

Away from the Desk

A dynamic & extensive upholstery system

Away from the Desk (AftD) is a soft upholstery system designed to answer the rapidly changing needs of the workplace, giving users the choice to work in alternative settings while having accessible power and data.

AftD offers multiple configurations with comfort on par with task chairs. Available in modular seating, detached seating, table options & media dens. Its high-back options minimize noise and visual distractions for individuals or groups, while various other seating options offer lounge or collaborative environments.

Designed for the future, AftD transforms office environments and working practices to meet the needs of its users. And, just as the Kleenex brand is often used as a generic word for tissue (though we wouldn't dare to go as far as comparing their stories!), AftD has become an industry archetype that describes working in other settings versus assigned personal workspaces.

Upholstery Selection

Seating Surfaces

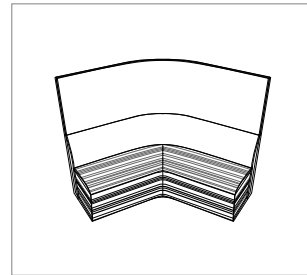

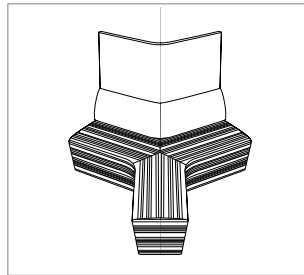

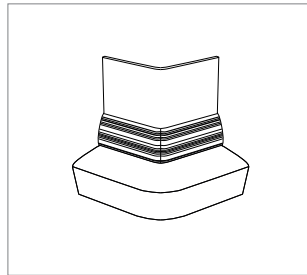

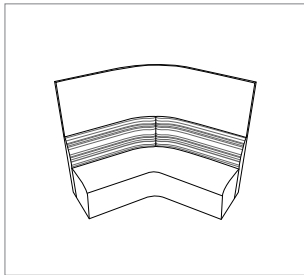

All seating units can be upholstered in different fabrics on the surfaces shown below.

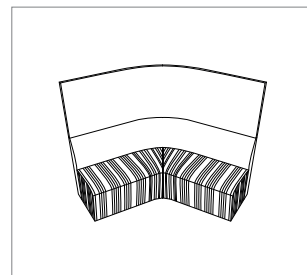

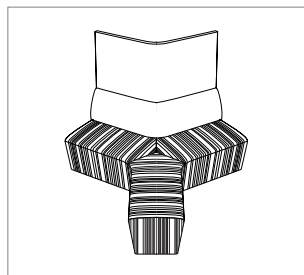

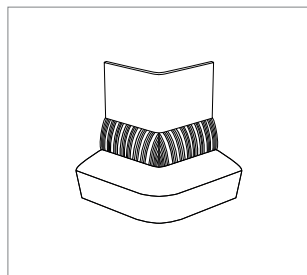

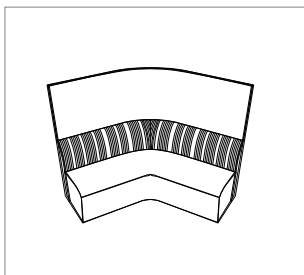

Patterned Surfaces

Patterned fabrics are governed by the way the fabric comes off the roll.

If the direction is **vertical on the fabric roll**, then when applied to the **product will appear horizontal**.

If the direction is **horizontal on the fabric roll**, then when applied to the **product will appear vertical**.
