.

Printed Materials

Tile Portfolio

Color photographs of new and existing tiles in a fun “flip book” that demonstrates the endless combinations and beauty of Montage tiles.

Montage Solutions Brochure

Form number S10945

Universal Worksurface Products Brochure

Form number 02-0002583

Storage Specification Guide contains storage that attaches to Montage.

Montage Wired

This brochure provides a written, quick, and colorful overview of how Montage accommodates technology. A color photograph of the interior of an untiled workstation loaded with cable, and plenty of power and termination points demonstrates Montage’s technology capability.

Form number S2515

Surface Materials Reference Manual

provides:

- An explanation of the surface materials program
- “Available on” matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Planning Tools

Quick Ship Guide

This handbook describes all Steelcase and Coalesse products that are available for Rapid2 (ships in 2 days), Rapid5 (ships in 5-7 days), or Coalesse Rapid10 (ships in 10 days).

Videos

Product Overview Video

Video showing Montage worksetting that explains the breadth of Montage aesthetics, flexibility, and technology options.

Form number S70643

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase’s design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project-Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

► For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Montage CD-ROM

This interactive CD-ROM includes a model customer sales presentation, Montage thought-starter renderings, Montage digital photos, and PDFs of several Montage sales and learning publications.

Form number S11417

Montage Product Training

Basic training for Montage and many other Steelcase products is part of the Building Product Muscle curriculum on the Steelcase University Web site at village.steelcase.com.

The Montage BPM web-based module is an interactive course filled with pictures, product detail, and practice exercises designed to build knowledge of Montage’s positioning, statement of line, features and benefits, competitive products, application, and sales presentation. It also provides printable job aids of all content covered in the course to serve as ongoing performance support for Steelcase and dealer salespeople. The Montage BPM is course SAL277.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance,

please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939, or visit our Web site: www.steelcase.com.

Related Products

Slatwall worktools

are available for use with Montage slatwall tiles.

Worktools include a full line of ergonomically designed products that enhances and improves the work setting. Product platforms include computer support tools, organizational worktools, and personal lighting.

► For additional information, refer to *Steelcase Worktools Specification Guide* or contact Steelcase at 1.888.STEELCASE (1.888.783.3522) or email lineone@steelcase.com.

Height-adjustable desks

include a full line of crank, counterbalance, and electric height-adjustable desks which promote well-being in the office.

► For additional information, refer to *Height-Adjustable Desks Specification Guide* or call 1.888.STEELCASE or email lineone@steelcase.com.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies.

To learn more at a corporate level, visit: <https://www.steelcase.com/discover/steelcase/esg-overview/environmental/>

Product Environmental Profiles, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at Origin.build.

Enhanced Monolithic Frames

Enhanced monolithic frames are designed to link horizontally and accept stack-on frames to create visual space division and accommodate electrical and cable routing. Enhanced monolithic frames are designed to utilize frame, worksurface, and upper storage on-module connections. Enhanced monolithic frames can be connected to enhanced standard and enhanced off-module frames. Enhanced monolithic frames can be connected to enhanced off-module frames on a spine wall.

► Specifying, page 276

Cable carriers organize cables inside frame.

Openings in frame allow pass-through cable routing.

Horizontal filler strip, ordered separately, must be attached at each segmentation location.

Frame is structural and stackable.

End trim is available to finish the exposed end of a run of frames.

Base cavity can accommodate a powerkit to provide electrical receptacles in the base. In addition, if power is not used at base, the entire base cavity can be used for cable distribution and voice/data quick connects.

Open base cavity is available for routing power from the base of the adjacent frame to the desk cavity location. The open base frame cannot accommodate a powerkit.

Top cap finishes the top surface of frames.

Gaskets inside the panel frame eliminate all light leaks.

Enhanced 10"H and 20"H tiles can be used on enhanced monolithic or enhanced standard frames.

Enhanced monolithic tiles, available in tackable acoustical, high-performance acoustical, or wood, can be used on enhanced monolithic frames only.

Leveling glide is adjusted before the tile is installed. Range is 2".

Base cover is available plain or with openings to accommodate receptacles. You can mix plain and power base covers on opposite sides of the same frame.

Product Details

Enhanced Monolithic Tile

Enhanced Monolithic Tile

Enhanced Monolithic Tile

Segmented Tiles

Enhanced monolithic frames can accept an enhanced monolithic tile on both sides or an enhanced monolithic tile on side one and any segmented tiles with or without desk-height cavity cover on side two.

► See pages 320–334 for *Enhanced Monolithic Tiles* and *Enhanced Tiles*.

Filler strip

Filler strip

Horizontal filler strip must be added to the enhanced monolithic frame in each location where tile segmentation occurs. The filler strip is field installed and placed between two tiles on a frame. The filler strip provides the same aesthetic as an enhanced standard frame with segmentation.

► Page 278

Actual Dimensions

Depth (thickness)	3"
Width	18", 24", 30", 36", 42", or 48"
Height	10 ²¹ / ₆₄ ", 20 ⁴³ / ₆₄ ", 37 ¹ / ₄ ", 44 ¹¹ / ₁₆ ", 55 ¹ / ₆₄ ", 65 ²³ / ₆₄ ", or 86 ¹ / ₃₂ "
Stacked height	55 ¹ / ₆₄ ", 65 ²³ / ₆₄ ", or 86 ¹ / ₃₂ "
Door height	86 ¹ / ₃₂ "
Leveling glide range	2"

65"H frames

Tile segmentation on an enhanced monolithic frame may vary.

Top caps are provided with 38"H, 45"H, 55"H, 65"H, and 86"H frames. To stack 10"H or 20"H frames on top, the top cap is removed and reinstalled on the top frame. Top caps are available in metal and wood.

38"H frames are designed to accommodate a transaction height of 38 1/2"H to the top of the transaction top. 38"H frames do not accept stacker frames.

38"H frames

38"H enhanced monolithic frames accept a 20"H and a 13"H enhanced tile or a 33"H enhanced monolithic tile.

Extended top cap covers multiple frames eliminating the top cap joint. Not recommended on frames higher than 55"H and does not extend over junctions. Only available in steel.

Door and frame and single or double pocket doors are available to provide additional privacy for workstations. ▶ Pages 26–29

Special door tie plate is required in installations where no frames are installed above the door. Contact your local area Steelcase office for details about special product applications.

Connections

10"H and 20"H frames are designed to stack on top of 45"H, 55"H, and 65"H enhanced monolithic frames. ▶ See page 280 for *Enhanced 10"H and 20"H Single Stack-on Frames*.

A horizontal filler strip is not needed between the base frame and stack-on frame.

Heavy steel connectors bolt to frames to ensure stability. 45"H, 55"H, and 65"H frames can be used by themselves or with one 10"H or 20"H frame stacked on top.

Frames can support other components including work-surfaces, overhead storage bins, and shelves.

86"H Frames

65"H Frames

Overhead storage bins and shelves install at 65"H only. They cannot install on a 10"H stacker or any base frame lower than 65"H. *Tip: A special half-height shelf is available, contact Steelcase Systems Specials Group for an engineering quote.*

Vertical end trim can be ordered to finish the exposed end of a run of frames. Trim is available in either metal or wood.

Metal end trim must be used with metal top caps.

Wood end trim must be used with wood top caps. *Tip: End trim alignment is critical during installation. Ensure that end trim and top cap are installed flush to avoid function and aesthetic flaws, specifically in 45" applications.*

Junctions are available to join adjacent frames of the same height together in L-, V-, T-, Y-, and X-configurations. Although junctions are not required to join frames in a straight line, an in-line I-junction is available to maintain alignment with frames that are joined with junctions. Wood junctions are available in L-, I-, T-, and X-configurations.

Junctions can also join frames of different heights. ▶ Page 30

Adjustable wall-attachment bracket is available to anchor the beginning of a run of frames to a perpendicular wall. Or frame can be attached directly to wall without bracket. Adjustability allows 2 1/4" to 4" for creep. *Tip: Wall-attachment bracket is required when a door frame is being attached to a wall.*

Wiring & Cabling

Base power-in brings power to the frames at the right-hand receptacle location in the base.

Power pole can be added above any square junction, except the in-line junction, to bring power and cables down from the ceiling. Top power-in cable, installed inside the power pole, connects to the powerway in the base or desk-height cavity of the frame without occupying any receptacle locations.

Internode is available to be field installed to bring power and voice/data outside of the frame and mount above or below the worksurface.

Powerkit in the base of frame is field installed to provide three wiring schematics using an eight-wire system. Pass-through powerways are also available when you want to extend the network without installing receptacles in one of the frames.
▶ Page 52

Desk-height cavity can be added above worksurface height to accept powerkit and voice/data quick connects. Additional data openings can also be optioned to add voice/data quick connects below worksurface height. They accept both NEMA and modular data faceplates.

Tile segmentation and a desk-height cavity is required for desk-height power and data access. Tiles cannot be field-cut. *Tip: Horizontal filler strips must be added in each location where tile segmentation occurs. A filler strip is not needed between the desk-height cavity cover and the 13"H tile above.*

Desk-height cavity can be covered with a 20"H tile. Tile cannot be slatwall, high-performance acoustical, or perforated non-tackable.

Open base cavity on frames is used to transfer power from the base of the adjacent panel to the desk-height location. These frames cannot connect to each other; they must be installed between power base frames.

Open base cavity frame base will not accept any power components such as powerkits or Chicago boxes. Frame base cannot accept data terminations or data faceplates in the base cover.

Openings in frame allow cables to be routed inside the walls of a workstation.

Junctions allow cables and transfer cables to be routed vertically.

All frames are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Application Topics

Frames over 6' high and frames that are close to the ceiling should be reviewed and approved by the local building inspector before you complete your specification.

Open base frame

- Cannot be installed next to a junction
- Cannot be attached side by side
- Fiber-in tile cannot install in open base frame
- Glass tiles cannot install in bottom segment of an open base frame
- Full to the floor tiles cannot install on an open base frame

Horizontal Filler Strip for Use on Enhanced Monolithic Frames

Horizontal Filler Strip
for Use on Enhanced
Monolithic Frames

The horizontal filler strip must be added to an enhanced monolithic frame only in each location where tile segmentation occurs. The filler strip is field installed and placed between two tiles on a frame. The filler strip provides the same aesthetic as an enhanced standard frame with tile segmentation.

► Specifying, page 278

Filler strip is standard in black paint. Sterling paint is available as an option.

Product Details

Filler strip is available in all widths as enhanced monolithic frames.

Enhanced Standard Frame	Enhanced Monolithic Frame with Horizontal Filler Strips
-------------------------	---

Horizontal filler strip provides the same aesthetic as an enhanced standard frame with segmentation.

Attachment hardware, shipped with the filler strip, attaches filler strip to the frame.

At each location where tile segmentation occurs, horizontal filler strip must be added.
Tip: A horizontal filler strip is not needed between the desk-height cavity cover and the 13"H tile above.

When stacking on top of enhanced monolithic frames, a horizontal filler strip is not needed between the base frame and stack-on frame.

Actual Dimensions

Width 18", 24", 30", 36", 42", or 48"

Height 1¹/₁₆"

Enhanced Standard Frames

Enhanced standard frames are designed to link horizontally and stack vertically to create visual space division and accommodate electrical and cable routing. Standard frames are designed to utilize frame, worksurface, and upper storage on-module connections. Enhanced standard frames can be connected to enhanced off-module frames on a spine wall. Enhanced standard frames can be used with enhanced off-module frames.

► Specifying, pages 279–280

Cable carriers organize cables inside frame.

Openings in frame allow pass-through cable routing.

Frame is structural and stackable.

Slatwall tiles can be added to accommodate work organizers.

End trim is available to finish the exposed end of a run of frames.

Base cover is available plain or with openings to accommodate receptacles. You can mix plain and power base covers on opposite sides of the same frame.

Base cavity can accommodate a powerkit to provide electrical receptacles in the base. In addition, if power is not used at base, the entire base cavity can be used for cable distribution and voice/data quick connects.

Product Details

Enhanced tiles are available in many versions—tackable acoustical, high-performance acoustical, painted steel, patterned steel, fabric-covered steel, laminate, wood, marker-board, slatwall, glass, and base fiber-in.

Tip: Enhanced monolithic tiles can be used on enhanced monolithic frames only.

Tip: The use of glass on the spine wall is limited to one row in an off-modular connection.

Top caps are provided with 38"H, 45"H, 55"H, 65"H, and 86"H frames. To stack 10"H or 20"H frames on top, the top cap is removed and reinstalled on the top frame. Top caps are available in metal and wood.

Extended top cap covers multiple frames eliminating the top cap joint. Not recommended on frames higher than 55"H and does not extend over junctions. Only available in steel.

Actual Dimensions

Depth (thickness)	3"
Width	18", 24", 30", 36", 42", or 48"
Height	10 ²¹ / ₆₄ ", 20 ⁴³ / ₆₄ ", 37 ¹ / ₄ ", 44 ¹¹ / ₁₆ ", 55 ¹ / ₆₄ ", 65 ²³ / ₆₄ ", or 86 ¹ / ₃₂ "
Stacked height	55 ¹ / ₆₄ ", 65 ²³ / ₆₄ ", or 86 ¹ / ₃₂ "
Leveling glide range	2"

Door and frame and single or double pocket doors are available to provide additional privacy for workstations.
▶ Pages 26–29

Special door tie plate is required in installations where no frames are installed above the door. Contact your local area Steelcase office for details about special product applications.

38"H frames are designed to accommodate a transaction height of 38 1/2"H to the top of the transaction top.

38"H frames

38"H enhanced standard frames accept a 20"H or a 13"H enhanced tile. 38"H frames do not accept stacker frames.

Connections

10"H and 20"H frames are designed to stack on top of 45"H, 55"H, and 65"H frames.

Heavy steel connectors bolt to frames to ensure stability. 45"H, 55"H, and 65"H frames can be used by themselves or with one 10"H or 20"H frame stacked on top.

Frames can support other components including work-surfaces, overhead storage bins, and shelves.

86"H Frames

65"H Frames

Overhead storage bins and shelves install at 65"H only. They cannot install on a 10"H stacker or any base frame lower than 65"H.
Tip: A special half-height shelf is available, contact Systems Specials Group for an engineering quote.

Vertical end trim can be ordered to finish the exposed end of a run of frames. Trim is available in either metal or wood.

Metal end trim must be used with metal top caps.

Wood end trim must be used with wood top caps.
Tip: End trim alignment is critical during installation. Ensure that end trim and top cap are installed flush to avoid function and aesthetic flaws, specifically in 45" applications.

Junctions are available to join adjacent frames of the same height together in L-, V-, T-, Y-, and X-configurations. Although junctions are not required to join frames in a straight line, an in-line I-junction is available to maintain alignment with frames that are joined with junctions. Wood junctions are available in L-, I-, T-, and X-configurations.

Junctions can also join frames of different heights.
▶ Page 30

Adjustable wall-attachment bracket is available to anchor the beginning of a run of frames to a perpendicular wall. Or frame can be attached directly to wall without bracket. Adjustability allows 2 1/4" to 4" for creep.
Tip: Wall-attachment bracket is required when a door frame is being attached to a wall.

Floor anchor brackets are available to secure frames to the floor to prevent panel movement. Brackets are intended for use in seismic zones and may require additional code approvals.

Wiring & Cabling

Base power-in brings power to the frames at the right-hand receptacle location in the base.

Power pole can be added above any square junction, except the in-line junction, to bring power and cables down from the ceiling. Top power-in cable, installed inside the power pole, connects to the powerway in the base or desk-height cavity of the frame without occupying any receptacle locations.

Internode is available to be field installed to bring power and voice/data outside of the frame and mount above or below the worksurface.

Powerkit in the base of frame is field installed to provide three wiring schematics using an eight-wire system. Pass-through powerways are also available when you want to extend the network without installing receptacles in one of the frames.

▶ Page 52

Desk-height cavities can be added to accommodate powerkits and voice/data at worksurface height.

Desk-height cavity can be covered with a 20"H tile. Tile cannot be slatwall, high-performance acoustical, or perforated non-tackable.

Openings in frame allow cables to be routed inside the walls of a workstation.

Junctions allow cables and transfer cables to be routed vertically.

All frames are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Enhanced Off-Module Frames

Enhanced off-module frames are designed to link horizontally and stack vertically to create visual space division and accommodate electrical and cable routing. Off-module frames are designed to utilize frame, worksurface, and upper storage off-module connections. Off-module frames can be used with enhanced standard frames. Off-module connections are slotted in 1/2" increments and are hidden behind tiles.

► Specifying, pages 281–282

Cable carriers organize cables inside frame.

Openings in frame allow pass-through cable routing.

Frame is structural and stackable.

Product Details

Enhanced tiles are available in many versions—tackable acoustical, high-performance acoustical, painted steel, patterned steel, fabric-covered steel, laminate, wood, marker-board, slatwall, glass, and base fiber-in.

Tip: Enhanced monolithic tiles can be used on enhanced monolithic frames only.

Tip: The use of glass on the spine wall is limited to one row in an off-modular connection.

Top caps are provided with 38"H, 45"H, 55"H, 65"H, and 86"H frames. To stack 10"H or 20"H frames on top, the top cap is removed and reinstalled on the top frame. Top caps are available in metal and wood.

Actual Dimensions

Depth (thickness)	3"
Width	18", 24", 30", 36", 42", or 48"
Height	10 ²¹ / ₆₄ ", 20 ⁴³ / ₆₄ ", 37 ¹ / ₄ ", 44 ¹¹ / ₁₆ ", 55 ¹ / ₆₄ ", 65 ²³ / ₆₄ ", or 86 ¹ / ₃₂ "
Stacked height	55 ¹ / ₆₄ ", 65 ²³ / ₆₄ ", or 86 ¹ / ₃₂ "
Leveling glide range	2"

Extended top cap covers multiple frames eliminating the top cap joint. Not recommended on frames higher than 55"H and does not extend over L, T, Y, and X junctions. Only available in steel.

Door and frame and single or double pocket doors are available to provide additional privacy for workstations. ▶ Pages 26–29

Special door tie plate is required in installations where no frames are installed above the door. Contact your local area Steelcase office for details about special product applications.

38"H frames are designed to accommodate a transaction height of 38½"H to the top of the transaction top. 38"H frames do not accept stacker frames.

38"H enhanced off-module frames accept a 20"H and a 13"H enhanced tile.

Connections

10"H and 20"H frames are designed to stack on top of 45"H, 55"H, and 65"H frames.

Heavy steel connectors bolt to frames to ensure stability. 45"H, 55"H, and 65"H frames can be used by themselves or with one 10"H or 20"H frame stacked on top.

Frames can support other components including work-surfaces, overhead storage bins, and shelves.

Overhead storage bins and shelves install at 65"H only. They cannot install on a 10"H stacker or any base frame lower than 65"H. *Tip: A special half-height shelf is available, contact Systems Specials Group for an engineering quote.*

Off-module frame attachment brackets are used to make frame off-module connections. Package is ordered according to frame height and includes all brackets and light seal.

Off-module end-of-frame bracket is used to make off-module, end-of-frame, 90° connections.

Off-module mid-frame and in-line bracket is used to make mid-frame and in-line connections. *Tip: When installing frameless glass on off-module frames, field modification to the top cap is required to allow clearance for top off-module attachment bracket.*

Vertical end trim can be ordered to finish the exposed end of a run of frames. Trim is available in either metal or wood. *Tip: End trim alignment is critical during installation. Ensure that end trim and top cap are installed flush to avoid function and aesthetic flaws, specifically in 45" applications.*

Junctions are available to join adjacent frames of the same height together in L-, V-, T-, Y-, and X-configurations. Although junctions are not required to join frames in a straight line, an in-line I-junction is available to maintain alignment with frames that are joined with junctions. Wood junctions are available in L-, I-, T-, and X-configurations.

Junctions can also join frames of different heights. ▶ Page 30

Adjustable wall-attachment bracket is available to anchor the beginning of a run of frames to a perpendicular wall. Or frame can be attached directly to wall without bracket. Adjustability allows 2¼" to 4" for creep. *Tip: Wall-attachment bracket is required when a door frame is being attached to a wall.*

Floor anchor brackets are available to secure frames to the floor to prevent panel movement. Brackets are intended for use in seismic zones and may require additional code approvals.

Wiring & Cabling

Base power-in brings power to the frames at the right-hand receptacle location in the base.

Power pole can be added above any square junction, except the in-line junction, to bring power and cables down from the ceiling. Top power-in cable, installed inside the power pole, connects to the powerway in the base or desk-height cavity of the frame without occupying any receptacle locations.

Internode is available to be field installed to bring power and voice/data outside of the frame and mount above or below the worksurface.

Powerkit in the base of frame is field installed to provide three wiring schematics using an eight-wire system. Pass-through powerways are also available when you want to extend the network without installing receptacles in one of the frames.

▶ Page 52

Desk-height cavities can be added to accommodate powerkits and voice/data at worksurface height. Cavity can be covered with a 20"H tile. Tile cannot be slatwall, high-performance acoustical, or perforated non-tackable.

Base-to-desk height

and off-module power transfer cable carries power between the base of a frame to desk-height powerways and can transfer power at off-module frame connections at desk height.

Frame base will not accept any power components such as powerkits or Chicago boxes. Frame base cannot accept data terminations or data faceplates in the base cover.

Openings in frame allow cables to be routed inside the walls of a workstation.

Junctions allow cables and transfer cables to be routed vertically.

All frames are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Application Topics

Frames over 6' high and frames that are close to the ceiling should be reviewed and approved by the local building inspector before you complete your specification.

Open base frame

- Cannot be installed next to a junction
- Cannot be attached side by side
- Fiber-in tile cannot install in open base frame
- Glass tiles cannot install in bottom segment of an open base frame
- Full to the floor tiles cannot install on an open base frame

Vertical slot cover is installed on vertical uprights of Montage frame. Once installed, vertical slots are no longer visible.
 ▶ Specifying, page 278

Vertical slot cover is painted to match the color of the Montage frame.

Monolithic tiles use multiples of 20" vertical slot covers.

Product Details

Vertical slot cover cleans up aesthetics on platinum and sterling frames.
Tip: Slot cover can be moved to the side to allow access to slots if needed.
 Each standard package includes two covers. One for the right side and one for the left side.

Tip: Vertical slot covers will not work in segments with slatwall or glass tiles.

Three vertical light seals

Tile height determines slot cover height. Three 20"H tiles on one side of frame require three 20"H slot covers.

Actual Dimensions

Height 7", 10", 13", or 20"

Door and Door Frame

Montage door frames

can accommodate any hollow-core door of the right size with hardware fittings in the correct locations. If you choose to obtain doors locally, make sure they match these specifications.

► Specifying, pages 283–284

Door is available left- and right-hand versions.

Latch cutout is standard size to accommodate cylindrical-type hardware, ordered separately.

Product Details

Door swings open 180° maximum.

Right-hand or left-hand door? To determine whether a door is left or right-hand, imagine yourself standing in the door's frame with your back against the side of the frame where the door's hinges will be attached. If the door will swing to your left, it is a left-hand door. If it will swing to your right, it is a right-hand door.

Actual Dimensions

	Door	Frame
Depth	$1\frac{3}{4}$ "	3"
Width	$28\frac{7}{8}$ " , $34\frac{7}{8}$ " , or $40\frac{7}{8}$ "	30" , 36" , or 42"
Height	85"	$86\frac{1}{2}$ "

Connections

10"H enhanced stack-on frames can be used on top of the door frame. The stack-on frame used above the door frame and the door frame should be the same width.

Special door tie plate is required in installations where no frames are installed above the door. Contact your local area Steelcase office for details about special product applications.

Adjacent frames or junctions must be 86"H.

Door frame must use 10"H stack-on frames or special door tie plate to integrate into adjacent panels.

Door should not be installed adjacent to a change-of-height junction.

A wall attachment bracket is needed if attaching a door to a wall.

Application Topics

Door code approvals

vary by location. Check local codes prior to product specification.

Single and Double Pocket Doors

Pocket doors can be used adjacent to any Montage frame. Because door slides into the frame, doors and pocket frame provide visual privacy without using floor space. The pocket doors include pocket door frame, slider door, header with in-line lock post and top cap, and hardware. Pocket doors are standard with a lock.

► Specifying, pages 285–286

Door ships pre-assembled with single-pane clear glass. A frosted glass can be specified as an option.

Pocket door slides inside pocket frame.

Doors ship preassembled with single-pane clear glass. Frosted glass can be specified as an option.

Single pocket door

Double pocket door

Product Details

Pocket doors are 86"H. Single pocket door opening is available 36"W or 42"W. Double pocket door opening width is 66"W.

Tip: Actual opening width is 31½"W for 36"W door, 37½"W for 42"W door, and 58⅜"W for 66"W double door.

Pocket frames are available 36"W, 42"W, and 48"W. Overall dimensions of the single pocket door are 78"W, 84"W, 90"W, and 96"W. Overall dimensions of the double pocket doors are 144"W, 156"W, and 168"W.

Actual Dimensions

	Single pocket door	Double pocket door
Depth (thickness)	3"	3"
Width of pocket frame	36", 42", or 48"	36", 42", or 48"
Width of pocket door	36" or 42"	66"
Clear width of pocket door	31½" or 37½"	58⅜"
Overall dimensions	78", 84", 90", or 96"	144", 156", or 168"
Height	86⅓"	86⅓"

Standing outside,
facing office:
left-hand
door

Single pocket doors are available in right-hand or left-hand versions.

Top caps ship with door and frame.

Surface materials for the pocket door is as follows:

- Inline lock post, header, door, and top cap are trim material.
- Pocket frame, door handle, and horizontal detail are frame material.

Eight enhanced tiles (four tiles per side of pocket frame) and two plain base covers must be ordered separately for single pocket door frame.

- ▶ See pages 316 and 326 for *Plain Base Covers* and *Enhanced Tackable Acoustical and High-Performance Acoustical Tiles*
- ▶ See page 78 for glass tile packages for use with pocket door frames.

Tip: Slatwall, high-performance acoustical, monolithic, and perforated non-tackable tiles cannot be installed on pocket frames.

Tip: Frosted glass or solid tile such as tackable acoustical or steel is recommended in the top position of the pocket frame to conceal the door operating mechanism.

Tip: Segmented tiles are required on pocket doors and frames.

Sixteen enhanced tiles and four plain base covers must be ordered separately for double pocket door frames.

- ▶ See pages 316 and 326 for *Plain Base Covers* and *Enhanced Tackable Acoustical and High-Performance Acoustical Tiles*
- ▶ See page 78 for glass tile packages for use with pocket door frames.

Tip: Slatwall, high-performance acoustical, monolithic, and perforated non-tackable tiles cannot be installed on pocket frames.

Tip: Frosted glass or solid tile such as tackable acoustical or steel is recommended in the top position of the pocket frame to conceal the door operating mechanism.

