# Series 7 Walkstation

## The Series 7

**Walkstation** consists of a fully integrated electric height adjustable worksurface with an exclusively engineered, low speed, commercial grade treadmill. ▶ Specifying, page 170

**Worksurface indent** allows user to be closer to flat panel while maintaining body alignment to the treadmill base.

**Quiet, high torque motor** is included.

**Commercial grade treadmill** has maximum speed of 2 mph in .1 mph increments and no incline adjustability.

**The Sit-to-Walkstation** provides an area where the worksurface can be lowered for seated use. The user then has the flexibility to adjust from a seated, to a standing, to a walking position with room for a chair next to the treadmill.

**Base** is painted steel.

**2 1/2" diameter glides** have 1" of height adjustment for surface leveling on uneven floors.

**Back and side edges** are laminate to match worksurface.

**Urethane high profile soft edge** provides grip for balance and serves as a built-in wrist rest.

**Magnetic safety clip** is standard.

**Digital key pad console** allows user to start, stop, adjust speed, and adjust worksurface height.

**Patented Soft System® surface with Neoprene shock absorber in front third of the deck** is standard.

**Height-adjustable worksurface** is laminate and standard with a urethane high profile soft edge and built in wrist rest. Urethane edge is located on the front edge only.

**Digital display console** allows user to monitor speed, calories burned, time, and distance.

**Allows room for a chair** next to the treadmill.

**The treadmill** sits firmly in slots along the base of the table. In the Sit-to-Walkstation the treadmill mounts under the right- or left-side of the table.
