

## WASHED WALNUT SIGN-OFF

3082 Flat Cut Open Pore

3084 Flat Cut Full Fill

Materials are displayed for reference and may vary by screen. Please refer to a physical sample before specification.

Washed Walnut celebrates the natural beauty of wood. This finish features a clear finish over walnut that has gone through a melanin washing process. This method allows us to use wood pieces that are too dark for our traditional stains and provides a one-of-a-kind aesthetic.

Wood is a natural material, and variations will occur in color, grain pattern, and character marks. Because of these natural irregularities, each veneer will have its own variation in color, grain structure, and texture.

Each tree species has unique qualities, and the way in which the wood is sliced will produce different grain characteristics. Every grain pattern is a one-of-a-kind, unique and natural design.

Wood will age and lighten or darken as it goes through a natural maturation process. Color changes occur because wood is an organic material. The rate and degree of color change depends on the species of the tree, its growing conditions, and the conditions of the environment it is exposed to after being made into furniture. Direct and constant sunlight (natural or synthetic) will age any wood product.