When specifying the pocket door, four surfaces require a glass finish on each door. Each surface may be specified with a different glass type. However, on double pocket doors, the same glass type will be shipped on both pocket doors.

10\"/>

10\"/>

Pocket doors are standard with a lock, but it can be omitted. Lock is keyed randomly.

Connections

Only floor-supported worksurfaces may be hung on pocket frames.

Overhead storage cannot be hung on pocket frames.

Off-module connections cannot occur on pocket frames.

A wall attachment bracket is needed if attaching a pocket door directly to a wall.

Wiring & Cabling

Power and cabling cannot be routed in pocket doors or pocket frame.

- ▶ Specifying, pages 287–299

L-Junctions

T-Junctions

X-Junctions

Y-Junctions

V-Junctions

I-Junctions

Product Details

Six aluminum junction types are available—L, T, X, Y, V, and I configurations. L-junctions are available with square, radius, or chamfered shapes.
Tip: Standard junction packages are for on-module connections only.

Four wood junction types are available—L, T, X, and I configurations. L-junctions are available in square shapes only.

Change-of-height junctions are available to ensure proper alignment. Specify the same material on the junction as the adjacent top trims.

Kits are available to accommodate all combinations of frame heights involving 38"H, 45"H, 55"H, 65"H, and 86"H frames. Kits include end trim when it is required to finish the exposed ends of frames that are used in change-of-height applications.

- ▶ See *Frame Junction Kits Overview*, page 32

Connections

Connectors are included with each junction kit to join frames together whether they are the same height or different heights.

Wiring & Cabling

Cables can be routed vertically within the portion of the junction that is enclosed by cover(s). On some change-of-height applications, the covers do not extend to enclose the highest frame(s).

Junctions must be used to route power vertically, either from the base or ceiling.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment.

Frame Junction Kits Overview

L-Junctions

Selecting a Kit

To determine the kit you need, follow these steps:

1 Find the type of junction you are making—L, T, X, Y, V, or I. An array of all the possibilities is shown on the following pages.

2 Find the type of kit you'll need. If the frames to be joined are all the same height, you'll need a Same-Height kit. If they are different heights, you'll need a Different-Height kit that corresponds to your specific configuration. It may help if you make a sketch of the junction you are trying to build and then match it with the kits shown on the following pages. Pictures of every possible combination are included here.

3 When you've found the kit that matches, turn to the page number indicated to specify.

Style numbers for kits are based on the heights of the frames that the kits accommodate.

Digit in Style Number	Corresponding Frame Height
3	38"
4	45"
5	55"
6	65"
8	86"

Horizontal dimensions vary depending on how frames are combined. Small increments are added to the length of a run of frames when frames are joined together. The accumulation of these increments is called creep.

No increment is added when frames are joined in line.

Add 1/8" for each end trim.

$$30'' + 30'' + 30'' + 30'' + \frac{1}{8}'' + \frac{1}{8}'' = 120\frac{1}{4}''$$

Add 3" each time a perpendicular frame is joined to the end of a frame run, which uses a junction.

$$30'' + 30'' + 30'' + 30'' + 3'' + 3'' = 126''$$

Add 3" each time a perpendicular frame is inserted into a frame run, which uses a junction.

$$30'' + 30'' + 30'' + 30'' + 3'' + 3'' + 3'' = 129''$$

Add 0.200 when attaching frames off-module due to light seal installation.

$$30'' + 30'' + \frac{1}{5}'' = 33\frac{1}{5}''$$

Vertical dimensions of stacks of frames

are shown in the drawings at right. Distance from top of frame to floor will be slightly greater if the leveling glides are extended. Leveling glide range is 2".

Stacking 10"H or 20"H frames on 45"H frames

Tip: Stacking 20"H frames on 65"H frames will match the heights shown here as 86.023"H.

Tip: 20"H stack-on frames are actually 20.669"H.

Tip: 10"H stack-on frames are actually 10.335"H.

Tip: Height dimensions do not include top cap.

Rules for Frame Stability

For Frames Up to 86"H

Montage frames and tiles, when properly installed, are designed to be stable. Adherence to the guidelines presented here will allow you to efficiently plan stable workstations using frames and tiles alone or with components attached. To ensure safe performance and maximum stability, the installation instructions that accompany each furniture shipment must be followed.

Counterweight packages for storage products are required to ensure product stability.

▶ See page 193 for Counterweight Requirements for Storage Products.

The rules for stability are the same regardless of the type of tile that is used, including glass tile inserts.

An "X" over a drawing means that this application is not recommended.

Changing height within a run has no effect on these stability rules as long as none of the frames exceed 86"H.

Run of Two

Run of Three

Unstable. Requires additional support at end of run.

Alternatives to fin panel or end panel in this application:

- Open loop leg
- Closed loop leg
- Pedestal with filler
- Tower with tall storage-to-panel connector
- 1.5H or 2H storage with medium storage-to-panel connector
 - 18" or 24"D cabinet in perpendicular application
 - 24"D cabinet in parallel application
 - Tower with medium storage-to-panel connector

Run of Four

Unstable. Requires additional support at end of run.

Tip: Doors cannot be used in panel runs of four.

Run of Five

Tip: Doors cannot be used in panel runs of five.

Rules for Frames with Component

For maximum stability, frames that support storage components should be constructed from 65"H three-high frames.

No components should be attached to any locations above 65"H.

Maximum stability is always achieved when loads are counterbalanced by similar loads on the opposite side of the frames.

Pedestals with fillers cannot be used at the end of run for stability.

Runs with one frame-supported component per frame require perpendicular frames for stability every three frames. For maximum stability, return frame must be at least 65"H and 30"W (a single frame 65"H or a 45"H frame with 20"H frame above). Frame-supported components do not have to be counterbalanced.

Counterbalancing components allows runs with one frame-mounted component per frame to be extended to four frames. For maximum stability, return frames must be at least 65"H and 30"W (a single frame 65"H or a 45"H frame with 20"H frame above).

Runs with two frame-mounted components per frame require perpendicular frames for support every two frames. For maximum stability, return frame must be at least 65"H and 30"W (a single frame 65"H or a 45"H frame with 20"H frame above). Frame-supported components do not have to be counterbalanced.

Alternatives to fin panel or end panel in this application:

- Open loop leg
- Closed loop leg
- Tower with tall storage-to-panel connector
 - Overhead bin or shelf cannot span over or be positioned over tower.
- 1.5H or 2H storage with medium storage-to-panel connector
 - 18" or 24"D cabinet in perpendicular application
 - 24"D cabinet in parallel application
 - Tower with medium storage-to-panel connector

End panel can provide support. For maximum stability, the frames that support the frame-mounted components must be made up of single frames 65"H, with or without 20"H frames above. If 45"H frames with 20"H frames above are used, you must install 65"H return frames at the end of the run for stability as described in the previous caption.

Alternatives to fin panel or end panel in this application:

- Open loop leg
- Closed loop leg
- Tower with tall storage-to-panel connector
 - Overhead bin or shelf cannot span over or be positioned over tower.
- 1.5H or 2H storage with medium storage-to-panel connector
 - 18" or 24"D cabinet in perpendicular application
 - 24"D cabinet in parallel application
 - Tower with medium storage-to-panel connector

Rules for Frame Stability For Frames Up to 86"H, continued

Rules for Frames with Components, continued

Runs with two frame-mounted components per frame cannot be extended for three frames unless components are counterbalanced.

Counterbalancing components allows runs with two frame-mounted components per frame to be extended to three frames. For maximum stability, return frame must be at least 65"H and 30"W (a single frame 65"H or a 45"H frame with 20"H frame above). Frame-supported components do not have to be counterbalanced.

End panel can provide support. For maximum stability, the frames that support the frame-mounted components must be made up of single frames 65"H, with or without 20"H frames above. If 45"H frames with 20"H frames above are used, you must install 65"H return frames at the end of the run for stability as described in the previous caption.

Each off-module frame will hold up to four storage shelves, but may not hold more than two off-module upper storage bins. Maximum bin width in off-module position is 48". Contact your Steelcase representative for your specific application requirements.

Rules for Frames with Doors

10"H stacking frames can be used to create 96"H panels over doors and adjacent panels. A maximum run of three 96"H panels may be used with the door, and up to five 96"H panels can be used perpendicular to either end of the door panel run.

Hanging components cannot be used on a 96"H panel run with a door.

Guidelines for Bench Configurations

Single Sided Bench

Double Sided Bench

End-of-run support options include:

- Post leg and cantilever
- Half loop leg
- Open loop leg
- Closed loop leg
- Worksurface end panel
- Pedestal with filler
- 1.5H or 2H (18" on 24"D) cabinet with medium panel-to-storage connector in perpendicular application.
Note: 1.5H cabinet requires intermediate support.
- 1.5H or 2H (24"D) cabinet with medium panel-to-storage connector in parallel application.
Note: 1.5H cabinet requires intermediate support.
- Tower with medium storage-to-panel connector.

Maximum worksurface depth is 24" with intermediate front support.

30"D worksurfaces require legs in the front of each worksurface on both ends of the worksurface.

Center support panels cannot be used as intermediate supports.

Slim shelves and slatwall skins (including monitor arm attachment) can be applied, but bins and universal shelves are not allowed.

Acoustic Guidelines

Montage is a flexible, stackable furniture system that can provide moderate levels of acoustical privacy if applied appropriately.

Open-plan installations provide visual privacy with moderate levels of acoustical privacy. Sound absorption is the goal of open installation plans. Higher-performing NRC ratings are desired.

Checklist

For optimum acoustical performance

For all installations:

- 1** Use steel or other hard tile surfaces at the frame base.
- 2** Use high-performance acoustical, slatwall, or markerboard functional tiles above worksurface.
- 3** Use steel or other hard tile surfaces at the top of frame.
▶ See page 271 for additional frame run elevations.

Powerkit System

Powerkit systems are a combination of modular power blocks, harnesses, and connectors that attach to a base or desk-height cavity for installation inside a Montage frame.

► Specifying, page 306

Powerkits are always field installed in the base of frames or in desk-height cavities.

Product Details

Powerkits are available in widths that correspond to frame widths. For frames over 24"W, the kit includes two modular power blocks, a harness connecting them, and a harness to reach the next powerkit in an adjacent frame.

Powerkits may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Pass-through powerkits are available for applications where you want to extend the power between frames but have no need for access in a specific frame. *Tip: Junctions must be specified to route power vertically.*

Pass-through powerkits may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Retrofit powerkits are available for use with frames manufactured prior to March 20, 2000. Retrofit powerkits can be used with pass-through powerkits, 15-amp receptacles, power infeeds, power harnesses for use with power and cable poles, and modular harnesses for base-to-desk-height power transfer. However, base covers and desk-height cavity covers must be ordered through Specials.

Retrofit powerkits may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

18"W

24"W

30"W

36"W

42"W

48"W

Width of base determines how many receptacle locations are available.

15-amp or 20-amp duplex receptacles

snap into powerkits on one side or both sides of the frame. Receptacles are available in eight versions to enable you to access different combinations of circuits. Install receptacles only where you want them. Add more receptacles in the future.

Controlled receptacle

must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

USB receptacles, available in three wiring schematics with multiple line options, snap into powerkits on one side or both sides of the frame. USB receptacles offer easy access to two charging ports. Each port provides 1 ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

▶ Page 62

Connections

Harnesses plug into connection points on the powerkit. Every powerkit has multiple connection points to allow branching of power.

Power harness may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

L-connection is formed by connecting a harness to a power block.

T-connection is formed by connecting two harnesses to a power block.

X-connection is formed by connecting two harnesses to two successive power blocks.

Knockouts and cutouts for receptacles in the frame base trim and desk-height trim are always 12" from the outside edges of the frame.

Cable grommets can be inserted in receptacle openings to route cables from the panel base into the panel. Black plastic only.

Internode is available to bring power and voice-data out to the worksurface.

Modular harnesses that are 48"W are available to route power from the frame base to desk height.

Power and cable pole can be added above any square junction, except the in-line junction, to bring power and cables down from the ceiling. Power harness, installed inside the power pole, connects to the powerkit in the base or desk-height cavity of the frame without occupying any receptacle locations.

Power infeed is available to bring power from monument in floor of building to a cluster of frames. It attaches to a powerkit installed in frame base and occupies one receptacle location.

Modular spine-to-fin off-modular jumper cable is available to bring power from the spine to an off-modular fin wall at the base only. Cable must be used with a powerkit base cover for use with off-module jumper cable.

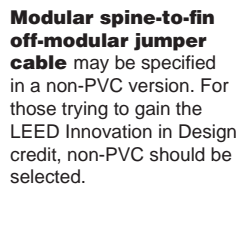

Desk-height cavity is required to install a powerkit in a frame at worksurface height. Frames are available with factory-installed desk-height cavities or you can order cavities separately and install them in the field.

Cable sleeves can be added in the field to finish the edges of feed-through openings in the panel frames. Sleeve must be oriented as shown. Sleeve will not install on frame when installing 135° V-junctions.

Power infeed sits proud of the panel approximately 3" and will interfere with Universal storage with the Universal 3" base, FrameOne footbase, or c:scape glide base.

Modular spine-to-fin off-modular jumper cable may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Off-modular power transfer cable is available to bring power internally from the spine to an off-modular fin panel at desk height only.

Wiring & Cabling

All Montage electrical components are listed by Underwriters Laboratory of the United States (UL), and Canada (ULC), and certified by the Canadian Standards Association (CSA).

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements. **▶ Page 60**

San Francisco code allows use of standard Montage base power infeeds.

Surface Materials

Powerkit systems are concealed when they are properly installed.

Powerkit Receptacles and Covers

Powerkit receptacles and base and desk-height cavity covers

can be used with powerkit system only.

► Specifying, pages 313–318

Power receptacle openings cannot accommodate voice/data receptacles unless there is no powerway installed.

Optional voice/data openings can be specified below desk height. 24"W and 30"W covers have one optional opening and 36"W, 42"W, and 48"W covers have two optional openings.

Voice/data receptacle openings cannot accommodate power receptacles.

Cable-management tray is optional and concealed below the level of the worksurface. This tray cannot be used with full-depth (24"D and 30"D) Universal pedestals.

Powerkit base cover attaches to the frame and accommodates receptacles.

Powerkit base cover for use with a modular spine-to-fin off-modular jumper cable has knockouts that need to be removed in the field to install jumper cable.

Actual Dimensions

Desk-height cavity cover

Width 18", 24", 30", 36", 42", or 48"

Height 7"

Base cover

Width 18", 24", 30", 36", 42", or 48"

Receptacle opening

Width of opening 2⁵/₈"

Height of opening 1³/₈"

Enhanced desk-height cavity cover provides openings for electrical outlets and voice/data receptacles.

Plain base cover can be combined with power base covers on opposite sides of a frame.

Desk-Height Cavity Covers

Base Covers

Product Details

Receptacles are ordered separately and installed in the field.

Covers are ordered separately and attached to frames in the field.

Circuit connections are predetermined by the type of receptacle.

Receptacles are available in several versions to enable you to access different schematics and combinations of circuits.

Label on each receptacle face indicates which circuit each outlet is connected to, so the user can control which devices are on specific circuits.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

Orange triangle indicates to users that the receptacles are connected to isolated grounds.

USB receptacles, available in three wiring schematics with multiple line options, snap into powerkits on one side or both sides of the frame. USB receptacles offer easy access to two charging ports. Each port provides 1 amperage of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Outlet filler plate is available, ordered separately, to fully close unused receptacle openings.

Desk-height cavity without powerkit can be used for cable routing, and receptacle openings can accommodate voice/data receptacles.

Voice/data receptacles are available to accommodate a wide range of modular connections. We recommend that testing be conducted using your specific voice/data receptacle as well as the furniture configuration you are considering. Receptacles are supplied by the installer.

Connections

Base covers attach to the frame with a concealed attachment and are removable.

Desk-height cavity covers snap onto desk-height utility cavity with a concealed attachment.

Power is not available in 18"W frames, pass-through only.

Wiring & Cabling

Any circuit can be accessed at any receptacle location by using the appropriate receptacle.

Powerkit Wiring and Cabling with Frames

Capability

- Multiple cable pathways within each tile providing unparalleled cable capacity
- Four circuits per base power-in
- 3+1, 2+2, and 3SN wiring schematic

Connectivity

- Desk-high access to power and communications cabling using desk-high cavity
- Flexible access to communications anywhere in frame using customized tiles
- Additional access to power at base

Protection

- SmartPower solutions for clean power
- Separate pathways for power and communications
- Protection for fiber optic cabling entering and within frame

Flexibility

- Removable tiles for easy access to cables
- Stackability accommodates change while minimizing wire and cable reconfiguration
- Variety of interfaces (ceiling, floor, end) to support building wiring and communications technology

Management

- Cable carriers within tiles for horizontal cable management
- Vertical cable routing between tiles
- Cable management recesses on all worksurfaces
- Energy-efficient electrical systems and lighting
- Base to desk-height power transfer cable routed through a junction

Multipurpose Power Infeeds

Multipurpose power infeed brings power from the ceiling, wall, column, or floor and connects to a powerkit in a Montage or Internode power module.
 ▶ See *Answer Specification Guide*

Utility pole is used to conceal multipurpose power infeeds and cables that drop from the ceiling.

Modular connector attaches to a powerkit, power module, or another harness with a harness-to-harness connector.

Modular connector receptacle is available to be connected to building power source.

Hardwire infeeds connect to the building power source.

Multipurpose power infeed can pass through a wall start bracket directly into the base or desk-height cavity of a Montage panel.

Product Details

Multipurpose power infeed is made from flexible conduit. One end allows either a modular or hardwire connection to the building power source. The opposite end has a modular connector that attaches to a powerkit, power module, or harness-to-harness connector.

Modular connector receptacle is included with modular multipurpose power infeed to hardwire to a junction box. It allows modular connector to snap into position. This allows furniture to be disconnected, moved, and reconnected later.

Flexible conduit is available in two lengths—12' or 24'.

Surface Materials

All of the components of the power infeeds are concealed when they are properly installed.

- Utility pole**
- Paint

Actual Dimensions

Multipurpose power 12' or 24' infeed length

Power Special Requirements for Chicago, New York City, San Francisco, and Los Angeles

Local electrical codes

vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components. Here are the special conditions for the cities of Chicago, New York City, San Francisco, and Los Angeles.

Chicago Junction Box

Chicago electrical code requires the power distribution network to be hardwired on site. These installations require Chicago junction boxes. There is no hardwired version of Internode.

Any hardwired installation can use the components of the Chicago junction box.

Chicago code does not permit the following components: power spheres, or round power and communication ports.

Order Chicago junction boxes separately.

Chicago junction box can be installed in frame base cavity and desk height cavity, and can accommodate two receptacles back to back. Electrician can use Levitron 5325 or equivalent receptacles.

Electrician must make all hardwire connections in the field. Electrician must supply all conduits, wires, nuts, and connection to building power supply.

Order Chicago version of shelf lights. These lights have a built-in circuit breaker.

Wood and laminate tiles will not fit over a Chicago junction box installed at desk height or base cavity.

Receptacle openings are knocked out in the field.

Conduits are supplied by the electrician.

Receptacles are supplied by the electrician.

New York City electrical code requires modular power components to be field installed by the electrician. Because Montage power components are always field installed, they are acceptable for use in New York City.

San Francisco applications use standard powerkit components.

Los Angeles applications must comply with Los Angeles code. Check local code authority to use powerkit systems. L.A. applications use standard powerkit components.

Order New York City power infeed to allow hardwire connection to the powerkit.

Tip: Remember that the frame with the New York City power infeed installed cannot accommodate any receptacles in the base because a powerkit cannot be installed. Install a powerkit higher in the frames to accommodate receptacles or use adjacent frames to install receptacles.

Tip: Power infeed sits proud of the panel approximately 3" and will interfere with Universal storage with the Universal 3" base, FrameOne footbase, or c:scape glide base.

New York City

Internode modular components are acceptable for use in New York City with the exception of Inter-node modular connector receptacles, convenience tri-receptacles with modular harness, convenience tri-receptacles with power cord and plug, and floor power infeeds. Use a multipurpose power infeed instead.

New York City code also requires the electrician to complete the hardwired connection to the building's power supply.

San Francisco

San Francisco code does not permit the following components: power spheres, convenience tri-receptacles with modular harness, convenience tri-receptacles with power cord and plug, and round power and communication ports.

Los Angeles

All modular power components are acceptable for use in Los Angeles except for convenience tri-receptacles with power cord and plug, and round power and communication ports.

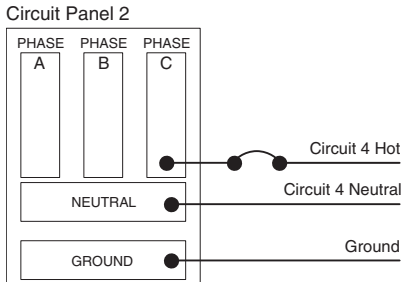

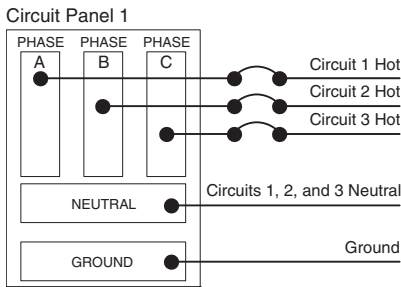

Powerkit Wiring Schematics

Details for the Electrician

Montage powerkits offer three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.
Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

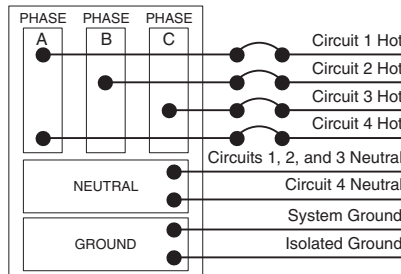

- Black = Four-circuit, 3+1
- Brown = Four-circuit, 2+2
- Rust = Three-circuit, separate neutrals (3SN)
- Shared neutrals = 10 gauge
- Non-shared neutrals = 12 gauge
- Hot wires = 12 gauge
- Ground wires = 12 gauge

Four-Circuit, 3+1

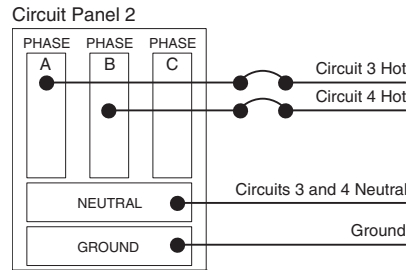

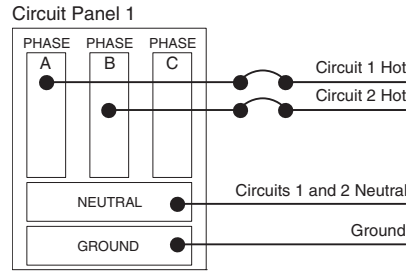

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase Circuit Panel

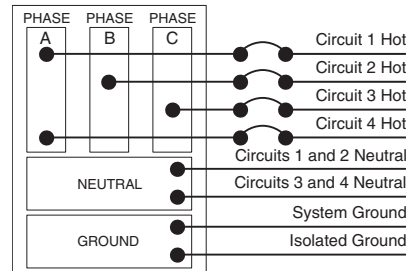

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

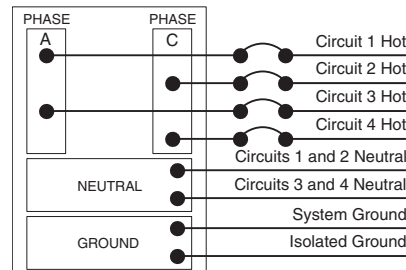

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and supported by their own shared neutral and ground.

Single 3-Phase Circuit Panel

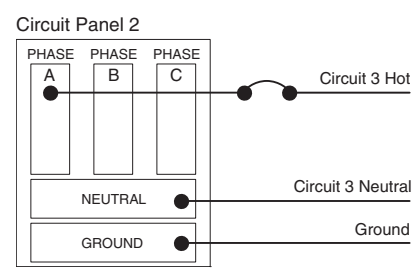

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase Circuit Panel

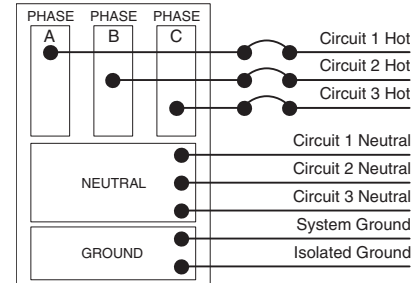

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate Neutrals

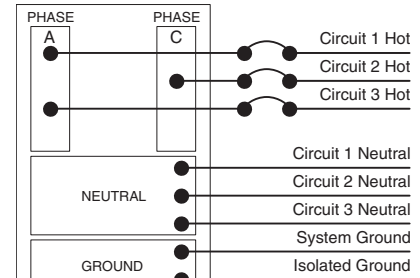

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

Single 3-Phase Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance: The National Electrical Code (NEC) allows a maximum of 15 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance: Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.
▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

Device	Wattage	Amperage	Voltage	Number of Devices Supported on Single 20 Amp Circuit*
Laptop	60	0.6	110	20
CPU/Desktop Computer	120	1.1	110	15
Monitor	60	0.5	110	20
Phone	5	0.0	110	352
High Power Tablet (e.g. Surface Pro)	40	0.4	110	44
Low Power Tablet (e.g. iPad Air)	15	0.1	110	117
Desktop Printer	40	0.4	110	44
42" LCD Screen	210	1.9	110	8
DVD Player	25	0.2	110	70
Projector	175	1.6	110	10
Desktop Lamp	19	0.2	110	93
Large Printer/Copier (high)	1900	17.3	110	1
Large Printer/Copier (low)	850	7.7	110	2
Paper Shredder	360	3.3	110	5
Desktop Fan	20	0.2	110	88
Standing Fan	180	1.6	110	10
Coffee Maker (high)	1200	10.0	110	1
Coffee Maker (low)	600	5.5	110	3
Microwave (high)	400	3.6	110	1
Microwave (low)	150	1.4	110	3
Refrigerator (high)	1500	13.6	110	1
Refrigerator (low)	200	1.8	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Cable Capacities

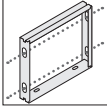

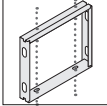

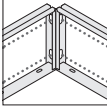

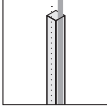

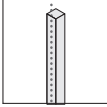

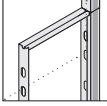

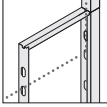

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable as well as the furniture configuration you are considering. Cable capacities in this table are based on non-plenum-rated cables installed by a cable contractor under ideal conditions. Figures are approximations. Actual capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Base Fiber-In	8	5	7	6	7	7	6	6	5	5	6	5	6	7

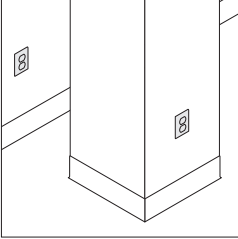

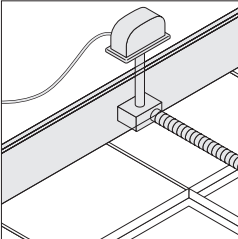

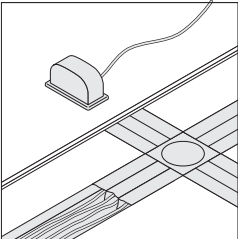

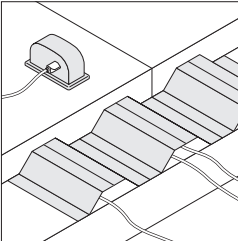

Base fiber-in into panel base

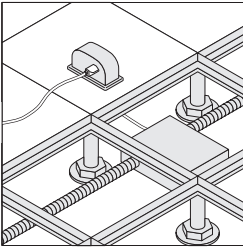

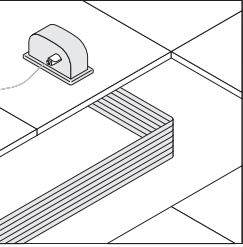

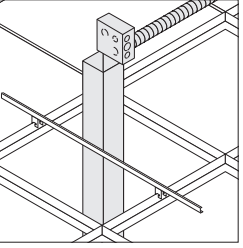

Tip: Desk-height powerkit will occupy one cable opening, thus reducing cable routing capacity.

Tip: High-performance acoustical tiles, when used in back-to-back applications, minimize cable capacity available.

Understanding Building Wiring

System	Characteristics	Advantages	Disadvantages	Comments
Fixed Wall and Column 	<ul style="list-style-type: none"> • Common to most buildings. • Power and telecommunication run through permanent walls to wall receptacles. 	<ul style="list-style-type: none"> • Low cost for initial installation. • Provides power in corridors and small rooms. 	<ul style="list-style-type: none"> • Must be used with other systems to reach areas away from walls. • Moving wall receptacles is difficult and expensive. 	<ul style="list-style-type: none"> • Workstations layout depends on location of wall receptacles and must be carefully planned. • Usually used with other systems such as poke through or flat wiring.
Poke Through 	<ul style="list-style-type: none"> • Wiring concealed in ceiling space of floor below and fed through holes in floor. • Electrical receptacles and telecommunications outlets located in floor-attached monuments. 	<ul style="list-style-type: none"> • More flexible than underfloor duct because wires can be pulled up at any location. 	<ul style="list-style-type: none"> • High relocation costs. • Moving junction boxes requires putting a hole through the floor—a process called coring. • Moving junction boxes can disrupt work on two floors. • Monuments can cause people to trip. 	<ul style="list-style-type: none"> • Not accepted by some local fire codes. • May weaken floor slab. • Flexibility dependent on building structure. • Pedestals can conceal monuments.
Underfloor Duct 	<ul style="list-style-type: none"> • Ducts or continuous channels encased in floor slab. 	<ul style="list-style-type: none"> • Low life-cycle costs. • Easy access for relocation. • Relocation causes little disruption. 	<ul style="list-style-type: none"> • Flexibility limited to specific access points. 	<ul style="list-style-type: none"> • Increasing wire and cable requirements may exceed capabilities of existing system.
Cellular Floor 	<ul style="list-style-type: none"> • Underfloor system with large-capacity, divided distribution cells for electrical and telecommunication wiring. • Wiring runs perpendicular to the trench header, a special duct that cuts across all the cells and provides access. 	<ul style="list-style-type: none"> • Inconspicuous. • Electrical and telecommunication systems run together to the workstation. • Protects voice and data systems from interference and damage. 	<ul style="list-style-type: none"> • System can add to required length of wire or cable because of trench header-cell configuration. 	<ul style="list-style-type: none"> • Carpet tiles ease access to trench.

System	Characteristics	Advantages	Disadvantages	Comments
<p>Access Flooring</p> 	<ul style="list-style-type: none"> • Developed for mainframe computer rooms. • Modular floor panels raised above the slab on 6" to 36" high supports, and conduit and cables run beneath these floor panels. • Access through monument fixtures. 	<ul style="list-style-type: none"> • Ease of access and rearrangement of wiring systems. 	<ul style="list-style-type: none"> • May be noisy when walked on. • Requires stairs and ramps on building floor when added to existing facility. 	<ul style="list-style-type: none"> • Smoke alarms and fire protection sprinklers may be required. • Use only carpet tiles or area rugs.
<p>Flat Wiring</p> 	<ul style="list-style-type: none"> • Access from wall or column. Power and signal cables run to workstation via flat wire and cable sandwiched between slab and carpet. • Outlets in transition boxes on top of carpet. 	<ul style="list-style-type: none"> • Easy relocation. • Flexible. • Meets most capacity requirements. • Elements sold as one package. 	<ul style="list-style-type: none"> • Heavy wheel traffic can cause signal interruption in data transmission wiring. 	<ul style="list-style-type: none"> • Should not be used in areas susceptible to extreme dampness or water spillage. • Slab-on-grade installations, where concrete is poured directly on the ground, require careful preparation per manufacturer's instructions to ensure that moisture doesn't damage the system.
<p>In-Ceiling Wiring</p> 	<ul style="list-style-type: none"> • Conduit and cables run in space above suspended ceiling and are distributed to frames by power and cable poles. 	<ul style="list-style-type: none"> • Low initial cost. • Very easy to move. • Little disruption during move. • Space usually accommodates large capacities. 	<ul style="list-style-type: none"> • Power and cable poles used to route cables can detract from open-plan aesthetics. 	<ul style="list-style-type: none"> • Cost for installation increases when ceiling space is used as return air plenum to meet fire-protection codes. • Ceiling-suspended cable trays should be considered for communications wiring.

Enhanced Monolithic Tiles

Enhanced monolithic tiles cover the entire surface of the enhanced monolithic frames to provide a different aesthetic from segmented tiles.
 ▶ Specifying, pages 320–324

Tackable acoustical tiles provide a tackable, fabric-covered surface and absorb sound.

High-performance acoustical tiles provide a tackable, fabric-covered surface and offer enhanced sound absorption.

Wood tiles are non-tackable. Grain of wood veneer runs vertically.

Product Details

Enhanced monolithic tiles can be used on enhanced monolithic frames only.

Enhanced Monolithic Tile

Enhanced Monolithic Tile

Enhanced Monolithic Tile

Segmented Tiles

Enhanced monolithic frames can accept an enhanced monolithic tile on both sides or an enhanced monolithic tile on side one and any segmented tiles with or without desk-height cavity cover on side two.

Tip: Monolithic wood tiles cannot be installed over a desk cavity with Chicago hardwire junction boxes installed.

Actual Dimensions

Width	17 ³ / ₈ ", 23 ³ / ₈ ", 29 ³ / ₈ ", 35 ³ / ₈ ", 41 ³ / ₈ ", or 47 ³ / ₈ "
Height	33 ³ / ₈ ", 40 ⁷ / ₈ ", 51 ³ / ₁₆ ", 61 ⁹ / ₁₆ ", or 82 ³ / ₁₆ "

Enhanced Monolithic Full To The Floor Wood Tile

Full to the floor enhanced monolithic wood tiles extend all the way to the bottom of the frame.

Tip: Base covers cannot install on side of frame with full to the floor tiles.

Horizontal trim must be ordered separately for use on full to the floor enhanced monolithic wood tiles. This trim provides a painted reveal at the bottom of the tile and is required to provide additional attachment of the tile to the frame. Trim is available in paint finishes to match the frames.

Standard Width Wood Tile

Full Width Wood Tile

Full width option on enhanced monolithic wood tiles minimizes the gap between the edge of the tile and the edge of the frame. Full width tiles cover the majority of the slot in the frame vertically, thus hang on components are not allowed. Vertical slot covers should still be considered on light colored frames to ensure slot is not visible.

Horizontal filler strip must be added to the enhanced monolithic frame in each location where tile segmentation occurs. The filler strip is field installed and placed between two tiles on a frame. The filler strip provides the same aesthetic as an enhanced standard frame with segmentation.

▶ Page 17

Standard fabric direction on Montage tiles 60"H or less is warp horizontal; warp vertical direction is available as an option. Fabric direction on tiles 81"H is warp vertical only. ▶ See *Specification Guidelines for Directional Fabric Applications*, page 550.

Enhanced Tiles

Tiles finish the surface of structures built of frames.
 ▶ Specifying, pages 326–336

Tackable acoustical tiles provide a tackable, fabric-covered surface.

High-performance acoustical tiles offer enhanced sound absorption and are tackable.

Laminate tiles are decorative and non-tackable.

Slatwall tiles have horizontal channels that accommodate organizers and accessories.

Slatwall worktools can be installed and rearranged at any time by user.

Non-tackable tile with cutout accommodates a base fiber-in.

Non-tackable data entry tile manages cables into the Montage panel system.

Non-tackable data termination tile has only one data opening for either Nema or Decora. This data opening is located in one of six possible locations.

Actual Dimensions

Tile

Width	17 ³ / ₈ " , 23 ⁷ / ₈ " , 29 ³ / ₈ " , 35 ³ / ₈ " , 41 ³ / ₈ " , or 47 ³ / ₈ "
Height	9 ⁷ / ₈ " , 12 ⁵ / ₈ " , or 20 ³ / ₁₆ "

Conduit

Outside diameter	1"
Inside diameter	3/4"
Length	6'

Non-tackable tiles can be painted, patterned, or fabric covered.

Wood tiles are non-tackable. Grain of wood veneer runs vertically.

Markerboard tiles can be used with dry-erase markers and magnets will adhere to the surface.

Glass tile package trims the exposed interior surfaces of a 10"H or 20"H frame and includes two sheets of tempered glass.

Frameless glass stacker is 1/2" integral glass that extends from top of Montage frame.
 Tip: Glass tiles manufactured before 6/1/2010 are visually different than tiles produced after that date.

Tip: Enhanced tiles can be used on any enhanced frame, including monolithic frames, and any standard frames manufactured after July 2001.

Exception: Enhanced slatwall tiles can be used on any standard frame regardless of manufacture dates.
 Refer to compatibility tips.
 ▶ Page 274

Tip: The cutout and box cover on 23⁷/₈"W tiles is 4" to the right of center. The cutout and box cover on 29³/₈"W tiles is 7" to the right of center.

Product Details

13"H tiles allow space below to install a desk-height cavity cover and tray. 20"H tiles fill the entire frame.

High-performance acoustical tiles, when used in back-to-back applications, minimize cable capacity available.

Standard fabric direction on Montage tiles 60"H or less is warp horizontal; warp vertical direction is available as an option. Fabric direction on tiles 81"H is warp vertical only.

▶ See *Specification Guidelines for Directional Fabric Applications*, page 550.

Worktools are available in different forms for use on slatwall tiles.

▶ For additional information refer to *Steelcase Worktools Specification Guide*.

Frameless glass stacker is centered along the top of the Montage frame. Glass and top cap are assembled during installation. No special tools required. Refer to compatibility tips.
▶ Page 274

Between adjacent glass, there is a 1/2" gap. Height aligns with a 10"H stacker frame. In-line change-of-height end trims must be painted version when used beside frameless glass.

Tip: Frameless glass stacker cannot be installed between two taller frames.

Patterned tiles are available in one pattern density. Numbers are used to designate the number of holes in each 2"W x 1 3/8"H area. Tiles are painted steel.

Cross-section through indented tile

Cross-section through dome tile

Indented and dome tiles are available in one pattern. Indents are 0.125" diameter. Indented tiles are 10"H, 13"H, or 20"H and are painted steel.

Tip: Off-module connection cannot be done over dome tiles.

Tip: Power and cable cannot be routed behind perforated tiles.

Glass tiles are available in a clear or frosted finish. The use of glass on the spine wall is limited to one row in an off-modular connection.

Pocket door frames will only accept glass tiles for pocket doors.

Note: Glass tiles manufactured before 6/1/2010 are visually different than tiles produced after that date.

Connections

Slatwall worktools slide into channels in the slatwall tile. Monitor arms cannot be mounted on a Montage slatwall tile.

Overhead storage components cannot be attached to frames with glass tiles.

Glass tiles cannot be used with worksurfaces because glass prevents the use of cantilevers and worksurface supports.

Storage-to-panel connectors cannot be attached to Montage frames with glass tiles.

Fabric-covered tiles that have fabric over 0.035" thick should not be used where off-module connections are made. Fabric-covered tiles 0.035" thick or more will prevent the off-module brackets from attaching to tiles.

20"H slatwall, perforated, and HPTA tiles cannot be installed to cover up a desk-height cavity. In applications where you want to have desk-height power on only one side of the frame, use 20"H tackable acoustical or 20"H non-tackable tile on opposite side.

Wood and laminate tiles cannot be installed to cover up Chicago hardware junction boxes installed at desk height or base cavity.

6"H slatwall and non-tackable tiles are available to install above a desk-height cavity installed in a 38"H base frame.

Wiring & Cabling

Data entry tiles manage cables into the panel system. Cables enter through the opening and the box cover slides down over the top. Data cables enter the frame above the base cavity.

Data termination tile openings depend upon the placement of the tile. If the tile is used above worksurface, only the three lower cutouts are possible options for the one data opening. If the tile is used below worksurface, only the three upper cutouts are possible options for the one data opening.

Base fiber-in allows fiber-optic cables to enter the base on frames at an angle so that the fiber-optic cable isn't forced to form a tight radius which could damage the cable. This cable-in also accommodates conventional cables.

Wedge-shaped connector can be oriented in either direction.

Base fiber-in is positioned above base cavity of frame and doesn't obstruct any receptacle locations.

Inside diameter of conduit is $\frac{3}{4}$ ". In situations where capacity is critical, you should conduct a test using the specific cable types your installation requires.

Worksurface Positioning

Universal Worksurfaces

Universal Worksurfaces is a comprehensive solution of worksurfaces, supports, and privacy screens designed to deliver flexibility, mobility, and options to create inspiring spaces that support the different ways people work. A beautiful, light-scale aesthetic which gives designers new solutions across a broad spectrum of applications including the following: traditional panel-mounted systems, freestanding light-scale desking, panel wrapped desking, private office, conference, and teaming. Consists of Universal Systems Worksurfaces and Universal Tables.

Universal Systems Worksurfaces

Main worksurface solution for the three primary space division products: Answer, Montage, and Kick. Worksurfaces can be panel-mounted or freestanding.

- Extensive shape and size offering allows designers to meet a variety of planning applications.
- Worksurfaces feature a choice of curvilinear or straight-front shapes.
- User front edge available in 3 mm edge.
- Standard with 1/2" cord drop in the back of the worksurface providing the most efficient routing of cords and an uncluttered desktop.
- Standard scallops allow large cord heads to easily pass below the desktop. Scallops can be eliminated for freestanding applications.
- Available with full offering of Steelcase High-Pressure laminates or veneers; specifiable 3 mm edge colors.
- Worksurfaces can be supported with cantilevers, center support panels, end panels, pedestals, or freestanding legs.

Answer Freestanding Desks

Main desk solution for use with the four primary space division products: Answer, Montage, and Kick. Desks are built up from Universal components ordered separately and assembled onsite.

- Flexible product offering allows a wide range of desk applications for private offices, reception areas, and open plan settings.
- Non-handed desk components are easy to assemble and easy to reconfigure.
- Compatible with a wide range of worksurface products, including Universal Systems Worksurfaces, Answer worksurfaces, and many others.
- Wide range of storage available, including Universal pedestals, lateral files, and hutches.
- Full-height and half-height modesty panels available for desks and peninsulas.
- Visually compatible with Universal tables, towers, and other products.

Universal Tables

Freestanding solution appropriate for primary worksurface or teaming and conferencing environments. Mobile tables appropriate in panel-wrapped environments for increased flexibility and ease of reconfiguration.

- High-Pressure laminate tables are available with a 3 mm edge. Wood veneer tables are available with a square (3 mm) edge.
- User edge on all sides of the table and rounded corners allows user to work on any side leveraging its mobile capability.
- Tables feature a choice of curvilinear or straight-front shapes.
- Available with full offering of Steelcase High-Pressure laminates or veneers; specifiable 3 mm edge colors.
- Post legs, C-leg, and adjustable-height leg give designers options for visual aesthetic and functionality.
- Offering includes desk-mounted screens, which allow for above- or below-worksurface privacy.

Elective Elements Worksurfaces

(See *Elective Elements Specification Guide*.)

Main worksurface solution for three primary space division products: Answer and Montage. Worksurfaces can be panel-mounted or built up into casegood solutions appropriate for private office solutions when combined with storage, end panels, and modesty panels.

- Extensive shape and size offering allows designers to meet a variety of planning applications.
- Worksurfaces feature a choice of curvilinear or straight-front shapes.
- Desk, bridge, return, peninsula, and desk return worksurfaces are also available for freestanding casegood applications in addition to the typical systems worksurface shapes.
- User-front edge is available in a choice of 3 mm plastic edges, wood edge profiles on laminate worksurfaces (square 5 mm, bullnose), or wood edge profiles on wood worksurfaces (3 mm square, bullnose, waterfall, or knife).
- Worksurfaces are depths 24" or 30".
- Scallops are optional, as well as round or square grommets, depending on power and cable management needs. Grommets are available, depending on the worksurface shape, typically in left, center, and right locations.
- Grommets must be used for worksurface cable or cord management to route cords below the desk top.
- Scallops used for task light cord management only.
- Available with full offering of Steelcase laminates or veneers. Also available with custom stain or open line laminates.
- Worksurfaces can be supported with Elective Elements supports (center support panels, end panels, under-worksurface storage, or freestanding legs) as well as Montage cantilevers and side support brackets.
- Height adjustability is achievable by using the height-adjustable storage and/or legs. Range of maintenance adjustability is 29"H–32"H in 1/2" increments.

Panel-Mounted Worksurface Supports Integration Matrix

This matrix shows recommended panel-mounted supports for specific panel and worksurface combinations.

Universal Worksurface Thought Starters

Universal Worksurface Products provide a variety of traditional and non-traditional methods of applying worksurfaces and supports. Worksurfaces can be supported in on-module and off-module panel-supported applications, freestanding configurations, and many combinations of these applications. The thought starters included on the following pages can help leverage the benefits of the worksurfaces in new and unique ways.

Universal Worksurface Products provide significant planning flexibility:

- Systems worksurfaces and tables can be used together, and a wide range of worksurface shapes and sizes allow various footprints to be achieved.
- Systems Worksurfaces can be used with Answer and Kick panels, Montage frames, and V.I.A. walls. They can be panel-supported or freestanding.
Tip: Corner 120° Systems Worksurfaces may not be panel-supported with Montage panels due to the unique design of the Montage 120° junction.
- Freestanding, mobile worksurfaces allow user control of the workspace to provide either privacy or team collaboration.
- 26"H and 28½"H legs may be installed 3", 6", or 9" from the edge of most tables to accommodate nesting and slip-fit capability.
- Adjustable-height legs are available on Systems worksurfaces and tables. legs adjust 25½"H to 31½"H in ¾" increments.

Tables with legs installed 6" or 9" from the edge allow the worksurface to slip-fit over the panel-mounted Systems Worksurface. This configuration also allows the user to face the aisle while working at the computer.

U-Configuration with large Footprint

Recommended Worksurfaces

One 24"D x 72"W straight table	BFS2472
One 24"D x 60"W straight worksurface	US2460
One 24"D x 42"W x 42"W x 24"D corner, curved-front worksurface	UCC224242
One 24"D x 30"W visitor, curved-front worksurface	UVC2430R

▶ See *Specifying* pages for pricing.

18"D Systems Worksurfaces allow for a spacious U-configuration with a compressed footprint.

U-Configuration with Medium Footprint

Recommended Worksurfaces

Two 18"D x 30"W straight worksurfaces (3 mm edge)	US1830
Two 18"D x 42"W x 42"W x 24"D corner, curved-front worksurfaces (3 mm edge)	UCC124242

▶ See *Specifying* pages for pricing.

Tables with nesting-height legs allow worksurfaces to nest under panel-mounted Systems Worksurfaces. This configuration uses an 18"D Systems Worksurface and allows a small workstation to expand and decrease, giving users control over their space.

I-Configuration with Small Footprint

Recommended Worksurfaces

One 24"D x 48"W capsule table	BFK2448
One 18"D x 60"W straight worksurface	US1860

▶ See *Specifying* pages for pricing.

Spacious U-configurations with a minimum number of panels and worksurfaces can be created with 60"W x 60"W corner, curved-front and linking peninsula Systems Worksurfaces.

Penta Cube

Recommended Worksurfaces

Six 24"D x 60"W x 60"W x 24"D corner, curved-front worksurfaces (3 mm edge)

UCC226060

Five linking peninsula, straight-front worksurfaces (3 mm edge)

UPAC2748

One straight worksurface

US2460

Tip: Size of linking peninsula worksurface to be used is determined by the panel system which it will be used with. Answer panels are shown at left.

▶ See *Specifying* pages for pricing.

Worksurface Support Guidelines

Worksurface spans greater than 54" require a brace or additional support to the floor. Spans greater than 72" wide cannot be supported only by a reinforcing channel, and require additional supports to the floor. Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface.

Exception: When using pedestals or lateral files to support a worksurface, measure from the inside edge of the storage unit.

Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. A light load application is less than 40 pounds placed on a worksurface. Reinforcing channel must be specified separately.

▶ Page 406

Exception: Knife edge worksurfaces require support on spans greater than 48"W.

Reinforcing channel is not required on worksurfaces with spans less than 54"W.

Lightly loaded applications typically include a workstation with monitors, lighting, limited organizational tools, and personal items.

Reinforcing channel or additional support is required for worksurfaces with spans greater than 54"W and less than 72"W in light use applications and on worksurfaces with spans greater than 54"W and less than 60"W in heavy load applications.

Worksurface span cannot be supported solely by a reinforcing channel. Additional to the floor supports are required.

Tip: Reinforcing channels add 1"D below the worksurface.

Tip: For maximum effectiveness, place the reinforcing channel in the middle of the worksurface span.

Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface. To determine size of reinforcing channel needed, deduct the amount listed in the matrix below from the measured span. Deduction in inches is based on combination of the left-hand and right-hand supports.

Example: 72"W measured span, with application of cantilever for left-hand support and end panel for right-hand support, has a span deduction of 6" for a reinforcing channel size of 66" ($72"-6" = 66"$). For this application, use reinforcing channel TS7WKSPT66.

Worksurface Span Deductions for Determining Reinforcing Channel Size		Right-Hand Support						
		End Panel	FrameOne Leg	FrameOne Leg-Table Application	Intermediate Support	DBL Post Leg	Cantilever	All other Legs/Supports
Left-Hand Support	End Panel	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg-Table Application	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	Intermediate Support	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	DBL Post Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	Cantilever	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	All other Legs/Supports	-6"	-6"	-9"	-9"	-6"	-6"	-6"

Reinforcing Channel Sizes		
Style Number	Nominal	Actual
TS7WKSPT39	39"W	39.231"W
TS7WKSPT48	48"W	47.547"W
TS7WKSPT51	51"W	50.547"W
TS7WKSPT54	54"W	53.547"W
TS7WKSPT	57"W	56.547"W
TS7WKSPT60	60"W	59.547"W
TS7WKSPT63	63"W	62.547"W
TS7WKSPT66	66"W	65.547"W
TS7WKSPT72	72"W	71.547"W

Note: If the deducted span distance falls between two reinforcing channel sizes, select the smaller of the two sizes.

Support Requirements for Peninsula Worksurfaces

Peninsula worksurfaces smaller than 60"W do not require a reinforcing channel. Location of leg or column support, determined by pilot holes, meets the requirements for worksurface support every 54". Sizes 60"W or greater require a reinforcing channel. Determining brace size for peninsula worksurfaces: If worksurface is supported by a single column or legs, subtract 21" from span of worksurface to determine reinforcing channel size. Example: 72"W measured span has a span deduction of 21" for a reinforcing channel size of 51" ($72"-21" = 51"$). For this application, use reinforcing channel **TS7WKSPT51**.

Transaction Worksurfaces

Universal Systems Worksurfaces

Systems worksurfaces— with 1/2" Cord Drop feature built-in cable management flexibility, allowing cords to drop below the worksurface at any point along the back edge.
▶ Specifying page 342

Systems worksurfaces— Full Depth feature a tighter fit to panels for a cleaner aesthetic.

Systems straight worksurfaces with 1/2" cord drop and full depth are available in a variety of widths and depths in modular and parametric dimensions.

Full-depth worksurfaces fit flush against panels. Cords and cables are routed through cable scallops.

Front (user's) edge is available in three edge profiles on laminate worksurfaces. Wood veneer worksurfaces have a square (3 mm) edge profile only. Back and side edges are flat.

Cable scallops allow cords and plugs to pass behind the worksurface. Cable scallops can be omitted as an option.

Worksurface has a wood core with a High-Pressure Laminate or wood veneer surface and is 13/16" thick.

Product Details

High-Pressure Laminate Worksurfaces

Front (user's) edge profile is available in two shapes.

3 mm edge profile Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

▶ See surface material listing in this book for specific PVC-free availability.

Knife edge with 3 mm user edge is available on straight and tapered systems worksurfaces and on round tables.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Linking

Edge profile is applied to front (user's) edge only.

*Tip: Straight worksurface width is available parametric from 18"W–120"W in 1/16" increments.

*Tip: Straight worksurface depth can be specified parametric from 18"D–36"D in 1/16" increments.

3 mm edge profile provides a flush interface with universal pedestals.

Straight worksurfaces

are available to specify parametrically. The parametric dimensions available are from 18" to 36" deep and from 18" to 120" wide in 1/16" increments both depth and width.

Parametric straight worksurfaces

are available in laminate with a 3 mm plastic edge, knife edge, or soft edge options and wood veneer with square edge or soft edge options.

Parametric straight worksurfaces

have the option to specify a scallop, grommet cutouts, power and data access door and tray cutout, or power access door.

Dual-worksurfaces are two pieces - a large monitor surface with a smaller keyboard surface attached. A dual-arm spring mechanism provides superior stability when compared to the single-arm spring mechanism used in worksurfaces with an adjustable keyboard shelf.

Keyboard surface on dual worksurface can be adjusted to positions up to 6" higher or 5" lower than the monitor worksurface.

Keyboard surface tilts with a range of 25°.

A 1" gap separates the sides of the keyboard surface and adjacent worksurfaces. There is also a 1 1/2" space between the keyboard and monitor surfaces.

Dual worksurfaces cannot be used as a single worksurface. Dual worksurfaces must be tethered to a panel or connected to an adjacent worksurface in a freestanding application.

30"D straight, tapered, and transition cantilevered worksurfaces

require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Taper-flat worksurfaces can be supported at the larger end with a side support bracket and a post leg. If the larger end is 30"D, a 24"D end panel can also be used.

Spanner worksurfaces with 3" notch accommodate Montage panels. Legs and cantilevers or column and cantilevers must be used for support.

Notch is not included on spanner worksurfaces for freestanding applications without panels.

3 mm edge bullet peninsula, jetty, and bubble jetty worksurfaces

can be supported two ways:

- With a cantilever, a center support panel and a column
- With a cantilever, a side support bracket, and two post legs

In certain applications, a center support panel should not be used because the unfinished top edge of the support panel would be exposed. Use a cantilever, a side support bracket, and two post legs instead.

These applications include:

- Angled peninsula with 3 mm edge and 1/2" cord drop

Linking peninsula worksurfaces and linking worksurfaces

with 3" notch accommodates Montage panels. Legs and cantilevers or column and cantilevers must be used to support linking peninsula worksurfaces. One leg and two cantilevers must be used to support linking worksurfaces.

3 mm edge visor worksurfaces must be supported by either a cantilever and a center support panel, or by a cantilever, a side support bracket, and a leg.

Connections

Worksurfaces can be used freestanding or in panel-supported installations.

Supports are ordered separately and installed in the field.

For Montage frame-supported applications you can use:

- Closed loop
- Open loop
- Half loop
- Intermediate support
- Off-module worksurface-to-panel connector
- End panel
- Off-module end panel
- Cantilever
- Adjustable-height cantilever
- Side support brackets
- Off-module worksurface bracket
- Off-module tie plate
- Adjustable column or legs
- ▶ See page 122 for *Panel-Mounted Universal Systems Worksurface Supports for Montage Frames*.
- Universal pedestal with filler
- ▶ Page 460
- Use two legs for panel-mounted spanner, bullet peninsula, linking peninsula, jetty, and bubble jetty worksurfaces
- Use one leg for visitor and linking worksurfaces

For leg-based applications you can use:

- Closed loop
- Open loop
- Intermediate support
- Post legs
- Double post leg
- Double post C-leg
- Support plate
- ▶ See page 130 for *Legs and Columns for Universal Systems Worksurfaces*.
- Tip: Pedestal can also be used in leg-based freestanding installations.*

Intermediate supports replace the need for other types of worksurface support when used with 1-High or 1.5-High Universal storage.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception: Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a TS7WKSPT reinforcing channel is used. Reinforcing channel must be specified separately.

▶ See page 90, *Worksurface Support Guidelines*

Knife edge worksurfaces require reinforcement channels for spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Heavy load worksurfaces spanning greater than 60", or all worksurface spans wider than 72" require additional support of a cantilever, pedestal, intermediate support, or leg.

Wiring & Cabling

Worksurface depth is 1/2" less than nominal and allows cords and cables to pass over at any point. Cable scallops provide space for plugs to pass over the back edge of the worksurface.

Cable scallop allows cord plugs to easily pass below the worksurface. Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications. Wire managers are included with wood veneer worksurfaces. Wire managers for use with laminate worksurface must be ordered separately.

Corner worksurfaces have scallops located 12 1/2" from the rear corner of the worksurface to the center of the scallop. Taper-flat worksurfaces have a single scallop located 18 1/2" from the larger end. Scallops are centered on the rear edge of all other worksurfaces that include them.

Cable scallop can be omitted for freestanding applications or panel-supported applications where plugs do not need to pass over the back edge of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.

▶ See *Worksurface Power and Communication*, page 181.

Parametric straight worksurfaces have two grommet cutout options. The 2" round grommet cutout option fits the **AWAG2** grommet which is specified separately.

▶ See page 451

The 3" round grommet cutout option fits the TSAEGROM grommet which is specified separately.

▶ See page 454

The grommet cutout option is not available on a worksurface when the power access door option is selected.

Grommet cutouts in parametric straight worksurfaces can be specified in the center, the left, or the right sides of the worksurface. Grommet cutouts are available in the below configurations.

Grommet Location on Worksurface	Minimum Worksurface Widths
Center, Right, or Left	All widths
Right and Left	At least 25"W
Right and Center	At least 34"W
Left and Center	At least 34"W
Center, Right, and Left	At least 34"W

FrameOne post legs will interfere with the left or right grommet cutouts on parametric Universal straight worksurfaces.

Grommet cutouts in parametric straight worksurfaces are located $3\frac{5}{16}$ " from the back edge of the work surface to the back edge of the grommet cutout. Left and right grommet cutouts are located $6\frac{1}{2}$ " from the edge of the work surface to the outside edge of the grommet cutout.

Surface Materials

High-Pressure Laminate Worksurfaces

- Laminate
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option) A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

Front (user's) edge(s)

- Plastic

Back and side edges

- Plastic color default to match user's edge

Wood Veneer Worksurfaces

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match work surface

Front (user's) edge(s)

- Wood edge band

Application Topics

Full-depth worksurfaces provide an uninterrupted working surface and are designed to allow traditional corner or L-configuration planning without creating uneven gaps.

Plan using worksurfaces actual dimensions when panel-wrapping worksurfaces because work surface depths and widths vary by type. Straight and transition worksurfaces are full-width to correspond directly with panel width. Corner, extended corner, 120° corner, bullet peninsula, jetty, visitor, and linking worksurfaces are $\frac{1}{2}$ " less than panel width to allow for a consistent $\frac{1}{2}$ " cable-management gap when used in combination with straight worksurfaces.

Tip: To avoid uneven gaps in panel-supported applications, use full-depth worksurfaces to create L-configurations.

Screens mount to worksurfaces in privacy position or below the work surface for modesty.

▶ See *Screens*, page 177.

Worksurfaces used in panel-supported installations must follow applicable panel stability guidelines.

▶ Page 44

Do not use a Universal Systems Worksurface as a top for storage that matches the work surface width. Universal Systems Worksurfaces are slightly undersized for panel-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

▶ See *Storage Specification Guide*.

Knife edge worksurfaces

have limitations for support options and application restrictions.

▶ See page 132 for *Knife Edge Worksurface Application Guidelines*

Universal Systems Worksurfaces with Soft Edge, Power and Data Access Door and Tray

Soft edge provides a comfortable user experience reducing strain on wrists and forearms.

► Specifying page 350

Power and data access door and tray provides desk top access and management of cords.

► Specifying page 400

Soft edge and power and data access door and tray cutout are available in modular and parametric straight worksurfaces, both 1/2" cord drop and full depth.

Cutout is optional; power and data access door and tray is ordered separately. 24"W cutout is centered near the back of the worksurface.

Edge is soft to the touch and flexes to conform to the arm.

Power and data access door and tray is available with cord or with modular or hardwire connection.

Soft edge is 36" wide centered on the worksurface; balance of front edge is 3 mm radius. Back and side edges are flat.

Soft edge and power and data access door and tray are available on straight and taper Universal Systems Worksurfaces with 1/2" cord drop and full depth.

Tray includes six simplex receptacles and cutout for data access.

Depth	3"	4 5/8"	6"
Thickness	1/2" at front	N.A.	N.A.
Height	N.A.	N.A.	4 3/4"

Product Details

Soft edge profile is polyurethane and is available with Bactiblock™ antimicrobial protection.

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

3 mm front edge is specifiable. Back and side edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Scallops are omitted on worksurface when cutout for power and data access door and tray option is selected.

Power and data access door and tray cutouts are 3⁵/₁₆" from the back edge of the worksurface and always centered on the width of the worksurface.

Power and data access door and tray cutouts are available on worksurfaces 24"D through 36"D.

Inner tray provides under the surface power and data connections and access and cord management.

Outer tray provides cover and management for harness, cord, and/or data cables to and from the panel.

Power and data access door and tray flips toward the user.

Modular, cord and plug, or hardware options are available.

Corded version includes 10' cord with plug. Modular and hardware versions each include 8' of harness.

Three wiring schematics are available in the modular version – 3+1, 2+2, and 3 separate neutrals (3SN). Each has a single circuit. 3+1 and 2+2 have the option for line 1, 2, 3, or 4 with either a system or isolated ground. 3SN has the option for line 1, 2, or 3 with either a system or isolated ground.

Data cutout in tray can accommodate either a single gang or a modular furniture communication faceplate. Tray includes adapter to accommodate modular faceplate.

Filler packages are available to fill unused data cutouts. Order separately in packages of 20.

With the modular and hardware version, the harness enters the panel through a field cut opening in a fabric skin. A grommet is included to provide a finished edge to the field cut opening in the skin where the harness enters the panel. Inside the panel the harness can connect to a powerkit or it can use either a harness to harness connector or a branching harness to harness connector to connect to other modular harness trays or modular harnesses.

Cord and plug version has an integrated overload circuit breaker.

Non-PVC versions are available for each power solution.

Connections

Fixed storage can be used with worksurfaces with soft edge but must not encroach the 36" width of the edge.

Worksurfaces connected perpendicular should not encroach the 36" width of the soft edge.

Soft edge worksurfaces are available with the same support options and follow the same application rules as other Universal Systems worksurfaces. ▶ See page 110 for Universal Systems Worksurfaces Understanding. *Exception: 48"W worksurface with soft edge used with the FrameOne post leg has some limitations.*

In an end-of-run condition, the FrameOne post leg will not fit when used with 48"W soft edge worksurfaces, use half, open, or closed loop legs.

In shared applications, the FrameOne post leg can be angled and positioned at the front edge or for a square orientation it must be inset 1" from the front edge when used with 48"W soft edge worksurfaces.

Access holes in tray allow power and data to be routed straight back when worksurface is against the panel or routed to the sides when the worksurface is perpendicular to the panel.

Worksurfaces with power and data access door and tray are available with the same support options and follow the same application rules as other Universal Systems worksurfaces.

▶ See page 110 for Universal Systems Worksurfaces Understanding.

Tray with cord and plug can be used in a freestanding table application.

Worksurfaces with power and data access door and tray with modular or hardwire power cannot be used in a freestanding application. The worksurface must either be attached to a panel on one end or if the worksurface is attached to low storage with an intermediate support on one end, the cabinet must be attached to the panel or ganged to another storage cabinet. This applies to both parallel or perpendicular to the panel applications.

Height of tray is 4³/₄" so lower storage height must be accounted for when used adjacent to tray.

Width of outer tray below the worksurface is 27¹/₈" so adjacent lower storage dimensions must be accounted for on each worksurface width.

Tray with cord and plug includes two cord clips to help manage the cord below the worksurface.

Tray with modular harness or hardwire harness includes two harness clips to help manage the harness below the worksurface.

Soft edge worksurfaces and power and data access door and tray worksurfaces require reinforcement channel or other support on worksurfaces 60"W or larger.

Worksurfaces greater than 72"W require additional support such as cantilevers, pedestals, or legs beyond the brace.

Wiring & Cabling

Chicago, New York, and Los Angeles have special requirements.

Underwriter Laboratory (UL) listed. The power and data tray has been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Cutout for Door

Width	16 ¹ / ₈ "
Depth	4 ¹ / ₄ "

*Tip: Modular 29¹/₂"D worksurface is only available up to 72"W.

*Tip: Worksurface width is available parametric from 18"W–120"W in 1/16" increments.

*Tip: Worksurface depth can be specified parametric from 18 3/8"D–36"D in 1/16" increments.

Product Details

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

▶ See *Surface Materials Reference Manual* for specific PVC-free availability.

3 mm front edge is specifiable. Back and side-edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Scallops are omitted on all worksurfaces with a power access door.

Power access door provides access to power outlets in the panel.

Currency Enhanced storage with recessed back should be used when storage will be placed in front of a power outlet.

Recessed back storage features a 3³/₄" cavity to allow access to outlets below the worksurface.

Left and right configured power access doors will interfere with FrameOne post leg support and freestanding end panels (UE18, UE24, and UE30).

15"	59"

Product Details

High-Pressure Laminate Worksurfaces

Edge profile is available in 3 mm.

3 mm edge profile

PVC-free, 3 mm edge profiles are a proprietary polyolefin blend for all solid colors and seven woodgrain finishes.

▶ See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Worksurfaces

Edge profile is wood veneer with a square (3 mm) radius. Wood edge color matches finish specified for worksurface.

Edge profile is applied to all edges.

Connections

Recommended standing height for transaction worksurface is achieved by attaching them to 45"H frames.

Montage transaction worksurfaces can be installed between adjacent taller frames with standard change of height trim. Elective Elements transaction tops cannot be installed between adjacent taller frames.

Perpendicular frames can be higher than the transaction worksurface. *Tip: Transaction worksurface must be removed to access adjacent frame.*

Frame top cap, steel or wood, remains in place beneath the transaction worksurface and is not damaged. *Tip: When top is installed over steel top caps, there is a 3/8" gap between underside of worksurface and top cap.*

Glass tile will not fit directly below transaction top.

Transaction top fits on a 45"H frame, 55"H frame, or a 10"H stacker. It will only install on-module.

Utility shelf lights can be installed beneath transaction worksurfaces using screws and keyhole slots in light fixture.

Transaction worksurface must be centered on the panel.

Wood Veneer Worksurfaces

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match worksurface

Brackets

- Black paint only

Application Topics

Transaction worksurface cannot be shorter than the frame that supports it.

Brackets shipped with transaction worksurfaces apply to frames manufactured after June 11, 2001. *Tip: Brackets can be modified in the field to fit frames manufactured prior to June 11, 2001.*

Flat mount transaction top bracket allows the transaction top to be attached directly on top of a Montage frame with steel top cap. Brackets are field installed only. Select the omit top cap option on the frame when this bracket package is ordered.

Uppmount transaction top bracket allows the transaction top to be attached to the top of a Montage frame, and allows the transaction top to float 3/4" over the top of the frame. Bracket package includes two brackets, attachment hardware, and top cap to accommodate all standard sized transaction tops. These brackets cannot be used on frames with glass.

Panel-Mounted Worksurface Supports for Montage Frames

Supports can be used to mount worksurfaces in various configurations on to Montage frames.

► Specifying, page 404

Adjustable-height cantilever supports corner and straight worksurfaces from 24½"H to 34½"H.

Side support brackets can be used to support the ends of straight and corner worksurfaces and also to support the back corner of any corner worksurface.

Off-module worksurface bracket is used where two worksurfaces join in an off-module position.

On-module cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height.

On-module end panel is available in left- and right-hand versions to support either end of a worksurface.

Off-module end panel is available in left- and right-hand versions to support either end of a worksurface.

Product Details

Side support brackets support worksurfaces at 28⅝"H. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support brackets can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Single side support bracket can be used to support the rear corner of corner and extended corner worksurfaces.

Tip: For off-module fin wall applications, the single side support bracket must be handed appropriately for connection to the fin wall.

Actual Dimensions

	End Panel
Height*	28⅝"
Depth	23¾" or 29¾"

*Height dimensions include the thickness of a worksurface.

Single side support bracket can be used to support the user's side rear corner of bullet peninsula, angled peninsula, visitor, jetty, and bubble jetty workspaces.

Adjustable-height cantilevers are available to support corner and straight workspaces from 24½"H to 34½"H at 1" increments in on-module positions only.
Tip: Requires a third adjustable-height cantilever to support rear corner of corner workspace.
Maximum span between adjustable-height cantilevers is 48".

On-module cantilevers support workspaces at seated height of 28⅝" and standing height of 40⅞". Cantilever is non-handed and can be used to support either end of a workspace or shared to support two workspaces at the same height simultaneously. One tie plate ships with each cantilever.

Tie plate is included to make connection to adjacent workspaces and used in conjunction with off-module workspace brackets.

Adjacent cantilevered workspaces must be the same height in order to connect with a tie plate and provide panel stability.

Off-module workspace bracket is used where two workspaces join in off-module positions. Bracket can also be used to support the front of a workspace on an off-module fin panel. Off-module workspace brackets must be used with on-module supports to provide workspace forward tip support. One off-module tie plate ships with the bracket to connect adjacent workspaces.

End panels are available in left- and right-hand versions to support either end of a workspace. A bracket is included with the end panel to connect it to the frame. End panels are used in on-module or off-module positions. End panels can be converted in the field to standard or off-module end panels by ordering a panel package from Service Parts.
Tip: When using a combination of panel-mounted and tethered or freestanding workspaces with legs, the workspace(s) supported by legs will not reach the same height as the cantilevered workspace if panel glides are extended more than ¼". Standard Montage workspace height is 28⅝" H when panel glides are at zero. Legs adjust up to 28⅞" H.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or tiles.

Pedestals with a filler can be used to support the end of a workspace in place of an end panel.
▶ Rules for Frame Stability, page 44

Workspace spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; workspaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Specifying, page 406
Tip: The on-module cantilever and standing height post legs are the only supports that will work for standing height applications.

Surface Materials

End panel, off-module workspace bracket, and end-of-run cantilever

- Paint

Cantilever and side support bracket, alignment plate, and tie plate

- Black paint only

Application Topics

Workspaces used in panel-supported installations must follow applicable panel stability guidelines.

- ▶ Page 44

Off-Module Worksurface-to-Panel Connector

Connector attaches into the slots in the panel frame.

Product Details

Connects 18"D, 24"D, and 30"D worksurface to wider panels eliminating the need to match panel width to worksurface depth. Replaces side supports, cantilevers, and the need for front edge support with 30"D worksurfaces.

Application Topics

Worksurface must be justified to one end of the off-module connector.

Opposite end of the worksurface must be connected to another panel or an end support connected to the panel.

Off-module worksurface-to-panel connector can support a single worksurface only.

Off-module worksurface-to-panel connector cannot replace cantilevers and side support brackets when worksurface is parallel to the panel.

Surface Materials

Connector

- Paint

Actual Dimensions

Width	24", 30", 36", 42", or 48"
Height	3"
Depth	1/2"

FrameOne Legs and Supports for Universal Worksurfaces

Legs and supports share a common visual with FrameOne bench and support Universal worksurfaces in freestanding, storage-supported, or panel-supported applications. ▶ Specifying page 410

Spacers between top of legs and worksurface provide a floating look to the worksurface and match visual of FrameOne bench.

Intermediate support is used with Universal One-High or 1.5-High storage as a worksurface support allowing for nesting of low storage.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Post leg is square to provide a complementary visual to FrameOne legs. Post leg can be used as a column support.

Dimensions

	Closed, Open, and Half-Loop Legs	Post Leg	Intermediate Supports	
			For One-High storage	For 1.5-High storage
Height*	28½"	28½"	28½"	28½"
Height	N.A.	N.A.	11¼"	5¼"
Depth	24" or 30"	N.A.	16"	16"
Width	N.A.	N.A.	23/16"	23/16"
Glide range	2¼"	1"	N.A.	N.A.

*Height dimensions include the thickness of the worksurface.

Product Details

Closed, open, and half-loop legs are handed when panel supporting and must be specified left or right when facing the front of the worksurface. Freestanding tethered and table versions are non-handed.

Closed, open, and half-loop legs are available in panel supporting versions. They support the ends of worksurface; they are not shared supports between two worksurfaces.

Closed and open-loop legs are available in tethered versions in which one side of the worksurface is attached to a panel or storage.

Closed and open-loop legs are available in table versions in which both sides of the worksurface are supported by the legs. Post legs can also be used to create freestanding tables.

Half-loop leg is always panel supporting, however panels cannot exceed 48"H or support overhead storage above.

Closed, open, and half-loop legs do not align properly with knife-edge worksurfaces. Instead use cantilevers. ▶ See page 132 for knife-edge worksurface application guidelines.

27"H mobile, free-standing, or fixed pedestals do not fit flush to the inside of the closed, open, or half-loop leg, there is a 3" gap due to the worksurface support plate. 25 1/2"H freestanding pedestals or 21"H mobile pedestals will fit flush.

27"H mobile, free-standing, or fixed pedestals do not fit flush to the inside of the post leg, there is a 5 3/4" gap due to the worksurface support plate. 25 1/2"H freestanding pedestals or 21"H mobile pedestals will fit flush.

Post leg can be shared between two worksurfaces.

Post leg in shared applications can be square or oriented angled to the front edge of the worksurface.

Intermediate supports replace the need for other types of worksurface support when used with One-High or 1.5-High Universal storage.

Steel top storage requires additional bracing inside the storage when used with an intermediate support. Bracing is an option to the intermediate support and is specified to match the width of the storage.

Bracing is field-installed.

Number of braces is determined by the orientation of the intermediate support to storage. It is not determined by the orientation of the worksurface to storage.

Side-to-side (parallel) orientation of intermediate support relative to storage requires one brace.

Front-to-back (perpendicular) orientation of intermediate support relative to storage requires two braces.

Storage with laminate or wood tops do not require additional bracing with intermediate support.

Side-to-side (parallel) application of intermediate support allows worksurface to be oriented perpendicular to storage.

Front-to-back (perpendicular) application of intermediate support allows worksurface to be oriented in-line with storage.

Intermediate support must be at least 1" from the front, back, or side edges of the storage unit to allow clearance for installation.

On cabinets with steel tops, in parallel applications, the intermediate support can be positioned left or right 1" or 7" from the side edge of the storage unit to align with bracing hole locations and can be positioned anywhere front to back on the unit. On cabinets with laminate or wood tops, in parallel applications, the intermediate support can be positioned left or right anywhere between 1" and 7" from the side edge of the storage unit.

On cabinets with steel tops, in perpendicular applications, the intermediate support can be positioned left or right 1" or 7" from the side edge of the storage unit to align with bracing hole locations and can be positioned anywhere front to back on the unit. On cabinets with laminate or wood tops, in perpendicular applications, the intermediate support can be positioned left or right anywhere between 1" and 7" from the side edge of the storage unit.

Worksurfaces 18\"/>

Worksurfaces 24 1/16\"/>

Intermediate support cannot support worksurfaces larger than 30\"/>

Worksurface may extend up to 10\"/>

FrameOne post legs will interfere with left and right oriented power access doors on Universal worksurfaces.

FrameOne post legs will interfere with left and right oriented grommet cutouts in parametric straight Universal worksurfaces.

Surface Materials

Legs and intermediate support

- Paint

Spacer caps for panel attached legs

- Black plastic only

Glide cap for legs

- 6694 Slate only

Shipping

Closed, open, and half-loop legs are packed in boxes of six when ordered on the same line item.

Bracing for intermediate supports ship separately from intermediate supports and are field installed into storage cases.

Infills for FrameOne Legs for Universal Worksurfaces

Infills for FrameOne Legs for Universal Worksurfaces

Infills are available in laminate and veneer and are used with open and closed loop FrameOne legs. ▶ Specifying page 411

Infills provide added privacy.

Product Details

Infills can be used with both panel connected or freestanding versions of open and closed loop FrameOne legs for universal worksurfaces.

Connectors attach to the back side of the legs.

- Veneer

Planning Dimension

Infills are available 24"W and 30"W.

Legs and Columns for Universal Systems Worksurfaces

Without Alignment Tab

Legs are available to support worksurfaces in free-standing or panel-supported applications.

► Specifying, page 412

Double post C-leg can be used on a single worksurface or in a shared application.

Post leg can be used on a single worksurface. Non-locking caster and glide versions are available.

Column is 4" in diameter and can be used as a column support on a single worksurface.

Double post leg can be used as a column support on a single worksurface or to support a shared application.

Support plate can be used with a double post leg to join and support two worksurfaces. Plate is 14"D or 20"D and 3¹/₁₆"W.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Adjustable-height leg adjusts from 25¹/₂"H to 31¹/₂"H in ³/₄" increments.

Adjustable-height leg can be used with a single worksurface. Locking caster and glide versions are available.

Actual Dimensions

	Column	Double post leg	Post leg	Adjustable-height leg	Double post C-leg
Height*	28 ¹ / ₂ "–31 ⁵ / ₈ "	28 ¹ / ₂ " or 40 ⁷ / ₈ "	26", 28 ¹ / ₂ ", or 40 ⁷ / ₈ "	25 ¹ / ₂ "– 31 ¹ / ₂ "	28 ¹ / ₂ "
Glide range, for legs equipped with glides	3 ¹ / ₈ "	3 ³ / ₄ "	3 ³ / ₄ "	3 ³ / ₄ "	3 ³ / ₄ "

*Height dimensions include the thickness of a worksurface.

Product Details

Legs support Systems Worksurfaces at 26"H nesting, 28½"H standard, 40⅞"H standing or 25½"H to 31½"H adjustable heights.

Legs for Systems Worksurfaces do not include alignment tabs. Pilot holes help the installer locate the proper leg position under the worksurface.

45° orientation

Post legs are always installed at a 45° orientation.

26"H nesting height legs allow worksurfaces to nest underneath an adjacent worksurface supported with 28½"H legs or a panel-supported worksurface.

Double post leg can be used in a shared application with a support plate, or it can be used as a column support for spanner, jetty, bubble jetty, bullet peninsula, and angled peninsula worksurfaces in panel-mounted applications.

Post leg, in conjunction with two cantilevers or center support panels, can be used as column support for linking worksurfaces.

Post leg, in conjunction with a side support bracket, can be used to support the end of a visitor or taper-flat worksurface.

Two post legs can be used in place of one double post leg as column support for spanner, jetty, bubble jetty, bullet peninsula, and angled peninsula worksurfaces for added stability.

Standing-height post or double post legs can be used as column support in panel-mounted applications only.

30"D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Columns can be used on spanner, bullet peninsula, angled peninsula, linking peninsula, jetty, and bubble jetty worksurfaces in panel supported applications. Column adjusts continuously from 28½" to 31⅝".

Columns cannot be used in a shared application.

Bottom View
Column

Bottom View
Post Leg

Columns are not recommended for applications that include post legs because it has a round shape, while post legs are more of an elliptical shape. Use single or double post legs as a column support in applications that include other post legs.

Adjustable-height legs adjust from 25½"H to 31½"H in ¾" increments. Legs can be used to support the primary worksurface, or legs can support a worksurface in a nesting application.

The adjustable-height leg with casters cannot support freestanding worksurfaces that are less than 24" deep.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

Freestanding Guidelines for Systems Worksurfaces

- ▶ Page 134

Knife Edge Worksurface Application Guidelines

When planning an L-configuration, two UFB flat brackets should be used to support the worksurfaces. A cantilever is not wide enough to support the gap where the knife edge worksurface comes together.

Freestanding L-configuration should be avoided due to profile on the backside of the worksurface.

25 1/2"H Pedestal
(cantilever supported worksurface)

Boxfile
(cantilever supported worksurface)

Compatible storage includes 25 1/2"H pedestal with freestanding conversion kit, box/file mobile pedestals, and 1-high storage.

Knife Edge with 27"H Lateral
and 27"H Pedestal

Knife Edge with 25 1/2"H Pedestal

Knife edge worksurface over 27"H storage can make files difficult to access. Use a 25 1/2"H pedestal that is flush with the front edge of the worksurface to avoid this issue.

Knife edge worksurfaces require reinforcement channels for unsupported spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Although a 25 1/2"H pedestal looks good when paired with knife edge, keep in mind that it does not align with other storage – drawers and base trim do not align. Use a box/file mobile pedestal instead.

End panels, 27"H standard pedestals, side support brackets and FrameOne legs for Universal do not align properly with knife edge worksurfaces. Instead, use cantilevers as shown.

**Side support brackets will work to support the back end of a worksurface; front end is where they won't align properly.

In order to align the knife edge top with a standard 27"H pedestal, a 2" proud top can be added. This can be done, but keep in mind that the 2" proud tops (26"D knife edge) will stick out beyond panel end trims and tower fronts, and they do not allow L-planning. Use a cantilever supported 24"D worksurface with a box/file mobile pedestal, and it will align with the tower.

Freestanding Guidelines

For Systems Worksurfaces with Legs

The following section on freestanding worksurfaces gives some guidelines to be used with common freestanding configurations.

Counterweight packages for storage products are required to ensure product stability.

▶ See page 193 for *Counterweight Requirements for Storage Products*.

Remember to specify "omit scallops" option on worksurfaces intended for use in freestanding applications.

There are several ways to support the ends of a freestanding worksurface:

With post legs. Nesting post legs can also be used.

With a double post C-leg.

With adjustable-height legs.

With a pedestal, other storage products can also be used.

Double post C-legs can be used on a single worksurface or in a shared application.

Tie plate is recommended to align worksurfaces. Support plates alone cannot be used to support worksurfaces.

18"D worksurfaces can be freestanding down to 24"W.

Freestanding worksurfaces greater than 72"W need additional center front and back floor support.

The adjustable-height leg with casters cannot support freestanding worksurfaces that are less than 24" deep.

Combined worksurfaces can give each other support when joined with a double post leg and support plate. Use 14"D support plate on worksurfaces 24"D and smaller and 20"D support plate on worksurfaces 24¹/₁₆" and larger. Tie plate is recommended to align the worksurfaces.

Double post C-leg can be used to support a corner or extended corner worksurface and adjacent worksurfaces.

Double post C-leg can be used to support an extended corner worksurface and adjacent worksurfaces.

Answer Freestanding Desk Overview

Answer Freestanding Desk components are designed to work together. Desks, tables, towers, and other storage units can be used to create individual and team spaces that share a common aesthetic. Components are ordered separately and assembled in the field.

Quick spec pages conveniently provides all of the style numbers needed to quickly specify some of the most commonly ordered desk application.
▶ Page 416

Hutch kit includes a double sided tackboard and an accessory rail. Plugs and cords can be routed below the accessory rail and through worksurface scallops.
▶ Page 475

Universal pedestal provides storage and supports the desk. Steel and wood drawer fronts are available with a variety of pulls.
▶ Page 458

Modesty panels are not required for structural support. Desks without modesty panels allow free access to power and data outlets in the wall.

Universal in the case and over the case bins can attach to a wall or panel, or can be supported by a hutch kit.
▶ Page 214

Tower
▶ Page 490

Universal Systems Worksurfaces, either full depth or with 1/2" cord drop, can be used to create desks. High-Pressure Laminate and wood veneer worksurfaces are available in a variety of shapes and sizes.
▶ Page 341

2 1/2" round grommets
▶ Page 453

Modesty panel conceals the kneespace. Half-height and full-height modesty panels are available. Modesty panels can be positioned flush or inset depending on the application.
▶ Page 426

Mobile pedestal with cushion top
▶ Page 464

End support is L-shaped to stabilize the desk, even if there is no modesty panel. Non-handed, reversible design aids in reconfiguration. Corner shelves are available for additional storage below the worksurface.
▶ Page 423

Screens clamp to worksurfaces to provide additional privacy above or below the worksurface.
▶ Page 448
▶ See *Height-Adjustable Desks Specification Guide*

Taper-flat worksurface provides an extra deep primary work area that faces away from the corner.

Worksurface wire managers are available to convert cable scallops to grommets in freestanding applications. They are included with wood veneer worksurfaces.
▶ Page 449

Counterweight Requirements for Storage Products
▶ Page 193

Half-height modesty panels conceal the kneespace with a lighter scale aesthetic. They can be mounted flush with the worksurface, or with a 1 1/2" reveal for cord and plug management. Horizontal cable race channels are available to manage cords and to block vision through this gap.
▶ Page 426

Desk Supports and Corner Shelves

Answer Freestanding Desk supports are available to support worksurfaces in desk applications.
 ▶ Specifying, page 423

Quick spec pages conveniently provide all of the style numbers needed to quickly specify some of the most commonly ordered applications.
 ▶ Page 416

End support is L-shaped to stabilize the desk, even if there is no modesty panel. Non-handed, reversible design aids in reconfiguration.
 ▶ Page 423

End support mounting brackets and leveling glides can be installed on either end to create a left-hand or right-hand end support.
 ▶ Page 423

Leveling glides allow desk height to be adjusted for uneven floors.

Corner shelves attach to the inside of end supports to provide additional storage below the worksurface. Non-handed, reversible design aids in reconfiguration.
 ▶ Page 423

Peninsula support is T-shaped to allow a modesty panel to be mounted along the centerline of a bullet peninsula or jetty worksurface. Non-handed, reversible, two-piece design aids in reconfiguration.
 ▶ Page 424

Corner support is available to support the back of a corner worksurface. It can also be used as an intermediate support providing unobstructed knee clearance.
 ▶ Page 425

Removable inner cover contains and conceals cables.

Flush-mount bracket connects two worksurfaces together in an L-configuration. Two-piece design accommodates all worksurface depths.

Actual Dimensions

	End Support	Corner Shelf	Peninsula Support	Corner Support	Flush-Mount Bracket
Width	15"	11"	24" or 30"	5½"	4½"
Depth	18¾", 23½", or 29½"	15¾", 20½", or 26½"	12½"	5½"	5" and 8½" (2 plates)
Height*	27"	¾"	27"	27"	N.A.
Glide adjustment range	1½"	N.A.	1½"	1½"	N.A.

*Height dimensions match Universal pedestals. Desk height, including the thickness of a worksurface, is 28½".

Product Details

Desk supports used with 13/16" thick Universal Systems Worksurfaces will create desks at 28½"H standard height. Thicker worksurfaces will create taller desks.

Compatible worksurfaces include:

- Universal Systems Worksurfaces with ½" cord drop
- Universal Systems Worksurfaces—full depth
- TS Series Worksurfaces—full depth
- Elective Elements Worksurfaces—full depth
- Avenir 1½" thick worksurfaces

Compatible storage products include:

- 27"H fixed pedestals: Universal, TS Series
- 2-high lateral files with the no top option: Universal, TS 200 Series
- 2-high Universal bookcases and storage cabinets with the no top option
- Universal hutch kits with Universal in the case and over the case, and sliding door bins

Corner shelves attach to the inside of end supports to provide additional storage below the worksurface. Up to two shelves can be mounted to each end support. Each shelf has 12" of vertical clearance to accept standard binders. Shelves are not height adjustable.

Bookends are recommended when using shelves for binder storage.
▶ See *Storage Specification Guide*

Shelves are reversible, with High-Pressure Laminate on both sides, and can be easily reconfigured. Shelves do not interfere with modesty panel attachment or removal.

Each shelf size is designed to fit a single depth of end support. Smaller shelves may not be mounted in larger end supports without drilling additional holes in the end supports.

End supports with shelves can also be mounted facing outward to create open storage that is easier to access, and to create credenzas with a mix of closed and open storage. Modesty panels can be attached to outward facing end supports the same way they attach to pedestals.

Modesty Panels

Answer Freestanding Desk modesty panels

conceal the kneespace. They attach directly to desk supports and storage components to either side.
 ▶ Specifying, page 426

Quick spec pages conveniently provide all of the style numbers needed to quickly specify some of the most commonly ordered applications.
 ▶ Pages 416–422

Modesty panels are painted steel.

Removable non-handed attachment brackets are provided to connect modesty panels to desk supports. Two brackets are included with each modesty panel.

Modesty panel connects to end supports, peninsula supports, and corner supports with the attachment bracket.

Modesty panel connects directly to pedestals, other storage products, and columns with screws.

Product Details

Modesty panels are available in two heights.

Half-height modesty panels may be mounted flush with the worksurface, or with a 1 1/2" gap for cord and plug management.

Horizontal cable race channels are available to manage cords and to block vision through the 1 1/2" reveal. Cable race channels attach to the worksurface and feature a two-piece telescoping design to accommodate various desk configurations and lengths of modesty panel.

Full-height modesty panels are always mounted flush with the worksurface. 2 1/2" grommets are recommended for cord and plug management with full-height modesty panels.

Surface Materials

Modesty panels and attachment brackets

- Paint

Actual Dimensions

Width	9", 15", 18", 24", 27", 30", 33", 36", 39", 42", 45", 48", 51", 54", 57", and 60"
Depth	7/8"
Height	12 5/8" and 27"

Application Topics

Modesty Panel Alignment

▶ Page 156

Modesty panel width

is equal to the width of the kneespace. To determine the width of the kneespace, subtract the width of the desk supports and storage components from the width of the worksurface and round down. The specifying page also has a matrix of typical applications.

▶ Specifying, page 426

▶ Quick spec, pages 416–422

Example 1: Desk

Worksurface width: 72"

Pedestal width: 15"

End support width: 15"

Modesty panel width: 42"

Tip: Straight desks with zero, one, or two pedestals always use the same size modesty panel because end supports and pedestals are both 15"W.

Example 2: Pedestal Return

Worksurface width: 48"

Pedestal width: 15"

Modesty panel width: 33"

Tip: Returns with zero or one pedestal always use the same size modesty panel.

Example 3: Lateral File Return

Worksurface width: 48"

Pedestal width: 30"

Modesty panel width: 18"

Tip: Remember to use full-depth worksurfaces with proud front lateral files.

Example 4: Bridge

Worksurface width: 42"

Modesty panel width: 42"

Example 5: Bullet Peninsula

Peninsula width: 71 1/2"

Peninsula support depth: 12 1/2"

Column diameter: 4"

Clearance at end: 13"

(30" peninsula depth minus 4" column diameter divided by 2)

Modesty panel width: 42"

Example 6a: Extended Corner, long side

Worksurface width: 71 1/2"

Corner support width: 5 1/2"

End support width: 15"

Modesty panel width 51"

Example 6b: Extended Corner, short side

Worksurface width: 41 1/2"

Corner support width: 5 1/2"

Modesty panel width: 30"

12	1	RDD24245RDP	24"D x 65½"H Dual Door Tower, Proud Fronts

L-Office

Mobile pedestal with cushion top provides occasional guest seating and can be stowed below the worksurface when not in use.
▶ Page 464

End support is L-shaped to stabilize the desk even if there is no modesty panel. Non-handed, reversible design aids in reconfiguration.
▶ Page 423

Corner shelves attach to the inside of end supports to provide additional storage below the worksurface. Non-handed, reversible design aids in reconfiguration.
▶ Page 423

Screens clamp to worksurfaces to provide additional privacy above or below the worksurface.
▶ Page 448
▶ See *Height-Adjustable Desks Specification Guide*

Taper-flat worksurface provides an extra-deep primary work area that faces away from the corner.

Half-height modesty panels provide privacy with a lighter scale aesthetic. They can be mounted flush with the worksurface, or with a 1 1/2" reveal for cord and plug management.

Worksurface wire managers are available to convert cable scallops to grommets in freestanding applications. They are included with wood veneer worksurfaces.
▶ Page 455

Cable race channels are available to manage cords and to block vision through the 1 1/2" reveal. Cable race channels attach to the worksurface and feature a two-piece telescoping design to accommodate various desk configurations and lengths of modesty panel.
▶ Page 428

14	1	RQS24245LCP	24"D 5-High Left-Hand Open Side Tower, Proud Fronts

Height Matrix

Modesty Panel Alignment

Modesty panels are designed with reconfiguration in mind. Non-handed brackets connect modesty panels to end supports, peninsula supports, and corner supports. Brackets can be removed so modesty panels can be screwed directly to pedestals, lateral files, columns, and the outer faces of end supports and corner supports.

Modesty panel brackets are designed to create 1/4" reveal in certain applications. These reveals allow the same size modesty panels to be used in multiple applications, simplifying inventory management and reconfiguration.

A 1/4" reveal occurs when a modesty panel is attached to the side of a peninsula support.

Modesty panels mounted between two corner supports will have a 1/4" reveal on either side. This condition typically occurs on square corner worksurfaces or on the shorter side of an extended corner workspace.

Modesty panel can be screwed directly to the outside of a corner support when it is used as an intermediate support.

This u-configuration uses the same 42" modesty panels to create a 23 1/2"D x 72"W desk, a 23 1/2"D x 42"W bridge, and a 30" x 71 1/2" bullet peninsula worksurface.

Modesty panels are designed to be inset 1/2" from the back and side edges of end supports, peninsula supports, etc.

Worksurfaces with 1/2" cord drop are always flush to the back edges of pedestals, end supports, corner supports, and peninsula supports.

A 1/4" reveal occurs when a modesty panel is attached to the front edge of an end support, such as in most return or bridge applications.

Modesty panels mounted between one corner support and one pedestal or end support will have no reveal. This condition typically occurs on the longer side of an extended corner workspace.

Full depth work-surfaces typically cause end supports, peninsula supports, corner supports, pedestals, and modesty panels to be inset an additional 1/2" from the back edge of the worksurface.

Full-depth return work-surface applications with end supports should be assembled with the end support flush to the back edge of the worksurface. This will inset the return modesty panel 1/2".

Full-depth return work-surface applications with pedestals should be assembled with the pedestal flush to the front edge of the worksurface so that the drawers line up properly. A modesty panel can be attached flush to the back of this pedestal. This will inset the return modesty panel 1/2".

Desks

Pedestals and storage with flush fronts are 7/8" smaller in depth than proud front pedestals and storage.

Modesty panel alignment can be achieved by mounting flush front storage units with the fronts recessed 7/8" from the front edge of the worksurface.

Worksurfaces with 1/2" cord drop

Full-depth work-surfaces

Desk Stability Guidelines

Answer Freestanding Desks are exceptionally stable when applied according to these guidelines.

Counterweight packages for storage products are required to ensure product stability.

▶ See page 193 for *Counterweight Requirements for Storage Products*.

Remember to specify the omit scallop option on worksurfaces intended for use in desk applications, or order worksurface wire managers to fill the scallops.

Freestanding desks can be created with a variety of worksurfaces:

With straight worksurfaces. Support each end with a pedestal or other storage unit, or an end support.

With tapered or single-tapered worksurfaces. Each end requires an end support of appropriate depth. The wider end of a single-tapered worksurface can accommodate storage or a return worksurface.

With taper-flat worksurfaces. The smaller end can accommodate an end support, pedestal, or other storage unit, or a return worksurface. The wider end requires an end support of the next smaller size: for example, a 29¹/₂"D x 23¹/₂" x 72" taper-flat worksurface requires a 23¹/₂"D end support at the wider end.

18³/₈"D or 18⁷/₈"D straight worksurfaces or parametric straight worksurfaces that are less than 24"D, must be connected to an adjacent worksurface in an L-configuration for additional support. This also applies to any transition, tapered, taper-flat, or single-tapered worksurface with an 18³/₈"D or 18⁷/₈"D end.

End supports can be mounted facing outward to create open storage that is easier to access, and to create credenzas with a mix of closed and open storage. Stand-alone desks and credenzas with outward-facing end supports must be at least 60"W. Hutches may not be mounted above outward-facing end supports.

Return work surface applications up to 72" long can be supported with an end support or storage at one end, and a flush-mount bracket at the other end. The same two-piece bracket kit can be used to join work surfaces of any depth. Order one bracket for a desk return application. Return work surfaces longer than 72" require additional support.

Bridge work surface applications up to 60" long can be supported with two flush-mount brackets. Bridge work surfaces longer than 60" require additional support.

Work surface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; work surfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

► Page 406

Corner work surfaces can be supported by a corner support in the back corner. Sides must be supported by end supports if the corner work surface is being used as a stand alone desk.

Extended corner work surfaces can accommodate pedestals and other storage on the long end. Refer to specification pages to determine width available for storage.

Corner work surfaces can be combined with other work surfaces to create larger desks. For unimpeded knee clearance, a corner support can be used as an intermediate support for combined work surface runs up to 8 feet. Use a flush-mount bracket to attach the work surface.

Corner supports may not be used to support the end of a run.

Reinforcing Channel

Bullet peninsula worksurfaces and jetty worksurfaces may be supported by a peninsula support and a column. The bullet peninsula must be connected to an adjacent worksurface in an L-configuration for additional support, using a flush-mount bracket. A reinforcing channel must also be installed as shown to stabilize the peninsula worksurface.

Other legs may be used in place of a column, but these will not allow modesty panels to be used.

Jetty worksurfaces require the same supports as bullet peninsula worksurfaces, except that a corner support must be used as an intermediate support where the jetty is attached to another worksurface in an L-configuration. This corner support may be attached to either worksurface.

Bubble jetty worksurfaces can be supported by a peninsula support and a pair of legs. The bubble jetty must be connected to an adjacent worksurface in an L-configuration for additional support, using a flush-mount bracket and a reinforcing channel installed as shown. Also, a corner support must be used as an intermediate support where the bubble jetty is attached to another worksurface. This corner support may be attached to either worksurface.

Modesty panels are not compatible with bubble jetty worksurfaces.

Angled peninsula worksurfaces can be supported by a peninsula support and a pair of legs. The angled peninsula must be connected to an adjacent worksurface in an L-configuration for additional support, using a flush-mount bracket and a reinforcing channel installed as shown.

Modesty panels are not compatible with angled peninsula worksurfaces.

Various storage components can be used instead of pedestals when designing desks.

Lateral files, specified with the no top option, can be used in place of pedestals for high-density or legal-size filing. Two-high storage cabinets can also be used. Full-depth worksurfaces should be used with proud front lateral files and cabinets.

30"W lateral files and storage cabinets can also be applied facing the side of the desk when 30"D full-depth worksurfaces are used.
Tip: 24"D proud front storage products and 18"D flush front storage products work best for side-facing applications where modesty panels are required, because the exact modesty panel sizes needed are available.

24"W and 30"W bookcases, specified with the no top option, can provide open storage for binders below the worksurface. Bookcases can face outward for shared storage, or inward for personal storage. Bookcases are 15"D and can be substituted for 15"W pedestals. Full-depth worksurfaces must be used with side-facing bookcases.

Modesty panels are not compatible with inward-facing bookcases.

Do not use a Universal Systems Worksurface as a top for storage that matches the worksurface width. Universal Systems Worksurfaces are slightly undersized for panel-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

► See *Storage Specification Guide*

Universal hutch kits can be used to mount Universal in the case and over the case bins above desks. Hutch kits attached to desks without lower storage must be placed against a wall for stability.

Full depth corner and extended corner worksurfaces can also accommodate hutches. Worksurfaces with 1/2" cord drop will be 1/2" too short.
Tip: Select the omit scallops option when a hutch will be mounted above a corner worksurface, otherwise the scallops will interfere with hutch attachment.

Hutches can span an L-configuration when full depth worksurfaces are used. Worksurfaces with 1/2" cord drop will be 1/2" too short.

Both ends of a hutch kit must be mounted directly above some type of floor support, such as a pedestal, corner support, or end support. Do not mount either end of a hutch kit between floor supports or above a flush-mount bracket.

Add a corner support as an intermediate support below the hutch in this type of application.

Hutch connector bracket is required when two or more hutches are mounted side by side. Floor support is required below the connected hutch end supports in the middle of the run.

Universal Tables

Universal tables can be used in a variety of individual and team settings.
▶ Specifying freestanding tables, pages 432–442

Table top has a wood core with a High-Pressure Laminate or wood veneer surface and is 1 $\frac{3}{16}$ " thick.

Radius corner eliminates sharp edges and is appropriate for freestanding, mobile furniture.

Edge profile is continuous around all edges of the table.

Product Details

High-Pressure Laminate Tables

Continuous edge profile is available in two shapes.

3 mm edge profile Knife edge profile

PVC-free, 3 mm edge profiles are a proprietary polyolefin blend for all solid colors and seven woodgrain finishes.

▶ See surface material listing in this book for specific PVC-free availability.

Knife edge with 3 mm user edge is available on straight and tapered systems worksurfaces and on round tables.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Tables

Edges of worksurfaces are available square (3 mm) profile.

Square (3 mm) edge profile

Square (3 mm) edge profile is achieved by adding wood veneer surfaces to table core. This technique can be applied to tables that are straight or curved.

Connections

Universal tables are supported by legs or bases, which are ordered separately and installed in the field.

Use the Table and Base Combinations matrix to determine the type and number of bases you need to order for the table you choose. Not all sizes and shapes of tables can be supported by bases.

► Page 174

Use the Table and Leg Combinations matrix to determine the type and number of legs you need to order for the table you choose.

► Page 175

Reinforcing channels are available to support tables that are wider than 60"W and supported by legs. When installed, the channels add 1" below the table. Channels are available as an option on larger tables and are field installed. Select the reinforcing channel option if the table will be supported by legs. Channels are not required if the table will be supported by T- or X-bases.

Underside of table has inset locations that support slip-fit and nesting applications. Post legs are positioned in 45° orientation only.

► See *Table Leg Positions*, page 176

90° orientation

45° orientation

Legs installed in a 90° orientation allow for greater storage and kneespace below the table.

45° leg orientation is a preferred aesthetic for many customers.

Legs may be installed inset from the edge of the table to accommodate slip-fit planning. Amount of available space (3", 6", or 9") is measured from the edge of the table to the edge of the leg. Amount of slip-fit varies by table shape and size.

► See *Table Leg Positions*, page 176.

Slip-fit planning allows workstation footprint to expand or decrease, and is ideal for off-module applications.

Table with 28 1/2"H legs installed at 6" or 9" inset can slip over adjacent tables that are supported with 26"H legs.

Adjustable-height legs adjust 25 1/2"H to 31 1/2"H in 3/4" increments. Legs can be used to support the table in a standard height or nesting application.

26"H legs allow tables to nest underneath an adjacent table with 28 1/2"H legs or a panel-mounted worksurface.

Spanner table enables conferencing at the end of two tables that are placed back-to-back.

52"W or 64"W spanners should be used when tables are separated by a panel. These widths are designed to create a 4" gap.

Surface Materials

High-Pressure Laminate Tables

- Laminate
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option)
A program including non-Steelcase laminates which are suitable for use on Steelcase products.

Square (3 mm) edge profile

- Wood veneer to match table

Solid Surface

- Tables are available in solid surface Dupont. Tops are ordered directly from TFI, the industry leading producer of Dupont solid surface products.
- ▶ See *Additional Resources*, page 4.

Application Topics

Table Fit in Panel Environments:

Dimensions on straight tables are $\frac{1}{4}$ " less than nominal dimension. This allows for an easy fit of freestanding tables in panel-wrapped environments and allows tables to move in and out of the area with ease.

Example: A 48"W x 72"W corner is actually 47 $\frac{3}{4}$ "W x 71 $\frac{3}{4}$ "W.

Mobile pedestals up to 24 $\frac{1}{2}$ "H will fit under 26"H tables without reinforcing channels.

Mobile pedestals up to 27"H will fit under 28 $\frac{1}{2}$ "H tables without reinforcing channels.

Tables with reinforcing channel will reduce the available space by 1".

Table and Base Combinations

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5–50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized.

Pedestal-base tables

fill a variety of needs for conference and work tables in general offices, institutions, and educational work spaces. Tables and base are ordered separately.

► Specifying, page 443

Adjustable leveling glides allow tables to remain level when installed on uneven floors.

Column support includes a cylindrical steel column and a base with feet.

Product Details

26"W or 36"W

26"W or 36"W

Table and Base Combinations

► Page 174

Shipping

Bases are shipped knocked down (K.D.) and will require assembly.

Legs for Universal Tables

Legs attach to a table to make it freestanding.

► Specifying, page 444

Alignment tab helps installers locate proper leg position under the table.

Product Details

Legs support tables at 28½"H overall, including table thickness.

Table legs are ordered separately and installed on site.

► See *Table and Leg Combinations*, page 175.

Table legs are non-handed to accommodate left- and right-hand applications.

Table legs cannot be used in a shared application with two tables. Radiused corners do not provide enough attachment space for leg plate. When a shared leg application is required, order Universal Systems Worksurfaces.

Post legs can only be installed in a 45° orientation.

► See *Table Leg Positions*, page 176.

Actual Dimensions

	Adjustable-height leg	Post leg
Height* (standard)	25½"–31½"	28½"
Glide range, for legs equipped with glides	¾"	¾"

*Height dimensions include the thickness of a table.

Legs installed in a 90° orientation allow for greater storage and kneespace below the table.

45° leg orientation is a preferred aesthetic for many customers.

Legs may be installed inset from the edge of the worksurface to accommodate slip-fit planning. Amount of available space (3", 6", or 9") is measured from the edge of the worksurface to the edge of the leg.

Slip-fit planning allows workstation footprint to expand or decrease, and is ideal for off-module applications.

Alignment tab corresponds to underworksurface alignment slots in tables. Alignment features ensure legs are installed in the proper 45° or 90° orientation and slip-fit position.

Adjustable-height legs adjust 25½"H to 31½"H in ¾" increments. Legs can be used to support the table in a standard height or nesting application.

Divisio Side Screen

29¹/₂"D

11⁵/₈"H ●

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any 3/4"- to 1 1/2"-thick worksurface.

► Specifying, page 448

Magnetic body accommodates magnets for visual display.

21 1/2" of the screen sits on the worksurface. The depth allows the side screen to work on any 24"D or deeper worksurface.

Finger trigger makes it simple for the end user to move the screen to allow for expansion, compression, increased privacy, or collaboration.

Overhang provides greater peripheral privacy.

Clamp can accommodate 3/4"- to 1 1/2"-thick worksurfaces.

Product Details

Divisio side screen can be made more permanent by adding two screws through the clamp. For worksurfaces 1" thick or less; FrameOne, Ology, Migration, a #10 x 3/4" countersunk wood screw is recommended. For worksurfaces over 1", a #10 x 7/8" countersunk wood screw is recommended.

Actual Dimensions

Depth	29 1/2" (total), 21 1/2" (sits on worksurface)
Width	1 1/4"
Height	14 1/4" (total), 11 5/8" (above worksurface)

Wiring and Cabling Accessories

Power and Communication Spheres and Port

Power and communication spheres and port provide convenient desktop access to power outlets and data jacks. Spheres and ports are field installed only.

Power spheres have four electrical outlets and two 6' cords with plug.
▶ Specifying, page 450

Power and communication spheres provide two electrical outlets, faceplates for two customer-supplied voice/data jacks, and a 6' cord with plug or conduit.
▶ Specifying, page 450

Power and communication port has a low-profile cover that is almost flush with worksurface.
▶ Specifying, page 451

Power and communication port includes two outlets and two adapters to accommodate customer-supplied standard voice/data jacks.

Product Details

Power and communication spheres are field installed. Use a 3"-diameter drill to cut mounting hole at desired location.

Power and communication port contains an opening in one side of lower port that allows excess wire and cable cords to drop beneath the worksurface, leaving the port clear.

Port is field installed. Use a 3 1/2"-diameter drill to cut mounting hole at desired location.

Lid of port in up position allows low-profile routing.

Lid can drop down when port is not in use and conceal outlets. Twist lid until legs line up with slots and push down until lid is flush with housing.

Wiring & Cabling

6' power cord is included on power and communication spheres and port.

Chicago, New York City, and Los Angeles have special requirements.

All Montage electrical components are listed by Underwriters Laboratory of the United States (UL), and Canada (ULC), and certified by the Canadian Standards Association (CSA). Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Surface Materials

Power spheres, communication spheres, and round power and communication port

- Black plastic only

Power/Power Box

► Specifying, page 449

Product Details

Power power box, ordered separately, provide additional electrical outlets where needed. Boxes are field-installed and can be mounted to the underside of worksurface anywhere access to power is needed.

Surface Materials

Box

- Black paint

Actual Dimensions

Depth	3"
Width	3"
Height	1"

2 1/2" Round Grommet

► Specifying, page 451

Product Details

2 1/2" round grommet, ordered separately, provides wire and cable management for worksurfaces.

Surface Materials

Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 7360 Merle
- 9201 Polished Chrome
- 9211 Nickel

Actual Dimensions

Depth	2 1/2"
Width	2 1/2"

Universal Worksurface Wire Manager

► Specifying, page 449

Product Details

Worksurface wire managers are available to convert cable scallops into grommets in free-standing applications. They are included with wood veneer worksurfaces. Wire managers can be used with Universal or Answer worksurfaces.

Surface Materials

Universal worksurface wire manager

- 6000 Black
- 6009 Arctic White
- 6052 Milk
- 6053 Seagull
- 6249 Platinum Solid
- 6654 Sand
- 6695 Midnight
- 6697 Fog

Cable and Fiber Reels

Cable and fiber reels are available to store excess fiber-optic cable lengths. They are also suitable for storing power cables.
► Specifying, page 453

Key-shaped mounting hole allows quick installation and removal of reel mounted horizontally to underside of worksurface.

Mounting slots allow installation of reel vertically beneath worksurface.

Inner reel accommodates copper wire and other cables that can be wound tightly.

Outer reel accommodates the preferred bend radius of fiber-optic cables.

Tabs prevent cables from slipping off reel.

Product Details

Capacity of reel is approximately 12' of standard power or communication cable on outer reel and 18' of telephone-type cord on inner reel depending on the specific cable used. Neatness of installation can affect capacities. In critical situations, you should conduct a test using the specific cable types your installation requires.

Connections

Reel can be field installed vertically or horizontally in the kneespace of free-standing desks or panel-supported worksurfaces.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Reels
• Black plastic only

Actual Dimensions

Depth	1¼"
Width	8"
Height	8 ⁵ / ₁₆ "

Termination Plate

Termination plate is available for field installation to accommodate junction boxes for connections of fiber-optic cables and other cable types.

► Specifying, page 453

Bracket allows termination plate to be connected to worksurface.

Opening provides access to a termination device.

NEMA standard hole pattern allows virtually all conventional boxes and termination devices to be connected.

Product Details

Faceplates and junction boxes can be added to support fiber-optic or ordinary voice/data networks.

Connections

Termination plate is field installed beneath the worksurface in any position needed. Usually, it is located at the back of the worksurface so it doesn't obstruct kneespace.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Termination plate

- Black plastic only

Actual Dimensions

Depth	3/4"
Width	7 1/8"
Height	7 1/8"
Center opening	2 3/4" diameter

Cord Reels

► Specifying, page 453

Product Details

Cord reels, field installed under the worksurface, take up excess cord or cable.

Surface Materials

Cord reels

- Black paint

Cable Storage Tray

► Specifying, page 454

Product Details

Cable storage trays, field installed under the worksurface, hold cables out of the way.

Surface Materials

Cable storage tray

- Black paint

Wire Guide Clips and Wire Clips

► Specifying, page 454

Product Details

Wire guide clips and wire clips have an adhesive back to allow them to stick to painted metal components under a worksurface for routing and managing cords.

Surface Materials

Wire guide clips and wire clips

- Black plastic

Double clip can be screwed to the underside of a worksurface.

Wire Manager

► Specifying, page 455

Product Details

Wire manager, ordered separately, organizes cables routed vertically or horizontally beneath the worksurface. It can be cut on site as needed.

Surface Materials

Wire manager

- Black plastic

:	:	:	:	:	:	:

If a counterweight is not required in any condition for a particular style number, the product specification page will indicate not required.

Requirements for Freestanding Applications

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for lateral files, towers, cabinets, and bookcases anchored to the floor.

Floor anchor bracket (for TS Series Storage, TS 200 Series Storage, 900 Series Storage, 800 Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.

Floor anchor brackets for Universal with FrameOne foot secure lateral files and towers to the floor for stability or in seismic zones to reduce the risk of hazards during earthquakes.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent.

Wall Anchors

2. Counterweights are not required for lateral files, towers, cabinets, and bookcases anchored to the wall.

For wall anchoring of lateral files, towers, cabinets and bookcases, consult with the building's designated design professional (architect or engineer) and work with local codes authorities for approvals to ensure adequate support when product is fully loaded.

Ganging Brackets

3. Counterweights are not required for lateral files, towers, cabinets, and bookcases ganged back-to-back with ganging hardware.

TS Series towers which do not include ganging hardware, order 8425808SR from Service Parts.

Counterweights

Units ganged side-by-side **require** counterweights.

Requirements for Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.

► See *Panel Stability Guidelines* in the appropriate panel specification guide. (Storage may support panel stability)

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for Two Drawer lateral files installed right below a worksurface attached to the panel system when the application is mirrored back-to-back (a two-pack minimum).

TS Series underworksurface lateral files are only intended for use under a panel-mounted worksurface and cannot be used as freestanding.

**1.5-High
Intermediate
Support**

2. Counterweights are not required for One-High and 1.5-High lateral files and cabinets used with an intermediate support, when the application is mirrored back-to-back (a two-pack minimum).

Note: This includes storage either perpendicular or parallel to the panel.

**Storage-to-Panel
Connector**

**1.5-High
Intermediate
Support**

3. Counterweights are not required for One-High, 1.5-High, and Two Drawer lateral files and cabinets used with a storage-to-panel bracket to support the panel run if the application is mirrored back-to-back (a two-pack minimum) and the panel run is equal to or greater than 6'.

**Storage-to-Panel
Connector**

4. Counterweights are not required for towers used with a storage-to-panel connector to support the panel run, if the application is mirrored back-to-back (a two-pack minimum) and the panel is equal to or greater than 5'.

Requirements for Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
▶ See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. A counterweight is not required for a single Two Drawer lateral file attached to desks connected in an L-configuration.

2. A counterweight is not required for a single Two Drawer lateral file attached to a desk made with corner, extended corner, or 120 degree corner worksurfaces.

L-configurations with two or more lateral files **require** counterweights in each file.

Configurations with two or more lateral files **require** counterweights in each file.

Counterweights are **required** for all lateral files in stand-alone desk or credenza applications.

Hutch kit applications with lateral files always **require** counterweights in the lateral files.

Requirements for Pedestals in Freestanding Applications

Counterweights are required for all freestanding applications.

1. Universal fixed pedestals converted to freestanding pedestals require a counterweight and drawer interlock system.

Universal fixed to freestanding pedestal conversion kit includes 1/8"H steel top, counterweight package, and drawer interlock system.

Fixed pedestals, converted to freestanding with a laminate or veneer top, require a counterweight and drawer interlock system. Drawer interlock system is available from service parts.

TS Series fixed pedestals are only intended for use under a panel-mounted worksurface and cannot be converted to freestanding.

Laminate fixed pedestals can never be freestanding.

2. Mobile pedestals include counterweight and drawer interlock system as standard.

Requirements for Pedestals in Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.

► See *Panel Stability Guidelines* in the appropriate panel specification guide.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

Counterweights are not required for fixed pedestals installed below a worksurface attached in a panel spine application. Single workstation applications **require** a counterweight in each pedestal.

Requirements for Pedestals in Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
 ▶ See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Single pedestal desks less than 48"W require a counterweight and an interlock. Single pedestal desks with 30"D pedestals require a counterweight and interlock.

Tip: Interlock is available as a service part for Universal pedestals, 1043575SR for box/box/file and file/file configurations.

60"W or greater

2. Double pedestal desks 60"W and wider only require one pedestal with counterweight.

Less than 60"W

All other desk applications with multiple pedestals **require** a counterweight for each pedestal.

3. Counterweights are not required for a single fixed pedestal in desk with hutch kit applications. Any additional pedestals within the application **require** counterweights.

Requirements for Pedestals in Answer Freestanding Desk Applications, continued

4. A counterweight is not required for a single fixed pedestal attached to a desk attached to another worksurface in an L-configuration. Any additional pedestals within the application require counterweights.

5. A counterweight is not required for a single fixed pedestal attached to desks made with corner, extended corner, or 120 degree corner worksurfaces. Any additional pedestals within the application require counterweights.

Universal Pedestals

27"H fixed pedestals

are floor-standing and can support worksurfaces at 28½"H.

- ▶ Specifying, page 458
- ▶ Specifying *Storage Accessories*, page 511

Top is open and accommodates attachment to a worksurface. Attachment hardware is included.

Lock is standard on pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.

- ▶ *Lock and Keying*, page 560

Leveling glides adjust to install pedestals on uneven floors. 25½"H pedestals have a 7⁄8" adjustable glide range, and 27"H pedestals have a 17⁄8" adjustable glide range.

Mobile pedestals fit under a worksurface and can be moved wherever storage is needed. They provide an auxiliary work-surface when you need more space to spread out your work.

- ▶ Specifying, page 464
- ▶ Specifying *Storage Accessories*, page 511

Finished back and sides are standard.

Four casters are hard composition and non-locking, with a full-rotation swivel mechanism. Casters are exposed at the base of box/file pedestals and concealed with the base of box/box/file and file/file pedestals.

Drawer fronts are available in steel, laminate, or wood veneer. Mobile pedestals maintain drawer pull and drawer front alignment with other storage components that have a 3" base.

Pull on proud-front pedestal is available in a variety of shapes.

3"H base is integral to 27"H pedestal case.

Pull on flush-front pedestal is full width and integral. This pull is available on steel drawer fronts only. Full-width wood pull is available as an option. Wood pull, if selected, ships separately from pedestal and is field installed, attaching to the integral pull with double-sided tape.

Drawers open their full depth for total access to the contents. Box and file drawers are available.

Top on mobile pedestal is 1⁄8"H steel. Additional top options are available.

Mobile pedestal cushion top provides a temporary seat ideal for informal gatherings. Optional handle can be extended to easily transport mobile pedestal. Available factory- or field-installed.

- ▶ Specifying, page 466

Product Details

Box drawers are a welded steel construction and available with proud or flush fronts. One divider is included with each box drawer.

File drawers are a welded steel construction and available with proud or flush fronts. Drawer body sides are full height and accommodate front-to-back filing of hanging letter-size file folders.

Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders. *Exception: Legal-size file folders cannot be filed in 17½"D or 18¾"D pedestals.*

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Actual Dimensions

	Fixed	Box/File	Box/Box/File and File/File
Depth with flush steel front	17½", 22⁵⁄₈", and 28⁵⁄₈"	17½" and 22⁵⁄₈"	17½" and 22⁵⁄₈"
Depth with proud steel, laminate, or wood front	18¾", 23½", and 29½"	18¾" and 23½"	18¾" and 23½"
Width	15"	15"	15"
Height	27"	N.A.	N.A.
Overall height with 1⁄8"H top	N.A.	21"	27"

Pencil tray to hold small office supplies is included with each box/box/file pedestal.

Optional basic drawer interior allows box/box/file pedestals to be ordered without rails, box drawer dividers, or pencil trays.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 128 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel drawers only.

Label holders are available through Service Parts. Label holder fits inside the integral pull of flush-front drawers and over the top edge of drawer front on proud-front drawers.

Safety interlock system allows only one drawer to be opened at a time for added stability.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 560

Individual drawer locks are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed lock cylinders. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 560

Non-locking pedestal is available as an option.

27"H fixed pedestals have base alignment with other Universal Storage components that have a 3"H base.

Steel, laminate, and wood veneer tops are available in place of standard 1/8"H steel tops. 1"H steel tops, 1 3/16"H laminate with square edge profile, and 1 3/16"H wood veneer with square edge profile.

Handle of mobile pedestal cushion top is retractable. In the stowed position, handle is flush with mobile pedestal front. In the travel position, handle is completely extended and articulates upward for longer distance transport. Cushion top is also available without a handle.

Mobile pedestal cushion top for field-installation can be used with mobile pedestals RPM2421CP, RPM2421CF, and RPM2421CW only.

Basic cushion enhanced is ordered separately for use on Universal mobile pedestals with metal, laminate, or veneer top. Basic cushion enhanced is field-installed and attaches to the existing top with hook and loop fastener.

Basic cushion enhanced for field installation can be used with mobile pedestals RPM1821CF, RPM1821CP, RPM1821CW, RPM2421CF, RPM2421CP, and RPM2421CW only.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

Fixed pedestals are intended to attach under a worksurface for security and support. Three pedestal depths are available to correspond with Universal Worksurface depths. Proud-front pedestals exactly match the depth of Universal Worksurfaces. Flush-front pedestals are 1/8" shorter.

Filler conceals the gap that may exist between the face of a panel and the back of a 27"H pedestal. Fillers are also used to provide stability for pedestal and worksurface configurations that are not panel-wrapped.
Tip: Fillers for proud front pedestals conceal a 1/2" gap. Fillers for flush front pedestals conceal a 1 3/8" gap.

Freestanding applications that don't require attachment to a worksurface should be used with a conversion kit that includes a steel top, counterweight package, and components to convert the locking system to a safety interlock system.
 ► Page 462

Field-installed accessories are available, including pencil trays, stationery trays, dividers, and rails.
▶ Page 511

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets or other cable-routing accessories.

Surface Materials

- Leather

Basic cushion enhanced

- Fabric

Tip: For both cushion top and basic cushion enhanced: fabric patterns with a linear design will always be applied from the front to back of the unit or the depth of the unit. Pattern matching will not be done on COM.

Application Topics

Storage Capacities and Dimensions

▶ See *Storage Specification Guide*

Counterweight Requirements for Storage Products

▶ Pages 193–200.

Shipping

Fixed pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Mobile pedestals are shipped in corrugated board to minimize damage during transport.

Universal Sliding Door Bins

For Use with Montage

Universal sliding door bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.

► Specifying, page 468

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Steel, laminate, and wood front doors glide smoothly from one side of the case to the other.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Lock is standard on bins to secure the door. The door can be locked in the closed position on either the right- or left-hand side of the bin. Lock is located underneath the center of the shelf. Lock is standard factory-installed, keyed random. A no-lock option is available.

► Lock and Keying, page 560

Recess beneath unit can accommodate a shelf light.

► Page 258

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Omit brackets option must be specified when bin is being used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► Lock and Keying, page 560

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit.

► Page 258

Actual Dimensions

Depth	15 ³ / ₄ "
Width	36", 42", 48", 60", 66", and 72"
Height	16 ¹ / ₄ "

Divider is available as an option on overhead bins. Dividers ship in a package of four.
▶ Page 222

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Universal sliding door bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.
Tip: Select the omit brackets option when ordering the bin.
▶ Page 480

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced. Montage bin brackets will not work with these wall channels, order Answer bins for this application.

Overhead storage components cannot be attached to Montage frames with glass tiles.

86"H Frames

65"H Frames

20"H

Overhead storage components install at 65"H only. They cannot install on a 10"H stacker or any base frame lower than 65"H.
Tip: A special half-height shelf is available, contact Systems Specials Group for an engineering quote.

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

Rules for Frame Stability

▶ Page 44

Universal Over the Case and In the Case Bins

For Use with Montage

Universal over the case

bins can be attached to panels with an on-module bracket and provide overhead storage in the work space.

► Specifying, page 470

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets

are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Bin is steel and ships assembled.

Universal in the case

bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel, laminate, or wood.

► Specifying, page 472

Flat-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.

► *Lock and Keying*, page 560

Recess beneath unit can accommodate a shelf light.

► Page 258

Flat-front lift-up doors (steel, laminate, or wood) recess into the overhead storage bin.

Product Details

On-module attachment brackets are independent of the storage bins and unique to the panel system they are used on. The following style number suffixes indicate the panels they attach to:

TAK = Answer and Kick

AVR = Avenir

MON = Montage

If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets

, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth 15¾"

Width 24", 30", 36", 42", 48", 60", 66", and 72"

Height 16¼"

Horizontal off-module brackets, optional, accommodate off-module installations of overhead bins on all widths of Montage enhanced off-module panels.

Tip: Maximum width for a horizontal off-module bin that is mounted on an enhanced off-module Montage panel is 48"W.

Tip: Horizontal off-module brackets push bin out from panel 5/8" on enhanced off-module Montage panel.

Tip: Only two pairs of off-module brackets and associated storage can be mounted per frame.

Tip: Horizontal off-module brackets are visible below the overhead bin.

Tip: End of bin must be 4 1/2" or more past the joint of the panels in an off-module application.

Horizontal off-module brackets cannot span a vertical frame rail or joint on enhanced off-module Montage panel only.

Picture frame door, optional, is available on Universal over the case and in the case bins with flat steel fronts only, and is an aluminum door frame with acrylic or glass inserts. An omit insert option is also available which allows custom material to be field installed in the aluminum door frame.

The acrylic door insert is a white acrylic. A door assist mechanism is not available as an option on a bin with an acrylic door insert due to the light weight door.

The glass door insert is tempered translucent glass. If a glass door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Due to the weight of the glass door insert, it is recommended to specify the optional door assist mechanism.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. The weight of a custom insert on a Universal over the case bin can not exceed 10 1/2 pounds. An insert for a Universal over the case storage bin door with an assist mechanism must weigh within the range of 7 1/4 pounds to 10 1/2 pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix.

▶ See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 217

Door assist mechanism, optional, consist of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal bins ship with two assist mechanisms per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 560

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

▶ Page 258

Divider is available as an option on overhead bins. Dividers ship in a package of four.

▶ Page 222

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Universal over the case bin may be mounted at 38\"H or lower if another panel-mounted component prevents it from being seated upon.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as a separate style number.
Tip: Select the omit brackets option when ordering the bin.

▶ Page 480

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced. Montage bin brackets will not work with these wall channels, order Answer bins for this application.

Overhead storage components cannot be attached to Montage frames with glass tiles.

86\"H Frames

65\"H Frames

Overhead storage components install at 65\"H only. They cannot install on a 10\"H stacker or any base frame lower than 65\"H.
Tip: A special half-height shelf is available, contact Systems Specials Group for an engineering quote.

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

For Universal In the Case Bins

Bin Width	Door Width	Custom Picture Frame Door Inserts

75"	37½" (per door)	15.000"	36.664"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Hutch Kits

Hutch kits allow one Universal sliding door, over the case, or in the case bin to be mounted above a desk or credenza, to provide privacy and overhead storage. A hutch kit includes two end supports, a back panel for the bin, an accessory rail, a double-sided tackboard, one cable manager, and attachment hardware.
 ▶ Specifying, page 475

Bins are sold separately. Any Universal sliding door, over the case, or in the case bin can be used. Select the omit brackets option when ordering the bin.

Painted steel back panel encloses the storage bin so the hutch does not need to be panel wrapped.

End panels support the storage bins and are attached to the work surface with screws.

Double-sided tackboard can be ordered with matching or contrasting fabrics.

Accessory rail accepts the hutch kit receptacle, selected worktools, and the dividers that are an option to the storage bin.

1½" gap below the accessory rail allows plugs and cords to be routed between the rail and the worksurface. A painted metal access cover slides up and down to allow plugs to pass through without creating a large visible gap.

Product Details

Double-sided tackboards are standard with hutch kits. They divide space, increase privacy, and provide a display surface.

Accessory rail accepts the dividers that are available as an option to the storage bin and the hutch kit receptacle. The rail also accepts selected worktools. A 1½" gap below the accessory rail allows plugs and cords to be routed between the rail and the worksurface. A painted metal access cover slides up and down to allow plugs to pass through without creating a large visible gap.

Power receptacles are available for field installation on the accessory rail, providing access to power at worksurface height.

Actual Dimensions

Depth	14 ⁷ / ₈ "
Width	24", 30", 36", 42", 48", 60", 66", or 72"
Height	37 ⁵ / ₁₆ "

Connections

Hutches can be used on 23½"D, 24"D, 29½"D, and 30"D freestanding desks and credenzas. They can also be used on full-depth corner and extended corner worksurfaces.

24"W and 30"W hutches can also be mounted on the ends of desks, credenzas, and bullet peninsula worksurfaces that are at least as deep as the hutch is wide.

Hutch end supports attach to the work surface using screws that are shipped with the hutch kit.

Hutch connector bracket is available to connect two or more hutch kits side by side. ▶ See *Desk Stability Guidelines*, page 158

Shelf lights are available to recess into the bottom of storage bins.

Wiring & Cabling

Light cords can be routed through a hutch vertical cable manager, and then through the gap between the accessory rail and the work surface. One non-handed, painted steel vertical cable manager is shipped with each hutch kit. Additional cable managers, ordered separately, are available.

Surface Materials

End supports, back panel, vertical cable manager, and accessory rail

- Paint

Tackboard

- Vertical surface fabric

Power receptacle

- Black plastic only

Pricing

Tip: To price a tackboard with fabrics in two different price groups on opposite sides, add the two prices together and divide by two.

Application Topics

Clearance between the work surface and the bin is 21⅛".

Hutch end panels must be located immediately above a floor support that stabilizes the front and back edges of the work surface, such as a pedestal, an end support, or a pair of legs.

Steelcase worktools are available for use on accessory rail including letter tray, pencil cup, double square cup, shallow dish, office in a file, mini shelf, personal shelf, and slatshelves. For product information, see the *Steelcase Worktools Specification Guide*.

Shipping

Hutch kits are assembled in the field.

Universal Shelves

For Use with Montage

Universal shelves

supported by Answer, Kick, Avenir, and Montage, provide overhead storage in the work space.

► Specifying, page 478

Metal backstop on Universal shelves

prevents notebooks and equipment from damaging panel surface.

On-module attachment hooks

are integral to the end supports and are used to mount shelves on panels of the same width as bins.

Safety catch

locks shelf units to frame to prevent accidental removal.

Shelves are steel and ship ready to assemble.

Actual Dimensions

Depth	14 ³ / ₄ "
Width	24", 30", 36", 42", 48", 60", and 72"
Height	11 ¹ / ₂ " (Montage only)

Product Details

Shelf lights are available for use beneath shelves. Lights recess into the bottom of the overhead storage unit.
▶ Page 258

Dividers are available field installed for use on Universal shelves. Dividers ship in a package of four. Dividers cannot attach to Universal personal shelves.

Universal shelves for use on Montage panels have a taller end support to accommodate vertical slots in frame.

Universal shelves cannot mount on a 55"H Montage frame. Contact Steelcase Specials for a solution on a 55"H frame.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

On-module attachment hooks cannot be attached to upmount brackets.

Width of shelf must match the width of the panel or panels that it is attached to with the on-module brackets. Shelves may span up to two frames.

Overhead storage components cannot be attached to Montage frames with glass tiles.

Overhead storage shelves install at 65"H only. They cannot install on a 10"H stacker or any base frame lower than 65"H.
Tip: A special half-height shelf is available, contact Systems Specials Group for an engineering quote.

Wiring & Cabling

Vertical wire managers conceal cords and cables that are routed vertically outside of the panels.

Horizontal Wall Attachment Brackets

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins

Horizontal Wall Attachment Brackets

Horizontal wall attachment brackets can attach to wall of building to accept Universal sliding door, Universal over the case, and Universal in the case storage bins. Brackets will not accept bins introduced prior to March 2007, TS Series bins.

► Specifying, page 480
Tip: Specify as a separate style number.

Product Details

Horizontal wall attachment brackets must match the width of the storage bin.

Tip: Select the omit brackets option when ordering the bin.

Horizontal wall attachment brackets include brackets and a steel back to enclose the storage bin.

Horizontal wall attachment brackets can be positioned on wall at height needed.

Connections

Horizontal wall attachment brackets can be used to attach Universal sliding door, Universal over the case, and Universal in the case bins to a building wall. TS Series cannot attach to horizontal wall attachment brackets.

Shelves can not hang off horizontal wall attachment brackets.

Mounting of horizontal wall attachment brackets must include attachment to at least two wall studs, but it is recommended to attach to all studs in wall behind the storage bin. Storage bins that are 24"W or 25"W can only be mounted with horizontal wall attachment brackets if wall is constructed with 16" stud centers.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with 5/8" thick Toggler R-type 3/16" wall anchors with countersunk flat head screw.
- Wood studs with #10 wood screws of appropriate length with countersunk flat head screw.
- Steel studs with #10 sheet metal screws of appropriate length with countersunk flat head screw.

Limit of one bin for each horizontal wall attachment bracket.

Attaching worksurfaces to horizontal wall attachment brackets is not possible.

Horizontal wall attachment brackets allow overhead storage bin to fit flush to wall.

Actual Dimensions

Width 24", 30", 36", 42", 48", 60", and 72".

Surface Materials

Brackets and steel back

- Paint

Slim Shelves

Slim shelves provide a panel-supported surface that attaches to Answer, Kick, Avenir, and Montage with panel-specific brackets.
 ▶ Specifying, page 481

Slim shelf is an extruded aluminum shelf that provides storage for small items.

Product Details

Slim shelves attach to Answer, Kick, Avenir, and Montage with panel-specific brackets.

For Montage, slim shelves can be used on any enhanced Montage frame, including monolithic frames, and any standard Montage frame manufactured after July 2001.

Gap at back of slim shelf allows routing of shelf light cord.

Slim shelves can be mounted off-module. No more than 12" overhang on either side of panel is recommended. Brackets attach on vertical seams of panel, while the shelf adjusts off-module on the brackets.

Slim shelves will mount on 10"H stacker frames. Shelf only has one slot requirement for left side of shelf and one slot requirement for right side of shelf.

Slim shelves hang from the standard slots in any Montage frame. Recommended height is 36"H from the floor.

Two attachment brackets are included with shelves less than or equal to 48"W. Two attachment brackets and a mid-span support are included with shelves wider than 48"W.

Answer will not support two shelves installed end-to-end.

Panels	TS Series Bins, Universal Bins, and Universal Shelves—On-Module	Universal Bins—Single Side Vertical Off-Module	Universal Bins—Two Sided Vertical Off-Module	Universal Bins—Horizontal Off-Module (for use with Technology Wall and Montage only)	Universal Bins—Upmount
Answer	●	●	●		●
Kick	●	●	●		●
Avenir	●	●	●		●
Montage	●	●	●	●	●

On-Module Brackets and Hooks

On-module brackets and hooks are used to mount overhead bins and Universal shelves to panels with vertical slot patterns. Answer, Kick, Avenir, and Montage panels can support on-module attachment brackets.

Universal personal shelves can attach on-module to all panels except Montage.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability.

Tip: See Stability Guidelines in each corresponding specification guide.

On-module attachment brackets install in panel seams.

On-module brackets can be used above and adjacent to slatwall on Answer and Montage Panels.

On-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Off-module brackets are used with bins up to 12" larger than the panel, allowing them to overhang the panel seam.

Off-Module Brackets

Vertical off-module brackets, optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

Vertical off-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Vertical off-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Horizontal off-module brackets, optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

Horizontal off-module brackets can be used above and adjacent to slatwall on Montage panels.

Horizontal off-module brackets can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

Horizontal off-module brackets push bin out from panel 5/8" on enhanced off-module Montage panels.

Horizontal off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

Tip: End of bin must be 4 1/2" or more past the joint of the panels in an off-module application.

Only two pairs of off-module brackets and associated storage can be mounted per frame.

Upmount Brackets

Upmount brackets, optional, can be used with Universal sliding door, Universal over the case, and Universal in the case bins. Brackets attach bins near the top of 54"H panels. Answer over the case bins and Universal shelves cannot be attached to upmount brackets.

Overall upmounted bin height is 68 $\frac{5}{8}$ " when installed on a 55"H Montage frame.

Upmount bin width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Upmount brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Upmount brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Omit Brackets

Omit brackets option must be specified when bin is used in a hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Hutch kit supports bin at 66" height.

Universal One-High, 1.5-High, and Two Drawer Lateral Files

One-High and Two Drawer lateral files

serve a dual purpose as high-density storage and as an inviting space for guests.

► Specifying, page 482

1.5-High lateral files

provide multi-zone storage for binders, hanging folders, and piling surfaces at a height which allows for comfortable guest seating in collaborative environments.

► Specifying, page 482

Label holders

are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Finished back is standard.

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height.

Lock is standard on lateral files and is located at top left corner of drawer. Locks are standard factory-installed, keyed random.

► *Lock and Keying*, page 560

Pulls on flush-front lateral files are full width and integral.

Pulls on proud-front lateral files are available in a variety of shapes.

Top is standard 1"H steel on units with steel fronts and standard 1³/₁₆"H wood veneer on units with wood fronts. Other top options are available.

Drawer fronts are available in steel, laminate, or wood veneer.

Leveling glides adjust up to 3/4" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawers are standard 12"H and open full depth for total access to the contents.

Actual Dimensions

Depth with flush steel or open front 18" and 23¹/₈"

Depth with proud steel, laminate, or wood front 18⁷/₈" and 24"

Width 30", 36", and 42"

Height 16", 22", and 28"

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

Tip: All base options have same overall height.

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Contemporary pull

Handle pull

Jazz pull

Bar pull

c:scape pull

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel drawers only.

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options.

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately.

► Page 512

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately.

► For interior dimensions, see *Storage Capacities and Dimensions* in the *Storage Specification Guide*.

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers per drawer, 12"H file drawers also include one hanging folder bar per drawer. Additional dividers are available and must be specified separately.

► Page 513

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 560

Individual drawer locks are available as an option for an application that would limit access to each drawer. Lateral files include a security shield between drawers to prevent unauthorized access. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying are available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 560

No-top lateral files are available for use with cushion top or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the lateral file.

Security top is available as an option for installations where the file will be installed beneath a worksurface, but not physically attached. Thin steel top prevents unauthorized access to the contents of the cabinet. Security top is not structural and can be specified on 28"H files only. Security top reduces overall height of file to approximately 27"H.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

Cushion top is ordered separately for use on One-High and 1.5-High lateral files without top.

Basic cushion enhanced is ordered separately for use on Universal One-High, 1.5-High, and Two Drawer laterals with metal, laminate, or veneer top. Basic cushion enhanced is field-installed and attaches to the existing top with hook and loop fastener.
Tip: Basic cushion enhanced is available on Universal lateral files with a top only.

When applying the basic cushion enhanced on 30"W or 36"W Universal laterals with an open configuration, a support brace must also be specified.

Storage-to-panel bracket connects One-High, 1.5-High, Two Drawer laterals and cabinets to panel to provide added stability to panels and eliminate the need for return panels.
▶ See page 506

Storage-to-panel connectors cannot be attached to Montage frames with glass tiles.

Wood veneer with square edge profile Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza.
▶ Page 508

Field-installed accessories are available, including drawer accessories and counterweight packages.
▶ Page 511

Floor anchor bracket (for TS Series Storage, TS 200 Series Storage, 900 Series Storage, 800 Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.
Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.
▶ Page 516

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage.
▶ See *Storage Specification Guide*

Surface Materials

Lateral, including steel top, fixed shelf, and integral pulls

- Paint

Contemporary, handle, jazz, and bar pulls

- 0835 Black
- 9201 Polished Chrome
- 9211 Nickel
- 9212 Silver

scape pull

- 4140 Arctic White Gloss
- 4144 Black Gloss
- 4799 Platinum Metallic

Wood veneer top, lift-up door, and drawer fronts

- Wood veneer—
 - Open pore finishes
- Customiz stain (option)
- Full-fill finish (option) is available on field-installed wood veneer tops only.
Tip: Specify file with no top option.

Laminate top, lift-up door, and drawer fronts

- Laminate
- Open Line laminate (option)

Lock

- 9201 Polished Chrome
- 9250 Ember Chrome (option)

Drawer bodies, hanging folder bars, rails, and dividers

- Black

Cushion top

- Fabric
- Leather

Basic cushion enhanced

- Fabric

Tip: For both cushion top and basic cushion enhanced: fabric patterns with a linear design will always be applied from the front to back of the unit or the depth of the unit. Pattern matching will not be done on COM.

Cushion top will be manufactured in a four seam pattern in all standard solid color seating upholstery, leather, vinyls, COM leathers, and COM vinyls. These upholsteries are:

- Brisa
- Buzz2
- Cogent: Connect
- Elmosoft Leather
- Foundation
- Gaja
- Leather
- Select Surfaces Leather
- Stand In
- Vinyl

Cushion top will be manufactured in a two seam pattern for all approved standard patterned seating upholstery, leather, vinyl, COM leathers, and COM vinyls. All approved standard textured upholsteries will also be manufactured in a two seam pattern including leather, vinyl, COM leathers, and COM vinyls.

Basic cushion enhanced will be manufactured in a two seam pattern for all approved standard seating upholstery and Customer's Own Materials (COMs).

Note: Leathers and vinyls are not approved for basic cushion enhanced.

Application Topics

Storage Capacities and Dimensions

▶ See *Storage Specification Guide*

Counterweight Requirements for Storage Products

▶ Pages 192–200

Shipping

Lateral files are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field-installed.

Universal Towers

Towers provide storage of a variety of work and personal items for an individual, including paper, binders, books, and coats.
 ▶ Specifying, pages 490–494.

Finished back is standard.

Interior of tower is available in a variety of configurations combining coat storage, fixed and adjustable shelves, and file drawers.

Pull on flush-front tower is integral and full height on doors and full width on drawers.

Locks are standard on door and drawers. Locks are standard factory-installed, keyed random. Door and drawer locks are keyed alike.
 ▶ *Lock and Keying*, page 560

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height. All other universal towers are available with the universal 3" base only.

Leveling glides adjust up to $\frac{3}{4}$ " for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install tower on uneven floors.

Drawers open their full depth for total access to the contents.

Top is standard 1"H steel. Other top options are available.

Door is available in steel, laminate, or wood veneer. Hinges are European-style and allow doors to open to 110° for full access to the interior. Door is available hinged on left or right.

Locker space is 9" wide and standard with a coat rod.

Pull on proud-front tower is available in a variety of shapes.

Drawer fronts are available in steel, laminate, or wood veneer.

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

All base options have same overall height. FrameOne foot base and c:scape glide base are only available on 18"D and 24"D open side towers.
Tip: Power infeed sits proud of the panel approximately 3" and will interfere with Universal storage with the Universal 3" base, FrameOne footbase, or c:scape glide base.

Actual Dimensions

Depth with flush steel front	18", 23 $\frac{1}{8}$ ", and 29 $\frac{1}{8}$ "
Depth with proud steel, laminate, or wood front	18 $\frac{7}{8}$ ", 24", and 30"
Width	24"
Height	47 $\frac{1}{2}$ ", 52", and 65 $\frac{1}{2}$ "

Interior of tower combines coat storage, box and file drawers, fixed and adjustable shelves.

Flush-front pull is integral and full height on the door and full width on the drawers. Pull is available on steel doors and drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Door pull is 192 mm and drawer pulls are 128 mm. Proud-front pulls are available on steel, laminate, or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Adjustable shelves on open side towers are recessed from the front and side of the tower. Shelves adjust in 2 1/2" vertical increments.

Frosted glass adjustable shelves are available as an option on open side towers. *Tip: If glass shelves are selected, they will replace all steel shelves in the unit.*

Post on open side towers supports adjustable shelves and is painted to match the case.

Adjustable shelves in dual door towers can be positioned in the interior of the tower in 3/4" vertical increments using a reversible bracket. The first shelf above a file drawer is a fixed shelf.

Drawer accessories include one divider and one pencil tray in each box drawer. File drawers can accommodate front-to-back filing of letter-size hanging folders without the use of additional accessories.

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Door and drawer locks are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 560

Drawer lock in open side tower is located in the top file drawer.

Drawer lock in dual door tower is located approximately 36" from the floor and also secures the lift-up door on 65 1/2"H units.

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the tower.

Top will default to steel on towers with proud wood fronts since the door overlaps and partially conceals the top. Wood top is available as an option.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

High storage-to-panel connector provides added stability to panels and eliminates the need for return panels.
▶ See page 506

Worksurface-to-tower connector eliminates the need for other worksurface supports such as legs or end supports next to the tower.
▶ See page 506

Worksurface to tower connector eliminates the need for other worksurface supports such as legs or end supports next to the tower.
▶ See page 239

Worksurface to tower alignment. Proud front towers align with 23½"D, 24"D, 29½"D, and 30"D worksurfaces. Flush front towers extend 7/8" beyond 24"D and 30"D worksurfaces, and 1/8" beyond 23½"D and 29½"D worksurfaces.

Field-installed accessories are available, including drawer accessories and shelf bookends.
▶ Page 511

Floor anchor bracket (for TS Series Storage, TS 200 Series Storage, 900 Series Storage, 800 Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.
Note: Local seismic requirements vary.

Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.

Counterweight Requirements for Storage Products
▶ Pages 193–200

Shipping

Towers are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field installed.

Universal Lateral Files

Lateral files are ideal for high-density paper storage.
 ▶ Specifying, page 500

Finished back is standard.

Lock is standard on lateral files and secures all drawers and lift-up door. On 52"H and 65½"H files, lock is located at top left corner of drawer that is third from the bottom. On 28"H and 40"H files, lock is located at top left corner of top drawer. Locks are standard factory-installed, keyed random.
 ▶ *Lock and Keying*, page 560

Base is 3"H and is integral to the case.

Leveling glides adjust up to ¾" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawer and lift-up door fronts are available in steel, laminate, or wood veneer.

Pulls on proud-front lateral files are available in a variety of shapes. Pulls are located at the top of a drawer and at the bottom of a lift-up door.

Top is standard 1"H steel on units with steel fronts and standard 1¾"H wood veneer on units with wood fronts. Other top options are available.

Product Details

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Drawers open their full depth for total access to the contents are standard 12"H.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Pull on flush-front lateral file is full width and integral.

Actual Dimensions

Depth with flush steel front	18" and 23½"
Depth with proud steel, laminate, or wood front	18⅞" and 24"
Width	30", 36", and 42"
Height	40", 52", and 65½"

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options. *Tip: Your specification for optional drawer interiors will apply to all the drawers within a single lateral file.*

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately. ▶ Page 512

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately. ▶ See *Storage Specification Guide*.

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately. ▶ Page 513

Lift-up door with fixed shelf is standard in the top position of 65½"H cases. Door is 13½"H to accommodate standard-height binders. Door on lateral files with flush-front recesses inside the case; door on proud-front case lifts up above the case.

Lift-up door on flush-front cases is available with an optional roll-out shelf in place of the standard fixed shelf. Roll-out shelf includes three dividers and one hanging file folder bar to function as a backstop.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 560

Individual drawer locks are available as an option for applications where you want to limit access to each drawer. Lateral files include a security shield above each drawer to prevent unauthorized access. In 65½"H cases, the lock in the drawer below controls the lift-up door in the top position. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Field-installed lock cylinders must be specified separately. ▶ *Lock and Keying*, page 560

No-top lateral files are available for installations where cases will be installed under a worksurface or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are 3/16" taller than steel tops and will add that dimension to the overall height of the lateral file.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

Medium storage-to-panel connectors are used with 1.5-High, 2-High, 3-High laterals and cabinets to provide added stability to panels and eliminate the need for return panels. ▶ See page 506

Wood veneer with square edge profile Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza. ▶ Page 508

Storage-to-Panel Connectors

► Specifying page 506

Tip: For use with universal steel storage only.

Product Details

Medium storage-to-panel connector connects 1.5-High, 2-High, 3-High laterals and cabinets to panel to provide added stability to panels and eliminate the need for return panels.

Tall storage-to-panel connector connects towers to panels to provide added stability to panels and eliminate the need for return panels. Tall storage-to-panel connector can be used with 48"H, 4-high, and 5-high towers.

► See *Stability Guidelines*, page 47.

Tall storage-to-panel connectors can only be used on 45"H or taller panels.

Note: Medium storage-to-panel connectors can be used on towers connected to panels shorter than 45"H, but must follow application guidelines for medium connectors.

Application Topics

Storage-to-panel connector can be positioned on the back or side of the cabinet. Connector must be located only on the ends of the back or side of the cabinet. It cannot be positioned anywhere else on the case back or side.

Storage-to-panel connectors can only be used with select storage products:

- Universal lateral files and towers, 900 Series lateral files, or TS 200 Series lateral files manufactured on or after November 2005.
- TS Series Tower Too manufactured on or after January 2009.

Victor2

Victor2 is a recycling solution that is appropriate for supporting larger work groups, conference rooms, and cafés. A mobile unit and two freestanding units are available. ▶ Specifying, pages 518-522

Mobile unit has three openings. Eight insert options are available to pick for the openings. These eight insert options contain English, Spanish, and French.

Receptacles contain features to accommodate oversized bags.

Four non-locking casters are standard. Two casters swivel, and two casters are fixed.

Soft-touch integral handle allows easy movement from one location to another.

Receptacles fit bags from 30 gallon size and larger.

Freestanding unit has four or five openings. Eight insert options are available to pick for the openings. These eight insert options contain English, Spanish, and French.

Leveling glides are fully adjustable up to 1 1/2".

Actual Dimensions

	Mobile Unit	Freestanding Unit
Depth	18"	25"
Width	36"	48" or 60"
Height	36"	36"

Product Details

Mobile and freestanding units are standard with a metal case and top. Front and back of unit are available in wood or laminate.

Acrylic inserts etched with recycling icons are standard on mobile and freestanding units. The verbiage for each icon is in English/Spanish/French on the same insert.

Mobile unit is standard with three openings for inserts and sloped receptacles with built-in bag holding system.

Top on the mobile unit can be used for food service use or tray storage.

Hinged doors on the back are standard on the mobile unit for easy access to receptacles.

Four non-locking concealed casters, two swivel and two fixed, are standard on the mobile unit.

Receptacles in mobile unit can accommodate 12 gallons each. Receptacles in freestanding unit can accommodate 30 gallon size and larger.

Soft-touch integral handle on mobile unit allows for easy movement from one location to another.

Freestanding unit is standard with either four or five openings for inserts on the top of the unit.

Hinged doors on the front are standard on the freestanding unit for easy access to the receptacles.

Leveling glides on freestanding units are fully adjustable to 1 1/2".

Tray shelf can only be used with the freestanding unit.

Tray shelf fits most trays up to 20 3/4" x 12".

Freestanding four- or five-slot opening will accommodate two tray shelves.
Tip: A gap of 15" will separate the two tray shelves on a five-opening unit.

Maximum capacity of tray is 20 food trays with maximum size of tray 20" x 20".

Display holds two 8 1/2" x 11" papers or one 11" x 17" paper.

Tip: Paper will be between two acrylic plates. Paper can easily be replaced without tools.

Display can only be used with the freestanding unit.

Freestanding four- or five-slot opening will accommodate two displays.
Tip: A gap of 18 1/2" will separate the two displays on a five-opening unit.

One tray shelf and one display can be used on the freestanding unit.

31"H Enhanced Standard Frames

31"H enhanced standard frames are designed to support ADA compliant transaction tops. The frame is designed to link horizontally to create visual space division and accommodate electrical routing. Frame accommodates worksurfaces and transaction tops.

Openings in frame allow pass-through cable routing.

Frame is structural and not recommended for stacking.

End trim is available to finish the exposed end of a run of frames.

Base cavity can accommodate a powerkit to provide electrical receptacles in the base. In addition, if power is not used at base, the entire base cavity can be used for cable distribution and voice/data quick connects.

Enhanced tiles work on enhanced standard frames or enhanced monolithic frames.

Top cap finishes the top surface of frames.

Gaskets inside the panel frame eliminate all light leaks.

Non-tackable tiles are available with a painted or laminate surface.

Base cover is available plain or with openings to accommodate receptacles. You can mix plain and power base covers on opposite sides of the same frame.

Leveling glide is adjusted before the tile is installed. Range is 2".

Product Details

7"H enhanced tiles are available in painted steel and laminate.

20"H enhanced tiles are available in many versions—tackable acoustical, high-performance acoustical, painted steel, patterned steel, fabric-covered steel, laminate, wood, marker-board, slatwall, glass, and base fiber-in. They can be used on the lower portion of the 31"H frame.

Top caps are provided and available in metal.

Actual Dimensions

Depth (thickness)	3"
Width	24", 30", 36", 42", or 48"
Height	31"
Leveling glide range	2"

Connections

Frames can support other components including work-surfaces and transaction tops.

Vertical end trim can be ordered to finish the exposed end of a run of frames. Trim is available in metal.

Junctions are available to join adjacent frames of the same or different heights together in L- and T-configurations. Although junctions are not required to join frames in a straight line, an in-line I-junction is available to maintain alignment with frames that are joined with junctions.

Wiring & Cabling

Base power-in brings power to the frames at the right-hand receptacle location in the base.

Internode is available to be field installed to bring power and voice/data outside of the frame and mount above or below the worksurface.

Powerkit in the base of frame is field installed to provide three wiring schematics using an eight-wire system. Pass-through powerways are also available when you want to extend the network without installing receptacles in one of the frames.
▶ Page 52

Openings in frame allow cables to be routed inside the walls of a workstation.

Junctions allow cables and transfer cables to be routed vertically.

All frames are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

31"	55"	24"
31"	65"	34"

7"H Enhanced Tiles

7"H tiles finish the top section of 31"H frames.

Laminate tiles are decorative, durable, and cleanable. They are non-tackable.

Non-tackable tiles can be painted and patterned. They are durable and cleanable.

Wiring & Cabling

Wedge-shaped connector can be oriented in either direction.

Base fiber-in is positioned above base cavity of frame and doesn't obstruct any receptacle locations.

Inside diameter of conduit is $\frac{3}{4}$ ". In situations where capacity is critical, you should conduct a test using the specific cable types your installation requires.

► Specifying, page 529

Bumper rail brackets allow for bumper rails to be mounted to the Montage frame to protect tiles from impact by carts, mobile equipment, and wheelchairs.

Product Details

Bumper rail bracket package includes four brackets and attachment hardware to accommodate a bumper length of up to eight feet.

Bumper rails should be purchased separately by the customer. Montage frames will accommodate the same bumpers that are used in a facility's hallway, so the same bumper can be used for a consistent aesthetic.

Connections

Bumper rail brackets are field installed onto the Montage frame. Pre-drilled holes allow for mounting at 6", 16", 22", or 27" from the floor to the middle of the bumper rail.

The bracket will allow the bumper rail to be positioned approximately 1" from the tile.

Surface Materials

- **Bracket**
- Paint

► Specifying, page 529

Millwork facade brackets allow custom millwork fronts to be attached to the exterior of a Montage frame. This allows the workstation to look like millwork on the exterior while providing the performance and benefits of a modular system on the user side.

Product Details

Millwork facade bracket package includes four brackets and attachment hardware to accommodate one frame.

Connections

Millwork facade brackets are field installed on the Montage frame.

Application Topics

The creation of the custom facade should begin after the overall dimensions and specification of the Montage workstation are planned. The workstation schematic must be developed before a facade design can be created since the facade needs to work around the size of the frame structure. After careful review and approval of the workstation, standard Montage components can be ordered minus the exterior tiles.

Montage frame components are recommended to be shipped directly to the mill worker so they can fit the custom front around the Montage frame. Allow enough time for the mill worker to complete this step before final installation is expected on site.

Custom facades must include a base that transfers the weight of the facade to the floor.

Surface Materials

- **Bracket**
- Black paint

Flat mount transaction top bracket allows the transaction top to be attached directly on top of a Montage frame with steel top cap.

► Specifying, page 530

Product Details

Bracket package includes two brackets and attachment hardware to accommodate all standard sized transaction tops. These brackets allow the use of a glass tile below the transaction top.

Attachment to a 31" H Montage frame provides an ideal transaction height to meet ADA requirements.

Attachment to a 38" H Montage frame accommodates both sitting and standing positions in a service counter height.

Connections

Flat mount transaction top brackets are field installed only. Select the omit top cap option on the frame when this bracket package is ordered.

Surface Materials

- Bracket**
- Paint

Upmount transaction top bracket allows the transaction top to be attached to the top of a Montage frame, and allows the transaction top to float 3 1/4" over the top of the frame.

► Specifying, page 530

Product Details

Bracket package includes two brackets, attachment hardware, and top cap to accommodate all standard sized transaction tops. These brackets cannot be used on frames with glass tiles.

Connections

Upmount transaction top brackets are field installed only.

Shelf Lights

Standard

► Specifying, page 532

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy-chain cords.

Plug configuration allows two Standard shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves.

Specify LED shelf light or LED linear shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Daisy chain starter cord must be ordered separately when used with Standard shelf lights in a daisy chain application.

Actual Dimensions

Depth 9¹/₄" (235 mm)

Width 24⁵/₈", 36⁵/₈", or 48⁵/₈"
(625 mm, 930 mm, or 1235 mm)

36 ⁵ / ₈ "	36"	25 watts	F25T8-TL735
48 ⁵ / ₈ "	48"	32 watts	F32T8-TL735

Keyhole slots in housing of fixture allow shelf light to be mounted beneath wood or laminate overhead storage bins and shelves using screws provided. Keyhole slots are also used to mount lights to overhead storage bins and shelves manufactured prior to August 1991.

Standard shelf competitive mounting package provides attachment hardware to mount Steelcase shelf lights on all major competitive furniture lines. Package includes screws and installation instructions.

Shelf light can be mounted anywhere from side to side beneath over-head storage bin or shelf. The cord length is the only limitation.

Wiring & Cabling

Power drawn is approximately 1/2 amp.

Daisy chaining permits interconnecting up to six Standard shelf lights from a single power outlet.
▶ Page 267

Starter cord powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

Electronic high-power factor ballast that is roughly 45% more efficient than a normal-power-factor ballast is available on Standard.

Shelf Lights

Bottomline

► Specifying, page 534

Bottomline

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with a three-prong plug or a Chicago plug.

Plug configuration allows two task lights to engage adjacent outlets in one receptacle.

Optics:
Bottomline includes a batwing lens with mylar reflector that provides low glare and broad distribution of light.

Connections

Shelf light mounts recessed or flush depending on the design of the overhead storage bin or shelf. Standard with universal spring brackets for recessed mount or screw-in for flush mount.

Specify LED shelf light or LED linear shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Width	Lamp width	Lamp wattage	Replacement lamps
24"	23.3"	14 watts	F14T5-835
36"	35.1"	21 watts	F21T5-835
48"	46.8"	28 watts	F28T5-835

Lamp life of a fluorescent lamp that turns on and off once a day will last longer than a lamp that turns on and off many times a day. Environmental effects can shorten the life of a lamp, such as: moisture or higher humidity, higher or colder than normal temperatures, excessive vibration, and power surges.

Tip: If the light begins to flicker, or shuts down immediately, the sensor is indicating the lamp is at the end of its life and needs to be replaced.

Wiring & Cabling

Power drawn is approximately 1/2 amp.

Daisy chaining is only available on Bottomline shelf lights.

Daisy chaining on Bottomline permits interconnecting up to six shelf lights from a single power outlet.

► Page 267

Daisy chaining on Bottomline allows for independent operation of lights.

Electronic ballast is more energy efficient than T8 electronic ballasts.

LED Shelf Lights

► Specifying, page 535

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

An 18 watt power supply is used on the LED standard light; it is 9' long with a two prong driver plug.
Tip: Energy saving mini-LEDs greatly reduce power use.

Power supply for LED daisy chain starter light uses an 11' 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting allows shelf light to be installed without tools under most metal overhead storage bins and shelves. This mounting allows the light to be mounted to most competitive steel bins and shelves.

Optional fastener kit allows shelf light to be mounted to wood shelves.

Specify LED shelf light or LED linear shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

LED Linear Shelf Lights

A properly diffused light source under the linear head

provides a softly blended light pattern that reduces eye strain.

► Specifying, page 536

Optional occupancy sensor

turns off after 30 minutes of no activity and will turn back on upon return.

Single touch on/off pad plus touch and hold dimming

for easy individual user control.

Continuous dimming

from 100% to 15% with last state memory.

Cord exits from either end of the light.

Magnetic mounts and wood mount bracket hardware, both come standard with both LED light and optional occupancy sensor.

Light widths available in 17", 31", 44", and 58".

Product Details

LED linear stand alone and daisy chain starter lights include the lamp, power supply, and both magnetic mounts, and wood bracket hardware with adhesive cord managers.

LED linear daisy chain lights include the lamp, daisy chain cords, and both magnetic mounts, and wood mount bracket hardware with adhesive cord managers.

Optional occupancy sensor is a separate component that connects to the light fixture and activates in 30 minutes when no movement is detected to conserve energy. It will also turn back on upon return.

Average rated lamp life of LED linear shelf lights is 50,000 hours.

Color temperature LEDs is 3500K.

Color rendering index of LEDs is 84.

Automatic turn off after 10 hours (+/- 15 mins.); standard with both models.

Connections

Lights mount recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnet mounts allow shelf lights to be installed without tools under most metal overhead storage bins of shelves.

Wood mount brackets allow shelf lights to be mounted to wood shelves.

Wiring & Cabling

Light is standard with single touch on/off and touch control dimming.

User adjustable touch and hold dimming pad includes continuous dimming range of 100% to 15%.

Power supply for 17" linear stand alone only uses a straight plug with a 9' 18 watt 24 volt wall transformer.

Power supply for 31", 44", 58", or 17" starter light; 60 watt compact in-line brick straight plug. The cord is 11', 6' from power supply to power outlet and 5' from power supply to fixture.

Tip: Daisy chain starter light comes with a 60 watt power supply to support up to a limited number of lights – refer to chart for daisy chaining fixtures. Daisy chain secondary lights do not come with a power supply, but instead come with two daisy chain jumper cords, one 8" and one 30" set.

Chart for Daisy Chaining Fixtures

Standard Output Linear Shelf Light											
Light fixture widths	Maximum number of fixtures allowed with daisy chain starter light										
	17"	6	4	3	2	2	1	1	-	-	-
31"	-	1	-	2	-	2	1	3	1	1	-
44"	-	-	1	-	-	-	1	-	1	-	2
58"	-	-	-	-	1	-	-	-	-	1	-

High Output Linear Shelf Light				
Light fixture widths	Maximum number of fixtures allowed with daisy chain starter light			
	17"	4	2	1
31"	-	1	-	2
44"	-	-	1	-

- A 60 watt power supply is required for daisy chaining.
- Total system wattage of all fixtures together cannot meet or exceed 60 watts, see chart.
- Cannot daisy chain standard output and high output together.
- Cannot daisy chain 58" high output fixtures.
- Occupancy sensor must be positioned between the power supply and the first starter fixture.
- Only need one sensor when daisy chaining.

Tip: Each column is the maximum number of fixtures that can be daisy chained together.

Occupancy Sensor

- Turns off after 30 minutes of no activity and will turn back on upon return
- 360° lens view
- 90° outward detection angle
- 30" diameter coverage if mounted 15" above worksurface
- 36" diameter coverage if mounted 18" above worksurface
- Connects to fixture with one end-to-end connector. 8" or 30" jumper cords

Daisy Chaining

For Standard and Bottomline Lights

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

For Standard shelf lights, starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Power will not be interrupted in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.

For Bottomline lights, starter light is required with daisy chain lights to bring power to the first light in the daisy chain.

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

Vertical Wire Managers

Vertical wire manager

conceals task light cord or cable that is routed vertically along the edge of frames.

► Specifying, page 538

Product Details

Two lengths are available for typical applications. Wire manager can be cut to meet special requirements.

Connections

Wings along length of wire manager are captured by slot at edge of frame to hold wire manager in place.

Surface Materials

Vertical wire manager

- 6000 Black
- 6659 Light Grey

Actual Dimensions

Length 12³/₁₆" or 19⁵/₈"

Specifying Tips

General Tips

Standard Includes

- Case: paint
- Waterfall or rod pulls
- Dividers in box drawers
- Hanging file folder rail in file
- Lock in top drawer, key ran
- Polished Chrome
- Leveling glide
- Left- and right-hand filler ar

Review the features that are standard for each product before you begin to specify. You only need to include specifications for options, surface materials, and colors when you want a substitute for the standard.

To ensure that you do not overlook anything, approach the specifying process in a consistent order every time. Here are three common methods:

Specify products according to their order on the specifying pages.

Specify all workstations using a formula, such as starting at the entrance to a workstation and moving clockwise.

Specify each type of workstation in your installation and then determine how many of each type are needed.

Frames

Specify style numbers for all base frames and stack-on frames.

Specify enhanced standard frames, enhanced off-module frames, or a mix of both types of enhanced frames.

Specify enhanced stackers for use on enhanced frames.

Specify standard stackers for use on standard frames.

Specify vertical slot cover to hide vertical slots on platinum and sterling frames.

Specify ZSEAL20DC for slot covers needed on 20"H desk cavity openings.

Choose frames with desk-height cavities factory installed for positions where you want to install desk-height powerways.

Keep track of which frames you want to accommodate power, and you'll have an easy way to cross-check with your specifications for powerkits and base covers. 45"H, 55"H, and 65"H frames accommodate powerways in their bases or at desk-height. 10"H and 20"H frames accommodate cable routing but no other power distribution components.

Plan for 65"H or 86"H frames instead of a 45"H or 65"H frame with a 20"H frame stacked on top when the flexibility of variable heights is not needed. A single 65"H or 86"H frame will cost less than a 45"H or 65"H and a 20"H.

Add base covers and desk-height cavity covers to your list of specifications at the same time you specify frames so they are not overlooked.

Specify junctions by listing their style numbers and surface material.

No junctions are needed for frames that connect in a straight line at the same height or at different heights in off-module connections. But remember to specify end trim to finish the exposed portion of the taller frame.

Junctions are available to join frames in L, T, Y, X, V, and I configurations.

Specify a wall attachment bracket if you want a way to adjust space when installing a wall between two fixed points or when you suspect that the wall you want to connect frames to is not plumb. Remember that the 86"H wall attachment bracket has no top cap.

Specify enhanced frames for new customers and existing customers with new sites.

Specify end-of-frame or mid-frame off-module brackets when doing off-module frame connections.

Frameless Glass

Specify frame without top cap on frames utilizing frameless glass stacker.

Doors

Remember that door frames are not structural. Use a stack-on frame above a door frame to provide stability. For applications where no frame is going to be installed above the door, a special top cap linked to adjacent frames is required. Contact your Steelcase area office to discuss your application.

A wall attachment bracket is needed if attaching a pocket door directly to a wall.

Specify a wall attachment bracket to attach one side of a door frame to a building wall.

Use a junction on one side of a door frame to allow adjacent frames to be perpendicular to the door.

Determine if you need a left-hand or right-hand door by picturing yourself standing in the door frame with your back against the side of the frame with the hinges. If the door swings to your left, it's a left-hand door. If the door swings to your right, it's a right-hand door.

Wiring & Cabling

Specify a powerkit to correspond to the width of each frame with power. The frame-to-frame power connector cable that links adjacent powerkits together is included, so you don't need to order it.

Keep track of which surfaces will have desk-height cavity covers so that you can order smaller 13"H tiles for these frames.

Choose a base power-in to carry power from the floor of the building to the base of a frame. To extend power up to desk-height powerkits, you'll need to specify a base-to-desk-height power transfer cable. Remember that a power transfer cable must be routed through a junction.

Choose a top power-in to carry power from the ceiling down to either a powerkit at desk height or a powerkit in the frame base. Remember that a top power-in requires a power and cable pole of the appropriate size and that the power and cable pole must be positioned over a square L, T, or X junction to allow the top power-in cable to be routed.

Order covers. Plain base covers can be used in the bases of frames without powerkits or on the side of a frame where you don't want access to the powerkit's receptacle locations. Specify power base covers where you intend to have receptacles. Specify desk-height cavity covers for both sides of all the frames where you will have desk-height powerkits and want voice/data terminations and access to voice/data receptacles. Specify enhanced desk-height cavity covers for all frames manufactured after June 11, 2001.

Specify optional data openings below worksurface when extra voice/data plug-ins are needed.

Specify optional cable tray below the worksurface on a desk-height cavity cover when additional cord management is needed.

Specify power receptacles, voice/data receptacles, and filler plates to fill all the openings in the power base covers and desk-height cavity covers.
 ▶ See page 56 for the positions of receptacle openings.

Specify Internode components when routing cable or power frame a spine wall to above or below worksurface mounts.

For Answer Freestanding desk installations you can use:

- End supports
- Peninsula supports
- Corner support
- Columns and legs
- Modesty panels
- Pedestals
- Lateral files, storage cabinets, and bookcases

▶ Page 142

Tiles

Specify the style numbers and surface materials of all the tiles.

Draw an elevation view of both sides of each run of frames in the installation to help make sure you're including all the components in your specification and to help guide the installation. See example on next page.

Specify enhanced tiles for all frames manufactured after June 11, 2001.

Code each tile type and size with colors or a simple notation. Remember that 20"H segments with desk-height powerways will require 13"H tiles instead of 20"H tiles to allow space for the desk-height cavity covers. 13"H segments on 38"H frames with desk-height powerways require 6"H tiles instead of 13"H tiles to allow space for the desk-height cavity covers. If you don't want access to the desk-height powerway's receptacle locations, you can use 20"H tiles on that side of the frame.

Storage

Specify storage component style numbers, surface materials, and any specific keying information.

Specify off-module upper storage brackets for upper storage off-module applications.

Lighting

Specify style number and surface materials for all lights.

Example of Frame Run Elevations with Codes

N30	30" Non-Tackable (painted steel)	N48	48" Non-Tackable

Note: Base covers and desk-height cavity covers for use with the powerway system or retrofit powerkits must be ordered through the Specials Program.

Note: Glass tiles manufactured before 6/1/2010 are visually different than tiles produced after that date.

Note: Pocket doors shipped before October 18, 2004, require a standard tile to be used in the top segment of the pocket frame. Enhanced tiles can be used on the lower segments.

Note: Pocket doors are compatible with all standard tiles, except standard glass tiles.

Connectivity Slots for Montage

Legend

- = Compatible
- * = Tackable acoustical, high-performance acoustical, steel, laminate, and markerboard standard tiles can be modified to work on enhanced standard and enhanced monolithic frames. A transition kit is available through Service Parts.
- = Retrofit powerkit must be used in frames manufactured prior to March 21, 2000. The standard powerkit cannot be used.

Specifying Frames and Junctions

Frames

Enhanced Monolithic Frames	276
Horizontal Filler Strips and Vertical Slot Covers	278

Trims and Brackets

Extended Steel Top Caps	300
Wood Top Caps	301
Vertical End Trims	302
Wall-Attachment Bracket	303
Floor Anchor Bracket	303

Enhanced Monolithic Frames

Tip: Enhanced monolithic frames accommodate enhanced monolithic tiles or enhanced segmented tiles. A horizontal filler strip, ordered separately, must be used at each location where tile segmentation occurs.

Tip: Desk-height cavity can be covered with a 20"H tile. Tile cannot be slatwall, high-performance acoustical, or perforated non-tackable.

Tip: Montage frames do not accept overheads or shelves on any base frame below 65"H.

Tip: Open base frames cannot accept any powerkits or data termination.

Double Pocket Doors

Tip: Sixteen enhanced segmented tiles and four plain base covers must be ordered separately for pocket frames.

▶ Pages 316 and 326

Tip: Refer to the Montage Frames/Tiles Compatibility Matrix for more information.

▶ Page 274

Tip: Slatwall, high-performance acoustical, and monolithic tiles cannot be installed on pocket frames.

Tip: Only pocket door glass tiles will fit in pocket door frames.

Standard Includes		Required to Specify
▶ Need help? Wood Top Caps

Top Cap

Junction Top Cap

Tip: All wood top caps have a square edge profile.

Tip: Wood top cap for junction package includes an aluminum junction bracket for proper alignment.

Tip: Top caps are solid wood and offered in wood finishes that match both composite and open-pore natural veneer finishes.

Tip: Wood junction top cap is already included with wood junction frame kits.

Tip: The fifth digit of the wood junction top cap style number indicates the junction (L, T, or X) to be used in the application.

Standard Includes		Required to Specify

Enhanced Non-Tackable Tiles

Tip: Enhanced tiles can be used on any enhanced frame, including monolithic frames, and any standard frames manufactured after July 2001.

Exception: Enhanced slat-wall tiles can be used on any standard frame regardless of manufacture dates.

Refer to compatibility tips.

▶ Page 274

Tip: Data opening option only available on 20"H tiles.

Tip: Patterned options are not available on tiles with data termination option.

Tip: Perforated, indented, and dome tile pattern options are not available on fabric-covered tiles. Pattern options are not available on tiles with cutout and base fiber-in.

Tip: Perforated tiles ship with metal septum, which will block cable and power routing when used back-to-back.

Tip: Dome tiles cannot be used behind off-module bracket connections.

Decoding pattern numbers

P = Perforated

I = Indented

D = Dome

Number indicates the quantity of holes or indentations in a 2"W x 1 3/8"H area.

Cross-section through indented tile

Cross-section through dome tile

 Multiply U.S. Price by the Canadian price factor.
 ▶ See page 1 for details.

Frameless Glass Stacker

Tip: No special tools required for installation.

Tip: Matches height of 10"H stacker frame.

Tip: Centered along top of Montage frame.

Tip: Frameless glass stacker can be attached to 31"H, 38"H, 45"H, 55"H, and 65"H frames and stackers.

Tip: Specify frame without top cap on frames utilizing frameless glass stacker.

Tip: If frameless glass is installed on off-modular frames, field modification to the top cap is required to allow installation of top off-module frame attachment bracket.

Standard Includes	Required to Specify

Straight Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: Long work surface spans require additional support.
 ▶ See understanding section for details, page 131

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, US1830 becomes US1830SW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.
 ▶ Page 400
 ▶ See page 118 for work surface size availability matrix.

Tip: Scallop will be omitted if you select power access door.

Tip: Power access door option includes the power access door and a cutout for the door in the work surface.

Tip: Power access door option is only available on straight work surfaces with 1/2" cord drop.

Worksurfaces

Tip: When selecting with cord drop, subtract 1/2" from depth.

Tip: Scallop is available in the center location only. If cutout for power and data access door and tray or power access door is selected, scallop will default to omit scallop.

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► Page 400

► See page 118 for worksurface size availability matrix.

Tip: Cutout for power and data access door and tray is available in the center location only. Worksurface depth must be greater than 24".

Tip: Power access door option is only available on straight worksurfaces with 1/2" cord drop.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: If cutout for power and data access door and tray or power access door is selected, grommet will default to no grommet.

Parametric Straight Worksurfaces with Soft Edge Profile

High-Pressure Laminate or Wood Veneer

▶ Need help?
Product details,
page 111

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
 - Plastic antimicrobial soft edge profile centered on work-surface
 - Plastic 3 mm edge profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Plastic antimicrobial soft edge centered on worksurface
 - Wood square edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Depth: 18"D – 36"D
- Width: 18"W – 120"W

Required to Specify

- 1 Style number
 - 2 Worksurface size type (see below under Required Selections)
 - 3 Depth (see below under Required Selections)
 - 4 Width (see below under Required Sections)
 - 5 User edge profile (see below)
 - 6 High-Pressure Laminate or wood color number for worksurface
 - 7 Plastic color number for front edge on laminate worksurface, if selected
 - 8 Options, if selected (see below)
- ▶ See *Surface Materials*, page 540.

Tip: Long worksurface spans require additional support.
▶ See understanding section for details, page 131

 **For Canadian Pricing**
Multiply U.S. Price by the
Canadian price factor.
► See page 1 for details.

120° Straight Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Long worksurface spans require additional support. ▶ See understanding section for details, page 131

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, USE2448LH becomes USE2448LHSW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

▶ Page 400
▶ See page 118 for worksurface size availability matrix.

Tip: When facing the user edge, the side the diagonal is on is the handed side.

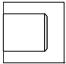

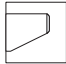

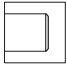

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.
▶ See page 1 for details.

Bullet Peninsula Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: Long work surface spans require additional support.
▶ See understanding section for details, page 131

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Bullet peninsula worksurfaces are recommended for use with other curved-front shapes such as corner, curved-front worksurfaces.
▶ Page 369

Tip: The same bullet peninsula worksurfaces can be used with either worksurfaces with 1/2" cord drop or with full depth worksurfaces.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, UPBC3060 becomes UPBC3060SW for wood with square edge profile.)

Standard Includes	Required to Specify

Specifying Worksurface Screens

Divisio Side Screen

448

Divisio Side Screen

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Pedestal Cushion Top for Field Installation on RPM2421C__ only

Cushion Top without Handle

22⅝"	15"	2¼"	RPXTC24F	\$483	(For use with RPM2421CF only)
23½"	15"	2¼"	RPXTC24P	\$483	(For use with RPM2421CP, RPM2421CL, and RPM2421CW only)

Cushion Top with Black Handle

22⅝"	15"	2¼"	RPXTCH24F	\$649	(For use with RPM2421CF only)
23½"	15"	2¼"	RPXTCH24P	\$649	(For use with RPM2421CP, RPM2421CL, and RPM2421CW only)

Tip: If used with a Universal mobile pedestal manufactured before 12/20/2011, you will need to order service part 1072962001SR for attachment hardware.

Basic Cushions Enhanced

For Universal Mobile Pedestals

Tip: Basic cushion enhanced is field-installed and supplies to attach are included.

Tip: Basic cushion enhanced is available on Universal mobile pedestals RPM1821CF, RPM1821CP, RPM1821CL, RPM1821CW, RPM2421CF, RPM2421CP, RPM2421CL, and RPM2421CW with a top only.

Tip: Basic cushion enhanced is constructed with a thin solid base.

Tip: For both cushion top and basic cushion enhanced: Fabric patterns with a linear design will always be applied from the front to back of the unit (depth of the unit).

Tip: For both cushion top and basic cushion enhanced: Pattern matching will not be done on COM.

Cushion Tops

For Universal One-High and 1.5-High Lateral Files

Tip: Seam pattern is determined by upholstery selected.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style of the lateral, (for example, RPDC1830__ becomes RPDC1830F for cushion top for flush steel front, or RPDC1830FF for cushion top for flush steel front with Fire Code Seating).

Standard Includes

- ▶ Need help? Product details, page 230
- Cushion top: fabric
- Attachment hardware

Required to Specify

- 1 Style number with appropriate front style suffix in the space provided
 - F** Flush steel front
 - P** Proud steel/wood front
- 2 Fabric color number
- 3 Options, if selected (see below)
 - ▶ See *Surface Materials*, page 540.

Universal Storage

Tip: Laminate and wood veneer tops are 3/16" taller than other tops and will add 3/16" to overall case height.

For wood group 2, wood group 3, laminate price group 2, and price group 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: If wood veneer top option is selected, wood veneer top color will default to match wood front.

Tip: Glass shelves are not available on 18"D Towers.

Tip: Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

► See Counterweight Requirements for Storage Products, pages 193–200.

Tip: Height dimension listed is for units with 1" top. Overall height will vary if another top is selected.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, RQS24244LA__ becomes RQS24244LAF for flush steel front).

► Specification Information, on next page

Universal Lateral Files

With Flush Steel, Proud Steel, Proud Laminate, or Proud Wood Fronts

► Need help?
Product details,
page 236

Standard Includes

- Lateral file: paint price group 1
- 1"H top on units with flush steel or proud steel fronts: paint price group 1 to match file
- 1³/₁₆"H top and drawer fronts on units with proud laminate fronts: laminate price group 1
- 1³/₁₆"H top and drawer fronts on units with proud wood fronts: wood group 1 veneer
- Integral pulls on units with flush steel front
- Pulls: metal
- Lift-up door with fixed shelf on 65¹/₂"H units with flush steel or proud steel front: paint price group 1 to match file
- Lift-up door with fixed shelf on 65¹/₂"H units with proud laminate fronts: laminate price group 1
- Lift-up door with fixed shelf on 65¹/₂"H units with proud wood fronts: wood group 1 veneer to match file
- Central lock, keyed random: 9201 Polished Chrome
- One label holder per drawer: clear plastic
- Drawer body: black only
- Drawer suspensions: black only
- One hanging folder bar per drawer on 18"D units
- Two rails per drawer on 24"D units
- One hanging folder bar and three dividers on roll-out shelf, if selected
- Four adjustable leveling glides
- Ganging hardware
- Counterweight package, if selected

Required to Specify

- 1 Style number with appropriate front style suffix in the space provided
 - F** Flush steel front
 - P** Proud steel front
 - L** Proud laminate front
 - W** Proud wood front
- 2 Paint color number for file
- 3 Laminate color number for drawer fronts and top, if proud laminate front selected
- 4 Wood color number for drawer fronts and top, if proud wood front selected
- 5 Pull (see below under required selections)
- 6 Metal color number for pulls, if proud steel or proud wood front selected
- 7 Options, if selected (see below)
 - See *Surface Materials*, page 540.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials Binders

- include:
- Surface Materials Reference Manual
 - A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Paint

► See *Surface Materials Reference Manual* for a listing of available paints for Victor2.

Tip: All products may not be available in all colors listed below.

► See page 548 for an overview of the paint colors available on each component.

- 24H2 Satin Black
- 24H3 Satin Stone
- 24H4 Satin Mocha

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line Laminate, on Universal worksurfaces, and Universal Storage tops specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

ⓔ = Established

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the woodgrain texture visible to the eye and distinguishable to the touch.

Applies to:

- End trim
 - Top caps
 - Tiles
 - Wood junctions
 - Worksurfaces
 - Infills for FrameOne legs
- See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Wood Group 1**Open-Pore Planked Veneer**

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

- 3832 QC/OP Figured Anegre

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Wood Group 1

Flat-Cut Open-Pore

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite

Quarter-Cut Open-Pore

- 3GGX QC/OP Zebrano Composite
- 3HGX QC/OP Oak Composite
- 3HVX QC/OP Walnut Composite
- 3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Specification Guidelines for Directional Fabrics

Steelcase is not responsible for charges associated with replacement or re-upholstery of panel surfaces due to incorrect specifications.

Warp Horizontal

The standard application direction of fabric on Montage tiles 60"H or less is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

Warp Vertical

Warp vertical is applied to all 81"H tiles. It also is an option on shorter tiles to accommodate fabrics designed for vertical application—most commonly COMs—or for shorter tiles being used with 81"H tiles.

Warp Horizontal

Fabric on 81"H tiles cannot be applied warp horizontal because the height of the product is greater than the width of the fabric.

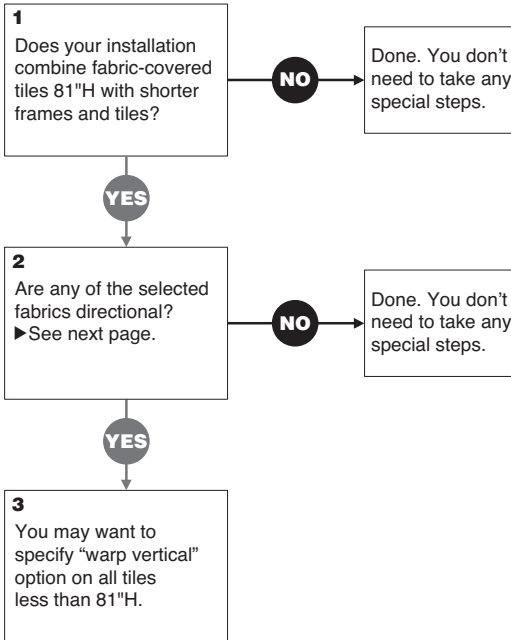

The combination of tall tiles (81"H with warp vertical) with short tiles (60"H or less with warp horizontal) will result in the fabric patterns running in opposite directions.

Warp direction on short panels can be specified vertical to match tall panels, or select a non-directional fabric.

Fabric Direction Decision Process

Tip: Not every installation requires that all panels have the same fabric direction. You may not have to specify matching fabric directions on tall and short panels,

- if they are not going to be used together, or
- if you like the appearance of contrasting fabric directions.

Tip: You may want to specify fabric direction if you are trying to match existing panels.

Fabric-covered tiles ordered before October 16, 1995,

were fabricated with warp horizontal or warp vertical depending on the fabric. Now all tiles will be warp horizontal.

Tip: If you're ordering tiles to match those in an existing installation, you may want to specify the fabric with warp vertical.

▶ See table at right.

Steelcase is not responsible for charges associated with replacement or re-upholstery of tile surfaces due to incorrect specifications.

Application Topics

Surface materials consultants are available to answer your questions and to provide clarification about COM availability, testing, yardage requirements, etc. Call 616.246.9822.

Price

No additional cost to specify warp direction.

Wood Veneer Grain Directions

Natural wood veneers, unlike composite veneers, do not have mitered corner surfaces.

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

How to Care for Laminate and Wood Surfaces

Laminate

Cleaning

Wiping with a damp cloth will remove general soiling and water-borne stains. If needed, use a hard-surface, all-purpose cleaner such as Formula 409, Fantastik, Top Job, Mr. Clean, etc. Some oil-borne stains may require the use of a dry-cleaning fluid. To fill scratches in woodgrain laminate tops, use an oak, walnut, or mahogany putty stick (available at paint supply and hardware stores).

Wood

Protection

Use desk pads and coasters to help protect the finish against dents, scratches, moisture and hot and cold liquids. Do not use desk pads that have plastic backing.

Use felt or leather pads on the bottoms of office equipment and accessories.

Lift objects when you move them, instead of pulling or pushing them across the surface, to avoid scratching the surface.

Periodically move desk accessories and other objects kept on the work-surface to ensure even aging.

Avoid leaving vinyl binders on worksurface for long periods.

If you use a protective glass top, insert felt pads between the glass and the worksurface, to create an air space and allow the wood to breathe.

Keep your furniture away from direct sunlight.

Avoid extreme temperatures and humidity. Maintain temperatures between 60 and 80 degrees Fahrenheit and humidity levels between 30 and 50 percent.

Cleaning

Keep a supply of soft, clean, absorbent cloths handy for wiping up spills and regular dusting.

Dusting

Clean with a slightly damp, soft cloth, using another soft cloth to dry. Always wipe the surface in the direction of the woodgrain.

Cleaning

Use a quality cleaner or flax soap formulated especially for use on wood surfaces. Do not use oils or ammonia. Dilute the cleaner as directed by the manufacturer. Dampen but do not saturate a soft cloth with the diluted cleaning solution. Wipe the surface in the direction of the woodgrain to remove dirt and fingerprints. Wipe the surface clean with a soft, dry cloth.

Waxing

Quality spray wax may be applied sparingly twice a year. Excessive waxing may result in a wax build-up which feels sticky and attracts an unusual amount of dirt. For information about how to remove this wax, contact your facilities department or Steelcase dealer.

Hardware

Clean metal finishes with a non-abrasive cleaner. Apply the cleaner sparingly, making sure that it does not come into contact with the wood. Wipe the hardware dry with a clean, soft cloth.

Help with Repair and Maintenance

Wood is a "forgiving" material which usually can be repaired. If your worksurface is damaged, call your facilities department or Steelcase dealer.

Many Steelcase dealers offer maintenance contracts for your convenience. Contact your dealer for more information.

Lock and Keying	560
Style Number Index	562

Lock and Keying Options

Universal Steel Storage

All locking products

are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Exception: Pkt doors are available keyed random only. Exceptions: Individual locking drawers are available only with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks

are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

Key

Required to Specify

Master key random	+ \$36	Specify with master key random.
--------------------------	--------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Example of a typical lock cylinder specification is shown below:
